SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF MARCH 1902.

WEATHER during March was of the usual hot season character, with rather marked high temperature conditions at the beginning and end of the month, and a period of disturbance in the middle. During that period of disturbance two depressions approached the Province from the west, and, though they did not, as frequently happens, move in an easterly direction into Burma, they caused moderate general rainfall, which was in excess of the normal in the northern districts and in South-West Bengal. Each depression continued to follow an easterly course until it was over the central districts of Bengal, when a rise of pressure in Assam as well as to the north-west of the low pressure area caused a displacement southward over the Bay. Simultaneously with this change of direction rainfall began in Assam or North Bengal, and from there spread southward and westward over the Province.

In front of these depressions there was the usual wave of high temperature, and the early occurrence of rainfall in the north-east is well shown by the fall of temperature in that region preceding the fall in other parts of the Province.

The first disturbance caused general rainfall about the 13th with scattered showers on the preceding and subsequent days. On the second occasion the rainfall began about the 20th and continued for several days, but it was very scattered in the south-western districts until the 22nd and 23rd, when it was fairly general in both Orissa and Chota Nagpur.

Probably owing to the variable winds in North Bengal accompanying the change of direction of advance of the depression, rainfall was considerably more heavy in that division than in other parts. The total fall in North Bengal for the month was 3·1 inches, nearly 2 inches in excess of the normal. In South-West Bengal excess was nearly 1 inch, and in Bihar rather more than half an inch. In other divisions there was defect greatest in East Bengal, where, with a total fall of 2 inches, there was defect of a third of an inch.

As temperature was very high in the early part of the month and again at the end, and the cool weather which followed the disturbances above referred to was of only brief duration, mean temperature for the month was above the normal over the whole Province. In Chota Nagpur there was excess of 3°·8, in Bihar 2°·9, in Bengal Proper nearly 2°, and in Orissa and Assam 1°. The highest maximum readings recorded were 108°·5 in Orissa, 107°·9 in South-West Bengal, 105°·1 in Chota Nagpur, and 104°·4 in Bihar. Average excess in maximum temperature varied from 2° in Lower Bengal and Orissa to 5° in the west of Bihar. In minimum temperature it was more uniform and generally between 2° and 3°.

At the beginning of the month pressure after a moderate general fall was practically normal over the whole area. Winds were southerly in the west of the Bay, variable in all parts of South-West Bengal, except the south-western districts, and as usual at that time of the year northerly in Burma. Temperature was 4° to 5° above the normal in all districts, except Orissa. On the two subsequent days the fall of pressure continued inland, but not so much so over the Bay, so that the gradient became steeper, the southerly winds penetrated inland as far as North Bengal, and temperature steadily increased. On the 4th, when pressure had begun to recover, mean excess in temperature varied from 4° in the southern districts to 7° at some places in the west of Bihar.

A brisk rise of pressure on the 4th again gave a normal distribution, but it was immediately followed by a brisk fall which continued till the 8th, when a considerable increase in wind force at the head of the Bay caused a further increase of temperature. On that and the following day mean excess in temperature varied from 5° in the south of the Province to 11° in Chota Nagpur.

On the 9th a well-marked depression was over the Province with regular cyclonic winds. But for the strong winds at the head of the Bay and the high temperature inland weather was not noticeably disturbed, and it was not until three days later that a rise of pressure in North-East India appeared to cause a general change. At that time the depression of the 9th, though not so well marked, was still over Bengal, and the increase of pressure which began in the north-east displaced it westward, where it coalesced with another shallow depression advancing eastward. The result was an area of low pressure over Chota Nagpur and a steep gradient to the east over Bengal. There was still very little rainfall in Bengal, but on the following day, that is the 13th, when the rise of pressure continued over the north of the Province and the depression in its eastward motion recurved southward, general rainfall occurred in Bengal Proper and the east of Bihar. There was no rain in the western districts over which the central area lay, and the fall of temperature was more marked in the east than in the west of the Province On the 14th pressure was lowest over the Bay, the rainfall had extended to Orissa and Chota Nagpur, and temperature was low over the whole Province.

The changes as noticed above show that the rainfall began in the north-east and extended south-westward over the Province, and that probably the most important cause was the rise of pressure which, first shown in Assam and North Bengal, met the advancing depression and caused the southerly displacement of the central area first towards Orissa and thereafter over the north of the Bay.

For some days after the 14th fine settled weather prevailed inland and over the Bay with northerly winds and temperature not above the normal. On the 18th there were signs of the development or advance of the second depression of the month. Pressure was steadily falling, the area of lowest pressure was in Chota Nagpur, and winds were easterly, showing an indraught towards that area. On the following day the low pressure area was better defined over Chota Nagpur and the gradient was steep from west to east, but an irregular rise of pressure had begun over Assam, with rain and falling temperature in North Bengal. The subsequent history of the disturbance is very similar to that of the preceding one. The area of lowest pressure recurved southwards and became diffused over the north of the Bay. The rainfall which began on the 18th or 19th slowly extended south-westward, and ended in Orissa and Chota Nagpur on the 23rd. The days of most general rainfall were the 21st and 22nd.

On the 23rd, when the disturbance was practically over and pressure was above the normal in Bengal, temperature was low by amounts varying from 2° in the west to 12° in East Bengal.

Temperature soon recovered, and during the last week of the month ordinary hot season conditions prevailed. Pressure underwent the usual oscillations, and temperature was latterly in moderate excess.

Pressure, owing to the disturbances during the second and third weeks, was for the greater part of the month below the normal. Means for the month are consequently low, except in North Bengal and Assam, where pressure on an average was practically normal. The greatest defect is in the western districts, where it varies from ·02 inch in Orissa and Chota Nagpur to ·04 inch in the west of Bihar.

Temperature has as usual in March undergone considerable variations in consequence of the passage of disturbances which are generally preceded by a wave of high temperature, and, when rainfall occurs, are followed by a period of low temperature. The extreme variations were 12° above the normal in the western districts just before the first disturbance and 12° below in East Bengal just after the second.

As temperature was more frequently above than below the normal, means both maximum and minimum are considerably in excess. The difference from the normal in the former varies from 2° in the south to 4° in the north-west. In the latter it was more uniform and generally between 2° and 3°.

Rainfall was general and moderately heavy on two occasions—the first about the 15th, the second about the 21st and 22nd. On the latter occasion the falls were both more heavy and general than on the former and the period of disturbance was of longer duration. In both cases the rainfall began in the north-east and extended south-westward, ending in Orissa and Chota Nagpur.

The average fall for the month in the various divisions is given below and varied from half an inch in Chota Nagpur to more than 3 inches in North Bengal. The fall was in excess in Bihar and North and South-West Bengal, and in defect, but by comparatively small amounts, in the other divisions:—

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the month of March 1902:—

Meteorological Divisions.	Temperature.						Rainfall.							
	Highest observed during month.	Lowest observed during month.	Averages for month.			Average mean of month above or below normal mean of month	Of month.			Rainy days			Since 16th of October 1901.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in month.	Normal average number in month.	Variation.	Average.	Normal average.

	%
The mean relative humidity	76
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	71
	Inches.
The total fall of rain from 27th April to 3rd May 1902	1·53
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·77
The total fall from 1st January to 3rd May 1902	9·15
The average fall of the corresponding period for 24 years, Surveyor-General's Office	5·23

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; p, passing temporary showers; ₼, strong wind; t, thunder; ⱬ, lightning;

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 5th May 1902.

G. W. KÜCHLER,
for Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.

WEATHER AND CROP REPORT.

For the week ending the 12th May 1902.

Burdwan.—Rainfall at Sadar 1·32, Kalna 1·63, Katwa 1·22, Raniganj 0·55. Weather seasonable. Ploughing and manuring of lands going on. Condition of cattle good. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Birbhum.—Rainfall at Sadar ·46, Rampur Hât 1·61. Weather fair. Transplantation of sugarcane, sowing of *til* and preparing of fields continue. Common rice sells at Sadar at 12¾ seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Sadar 1·98. Weather cooler on account of occasional rains. Planting of sugarcane going on. Fodder and water sufficient. Common rice sells at 15 seers at Sadar and at 14 seers at Vishnupur.

Midnapore.—Rainfall at Sadar 2·75, Contai 2·29, Tamluk 1·31, Ghatal 2·82. Weather cloudy. Ploughing and sowing going on. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Contai	13	6	
Tamluk	12	0	
Ghatal	13	0	

Hooghly.—Rainfall at Sadar 2·11, Serampore 1·26, Arambagh 1·64. Ploughing for *aus* and *aman* continues. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Serampore	10	12	
Arambagh	12	6	

Howrah.—Rainfall at Sadar 1·51, Ulubaria 1·39. Fall general. Weather generally cloudy. *Boro* paddy and sowings of winter paddy much benefited by the recent rains, which have also much facilitated the preparation of the soil for the cultivation of jute and transplantation of winter paddy. The rains have slightly damaged the vegetables. Supply of fodder and water sufficient. No cattle-disease. Common rice sells at Sadar at 11 seers 7 chittaks and at Ulubaria at 11 seers per rupee.

24-Parganas.—Rainfall at Sadar 1·88, Barasat 1·13, Basirhat 1·33, Diamond Harbour 1·17. Weather seasonable. Prospect good. *Aus* thriving in Sadar and Basirhat. Sowing going on in the other subdivisions. Jute sowing finished in Basirhat. No cattle-disease. Fodder and water sufficient everywhere. Common rice sells at 11¾ seers per rupee.

Nadia.—Rainfall at Sadar 2·10, Ranaghat 1·34, Meherpur 1·55, Chuadanga 2·38, Kushtia 0·68. Sowing of *aus* paddy and jute still progressing Standing crops doing well, Fodder and water sufficient everywhere. No cattle-disease reported. Price of common rice is as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Ranaghat	11	0	
Chuadanga	11	0	
Kushtia	11	0	
Meherpur	10	8	

Murshidabad.—Rainfall at Sadar 0·13, Kandi 0·13. Lalbagh 0·09, Jangipur 0·43. Weather seasonable. Lands are being prepared for paddy and *bhadoi*, sown in parts. Planting of sugarcane going on partly and prospects favourable. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Kandi	13	8	
Lalbagh	12	0	
Jangipur	13	0	

Jessore.—Rainfall at Sadar 0·92, Jhenida 1·86, Magura 2·49, Narail 1·84, Bangaon 0·85. Weather cloudy, but hot. The rains rather early, and we have more or less rain almost every day. This has retarded cultivation. Fodder and water sufficient. No cattle-disease. Common rice sells at 12 seers per rupee.

Khulna.—Rainfall at Sadar 2·22, Bagerhat 1·87, Satkhira 2·07. Fall sufficient. Weather cloudy. Prospects of standing crops fair. Harvesting of *boro* commenced. Cultivation of land for *aus* and *aman* continues. Fodder and water sufficient. Cattle-disease reported from Paikgachha and Asasuni thanas. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Bagerhat	13	0	
Satkhira	11	8	

Rajshahi.—Rainfall at Sadar ·98, Nator ·43, Naugaon ·82. Weather stormy and cool. Prospects of crops good. Sowing of *bhadoi* going on. Ploughing for *ropa* paddy commenced. Condition of cattle good. Fodder and water plentiful. Common rice sells at 12½ seers per rupee.

Dinajpur.—Rainfall at Sadar 1·63. Fall in the district general, varying from ·29 to 1·73. Weather seasonable. Sowing of *bhadoi* and jute nearly finished. No cattle-disease. Fodder and drinking-water plentiful. Rice sells at 13 seers per rupee.

Jalpaiguri.—Rainfall at Sadar ·78, Alipur Duars 4·74. Weather seasonable. Sowing of *bhadoi* paddy finished. Price of common rice is 12 seers per rupee. Fodder and water sufficient.

Darjeeling.—Rainfall at Sadar 1·38, Siliguri 1·00. Weather seasonable. *Hills*—Maize and potatoes growing. *Terai*—*Bhadoi* and jute sowing proceeding. Sugarcane as also jute and *bhadoi* in places growing up. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	12	0	

Maize sells at Darjeeling at 18 seers per rupee.

Rangpur.—Rainfall at Sadar 1·09. Prospects of standing crops good. Hailstorms in some parts of the district have caused a little damage to tobacco and jute. Common rice sells at 11½ seers per rupee. Fodder and water sufficient.

Bogra.—Rainfall at Sadar 1·50. Fall general. Weather cloudy. Prospects good. Sowing of *aus* and jute progressing. Fodder and water sufficient. Common rice sells at 13½ seers per rupee.

Pabna.—Rainfall at Sadar 1·17, Serajganj 0·25. Fall almost general, but insufficient. Weather cloudy with occasional storms. High winds almost every evening. Prospects of standing crops good. Sowing of jute and paddy continues. Fodder and water sufficient. Common rice sells at 10½ seers per rupee.

Dacca.—Rainfall at Sadar ·38, Manikganj ·45, Munshiganj 1·31, Narayanganj ·59. Weather seasonable. Prospects of crops not good. Fodder available. No cattle-disease. Common rice sells at 12 seers per rupee.

Mymensingh.—Rainfall at Sadar 2·30. Fall general. Weather seasonable. Sowing of jute practically complete. The unusually heavy rainfall has done some damage to the jute in low lands. Fodder and water sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Kishorganj	11	5	
Jamalpur	12	5	
Netrokona	12	9	
Tangail	11	8	

Faridpur.—Rainfall at Sadar 1·10, Goalundo 1·26, Madaripur 0·97. Weather hot with occasional clouds. Jute and paddy sowings are going on. Prospects of crops fair. Common rice sells at 12 seers per rupee.

Backergunge.—Rainfall at Sadar 2·80; fall general, but 1½ inches less in the south. Weather cloudy. Sowing and transplanting of *aus* going on. Prospects fair. Cattle-disease in two thanas. Fodder and water sufficent. Common rice sells at 12 seers per rupee.

Tippera.—Rainfall at Sadar 1·82, Brahmanbaria ·39, Chandpur ·91. Weather seasonable. Prospects not yet good. Sowing of jute and paddy going on. Fodder and water sufficient everywhere. No cattle-disease. Common rice sells at 11 seers per rupee.

Noakhali.—Rainfall at Sadar 3·77, Feni 1·36. Weather cloudy. Prospects not favourable owing to excessive rain. *Aus* and *aman* sowings going on. Fodder and water sufficient. Cattle-disease in two thanas. Common rice sells at Sadar at 11 seers and at Feni at 13 seers per rupee.

Chittagong.—Rainfall at Sadar 4·37, Cox's Bazar 3·84. Fields are under cultivation for *aus dhan*. Water and fodder sufficient. Common rice selling at 12 seers per rupee.

Patna.—Rainfall at Barh 0·46. Weather hot. Threshing of *rabi* nearly completed. Sugarcane is thriving well. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Patna	11	12	per rupee.
Barh	11	8	
Dinapur	11	12	

Gaya.—Rainfall at Sadar 0·12, Aurangabad 0·31. Weather hot and cloudy. Sugarcane continues to do well. Fodder and water sufficient. Cattle-disease reported from Pakribarwan and Muffassal Gaya. Average price of common rice is 11 seers 14 chittaks per rupee.

Shahabad.—Rainfall nil. Weather cloudy and hot. Sugarcane promising. Fodder and water abundant. Cattle-disease reported from Bikramganj, Nokha, and Nasriganj outposts. Rice sells at Sadar at 11½ seers a rupee.

Saran.—Rainfall at Sadar 0·30, Siwan 2·11, Gopalganj 2·23. Weather—high east wind. Rain has benefited *china* and sugarcane. *Marua* and paddy being sown in *diara* lands. Field being prepared for *bhadoi*. Fodder and water sufficient. Common rice sells at Sadar at 12 seers per rupee.

Champaran.—Rainfall at Sadar nil, Bettiah nil. Weather hot. *Bhadoi* being sown. Cattle-disease reported. Fodder and water sufficient. Common rice sells at 12½ seers and maize at 23½ seers per rupee.

Muzaffarpur.—Rainfall at Sadar ·22. Weather occasionally cloudy. Preparation of lands for *dhan* and *bhadoi* crops continues. Prospects fair. Fodder and water sufficient. A few cases of cattle-disease in Sitamarhi subdivision. Prices are—Common rice 12 and maize 20 seers a rupee.

Darbhanga.—Rainfall at Sadar 1·95. Sowing of paddy in low land continues. Fields are being prepared for *bhadoi*. Fodder and water sufficient. Cattle-disease is reported from Khajauli, Phulparas, Darbhanga, and Bahera thanas. Common rice sells at 12 seers per rupee.

Monghyr.—Rainfall at Sadar 0·28, Begusarai nil, Jamui 0·25. Weather seasonable. *Rabi* threshing still continues. Land being ploughed for *bhadoi* and paddy crops. Indigo doing well. Sugarcane being watered. No cattle-disease. Fodder and water sufficient. Common rice sells at Sadar at 11½ and at subdivisions at 11 seers per rupee.

Bhagalpur.—Rainfall at Sadar 1·25, Banka ·10, Madhipura ·90, Supaul ·34. Weather cloudy. Standing crops doing well. Preparation being made for the sowing of *bhadoi* and *madua*. Stray cases of cattle-disease reported. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	ch.	
Sadar	12	10	per rupee.
Banka	13	2	
Madhipura	13	8	
Supaul	13	0	

Purnea.—Rainfall at Sadar 0·16, Kishanganj 0·95, Araria 0·60. Fall general, though scanty towards the south. Weather cloudy and cool all over the district. Prospects improving. Jute and *bhadoi* sowings are brisk, and about 80 per cent. now. Plants growing well. Fodder and water sufficient everywhere. Cattle-disease reported from Sakti outpost. Common rice sells as follows :—

	Srs.	ch.	
Sadar	11	0	per rupee.
Kishanganj	10	8	
Araria	12	0	

Malda.—Rainfall at Sadar 0·34, Chanchal 0·73. Shibaganj ·40, Gajol 1·14. Fall general. Weather cloudy with east wind. *Bhadoi* and jute sowings, estimated at 75 per cent., doing well. *Boro* is being cut in some places. Sporadic cases of cattle-pox reported from thana Old Malda. Fodder available. Water scarce in two thanas. Common rice sells at 12 seers per rupee.

Sonthal Parganas.—Rainfall at Sadar 0·20, Deoghur 0·08, Godda 0·06, Jamtara 0·12, Pakour 0·05, Rajmahal 0·82. Weather cool. Standing crops good. Grazing improving. Cattle-disease reported in Pakour. Price of common rice is at Sadar 14 seers and at Rajmahal 11¾ seers per rupee. No considerable variation at other subdivisions.

Cuttack.—Rainfall at Sadar 1·30. Fall general, but scanty in Banki. Weather cloudy and stormy. Ploughing going on. Fodder and water sufficient. Slight cattle-disease in north-east. Common rice sells at 14 seers 7 chitaks per rupee at Sadar with a slight fall in Banki.

Balasore.—Rainfall at Sadar 1·98. Fall general except in the centre. Weather cloudy. Ploughing almost finished. Sugarcane doing well. Cattle-disease sporadic. Common rice sells at 14½ and 16 seers per rupee at Sadar and Bhadrak respectively. Fodder and water sufficient.

Angul.—Rainfall at Sadar 0·20. Weather hot every evening. There is a storm in Angul with occasionally a few drops of rain. Ploughing continues. Sugarcane doing well. Common rice sells at 12 and 15 seers per rupee at Sadar and interior respectively.

Puri.—Rainfall at Sadar cannot be given, as the instrument is broken; Khurda 0·65. Fall general throughout the district. Ploughing of paddy land being vigorously pushed on. Harvesting of *dalua* paddy and planting of sugarcane cuttings continue. Fodder and water sufficient everywhere. Common rice sells at 15 seers per rupee.

Hazaribagh.—Rainfall at Sadar 0·62, Giridih 0·55. Weather hot. Cattle-disease reported from one thana. Water scarce in places. Lands being ploughed. Common rice sells at 11 seers per rupee.

Ranchi.—Rainfall 1·03. Weather cloudy and stormy with almost daily showers in the afternoon. Hailstorms on the 10th. Ploughing and sowing in progress. Cattle-disease continues. Fodder dear at Sadar. Water sufficient. Common rice sells at 13¼ seers per rupee.

Palamau.—No rain. Weather hot, cloudy at times. Sugarcane doing well. Cattle-disease continues. Fodder and water insufficient in places. Rice selling at Sadar at 10 seers per rupee.

Manbhum.—Rainfall at Sadar 2·44, Gobindpur ·22. Weather seasonable. Sugarcane doing well. Paddy being sown in places. Fodder and water sufficient. Cattle-disease reported from thana Para. Common rice sells at Sadar at 13 seers 14 chitaks and at Gobindpur at 12 seers per rupee. Supply sufficient.

Singhbhum.—Ploughing continues. Average price of rice is 14 seers in the district; at Chaibassa 13 seers. Rearing of lac not yet commenced.

General Summary.—Rain fell during the week in every district, excepting Shahabad, Champaran, Palamau, and Singhbhum, and was accompanied by hail in Rangpur and Ranchi, but no serious damage was done. Ploughing and manuring of fields, planting of sugarcane, and sowing of *aus*, *aman*, and jute are still in progress. Harvesting of summer rice has commenced. Prospects on the whole fair. Cattle-disease reported from 18 districts, of which 10 are in Bihar and 4 in Chota Nagpur. Fodder dear at Ranchi and insufficient in Palamau; elsewhere it is sufficient. No want of water except in Palamau, and in two thanas of Malda and at some places in Hazaribagh. The price of common rice has risen in 12 districts, fallen in 10, and is stationary in the rest (24).

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

The centre of disturbance was evidently transferred eastward, but the pressure distribution remained as before with the lowest readings in Chota Nagpur. Pressure changes, the usual indication of disturbed weather, remained small, the winds were steadily from the east, and the elements which varied to any extent from the normal were rainfall and temperature in the eastern districts.

Between the 14th and 24th the 20th was the only day on which rainfall was not general in East Bengal. It therefore appears that there were two periods of disturbance in close succession. During the latter of these periods, commencing on the 21st there were faint indications of the eastward motion of a low pressure area. The general fall of pressure on the 21st and 22nd was followed by a brisk to rapid rise on the 23rd and 24th. The rise of pressure with which the period of disturbance closed, appeared to pass from north-east to south-west, but throughout these ten days of general rainfall in East Bengal changes of pressure moved with greater rapidity than usual, and were all but simultaneous in their effect.

Between the 25th and 27th a general fall of pressure occurred, and probably the area of lowest pressure was transferred westward again, as rainfall practically ceased in East Bengal, though considerable oscillations in pressure continued till the end of the month. Showers still fell in places, but during the last week the large defect in temperature, which had been a marked feature in the east during the previous ten days, almost disappeared. At the end of the month the greatest defect was in Orissa

Pressure was continuously low in the western districts, and during the latter half of the month there was a steep gradient over the Province and the north of the Bay, with strong southerly or south-easterly winds. The daily oscillations were larger and more frequent than usual, especially while weather was so unsettled during the latter half of the month. The mean difference from the normal varied from excess of ·04 inch at Narayanganj and Mymensingh to defect of about ·02 inch at Hazaribagh.

Temperature was generally below the normal in the western districts during the first half of the month and in the eastern districts during the latter half, defect being large almost continuously in one part of the Province or the other throughout the month. The average defect in maximum temperature for the month varies from 2° in the outlying districts to 6° in the central parts. The difference from the normal minimum temperature for the month is smaller, and ranges from excess of 1° in the west of Bihar to defect of 3° in East Bengal. For the whole of Bengal Proper the mean defect for the month was 3° and in the western districts about 1°.

Rainfall, as already stated, was more or less frequent throughout the month. The showers were most general in the western and central districts during the first two weeks. Between the 14th and 24th heavy general rainfall occurred in East Bengal and Assam, and from the 24th to the end of the month scattered showers again fell, chiefly in the west. The average fall in East Bengal was 13·2 inches, nearly 9 inches in excess of the normal, and in North and South-west Bengal about 5 inches. Over the whole of Lower Bengal the fall for the month was about three times what usually falls in April, and in North Bengal and Orissa about double the normal. In Bihar there was excess of about half an inch and in Chota Nagpur the fall was only slightly in excess.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the month of April 1902:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.						RAINFALL.							
	Highest observed during month.	Lowest observed during month.	Averages for month.			Average mean of month above or below normal mean of month.	Of month.			Rainy days.			Since 1st of April 1902.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of April 1902.

	Inches.	Date.	Hour
The mean pressure of the month ...	29·763		
The average pressure of April from 24 years' registers ..	29·752		
The highest pressure in the month ...	29·949	5th	10
The lowest pressure in the month ...	29·551	22nd	16
The range of pressure ...	0·398		
	Hours		
The total number of hours of bright sunshine during the month	210·9		
The maximum possible number of hours of sunshine ..	378·9		
	(F)		
The mean temperature of the month ...	83·2		
The average temperature of April from 24 years' registers ..	84·7		
The highest temperature in the month ...	97·3	7th	
The lowest temperature in the month ...	67·4	22nd	
The range of temperature during the month ..	29·9		
The mean daily range of temperature ...	17·5		
The greatest range of temperature in one day .	25·0	22nd	
	Per cent.		
The mean humidity of the month ...	78		
The average humidity of April from 24 years' registers .	69		
	Inches.		
The mean vapour tension of the month .	0·881		
The average vapour tension of April from 9 years' registers ...	0·851		
The mean cloud proportion of the month ...	4·88		
The average cloud proportion of April from 25 years' registers ...	2·95		
	Inches.		
The total rainfall of the month ...	6·11		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	5·78		
The average fall of April from 48 years' registers ...	2·81		
The greatest fall in 24 hours ...	2·41	18th	
	Days.		
The number of rainy days in the month ...	8		
The average number of rainy days in April from 24 years' registers .	8		
The mean maximum equilibrium temperature of solar radiation during the month ..	(F) 144·6		
The mean difference of sun and air temperatures .	52·6		
The greatest sun temperature .	148·0	5th 17th and 18th	
The greatest excess of sun over air temperature	58·0	17th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	71·6		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground ..	2·9		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature ...	5·4	13th	
	Miles.		
The mean movement of the wind per day .	180·1		
The greatest movement of the wind in one day ..	306·0	27th	
The greatest movement of the wind in one hour ...	29·0	23rd 5 to 6 p.m.	

The number of hours with winds from each of the 8 points—
N. 8, N.E. 16, E. 39, S.E. 117, S. 364, S.W. 146, W. 13, N.W. 11, Calm 6

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·2 lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.

G. W. KÜCHLER,
for Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.

The total fall from 1st January to 10th May 1902	10·65
The average fall of the corresponding period for 24 years, Surveyor-General's Office	6·16

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; p, passing temporary showers; d, drizzling rain; t, thunder; ∠, lightning; ⌓, dew; ⁄, strong wind.

REDISTRIBUTION OF THE SCALE OF TONNAGE ALLOTTED TO THE VARIOUS GRADES OF THE BENGAL PILOT SERVICE.

No. 105T.—Marine.

Government of Bengal.

MARINE DEPARTMENT.

Dated Darjeeling, the 1st July 1902.

RESOLUTION.

READ—

Resolution No. 2178Marine, dated 18th September 1893.
Letter No. 2234, dated 17th June 1902, from the Port Officer, Calcutta.

IN the Resolution read above the tonnage scale of vessels to be distributed among the various grades of pilots was fixed, the object of this scale being to reserve ships of large tonnage for the more experienced pilots, and also to secure, as far as possible, an average income to each pilot, proportionate to his standing in the service. This scale has now been in force for nearly nine years.

2. In his letter of the 17th June 1902, the Port Officer, Calcutta, brings to the notice of Government that, while the number of vessels of the Branch Pilots' tonnage has increased from 931 in 1894 to 1,771 in 1901, the numbers falling to the three lower grades have decreased. Notwithstanding this falling off in number in the lower grades, the earnings of the Master and Mate Pilots show an increase. This is entirely due to the fact that these junior officers have had to pilot over 25 per cent. of the vessels belonging to the senior class. The vessels in this class are yearly increasing, and the numbers are far in excess of the capabilities of the Branch Pilots. In order to avoid detention to vessels and to ensure a more equable distribution of their number among the members of the Pilot Service, the Lieutenant-Governor considers that the time has arrived to readjust the tonnage of the several grades. Accordingly His Honour has been pleased to decide that the following scale shall be observed until further orders:—

Branch Pilots	... ...	Above 3,000 tons.
Senior Master Pilots	... ...	From over 1,600 to 3,000 „
Junior ditto	... ...	„ „ 1,600 to 2,600 „
Mate Pilots	... ...	Up to 1,600 „

ORDER.—Ordered that a copy of this Resolution be forwarded to the Port Officer, Calcutta, for information and guidance.

Ordered also that a copy of this Resolution be forwarded to the Government of India in the Department of Finance and Commerce for information.

By order of the Lieutenant-Governor of Bengal,

D. B. HORN,

Offg. Secretary to the Govt. of Bengal.

FIRST FORECAST OF THE JUTE CROP IN BENGAL FOR THE SEASON, 1902.

THE following is published for general information.

W. C. MACPHERSON,
Offg. Secy. to the Govt. of Bengal.

The 2nd July 1902.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

First forecast of the Jute Crop in Bengal for the Season 1902.

Explanatory.—Returns are received from 26 districts in Bengal, the area under jute in the remaining 21 districts being insignificant. About two-thirds of the crop is grown in Eastern Bengal, principally in Mymensingh, Tippera, Dacca, Pabna, Rajshahi and Bogra, while one-fourth comes from the Rangpur, Dinajpur and Jalpaiguri districts of Northern Bengal. The present forecast contains figures for the area sown, and the probable outturn of the crop, as estimated up to the middle of June.

2. *Character of the season.*—The season has been abnormal and we must go back to 1891 for a record of so heavy a rainfall in April and May. A prolonged drought ended in the middle of March. In April the rainfall was excessive, especially in the Dacca and Chittagong Divisions. In May the fall was almost everywhere in excess, and especially so in the Dacca Division. During these two months the rainfall almost doubled the normal in the Dacca Division and more than did so in Tippera. In South-Eastern Bengal the weather was, therefore, very unfavourable for sowings, and to a less extent this was the case also in North-Eastern Bengal. The heavy rain in May has also retarded weeding.

3. *Area cultivated.*—It is now estimated by District Officers that the normal area under jute is 2,313,200 acres, that 2,262,200 acres were grown last year; and that this season's cultivation extends to 2,107,500 acres. There can be little doubt that the area cultivated in 1901 was underestimated. The imports into Calcutta and Chittagong indicate that the crop approached 76 lakhs of bales. At $3\frac{1}{5}$ bales to the acre, which may be taken as a bumper crop, the area cropped must have been 2,375,000 acres, so that District Officers have underestimated the area by 5 per cent. Assuming the same co-efficient of error in this year's estimate, the area is not likely to fall short of 2,200,000 acres, which is probably 7 per cent. less than in 1901.

The decrease is mainly due to excessive rainfall at the sowing seasons, but is also attributed in some districts to low prices obtained last year.

4. *Character of the crop.*—The prospects of this season's crop are not encouraging. Of the districts which return 50,000 acres and upwards, only two, Dinajpur and the 24-Parganas, estimate a full average crop of 100 per cent. Pabna expects 93 per cent., Rajshahi 85 per cent., and Purnea 82 per cent. Jalpaiguri anticipates a 77 per cent. crop, while the important districts of Mymensingh, Rangpur, and Faridpur with 942,200 acres between them only estimate 75 per cent. Dacca, with 152,000 acres, anticipates only 57·8 per cent., while Tippera, with 235,000 acres, expects only 50 per cent. of a normal crop. The detailed estimates worked out for the Province as a whole give a 75 per cent. crop. It seems to me that the returns from some districts are unduly pessimistic.

This is especially the case in North-Eastern Bengal, where the damage reported seems to be out of all proportion to the excess in rainfall over the normal. Making allowance for the tendency to underestimate, which was so strongly marked last season, I anticipate that an 80 per cent. crop will be reaped, provided that conditions for the remainder of the season are normal. If my estimates of area and outturn are correct, the yield may be expected to reach $52\frac{4}{5}$ lakhs of bales.

5. *Stocks of the previous season's crop in hand.*—District Officers report stocks to be low.

The above estimates of area and outturn are based upon the reports from District Officers, which are published for general information with this forecast.

C. G. H. ALLEN,

Offg. Director of the Dept. of Land Records and Agriculture, Bengal.

DARJEELING,

The 21st June 1902.

APPENDIX I.

First Forecast of the Jute Crop of Bengal, 1902.

Division.	District.	Total area of the district.	Estimated total area under cultivation.	Approximate normal area under jute.	Approximate area sown last year (1901).	Estimated area sown this year (1902).	Taking 100 to represent the normal outturn, how much represented outturn last year (1901)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1902)?	Whether much, little, or no jute remains in the district from the crop of the year 1901.	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11	12
		Acres.	Acres.	Acres.	Acres.	Acres.					
Burdwan ...	Burdwan	1,726,080	1,384,200	11,000	11,000	11,000	100	100	None.	....	Column 8 has been revised.
	Midnapore ...	3,292,800	2,190,600	14,000	12,800	12,300	84	91	Sadar none. Contai about 2 annas. Tamluk very little. Ghatal none.	The normal area has been increased in the Ghatal subdivision by about 100 acres. Some of the cultivators having cultivated jute this year on lands where *aus* paddy was destroyed last year for want of timely rain.	......
	Hooghly	1,067,360	702,300	12,000	13,600	13,800	88	94	Very little.	A slightly decreased outturn is likely, owing to the continual rain in the Serampore and Sadar subdivisions but in most parts a good crop is expected.	.... .
Presidency	24-Parganas ..	1,344,640	1,102,000	63,000	83,700	89,300	115	100	Little jute remains from the crop of the last year.	The increase in columns 5 and 7 is due to the fact that the jute is more paying and the season more favourable this year.	The entry in column 5 has been revised.
	Nadia	1,788,160	1,303,000	30,000	36,000	31,600	73	61	Little	As per revised final report for 1901. The decrease in area and in the estimated outturn is due to untimely and excessive rain.	The figure in column 6 has been revised.

Division.	District.	Total area of the district.	Estimated total area under cultivation.	Approximate normal area under jute.	Approximate area sown last year (1901).	Estimated area sown this year (1902).	Taking 100 to represent the normal outturn, how much represented outturn last year (1901)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1902)?	Whether much, little, or no jute remains in the district from the crop of the year 1901.	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11	12
		Acres.	Acres.	Acres.	Acres.	Acres.					
Presidency—concld.	Murshidabad ...	1,373,440	985,500	21,700	24,000	16,600	93	75	Little	...	The figure in column 7 is probably under-estimated.
	Jessore	1,573,000	1,142,000	33,300	33,600	30,800	81	65	Little	The final outturn is dependent on the weather in July and August.	The figure in column 6 has been revised.
	Khulna	3,103,942	870,000	29,800	12,000	11,600	92	85	Little	The decrease in the area sown this year is due to excessive early rains.	
	Rajshahi	1,663,040	1,262,100	108,100	112,200	100,000	95	85	A certain amount in the Natore subdivision. In Naogaon practically none.	Reduction of area is due to low price of jute last year, and low percentage of outturn due to rain in excess.	
	Dinajpur ...	2,526,080	1,697,600	103,000	70,000	80,000	83	100	Very little	Sufficient and seasonable rainfall has induced the sowing of a larger area with jute. The crop is thriving well, and promises an average outturn.	

Division	District										
Rajshahi	Jalpaiguri ...	1,994,600	1,075,000	66,700	69,800	58,700	77	77	Little jute remains in the district for home consumption.	Early and frequent rains have prevented successful weeding.	
	Darjeeling (plains)	744,960	148,000	2,500	2,000	2,500	75	90	Little	The increase in the outturn is expected, owing to early rains.	The figure in column 9 is probably an under-estimate.
	Rangpur ...	2,231,040	1,602,700	340,000	370,800	332,200	90	75	A little jute remains from last year's crop.	The decrease in area shown this year is due to the low price of jute during the last year. Excessive rainfall during April and May retarded the growth of the jute crop.	
	Bogra	869,760	660,000	95,000	71,000	70,000	90	70	Very little	Frequent rains proved detrimental to the growth of the plants and suppressed the growth, interfering with the weeding. Hence the fall in area and outturn.	
	Pabna ...	1,176,960	882,600	144,900	140,500	153,000	109	93	Little	Jute is more extensively grown in the Serajganj subdivison than in the Sadar. It is reported by the Subdivisional Officer of Serajganj, that the cultivators having in stock the required quantity of food-grains have increased the area under jute to liquidate debts. Owing to excessive rainfall the weeding operations have been retarded, and the crop on the low lands has been much damaged. Hence the outturn is expected to be below the average. The stock of jute may be attributed to the low price ruling during the greater part of the trading season.	
Dacca	Dacca	1,78[illegible],450	1,313,500	171,000	165,100	152,[illegible]	102	75	Very little	The decrease in the area sown and in the outturn is due to the untimely and excessive rainfall since the sowing season.	
	Mymensingh ...	4,052,480	2,405,700	562,100	545,500	509,000	106	75	Little	Small outturn anticipated, owing to excessive rain. The normal area shown in column 5 ought perhaps to be raised, but my figures are so inadequate that I am not prepared to alter the figures without further enquiry. All subdivisions except Tangail report a reduced area, owing to excessive rain.	
	Faridpur	1,459,840	1,116,300	100,000	105,000	110,000	100	75	About [illegible] of the last year's entire produce is estimated to be in stock.	The increase in area is due to early rain this year, but the outturn will be poor owing to excessive rain during the growth season.	
	Backergunge ...	2,335,360	1,408,000	10,000	10,000	10,000	100	50	Little	The outturn is expected to be much below the normal this year, owing to excessive rainfall at the sowing season.	

Division.	District.	Total area of the district.	Estimated total area under cultivation.	Approximate normal area under jute.	Approximate area sown last year (1901).	Estimated area sown this year (1902).	Taking 100 to represent the normal outturn, how much represented outturn last year (1901)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1902)?	Whether much, little, or no jute remains in the district from the crop of the year 1901.	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11	12
		Acres.	Acres.	Acres.	Acres.	Acres.					
[C]hittagong ...	Tippera	1,594,880	1,188,400	285,000	292,000	235,900	85	50	Little	Cultivation was retarded by drought, and the crop was subsequently injured by the abnormal rainfall of April.	
	Noakhali	1,052,800	818,800	3,500	7,000	2,100	85	30	Very little jute remains in the district.	The decreases both in the area sown and in the estimated outturn are due to excessive rainfall at the time of sowing. In 1900 the area sown with jute was estimated at 1,900 acres. In 1901 a special enquiry was made about the area under jute in this district. It came out from the enquiry that some lands formerly sown with paddy were sown with jute, and the estimated area thus sown was 7,000 acres. But the enquiry made this year shows a falling off. It is entirely due to the excessive rainfall as explained above.	
	Bhagalpur ...	2,704,640	2,097,000	21,900	33,300	23,200	100	100	No jute remains in the district from the crop of the year 1901.	... .	

Division	District									Remarks	
Bhagalpur ...	Purnea	3,135,520	1,639,900	55,000	53,000	38,000	90	83	A little	The weather was unfavourable for this crop in the Kishanganj where it is extensively cultivated and in some parts of S[illegible] subdivisions: hence a decrease in the outturn. No extension of cultivation can be expected in face of the [illegible] prices realised last year.	
	Malda	1,216,000	672,600	32,500	30,000	20,200	57	93	Very little jute remains from the crop of 1901.	The cause of decrease in the area sown this year is due to low price of jute last year. On account of timely rainfall the outturn of this year is expected to be more than that of the previous year. Enquiry is being made as to the approximate normal area under jute, but it is not possible to come to any conclusion unless further enquiry is made for a year or two more, when the question of increasing or decreasing the normal area can be considered.	
Orissa ...	Cuttack	2,323,200	1,161,200	4,500	5,600	5,900	90	100	Small quantity	Owing to favourable rainfall the area sown has increased by about 3[illegible] acres, and at least the average outturn is expected.	
	Balasore	1,334,365	870,800	2,600	3,500	4,700	85	100	Little	The increase in area and outturn is due to [illegible] rains.

WEATHER AND CROP REPORT.

For the week ending the 7th July 1902.

Burdwan.—Rainfall at Sadar 3·34, Kalna 0·25, Katwa 0·65, Raniganj 2·64. Weather cool and cloudy with showers. Ploughing and sowing continue. Fodder and water sufficient. Condition of cattle good. Common rice sells at 12 seers per rupee.

Birbhum.—Rainfall at Sadar 4·27, Rampur Hât 4·92. The rain has done considerable good. Transplanting paddy going on. Sugarcane promising. Common rice sells at Sadar at 12 seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Sadar ·99, Vishnupur 1·80. Weather cloudy. More rain is wanted for transplantation of paddy. Sugarcane is growing well. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Midnapore.—Rainfall at Sadar 1·73, Contai 5·14, Tamluk 5·40, Ghatal 4·00. More rain wanted for paddy in thanas Binpur and Garhbeta. Weather seasonable. Fodder and water sufficient. Cattle disease reported from thana Debra. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Contai	12	0	
Tamluk	11	12	
Ghatal	12	4	

Hooghly.—Rainfall at Sadar 1·17, Serampore 2·32, Arambagh 1·87. Weeding of *aus*, sugarcane and jute progressing. Rain wanted. Fodder and water sufficient. Price of common rice stationary.

Howrah.—Rainfall at Sadar 3·97, Ulubaria 3·61. Fall general. It has done much good to the paddy seedlings and other crops. Weather comparatively cooler than in the previous weeks. Fodder and water sufficient. No cattle-disease. Common rice sells at Sadar at 10½ and at Ulubaria at 11 seers per rupee.

24-Parganas.—Rainfall at Sadar 5·18, Barasat 1·43, Basirhat 3·75, Diamond Harbour 6·80. Strong monsoon weather. State and prospect of standing crops good, but more rain is wanted at Barasat. Transplantation of *aman* is going on and the weeding of *aus* is almost over. Common rice sells at 12 seers per rupee. Condition of cattle good. Supply of fodder and water sufficient.

Nadia.—Rainfall at Sadar 2·23, Ranaghat 0·67, Chuadanga 3·05, Meherpur ·66, Kushtia 5·32. Weather showery. More rain required. No cattle-disease reported. Fodder and drinking water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	0	per rupee.
Ranaghat	11	0	
Chuadanga	11	4	
Meherpur	10	11	
Kushtia	11	4	

Murshidabad.—Rainfall at Sadar 3·49, Kandi 1·21, Jangipur 0·78, Lalbagh 0·22. Weather seasonable. *Bhadoi* in Jangipur being harvested. *Haimanti* seedlings doing well. Prospect of sugarcane and jute good. More rain wanted for *aus* paddy. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	12	per rupee.
Kandi	12	0	
Jangipur	12	0	
Lalbagh	11	0	

Jessore.—Rainfall at Sadar 4·14, Jhenida 4·21, Magura 2·34, Narail 6·91, Bangaon 2·47. Weather seasonable. Prospects of crops fair to good. Fodder and water sufficient. Cattle-disease reported from Sadar and Narail. Common rice sells at 12 seers per rupee.

Khulna.—Rainfall at Sadar 4·53, Bagerhat 7·53, Satkhira 3·73. Weather hot and cloudy. Cultivation and sowing of *aman* going on. State of crops continues favourable. Fodder and water sufficient. Cattle-disease reported from thana Mollahat. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	12	per rupee.
Bagerhat	12	0	
Satkhira	10	8	

Rajshahi.—Rainfall at Sadar 3·67, Nator 6·21, Naugaon 4·51. Transplantation of winter paddy in progress. Prospects of standing crops good. Sporadic cases of cattle-disease reported from Nator and Naugaon. Common rice sells at 11 seers per rupee.

Dinajpur.—Rainfall at Sadar 7·36. Fall in the district general, varying from 9·23 to 2·20. Weather seasonable. Standing crops good. Transplantation of winter rice progressing. No cattle-disease. Fodder and drinking-water plentiful. Rice selling at 12 seers per rupee.

Jalpaiguri.—Rainfall at Sadar 9·64. Weather rainy and cloudy. Condition of *bhadoi* paddy and jute not good owing to excessive rain. Transplantation of *haimanti* paddy commenced. Fodder and water sufficient. Common rice sells at 11 seers per rupee.

Darjeeling.—Rainfall at Sadar 6·00, Kurseong 6·25, Siliguri 3·09. Weather seasonable. *Hills*—Potato being harvested. *Haimanti dhan* being cultivated. Maize, *chota marua* and *bhadoi dhan* doing well. *Terai*—Land being ploughed for *haimanti* paddy. Sowing for seedlings nearly finished. Coarse rice sells as follows:—

				Srs.	ch.	
Hill	...	...	...	8	0	per rupee.
Terai	...	...	...	12	0	

Maize sells at 16 seers per rupee.

Rangpur.—Rainfall at Sadar 4·76. Fall general. Weather seasonable. Transplantation of *aman* and cutting of jute going on. Prospects of jute and *aus* not favourable at Gaibanda. Fodder and water sufficient. Common rice sells at Sadar at 11 seers per rupee.

Bogra.—Rainfall at Sadar 7·59. Fall general. Weather hot and cloudy. Lands are being prepared for winter rice. Transplantation commenced in places. Prospects good. Fodder and water sufficient. Common rice sells at 11 seers 4 chitaks per rupee.

Pabna.—Rainfall at Sadar 1·76, Sirajganj 4·22. Fall general. Weather rainy and hot. Weeding of paddy and jute continues. *Til* and *kaon* are being harvested. Outturn poor owing to excessive rainfall. Prospects of standing crops fair. Rains damaged jute in places. Fodder and water sufficient. No cattle-disease. Common rice sells at 10 seers per rupee.

Dacca.—Rainfall at Sadar 5·55, Manikganj 4·01, Munshiganj 8·93, Narayanganj 6·99. Whether seasonable. Prospects of crops fair. Fodder available. No cattle-disease. Common rice sells at 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 4·74. Fall general. Weather seasonable. Transplantation of winter rice commenced. *Aus* and jute have suffered owing to heavy rain. Fodder and water sufficient. No cattle-disease. Common rice sells as follows:—

				Srs.	ch.	
Sadar	...	...	...	10	0	per rupee.
Kishorganj	...	...	...	11	12	
Jamalpur	...	...	...	11	0	
Netrokona	...	...	...	11	3	
Tangail	...	...	...	10	0	

Faridpur.—Rainfall at Sadar 3·28, Goalundo 5·20, Madaripur 2·68. Weather cloudy and hot. Prospects of crops still uncertain. Fodder sufficient. No cattle-disease. Common rice sells at 11½ seers per rupee.

Backergunge.—Rainfall at Sadar 8·93, Pirojpur 5·29, Patuakhali 7·01, Bhola 4·88. Weather cloudy. Transplanting of *aman* progressing. Prospects dull. Fodder sufficient. Cattle-disease reported from Matbari thana. Common rice sells at 10 seers per rupee.

Tippera.—Rainfall at Sadar 1·80, Brahmanbaria 6·80, Chandpur 5·87. Weather seasonable. Prospects of standing crops good at Brahmanbaria, but not so at Sadar. Sowing of *aman* going on. Fodder and water sufficient. Average price of common rice 11 seers 5 chitaks per rupee.

Noakhali.—Rainfall at Sadar 8·52, Feni 7·77. Fall general. Weather seasonable. Transplantation of *aman* not commenced. Prospects fair. Fodder and water sufficient. Cattle-disease in three thanas. Common rice sells at Sadar at 10 seers and at Feni at 12 seers per rupee.

Chittagong.—Rainfall at Sadar 6·09, Cox's Bazar 14·01. Ploughing for *aman* crops going on. *Aus dhan* is being transplanted. Cattle-disease prevalent in parts of the district. Fodder and water sufficient. Common rice sells at 12¾ seers per rupee.

Chittagong Hill Tracts.—Rainfall at Sadar 7·47. Fall general. Weather very wet but improving. *Joom* crops good. Land being prepared for winter rice crop. No cattle-disease. Common rice selling at 11 seers per rupee.

Patna.—Rainfall at Sadar 1·28, Barh 5·38, Bihar 0·54, Dinapur 0·36, Hilsa 0·40, Bikram 0·35. Weather cloudy and hot. Preparation of land for sowing continues. Prolonged drought has done considerable damage to *bhadoi* crops and sugarcane. No cattle-disease. Fodder and water scarce in Bihar subdivision. Common rice sells as follows:—

	Srs.	ch.	
Patna	11	0	per rupee.
Barh	11	8	
Bihar	10	0	
Dinapore	11	0	

Gaya.—Rainfall at Sadar 0·80, Aurangabad 2·61, Nawadah 2·55. Weather hot and cloudy. Transplanting of *marua* commenced. Lands being prepared for sowing *bhadoi* and paddy. Rain badly wanted in some parts. No cattle-disease. Fodder and water for cattle sufficient. Average price of common rice is 10 seers 14 chitaks per rupee.

Shahabad.—Rainfall at Sadar 3·04, Buxar 2·58, Bhabhua 2·02, Sasaram 3·06, Dehri 5·13. Weather hot and cloudy with east wind. The rain has been useful for sowing of *bhadoi* and paddy. More rain wanted. Sugarcane good. Fodder and water sufficient. Rice sells at 11 seers per rupee at Sadar.

Saran.—Rainfall at Sadar 1·17, Siwan 2·62, Gopalganj 5·18. Weather cloudy and rainy. Rain has done much good to the standing crops. Sowing of *bhadoi* continues. No cattle-disease. Water and fodder sufficient. Common rice sells at 11 seers per rupee.

Champaran.—Rainfall at Sadar 3·21, Bettiah 5·25. Fall general. Weather hot and cloudy. Prospects of standing crops greatly improved by the rain. Rice being sown and transplanted. Cattle-disease reported. Fodder and water sufficient. Common rice sells at 12½ seers and maize 23½ seers per rupee.

Muzaffarpur.—Rainfall at Sadar ·80, Hajipur ·56, Sitamarhi 2·60. Weather cloudy and rain occasionally. Rainfall general. Sowing of paddy and *bhadoi* crops going on. More rain wanted. Fodder and water sufficient. A few cases of cattle-disease still in Sitamarhi subdivision. Prices are—Common rice 11½ seers and maize 19 seers a rupee.

Darbhanga.—Rainfall at Sadar 1·28, Samastipur 2·02, Madhubani 1·19. More rain is required for transplantation of paddy seedlings. Fodder and water sufficient. Cattle-disease is reported from village Deodha. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	4	per rupee.
Samastipur	12	0	
Madhubani	11	11	

Monghyr.—Rainfall at Sadar 1·57, Begusarai 0·84, Jamui 1·14. Weather very hot and cloudy; subsequently rainy. *Bhadoi* and paddy sowing going on. Recent rain has benefited the crops. More rain still needed for *bhadoi* and to prevent water scarcity in Begusarai subdivision. Sugarcane promising. Cattle-disease reported from Begusarai thana. Fodder sufficient. Water plenty in Sadar and Jamui subdivisions. Common rice sells at Sadar at 11 seers 3 chitaks and at subdivisions at 11 seers per rupee.

Bhagalpur.—Rainfall at Sadar 1·75, Banka 1·40, Madhipura 0·15, Supaul 0·10. Weather cloudy. Transplantation of *bhadoi* and *aghani* paddy going on. Prospects fair. Recent rainfall did immense good to the standing crops. More rain wanted. Fodder and water sufficient. Cattle-disease reported from Banka and Supaul. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Banka	11	4	
Madhipura	13	0	
Supaul	15	8	

Purnea.—Rainfall at Sadar 1·74, Kishanganj 5·50, Araria 2·75. Fall general, but scanty in the Sadar, where want of rain has almost stopped agricultural works. Weather variable. Transplantation of winter rice going on in subdivisions. A few cases of cattle-disease reported from Araria. Fodder and water sufficient. Common rice sells at Sadar and Kishanganj at 11 seers and at Araria at 11½ seers per rupee.

Malda.—Rainfall at Sadar 1·33, Chanchal 2·60. Weather hot with occasional rains. Recent rain has improved the prospects of *bhadoi*. More rain wanted for transplanting of winter rice. No cattle-disease. Fodder and water available. Common rice sells at 11 seers per rupee.

Sonthal Parganas.—Rainfall at Sadar 3·98, Deoghur 3·52, Godda 4·23, Jamtara 0·32, Pakaur 1·31, Rajmahal 3·46. Fall general. Weather hot and showery. The rain has done immense good to paddy seedlings and Indian-corn. Sugarcane thriving; normal area under *makai*. Grazing improved. Price of common rice at Sadar 12 seers per rupee.

Cuttack.—Rainfall at Sadar 2·63. Fall general, in most parts exceeding the fall at Sadar. Weather monsoonish. *Beali* and *sarad* growing well. *Beali* being weeded at places. Prospects fair. No cattle-disease. Fodder and water sufficient. Common rice sells at 13 seers 2 chitaks at Sadar.

Balasore.—Rainfall at Sadar 5·50. Fall general. Paddy plants with sugarcane doing well. Rice sells at 13 and 15 seers per rupee at Sadar and Bhadrak respectively. *Rabi* in flowers and pods. No cattle-disease reported. Fodder and water ample.

Angul.—Rainfall at Sadar 1·03, Bissipara ·37. Weather rainy and windy. Fall general. Prospect of crop improved by the rain. Sowing of *bhadoi* and *sarad* crops nearly completed. Seeds germinating well. Fodder and water obtainable. Cattle-disease not reported this week. Common rice sells at 12 and 15 seers respectively at Sadar and interior.

Puri.—Rainfall at Sadar 3·60 Weather cloudy Rainfall general throughout the district and favourable to the growth of winter rice and *bhadoi* paddy. Sugarcane doing well. Fodder and water supply sufficient. Common rice sells at 13 seers 12 chitaks per rupee.

Hazaribagh.—Rainfall at Sadar 1·46, Giridih 3·04. Weather cloudy. Rain wanted. Ploughing and sowing in progress. Fodder sufficient. Water scarce. Common rice sells at 11½ seers per rupee.

Ranchi.—Rainfall 4·53. Fall general. Weather cloudy. Prospects improved by recent rains. Cattle-disease reported from Ranchi, Silli and Tamar thanas. Fodder and water available. Common rice selling at 12½ seers per rupee.

Palamau.—Rainfall 2·78. Weather cloudy. A good rain all over the district much improved the condition of crops and fodder. *Bhadoi* sowings in full swing. Cattle-disease in two thanas. Prices at Sadar—Rice 10 seers 2 chitaks and *makai* 14 seers per rupee.

Manbhum.—Rainfall at Sadar 4·70, Gobindpur 2·24. Fall general except in thanas Katras and Nirsha. Weather seasonable. Prospects of crops materially improved by recent rain. Fodder and water sufficient. Cattle-disease reported from Katras. Price of common rice at Sadar 12 and at Gobindpur 11 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall at Sadar 3·30. Weather seasonable. Transplantation of paddy and rearing of *tasar* commenced. Average price of rice 13 seers in the district; at Chaibassa 12 seers per rupee.

General Summary.—Rainfall during the week was general and for the most part heavy. Excessive rain has been unfavourable to the prospects of crops at places in North and East Bengal. Recent rain has improved the prospects in Bihar, but more rain is still wanted at several places there, and also in the Burdwan and Presidency Divisions. Transplantation of winter rice in progress. Sugarcane, early rice and jute generally doing well. Cattle-disease reported from 16 districts. Fodder and water generally sufficient. The price of common rice has risen in 11 districts, fallen in 10, and is stationary in the rest.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of June 1902.

	Inches.	Date.	Hour.
The mean pressure of the month	29·573		
The average pressure of June from 24 years' registers ...	29·549		
The highest pressure in the month	29·764	2nd	10
The lowest pressure in the month	29·369	14th	16
The range of pressure	0·395		
	Hours		
The total number of hours of bright sunshine during the month	120·7		
The maximum possible number of hours of sunshine ...	403·4		
	°		
The mean temperature of the month	85·7		
The average temperature of June from 24 years' registers ...	85·0		
The highest temperature in the month	97·5	23rd	
The lowest temperature in the month	70·7	4th	
The range of temperature during the month	26·8		
The mean daily range of temperature	13·5		
The greatest range of temperature in one day	22·0	23rd	
	Per cent.		
The mean humidity of the month	83		
The average humidity of June from 24 years' registers ...	81		
	Inches.		
The mean vapour tension of the month	1·025		
The average vapour tension of June from 9 years' registers ...	0·998		
The mean cloud proportion of the month	7·73		
The average cloud proportion of June from 25 years' registers	7·02		
	Inches.		
The total rainfall of the month	5·47		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	5·11		
The average fall of June from 48 years' registers ...	12·08		
The greatest fall in 24 hours	1·04	5th	
	Days.		
The number of rainy days in the month	13		
The average number of rainy days in June from 24 years' registers	19		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	142·3		
The mean difference of sun and air temperatures	50·2		
The greatest sun temperature	152·6	27th	
The greatest excess of sun over air temperature	59·5	8th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	76·8		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	2·3		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	3·3	2nd and 22nd	
	Miles.		
The mean movement of the wind per day	139·2		
The greatest movement of the wind in one day	231·0	20th	
The greatest movement of the wind in one hour	19·0	1st 4th 5th	11 to Noon 9 to 10 a.m. 7 to 8 p.m.

The number of hours with winds from each of the eight points—
N. 24, N.E. 31, E. 69, S.E. 91, S. 272, S.W. 137, W. 49, N.W. 20, Calm 27.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0°·5 higher; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.

G. W. Kuchler,
for Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.

Meteorological Office, Govt. of India,
Alipore (Calcutta), the 7th July 1902.

The maximum possible number of hours of sunshine	94·2
The mean temperature of the seven days	83·6
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	83·5
The extreme variation of temperature	16·7
The maximum temperature	92·4
	Miles.
The highest velocity of the wind in one hour	15
	%
The mean relative humidity	85
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	85
	Inches.
The total fall of rain from 29th June to 5th July 1902	4·77
The average fall of the corresponding period for 24 years, Surveyor-General's Office	3·59
The total fall from 1st January to 5th July 1902	26·33
The average fall of the corresponding period for 24 years, Surveyor-General's Office	24·05

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; ∠, lightning.

CONTENTS.

WEATHER AND CROP REPORT.

For the week ending the 14th July 1902.

Burdwan.—Rainfall at Sadar 1·72, Kalna 3·09, Katwa 0·30, Raniganj 1·07. Weather hot and sultry. Ploughing and sowing continue. Transplantation commenced in some places. Fodder and water sufficient. Condition of cattle good. Common rice sells at 12 seers per rupee.

Birbhum.—Rainfall at Sadar 1·25, Rampur Hât 0·63. Weather hot and cloudy. More rain wanted. Transplantation going on. Sugarcane promising. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Bankura.—Rainfall at Sadar 1·17. Weather hot and cloudy with occasional rain. More rain wanted. Sugarcane doing well. Transplantation of paddy going on. Fodder and water sufficient. Rice sells at 12½ seers per rupee.

Midnapore.—Rainfall at Sadar 1·47, Contai 1·57, Tamluk 1·49, Ghatal 1·58. Weather hot. More rain wanted for paddy. Transplantation going on. Fodder and water sufficient. Cattle-disease reported from thana Binpur. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Contai	12	6	
Tamluk	11	12	
Ghatal	12	0	

Hooghly.—Rainfall at Sadar 2·76, Serampore 1·76, Arambagh 1·53. Weeding of *aus*, sugarcane and jute progressing. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Serampore	10	10	
Arambagh	12	1½	

Howrah.—Rainfall at Sadar 1·71, Ulubaria 3·05. Fall general, but the amount of rainfall at Ulubaria was nearly double of that in Sadar. It has done good generally to all the crops; and no more rain is wanted at present at Ulubaria, but in the Sadar showers are wanted at intervals. Weather seasonable. Fodder and water sufficient. No cattle-disease. Common rice sells at Sadar at 10½ seers and at Ulubaria at 11 seers per rupee.

24-Parganas.—Rainfall at Sadar 1·53, Barasat 1·43, Basirhat 2·91, Diamond Harbour 4·46. Weather—Intermittent storm and sunshine. State and prospect of standing crops good, but more rain is wanted in Barasat and Basirhat. Transplantation of *aman* going on. Common rice sells at 12 seers. Condition of cattle good. Supply of fodder and water sufficient.

Nadia.—Rainfall at Sadar 1·80, Ranaghat 1·08, Chuadanga 1·85, Meherpur 1·00, Kushtia 0·83. Weather hot and cloudy. Fodder and drinking water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	0	per rupee.
Ranaghat	11	0	
Chuadanga	11	0	
Meherpur	10	11	
Kushtia	11	4	

Murshidabad.—Rainfall at Sadar 1·70, Kandi 1·28, Jangipur 4·33, Lalbagh 2·18. Weather seasonable. *Bhadoi* being harvested in Jangipur subdivision. Rain wanted for transplantation of *aman* seedlings in Kandi subdivision. The prospect of jute is good. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	12	per rupee.
Kandi	12	0	
Jangipur	11	8	
Lalbagh	11	4	

Jessore.—Rainfall at Sadar 1·75, Jhenida 1·54, Magura 1·42, Bangaon 1·30. No report received from Narail. More rain wanted, otherwise weather seasonable. Prospects of crops good. Fodder and water sufficient. No cattle-disease. Common rice sells at 12 seers per rupee.

Khulna.—Rainfall at Sadar 1·62, Bagerhat 2·92, Satkhira 2·08. Weather seasonable. Cultivation and sowing of *aman* going on. State of crops continues favourable. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee
Bagerhat	12	0	
Satkhira	10	8	

Rajshahi.—Rainfall at Sadar 1·92, Nator 1·45, Naugaon 1·64. Transplantation of winter paddy in progress. Cutting of jute begun. Sporadic cases of cattle-disease reported from Nator. Common rice sells at 12 seers per rupee.

Dinajpur.—Rainfall at Sadar 6·47. Fall in the district general, varying from 1·09 to 18·11. Weather seasonable. Standing crops good. Transplanting of winter rice progressing. No cattle-disease. Fodder and drinking-water plentiful. Rice selling at 12 seers per rupee.

Jalpaiguri.—Rainfall at Sadar 9·33, Alipore Duars 20·36. Weather seasonable. Transplantation of *haimanti* paddy going on. Prospect of *haimanti* and *bhadoi* paddy satisfactory. Common rice sells at 10¾ seers a rupee. Fodder and water sufficient.

Darjeeling.—Rainfall at Sadar 4·35, Kurseong 11·74, Siliguri 18·23, Kalimpong 4·48. *Hill*—Potato being plucked. *Haimanti dhan* being cultivated. Maize, *chota marua* and *bhadoi dhan* doing well. *Haimanti* paddy being transplanted. Prospects good. Coarse rice sells as follows:—

	Srs.	ch.	
Hill	8	0	per rupee.
Terai	11	0	

Maize sells at Darjeeling at 16 seers and at Kalimpong at 18 seers per rupee.

Rangpur.—Rainfall at Sadar 6·71. Fall general. Weather cloudy and rainy. Cutting of *aus* and jute and transplantation of *aman* going on. Prospects not favourable at Nilphamari and Gaibanda. Common rice sells at 11 seers per rupee.

Bogra.—Rainfall at Sadar 2·66. Fall general. Weather hot and cloudy. Cutting of *aus* and jute and transplantation of *aman* commenced. Prospects good. Fodder and water sufficient. Common rice sells at 11¼ seers per rupee.

Pabna.—Rainfall at Sadar 0·09, Sirajganj 3·10. Fall general. Weather hot and partially cloudy. Weeding of paddy and jute continues. Prospects of standing crops fair. Fodder and water sufficient. No cattle-disease. *Aus* harvesting commenced. Common rice sells at 10 seers per rupee.

Dacca.—Rainfall at Sadar 2·02, Manikganj 1·02, Munshiganj 3·58, Narayanganj 5·42. Prospects of crops fair. Weather seasonable. Fodder available. No cattle-disease. Common rice sells at 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 6·30, Jamalpur 7·07, Kishorganj 4·66, Nitrokona 18·01, Tangail 4·49. Weather rainy and hot. *Bhadoi* and jute crops have suffered owing to excessive rain. Transplantation of winter rice continues. Water sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Kishorganj	11	0	
Jamalpur	11	0	
Netrokona	11	12	
Tangail	10	0	

Faridpur.—Rainfall at Sadar 1·25, Goalundo 0·57, Madaripur 2·34. Weather seasonable. Prospects of crops improving. Fodder sufficient. No cattle-disease. Common rice sells at 11 seers a rupee.

Backergunge.—Rainfall at Sadar 2·23. Fall general. Weather seasonable. Transplantation of *aman* continues. Cattle-disease reported from thana Matbari. Fodder sufficient. Common rice sell at 10 seers per rupee.

Tippera.—Rainfall at Sadar 2·62, Brahmanbaria 1·71, Chandpur 2·63. Weather seasonable. Prospects of standing crops good at Brahmanbaria, but not so at Sadar. Transplantation of *aman* still continues. Fodder and water sufficient. Average price of common rice is 11 seers 6 chitaks per rupee.

Noakhali.—Rainfall at Sadar 3·71, Feni 5·89. Fall general. Weather seasonable. Prospects of *aus* fair. Transplantation of *aman* commenced. Fodder and water sufficient. Cattle-disease at Companygunge. Common rice sells at Sadar at 10 seers and at Feni at 12 seers per rupee.

Chittagong.—Rainfall at Sadar 0·92, Cox's Bazar 1·23. Ploughing for *aman* crops going on. Cattle-disease prevalent in parts of the district. Water and fodder sufficient. Common rice sells at 12 seers per rupee.

Chittagong Hill Tracts.—Rainfall at Sadar 3·68. Fall general. Weather fine with occasional showers. *Joom* crops progressing. Ploughing and sowing continues. No cattle-disease. Common rice selling at 12 seers per rupee.

Patna.—Rainfall at Patna 2·46, Barh 1·12, Bihar 2·81, Dinapore 3·12, Hilsa 1·92, Bikram 2·37. Weather hot and cloudy. Rain has done some good. *Marua* being transplanted. *Dhan* being sown. Sowing of Indian-corn going on. Sugarcane doing well. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Patna	10	8	per rupee.
Barh	11	8	
Bihar	10	0	
Dinapore	11	4	

Gaya.—Rainfall at Sadar 3·22, Jahanabad 4·29, Aurangabad 3·58, Nawadah 3·33. Sowing of maize almost over, but transplantation of *marua* only about half done. Sugarcane doing well. More rain wanted. No cattle-disease. Fodder and water for cattle sufficient. Average price of common rice is 10½ seers per rupee.

Shahabad.—Rainfall at Sadar 1·77, Buxar 3·34, Bhabhua 5·16, Sasaram 3·55, Dehri 2·20. Weather hot with passing clouds. Rain has benefitted the sowing of *bhadoi* and paddy. Sugarcane good. Fodder and water sufficient. No cattle-disease. Common rice sells at Sadar at 11 seers a rupee.

Saran.—Rainfall at Sadar 0·40, Siwan 2·73, Gopalganj 2·13. Weather cloudy and very hot. Standing crops doing fairly well. More rain wanted. Fodder and water sufficient. No cattle-disease. Common rice sells at 11 seers per rupee.

Champaran.—Rainfall at Sadar 8 26, Bettiah 7·73. Weather hot and cloudy. Sowing of maize estimated at 95 per cent., coming up well. Transplantation of rice progressing. Heavy fall has much improved agricultural prospects. No cattle-disease. Fodder and water sufficient. Common rice sells at 12½ seers and maize 23½ seers per rupee.

Muzaffarpur.—Rainfall at Sadar 3·34, Hajipur 1·58, Sitamarhi 1·21. Weather hot and cloudy occasionally. Sowing of paddy and *bhadoi* crops still going on. Prospects of crops improved by recent rain. More rain wanted. Fodder and water sufficient. Cattle-disease in Sitamarhi subdivision much abated. Prices are—Common rice 11½ seers and maize 19 seers a rupee.

Darbhanga.—Rainfall at Sadar 2·08, Samastipur 2·53, Madhubani 0·71. Weather very hot and cloudy. More rain urgently wanted for transplantation of paddy seedlings. Fodder and water sufficient. Cattle-disease is reported from Darbhanga and Warisnagar thanas. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	4	per rupee.
Samastipur	12	0	
Madhubani	11	6	

Monghyr.—Rainfall at Sadar 0·71, Begusarai 2·07, Jamui 0·74. Weather seasonable. *Bhadoi* and paddy sowings going on. The rainfall of the week has been beneficial to the crops, but more rain still wanted. Transplantation of *marua* and paddy commenced in places. Standing crops promising. Fodder and water sufficient. A few cases of cattle-disease reported from Begusarai thana. Common rice sells at Sadar at 10 seers 11 chitaks and at subdivisions at 11 seers per rupee.

Bhagalpur.—Rainfall at Sadar 2·76, Banka 2·10, Madhipura 2·19, Supaul 1·63. Weather cloudy. Transplantation of *bhadoi* and *aghani* paddy going on. Sugarcane and *janera* doing well. Recent rainfall has done immense good. More rain wanted. *Marua* in Supaul has been damaged by drought. Cattle-disease reported from everywhere. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	6	per rupee.
Banka	12	0	
Madhipura	13	0	
Supaul	13	0	

Purnea.—Rainfall at Sadar 0·84, Kishanganj 6·86, Araria 5·06. Fall general, but very scanty at Sadar, where want of rain is keenly felt by the agriculturists. Prospects on the whole good. Weather variable. A few cases of cattle-disease reported from Koari and Palasi outposts. Fodder and water sufficient. Common rice sells at Sadar at 10 seers and at Kishanganj and Araria at 11 seers per rupee.

Malda.—Rainfall at Sadar 2·00, Sibganj 3·10, Gajol 4·04. Weather very hot and cloudy. Transplantation of winter rice going on. No cattle-disease. Fodder and water available. Common rice sells at 11 seers per rupee.

Sonthal Parganas.—Rainfall at Sadar 1·51, Deoghur 1·20, Godda 1·87, Jamtara 2·18, Pakaur 6·49, Rajmahal 9·59. Weather unduly warm though with occasional showers. Indian-corn and sugarcane flourishing. More rain wanted for paddy transplantation. Fodder and water sufficient. Price of common rice at Sadar is 13 seers per rupee.

Cuttack.—Rainfall at Sadar 4·42. Fall general. Weather of settled monsoon character. *Beali* and *sarad* growing well and *beali* being weeded and harrowed in places. Prospects good. Fodder and water sufficient. Common rice sells at 13 seers 2 chitaks at Sadar.

Balasore.—Rainfall at Sadar 2·02. Fall general. Transplantation begun. Weeding of paddy going on, prospects of crop good. Sugar-cane and standing crops progressing. Jute and oilseeds doing well. Rice sells at 13 and 15 seers per rupee at Sadar and Bhadrak respectively. No cattle-disease. Fodder and water ample.

Angul.—Rainfall at Sadar 0·81, Chhindipada 2·09, Tikerpara 3·00, Bissipara 1·77. Monsoon set in. Sowing of *bhadoi* and *sarad* crop nearly over. Seeds germinating well. Fodder and water obtainable. No cattle-disease. Weather rainy with high wind. Common rice sells at 12 and 15 seers per rupee at Sadar and interior respectively.

Puri.—Rainfall at Sadar 2·28. Rainfall general and favourable to *bhadoi* crops. Weather cloudy. Winter rice growing well. Sugarcane, cotton and other miscellaneous crops doing well. Fodder and water-supply sufficient. Rice sells at 13 seers 12 chitaks per rupee.

Hazaribagh.—Rainfall at Sadar 1·75, Giridih 2·01. Weather hot and cloudy. Ploughing and sowing continues. Weeding of *makai* crop commenced. Fodder sufficient. Water scarce. Common rice sells at 11¼ seers per rupee. More rain wanted.

Ranchi.—Rainfall 1·68. Weather hot and cloudy. Sowing of *bhadoi* and winter rice in progress. More rain wanted. Cattle-disease reported from three thanas. Fodder and water sufficient. Common rice sells at 13¼ seers per rupee.

Palamau.—Rainfall at Sadar 1·70. Fall general. Weather cloudy. *Bhadoi* sowings in progress. Prospects fair. Sugarcane doing well. Cattle-disease decreasing. Fodder and water sufficient. Rice selling at Sadar at 10 seers 2 chitaks per rupee.

Manbhum.—Rainfall at Sadar 0·92, Gobindpur 2·23. Weather hot and cloudy. Prospects of standing crops good. Transplantation of winter rice retarded in most thanas for want of rain. Fodder and water sufficient. Cattle-disease reported from thana Purulia. Common rice selling at Sadar at 12 seers and at Gobindpur at 11 seers per rupee.

Singhbhum.—Rainfall at Sadar 2·49. Weather seasonable. Transplantation of paddy and rearing of *tasar* in progress. More rain needed. Average price of rice is 14 seers 10 chitaks in the district; at Chaibassa 12 seers per rupee.

General Summary.—Rain fell during the week throughout the Province. The fall was heaviest in North Bengal. Several parts of Bihar and Chota Nagpur and a few districts of the Burdwan and Presidency Divisions are in need of more rain. Agricultural operations being pushed on vigorously. Transplantion of winter rice continues. Autumn crops and sugarcane are generally promising. Cutting of early rice and jute has commenced at places. Cattle-disease reported from 13 districts. Fodder sufficient. No want of water except in Hazaribagh. The price of common rice has risen in 8 districts, fallen in 9, and is stationary in the rest.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JUNE 1902.

WEATHER was unusual in several important respects during the greater part of June. Pressure was almost continuously low in the north, and especially in the north east, so that, as there was a somewhat steeper pressure gradient than usual, the southerly moist winds were diverted towards Assam and the eastern parts of the Province. Rainfall was in consequence very heavy at eastern stations while conditions were favourable for rainfall, and that was at the end of the second and beginning of the third week. For about a week at that time heavy falls were of almost general occurrence in Assam and the adjacent parts of East and North Bengal.

Showery weather was fairly general in the early part of the month, even in the western districts; but being due to local disturbances, resulting from the light variable winds then prevalent, the rainfall was generally light. After the commencement of monsoon conditions in the east, which occurred about the 11th, rainfall almost entirely ceased in the west of the Province, and hot season conditions with high temperature prevailed.

For the month as a whole, Chota Nagpur received 33 per cent, Orissa, Bihar and South-West Bengal about 60 per cent., North Bengal 108 per cent., and East Bengal 131 per cent. of the normal. In Assam, Silchar, Dhubri and Tezpur received excess rainfall by amounts varying from 2·5 to 5·6 inches, while at Dibrugarh and Sibsagar there was defect, 1 inch at the former and 5·4 inches at the latter.

The large temperature variations which accompanied the irregular distribution of the monsoon rainfall have affected the average temperature considerably, and most so in the western districts, where little or no rain fell during the latter half. Mean excess in Chota Nagpur is 3°·6, in Orissa and Bihar more than 1°. In Bengal Proper mean temperature was almost normal, and in Assam there was defect of about 1°. Very high day temperatures were recorded, the highest in Chota Nagpur and Bihar being 111°, in Orissa 110° and in South-West Bengal 106°.

As already stated, showery weather was more frequent than usual in the early part of June, in which respect there has been a noticeable peculiarity throughout the past hot season. With the commencement of monsoon conditions a marked change took place, rainfall ceased in the west of the Province, and heavy rainfall became general in the east. This change was due to the only cyclonic disturbance which occurred over the Bay during the month.

The first sign of disturbance was on the 6th, when a diffused depression was shown over the north and centre of the Bay, and the pressure gradient in the south became steeper, with stronger south-westerly winds in that area. A fairly regular cyclonic circulation of light winds prevailed over the Province and the Bay. After a general rise of pressure during the subsequent 24 hours the depression had almost disappeared. The only trace of its existence was in the relatively low pressure in Burma. Pressure again fell on the 9th and continued to fall slowly or moderately until the 13th, when there was a slight depression over the Bay and a steep pressure gradient over the south and centre of the Bay. This shallow depression, without intensifying, moved north-eastward towards Assam, and with its advance heavy rainfall became general at eastern stations.

As the steep pressure gradient followed the depression northwards, wind force increased in the north of the Bay, and the highest velocities which accompanied the disturbance were felt in the extreme north-west angle. On the 13th the average velocity at Diamond Island was 20; on that and subsequent days the highest velocity reported from the Orissa coast was 24; while at Saugor Island from the 15th to the 17th strongish winds, averaging about 30 miles an hour, continued.

The disturbance which probably continued between the 7th, when it first appeared, and the 13th, when it was close to the north of the Bay, differed from the typical storms of the early monsoon season in two respects. It failed to develop into a cyclonic storm of any severity, and it moved north-eastward instead of in the usual north-westerly direction. After the low pressure area moved towards Assam, the pressure gradient was much steeper than usual in that direction for some days. On the 14th the difference from normal pressure varied from excess of ·05 inch in the south of the Bay to defect of ·2 inch in part of Assam; and though this rather large difference slowly diminished on subsequent days, it was not till nearly the end of the third week that the pressure distribution had become approximately normal. There was then a small to moderate excess over the greater part of the Province and the Bay.

Throughout that period from the 13th to about the 20th there was a strong indraught from the Bay towards East Bengal and Assam, and it was during those days that a considerable part of the rainfall of the month fell. The days of heaviest rainfall in East Bengal were the 14th to 17th and in North Bengal the 18th to 20th. The area of lowest pressure moved slowly westward, and at times rainfall became more general in the western districts; the only day on which there was any marked westerly extension was on the 17th, when

fairly general falls occurred in Orissa and North Bihar. In Chota Nagpur and South Bihar only a few light scattered showers fell.

The pressure gradient continued favourable for rainfall between the 21st and 24th, but the falls became daily less general. On the 25th a rapid rise of pressure began in the north-east and extended south-westward. The rapid change was accompanied by a few local showers, but monsoon rainfall ceased over almost the whole Province. The pressure distribution was more uniform than usual over both the Province and the Bay, and during the last week temperature rose, not only in the western districts, but also in North Bengal and Assam, until an important series of changes commenced in the north-east at the close of the month. These changes are difficult to account for. A fall of pressure began in North Bengal, and as it advanced south-westward heavy rainfall occurred first in North Bengal, then over almost the whole of Bengal Proper; and as the disturbed conditions advanced local storms with rainfall and a rapid fall of temperature became general in the western districts. On the last day of June most of the stations in East and North Bengal reported between 2 and 4 inches. The pressure changes on that date were such as would indicate the movement of a shallow depression from north-east to south-west, a rare occurrence in the monsoon season, and the temperature variation from the normal ranged from defect of 6° in Assam to excess of 12° in the west of Bihar and Chota Nagpur. In the early days of July this high temperature in the western districts disappeared, and whatever the causes of those large changes may have been or from whatever direction they may have originated, weather more characteristic of the monsoon season succeeded them over the whole Province.

Pressure, though not subject to large changes during June, underwent considerable variations and was at times unusual for the season. In the early part of the month there was a rather large excess over the Province, and a more uniform distribution than usual over the Bay. As the slight depression developed over the Bay, this excess inland disappeared, and with the north-easterly movement of that disturbance a rather large defect became established in the eastern and more especially the north-eastern districts. The defect and the accompanying steep gradient over the Bay continued during the third week, and gradually disappeared between the 22nd and 24th. The most noticeable changes during the month occurred between the 25th and the 30th—first the rapid rise, then the passage of a shallow depression from north-east to south-west accompanied by the remarkable changes already noticed.

On an average for the month the difference from the normal varied from excess of ·01 inch, general in Orissa, Chota Nagpur and South-West Bengal, to defect of ·01 inch in North Bengal and Assam.

Temperature.—During the early part of the month, while local storms were of fairly frequent occurrence over the greater part of the Province, temperature was low generally, and at times several degrees below the normal. After pressure fell in the east and dry westerly winds became general in the western districts, ordinary hot season conditions were restored with high temperatures, especially in the latter part of the month. A marked contrast obtained between the eastern and western districts during the second and third weeks. In the former, where there was dense cloud and heavy rainfall, temperature was exceptionally low, while in the west hot season conditions continued with day temperatures of about 110°.

The variation from the normal on an average for the month was small in the eastern districts, but in the west, notwithstanding the low temperature in the first week, there was a considerable to large excess.

Rainfall.—During the early part of the month scattered showers fell in all parts of the Province. After the shallow depression entered East Bengal on the 11th, heavy rain fell in the eastern districts, and the showers which had up to that date been fairly frequent in Bihar almost ceased. In Chota Nagpur and Orissa light showers were of occasional occurrence throughout the month.

As the monsoon current was diverted eastward, the rainfall for the month was much heavier in East and North Bengal than in the central or western districts. East Bengal received on an average 23 and North Bengal 19 inches, the former amount being more than 5 inches in excess of the normal. In South-West Bengal, Bihar and Orissa the fall was little more than half the usual amount, and in Chota Nagpur the fall was less than one-third the normal.

At individual stations the difference from the normal varies from defect of 5 inches in Chota Nagpur to excess of 10 inches in parts of East Bengal. The area of excessive rainfall includes the districts of Rajshahi, Jalpaiguri, Bogra and Pabna, in North Bengal, and all the districts in East Bengal. In all other parts of the Province, including Bihar, South-West Bengal, Orissa, and the western parts of East and North Bengal, defect was 2 to 4 inches.

The following table gives the rainfall of the various Divisions of Bengal in June and in each of the previous months of the present year as compared with the normal values

for the same periods. The figures given represent the actual falls expressed as percentages of the normal falls :—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	Actual rainfall of first six months of 1902 expressed as a percentage of the normal fall for the period.

	Inches.
The total fall of rain from 6th to 12th July 1902	2·59
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·17
The total fall from 1st January to 12th July 1902	28·92
The average fall of the corresponding period for 24 years, Surveyor-General's Office	26·22

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; p, passing temporary showers; t, thunder; ∠, lightning.

N.B.—In the weekly abstract from 15th to 21st June 1902, read 82 for 2 as humidity of the 21st June 1902.

RESOLUTION REVIEWING THE TRIENNIAL REPORT ON THE WORKING OF THE CHARITABLE DISPENSARIES IN BENGAL AND THE CALCUTTA MEDICAL INSTITUTIONS FOR THE YEARS 1899, 1900, AND 1901.

MUNICIPAL DEPARTMENT—MEDICAL.

Darjeeling, the 15th July 1902.

RESOLUTION—No. 1414T.—M.

READ—

The Triennial Report on the working of the Charitable Dispensaries in Bengal and the Calcutta Medical Institutions for the years 1899, 1900, and 1901.

Read also—

The Triennial Report for the years 1896, 1897, and 1898 and the Annual Returns for the years 1899 and 1900 and the Resolutions recorded upon them.

The Triennial Report has undergone considerable modification in consequence of the orders of the Government of India contained in the Resolution of the Home Department, No. 2741, dated 26th March 1901, and now presents a complete review of the working of all the medical institutions of the Province during the triennium. In spite of the inclusion of new material, the body of the report has been reduced by one-half.

2. The chapter on *Calcutta Medical Institutions* is new, the subject having hitherto been dealt with in a separate annual report. The increase in their number from 15 to 17 is due to the inclusion in 1900 of the Municipal and Dockyard dispensaries at Kidderpore. The out-patients for each of the three years numbered 219,302, 251,822, and 253,615, respectively, giving an average of 241,579, against 235,706 in the preceding triennium. The year 1900 was unhealthy, with a death-rate of 43·32 per mile, but in 1901 the increase of attendance was still maintained, although the general health had much improved. There was a considerable decrease of indoor patients, but the number of out-patients was kept up by the increased attendance of persons suffering from minor illnesses. This is an indication of the increasing popularity of the outdoor departments of the hospitals, of which the Medical College Hospital was the most conspicuous. The Inspector-General mentions three hospitals where the outdoor attendance fell off in 1901, and there seem to have been defects in the management, about which enquiries will be made.

The number of indoor patients was highest in 1900, owing to the unhealthy conditions of the year. In 1901 there was a decrease from 28,372 to 25,989. There is a considerable disproportion between the number of beds available and the requirements in the different hospitals. In the Campbell Hospital there are 752 beds, of which 428 were occupied on an average, and in the Presidency General Hospital there are 234, of which 154 were occupied. There were on an average 600 unoccupied beds in the different institutions. The popularity of the Sambhu Nath Pandit Hospital resulted in overcrowding both in 1900 and 1901, and further accommodation is being provided. The Dufferin Victoria Hospital in 1901 increased its number of patients from 158 to 382.

The rate of mortality among patients was 14·60, 17·57, and 15·70 in the three years. A disproportionately high ratio is returned every year from the Campbell and Howrah General Hospitals, but the Inspector-General is satisfied that this is due to the large proportion of moribund patients admitted into these institutions.

3. It is with satisfaction that the Lieutenant-Governor observes the restoration of public confidence in the hospitals which the plague scare in 1898 had seriously impaired. Evidence of this is given by the increase in the number of women and children treated from 39,706 and 47,977 in 1898 to 49,095 and 60,130, respectively, in 1901, and by the steady increase in the number of patients treated for local diseases and injuries, whose attendance is unaffected by the prevailing health conditions of the year.

4. In paragraph 18 of his report the Inspector-General gives some account of the diseases most prevalent during the triennium. There was a decrease in 1901 of malarial fever and dysentery cases. Cholera was epidemic in 1900 and small-pox in 1901. It is noticeable that disorders due to poisoning have steadily increased, and some inquiries are desirable on the subject. Explanation is needed of the considerable increase of tuberculous diseases and cases of cerebro-spinal fever, which are noticeable features of the period under report.

5. The nursing work at the principal hospitals receives favourable mention. The question of placing the nursing organisation on a more systematised footing, with the view of obtaining wider support from the public, is receiving the attention of Government.

6. *Charitable Dispensaries.*—The total number of dispensaries, outside Calcutta, on the Government list was 492 at the opening of the period under review and 558 at its close. The rate of increase during the preceding triennium has thus been more than maintained, and 128 new dispensaries have been opened in the last six years. The Inspector-General remarks that Bengal is behind other provinces in the number of such institutions in proportion to its population, and refers to his previous suggestion that there should be a dispensary at every thana and in every town or rural area with a population of 3,000 persons. The Lieutenant-Governor is of opinion that the progress made in recent years has, on the whole, been satisfactory. It is true that the existing dispensaries serve a larger area than in other provinces, and that the average attendance at each is lower than in any other province

except Bombay. This the Inspector-General attributes partly to the fact that the proportion of rural to urban population is greater in Bengal than in other parts in India. But a more potent reason, as has on former occasions been pointed out, is the fact that the medical demands of the Province are to a large extent met by the native practitioners, who are to be found in every town or large village, and who do a great deal of free work for the poor. During the last five years the outturn of qualified practitioners from the medical schools of Bengal was three times that of the medical schools of Bombay and the Panjab. It does not appear that much has been done to carry out the proposals to supply medicine-chests to village headmen, or to arrange for visits by dispensary officers to neighbouring markets, and the report contains so little information on these subjects that the Lieutenant-Governor invites the Inspector-General to give him more details as to the areas in which the experiment has succeeded. The plan was well meant, and experience may give useful suggestions.

Not only are dispensaries more numerous, but the number of patients treated has increased in a more than corresponding ratio. The total number of patients treated during the three years was 10,470,463, against 8,398,567 in the preceding triennium, showing a ratio per cent. of population of 4·72 against 3·95. During 1901 the percentage of population treated rose to 5·02. The chief increase was in outdoor patients, as in Calcutta, which is a proof that the attention to small amenities, and the respect to class and caste prejudices, which Colonel Hendley has assiduously inculcated, have resulted in an undoubted growth of popularity. This is also proved by the increased attendance of women and children by 28 and 31 per cent., respectively, over the numbers in 1897. As is natural, charitable relief is much more sought in urban than in rural areas. Some remarkable variations are, however, shown; the percentage of patients to population being as high as 351·13 in Noakhali and as low as 11·46 in Khardaha and 16·75 in Puri. The Inspector-General is making inquiries into the causes of these low returns, but it will probably be found due to the different methods of calculating the population served by the dispensaries.

The number of indoor patients increases slowly, and the daily average rose from 1,976 in 1899 to 2,177 in 1901. The number of beds available rose from 3,436 to 3,628. Attempts are being made to make the indoor wards more popular by providing separate quarters for pauper and moribund patients, and this has been done in 22 dispensaries. The Inspector-General attributes the increased attendance in certain institutions to improvements in administration and management, and the Lieutenant-Governor will gladly help to make these more general. The death-rate of 1901 was considerably lower than that of the preceding years—a result also attributed to improved management. There has been some increase of surgical work, but this is clearly capable of expansion. Credit is due to the officers whose names are specially mentioned in the report.

It is unsatisfactory to find that Civil Surgeons have been less active in inspections during the past year, and Government awaits the report on the subject which the Inspector-General proposes to furnish after taking the explanations of the officers in default.

7. The number of dispensaries managed by local bodies has considerably increased, the most noticeable feature being the rapid growth from 157 in 1898 to 205 in 1901 of institutions under the management of District Boards. The Lieutenant-Governor is pleased to see that the complaint made in the last triennial report of lack of interest on the part of local authorities is not repeated. The income contributed by local funds to medical institutions, which in 1898 was about $4\frac{1}{4}$ lakhs, amounted in 1901 to over $5\frac{3}{4}$ lakhs. In the matter of management, moreover, an improvement has been effected by placing every dispensary, where possible, under a committee, representative not only of the controlling local authority, but also of the general public. This policy has been generally carried out, though the Inspector-General mentions certain places which for no apparent reason are still backward in this matter. In some cases the Committees have not worked well, and it is hoped that Commissioners and District Magistrates will use their local influence to remedy such defects as have been noticed.

8. The main object of appointing Committees is to interest the public in the good management of the dispensaries and to increase subscriptions. The financial results of the triennium show that this arrangement has been to some extent successful. Of the total income of dispensaries, excluding the Calcutta institutions, which for the three years averaged Rs. 11,23,534, an average amount of Rs. 2,90,022, or 25·7 per cent., accrued from subscriptions, which now amount to over 3 lakhs, against 2½ lakhs in the preceding triennium. In addition to the subscriptions many special donations were received, which are not included in the returns. The Lieutenant-Governor fully concurs in Colonel Hendley's appreciation of these individual gifts, but he agrees with him that there should be a larger number of regular subscribers among all classes. This is particularly the case in Calcutta, where the average amount of subscriptions during the triennium was Rs. 14,486, or only a little over 1 per cent. of the average income, of which sum over Rs. 12,000 was subscribed by Europeans. Receipts from the native community, the Lieutenant-Governor regrets to observe, annually diminish. He is constrained to share Colonel Hendley's opinion that the income derived from charity is not worthy of the capital of India. Government contributed nearly 74 per cent. of the whole income of the Calcutta medical institutions. In the mufassal nearly 50 per cent. of the cost is borne by local funds, the income from which, as already indicated, shows a satisfactory increase. The average contribution from Government amounted to Rs. 1,15,140, or about 10 per cent. of the total income.

9. The expenditure on dispensaries has increased from Rs. 8,69,400 in 1898 to Rs. 10,40,168 in 1901. The increase is due mainly to the addition of new dispensaries and to the higher rate of contribution to the pay of Civil Assistant Surgeons, while additional miscellaneous expenditure was incurred on improvements in furniture and other matters intended to render the dispensaries more comfortable and attractive. The cash balance rose from Rs. 45,000 in 1898 to Rs. 1,41,485 in 1901. It is not clear why this balance, which in 13 per cent. of the total expenditure, should be so large. The investments of dispensaries increased during the three years by over 2½ lakhs. In Calcutta the charges were largely increased by heavy expenditure in each year on buildings, particularly in connection with the Medical College Hospital and the Presidency General Hospital. The opening of the new block in the latter Hospital, the additions to the staff, and other improvements have supplied a much-felt want.

10. The period covered by the review was one of considerable administrative progress. Among the reforms effected is the improvement in the position and prospects of the Subordinate Medical Service, which the Inspector-General confidently anticipates will have an important bearing on the working of hospitals and dispensaries. Among other innovations are the transfer of the control of Medical Education from the Director of Public Instruction to the Inspector-General of Civil Hospitals, the training of Civil Hospital Assistants in practical pathology and medico-legal work, and the abolition of the civil store of medicines maintained at district and subdivisional head-quarters for Government servants.

11. The inspection work done by Colonel Hendley, and by Colonel McConaghey in the eight months during which he officiated as Inspector-General, was full and sufficient. The thanks of the Lieutenant-Governor are due to both, and especially to Colonel Hendley for his able administration of the Department. His report is a record of substantial and continuous progress.

By order of the Lieutenant-Governor of Bengal,

E. W. COLLIN,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE REPORTS ON INLAND EMIGRATION FOR THE YEAR 1901.

GENERAL DEPARTMENT—EMIGRATION.

Darjeeling, the 15th July 1902.

RESOLUTION—No. 1108T.—G.

READ—

The Report of the Superintendent of Emigration, Calcutta, on Inland Emigration for the year 1901.

Read also—

The letters from the (1) Commissioner of the Bhagalpur Division, No. 729J., dated the 14th May, and No. 770J., dated the 28th May 1902, and (2) Commissioner of the Chota Nagpur Division, No. 249J., dated 26th May 1902, forwarding with their remarks the reports of the Superintendents of Emigration in their respective Divisions.

Introduction of the Assam Labour and Emigration Act, VI of 1901.

The year 1901 was important from the changes in the administration of inland emigration. The new Act, which consolidated and amended the law relating to emigration to the labour districts of Assam, came into force on the 9th March 1901, repealing Act I of 1882 and Act I (B.C.) of 1889; the changes made in the law were reviewed in this Government's Resolution No. 2153, dated the 3rd May 1901. A revised set of rules under the new Act was published for general information in the *Calcutta Gazette* of the 16th October 1901 under Notification No. 3412, dated the 15th idem.

Arrangements for the working of the Act.

2. The Superintendent of Emigration, Calcutta, has stated at length the action taken by Government to ensure the proper working of the new Act. Five Superintendents of Emigration have been appointed for the following local areas, viz., (1) Ranchi and Palamau, (2) Singhbhum and Manbhum, (3) Hazaribagh, (4) the Sonthal Parganas, and (5) the remaining districts of Bengal. Since the close of the year a Travelling Superintendent has been appointed for Bengal and the Central Provinces. A whole-time officer was appointed Superintendent of Emigration and Registering Officer at Ranchi during the latter part of the year for the four busy months of the year, viz., December 1901 to March 1902.

In this Resolution the reports received from the Superintendent of Emigration in Calcutta as well as of the local Superintendents are reviewed.

Systems of recruitment.

3. For the first portion of the year emigrants were recruited as in former years—(i) by licensed contractors and recruiters, (ii) by special local agents, (iii) by garden sardars, and (iv) went to the labour districts as "free emigrants." The special local agents system of section 62 of Act I of 1882 ceased to exist with the introduction of Act VI of 1901; and a new system of recruitment by specially-employed garden sardars under Chapter V, section 90 of the new Act became legal from the 15th July 1901 in the districts of Manbhum, Hazaribagh, and the Sonthal Parganas.

Number of emigrants.

4. Altogether 30,777 emigrants were despatched to the labour districts as against 65,190 in the previous year; 27,250 embarked at Goalundo and 3,527 at Jatrapur; Assam received 21,663, Cachar 2,596, and Sylhet 2,991 as against 46,635, 6,838, and 11,717 respectively in 1900. The great diminution is partly explained by the fact that the year 1900 was a famine year in Chota Nagpur, and is also ascribed by the Commissioner of that Division to wild stories having been circulated exaggerating the responsibilities incurred by garden sardars under the new Act. There is a further and, to the planter, more serious reason. Coal-mines in Bengal have increased rapidly of late both in number and in size, and the mine-owner is now a formidable competitor

with the tea-planter in the districts of labour-supply. He gives higher wages, and the mines have at least the attraction of being nearer the districts of recruitment.

Recruiting agencies.

5. Adding to the number of contractors, recruiters, and agents returned by the Superintendent of Emigration, Calcutta, the numbers reported by the local Superintendents, it would appear that there were at work during the year 13 contractors with 10 sub-contractors, 161 licensed recruiters, 24 special local agents who were licensed under the old Act, I of 1882, and continued to work until their licenses expired, and 37 local agents, as compared with 2 contractors, with 16 licensed recruiters, 17 special local agents, and 11 local agents in the preceding year. It may be, however, that individuals were licensed as contractors in more than one area, and that some have therefore been *twice* counted.

The increase in the number of recruiters' licenses is considered by Dr. Forsyth to be indicative of the good effect of the warning given to contractors not to avail themselves of the services of unlicensed recruiters.

The number of garden sardars and sardarnis at work in the recruiting districts fell from 4,045 in 1900 to 3,902 in 1901. During the latter part of the year 17 garden sardars with special permits under Chapter V of the new Act were sent to the Chota Nagpur Division, but they despatched no emigrants before the close of the year.

Classification of emigrants.

6. Of the 30,777 emigrants despatched to the labour districts, 11,631, or 34 per cent., as against 40 per cent. in 1900 went as free emigrants; 6 per cent. as against 2 per cent. in 1900 were recruited by the licensed contractors; and 7 per cent. as against 12 per cent. in 1900 by the special local agents; garden sardars recruited 15,041 emigrants, or 48 per cent of the whole number, as compared with 29,493, or 45 per cent., in the previous year. The districts in Bengal outside the Chota Nagpur Division and the Sonthal Parganas contributed only 2,278 of the registered emigrants. The great decrease in the number of "free" emigrants, who numbered 26,300 in 1900, is attributed by the Superintendent of Emigration, Calcutta, to the prohibition of recruiting otherwise than under Chapters III and IV of the Act in the districts of the Chota Nagpur Division, the Sonthal Parganas, and in the Central Provinces, but is no doubt also due to the abolition of registration at Dhubri.

According to the reports of the Superintendents of Emigration, only 5,894 labour contracts were executed during the year, but it is possible that there has been some mistake in the figures furnished, as out of the total number of emigrants despatched to the labour districts, 19,146, including dependants, were registered under the Act. The Superintendent of Emigration, Calcutta, will be asked to explain, in consultation with the other Superintendents, this apparent discrepancy.

Casualties *en route* and sanitary arrangements.

7. Between recruitment and embarkation 255 casualties were ascertained, of which 7 only were deaths, as against 132 deaths in the preceding year. The reduction in the number of casualties on the river journey was very marked, being only 36, or ·11 per cent., as against 227, or ·34 per cent., in 1900. The deaths on the river journey were 26, or ·08 per cent., as against 214, or ·32 per cent., in the previous year.

This result was due to the careful measures adopted for the well-being of the emigrants in transit. Special care was taken by the officials who inspected the depôts, places of accommodation, and rest-houses to see that they were kept clean and well ventilated; that the food and water-supply for drinking, culinary, and ablution purposes were good and sufficient; and that the accommodation and latrine arrangements were satisfactory. Vaccination was carefully and efficiently performed. In all the districts the health of the recruits was good, and there was no epidemic among them of any kind either in the depôts or on the river journey.

Measures taken to ensure the registration of emigrants in the district of recruitment.

8. Special measures were taken to ensure the proper working of sections 33 and 34 of Act VI of 1901, which require registration of emigrants in the district of recruitment. On its being reported that persons acting ostensibly

under section 92 of the Act were sending coolies to licensed recruiters in other districts who registered and put them under contract, contractors were warned that their recruiters must communicate direct with emigrants from the first without the intervention of any third party. They are not prohibited from recruiting within the local areas for which they are licensed emigrants residing elsewhere who come to such areas of their own accord, but they are not permitted to employ intermediaries to bring emigrants to them from other local areas. It was pointed out to contractors that if they make use of such assistance, their licenses and those of their recruiters are liable to be cancelled.

In all districts enquiries were made by the registering officers before registration of non-resident emigrants, and in some cases registration was refused. Before registration of single women is allowed, statements of the recruiter and of other emigrants of the party are recorded. Of the 1,907 emigrants registered by contractors, the largest number, viz., 1,347, or 70 per cent., were again registered in the 24-Parganas. In spite of the precautions taken to have registrations effected in the districts of recruitment, only a small proportion of the emigrants registered in the 24-Parganas and at Raniganj were residents of those districts; and the registration of non-resident emigrants at Calcutta, Howrah, and Raniganj still requires careful attention.

Measures adopted for stopping uncontrolled professional recruiting.

9. The Lieutenant-Governor is glad to observe that licenses were granted after careful enquiry by the Superintendents of Emigration. In Manbhum and Singhbhum a list of licensed contractors and recruiters was communicated to each police thana and outpost. The police were also ordered to instruct the village chaukidars at the weekly parades to see that no person without a recruiter's license is permitted to do any recruiting; and the Emigration Officer at Purulia and the Government Railway Police were ordered to watch the trains and other routes so that no free coolies may be despatched by rail or otherwise except in accordance with the rules made under the Act.

In order to check unlicensed recruiting in the Sonthal Parganas, the Commissioner of Bhagalpur has directed that a list of the licensed recruiters be sent to all thanas, parganaits, and other leading persons once in six months, so that it may be known who are licensed to recruit, and that information may be given about unlicensed recruiters.

Several cases of infringement of rules having been reported by the Emigration Officers at Katihar, Goalundo, and Jatrapur in respect of railway coolies, the provisions of the law were pointed out to the Agent, Assam-Bengal Railway, and he was requested to instruct the railway contractors and labour agents to build and maintain properly-equipped rest-houses at the several halting places on the emigration routes.

10. On the whole it may be said that the year was one of transition to a state of more complete supervision and control of recruitment in those districts, viz, the Sonthal Parganas and the districts of Chota Nagpur, in which past experience has shown increased supervision to be necessary in order to prevent abuses of recruiting among simple and ignorant people.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORT ON THE REFORMATORY SCHOOLS AT ALIPORE AND HAZARIBAGH FOR THE YEAR 1901.

GENERAL DEPARTMENT—EDUCATION.

Darjeeling, the 16th July 1902.

RESOLUTION—No. 1883T.—G.

READ—

The Annual Report on the Reformatory Schools at Alipore and Hazaribagh for the year 1901.

The Annual Report on the Reformatory Schools at Alipore and Hazaribagh has this year been curtailed in accordance with the instructions issued. The Lieutenant-Governor has no objection to the maximum length of the report being fixed at six instead of four pages.

This is the second year of the working of the two Schools under the Education Department.

2. *Admissions.*—It is satisfactory to observe that the number of admissions fell from 128 in 1900 to 120 in 1901, but the number is still large as compared with the admissions in 1898 and 1899. The Boards of Management, as desired in last year's Resolution, examined the admissions for 1900 to ascertain whether any of the boys could not be more suitably dealt with under the provisions for youthful offenders. The result of this examination led to the release of 4 boys from the Hazaribagh School. The Lieutenant Governor requests that the Boards of Management will continue to carefully scrutinise all admissions, and report to Government any cases of boys who, in their opinion, could have been more suitably discharged on probation of good conduct under section 562 of the Criminal Procedure Code or after due admonition under section 31 of the Reformatories Act of 1897. It has been ascertained from the judicial returns for the year that 256 offenders, probably in most cases juvenile, were dealt with during the year under section 562 of the Criminal Procedure Code, and 44 were discharged after admonition or were delivered to parents and guardians under section 31 of Act VIII of 1897. With reference to the Director's remark that the Board of Management of the Alipore School are of opinion that it is not desirable to send boys to a Reformatory on first conviction, or boys below ten years of age, it must be pointed out that the Lieutenant-Governor has decided that no such absolute instructions can properly be issued to the Courts.

3. *Health, Discipline, and Education.*—The health of the boys in both Schools was good; the admissions to hospital in the Hazaribagh School showed a slight increase. Punishments were more frequent in the Alipore School than at Hazaribagh, and discipline appears not to be so good in the former School. Satisfactory progress has been made in both Schools in elementary education; drill and gymnastics are included in the training, and games are played.

4. *Industries.*—In accordance with the system inaugurated last year of concentrating, as far as possible, boys of agricultural castes at Hazaribagh and those of industrial castes at Alipore, 41 boys were regularly employed at Hazaribagh on cultivation and 21 boys on market-gardening, but at certain seasons of the year nearly all the boys were employed on agricultural work. These arrangements are in accordance with the Lieutenant-Governor's orders, but there has been great delay in giving effect to them in the Hazaribagh School. In the Resolution of 13th September the teaching of market-gardening was enjoined. A cultivator to teach market-gardening was not got till June 1901, and then was badly selected and was a failure. Government has not been able to approve the proposal of the Hazaribagh Board of Management to engage a gardener from Saharanpore. The object is not to teach the boys floriculture and horticulture, but to make them expert market-gardeners, and for this purpose a good market-gardener of the Koeri caste from the neighbourhood or from Bankipore is to be preferred to a Saharanpore gardener.

There was a considerable decrease at both Schools in the profits from manufactures. This was fully anticipated in the orders passed on the reports

for 1899 and 1900, when it was directed that industries should be taught to the boys, preferably the trades of their castes which would be useful to them in after life. Local conditions may vary, however, and it is the duty of the Boards of Management to look out for openings for the boys. It was stated in last year's Resolution that the Lieutenant-Governor took no exception to the diminution of profits from industries. He desires to say again emphatically that such a diminution of profits should not be weighed against the reform which he has enjoined; and he regrets to notice that the Board of Management and the Superintendent at Alipore did nothing during the year to carry out a reform which he has had much at heart. Seventy-two boys were taught carpentry at Alipore in 1901, against 60 in 1900; 19 were taught tinsmithing, against 8; and 48 were taught book-binding, against 40. It is certain that there was no such increase in the number of lads, who are carpenters and book-binders by caste, and that boys of those castes did not reach anything like the numbers taught these trades. Were these boys taught the trades that would be likely to be useful to them when they left the School? From page 4 of the report it appears that out of 125 boys released from Alipore in the years 1898 to 1900, only 13 are now following the trades taught to them in the School. The figures above cited for the year under review show that this ill-success is likely to be aggravated, and the Lieutenant-Governor again calls the very special attention of the Director and of the Board of Management to the subject.

5. *Licensing.*—In last year's report it was stated that the Board of Management, Alipore, had taken no action in the important matter of licensing boys out. The Lieutenant-Governor is therefore pleased to learn that during the year under review 5 boys from the Alipore School were licensed out for work in the Upper Hooghly Mills, and that there is a probability of the system being extended. It is not stated whether these boys were wanted for carpentry or for weaving, and the presence of this opening for employment accentuates the apparent absence of any arrangement to prepare lads for it. The Lieutenant-Governor is gratified to learn that during the year under review 34 boys as against 12 last year were licensed out from the Hazaribagh School, and he congratulates the Board on the intelligence and care with which they have ordered the arrangements of the School. When, as apparently at Hazaribagh, an exhaustless field is opened out for employment in mining, carpentry, and blacksmith's work, it is quite a matter for the Board's consideration, if they are satisfied as to the stability of the opening, to prepare more directly for it. It is true that this would be a divergence from the plan, by which the Hazaribagh School was to be a school for agriculture. But the whole object of the Schools is to fit the lads to earn an honest livelihood; and if local conditions give a really valuable opening to that end in other directions, the Lieutenant-Governor has no objection whatever to deviation from the general plan to utilize it. He trusts that the licensing system will become more popular. No corresponding advantage is to be gained by resort to the ancient apprenticing system of 1850. By the apprentice system no wage, but only board, lodging, clothing, and instruction is secured for the boy. It is the direct aim of the School that the boy should go out instructed.

6. *Training of Boys.*—The efforts of the Educational Department to follow up the history of every boy for three years after his release were more successful during the year under review than in the previous year. The percentage of failure to trace out the boys after their release to the total number discharged in 1900 was 24 per cent. as against 34 and 33 per cent. in the years 1899 and 1898. The results are not, however, as satisfactory as the Lieutenant-Governor had hoped for. With an agency like the Educational Department, which commands the sympathy of the people at large, there should be no excuse for failure to trace out and account for nearly the whole number of boys released. The Lieutenant-Governor trusts that the procedure now adopted of releasing boys in the presence of an Educational officer may lead to better results, but success depends on the personal zeal and interest taken in the matter by the Educational officer himself.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

DISTRICT ROAD FUND ACCOUNTS FOR THE QUARTER ENDING 31st MARCH 1901.

No. 3518R.C.

Government of Bengal,

PUBLIC WORKS DEPARTMENT.

ROAD CESS.

Dated Calcutta, the 18th July 1902.

RESOLUTION.

READ—

Letter from the Accountant-General, Bengal, No. 286A.C., dated the 7th July 1902, submitting statement of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 31st March 1902.

RESOLUTION.—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees in Bengal for the fourth quarter of the year 1901-1902 be published in the *Calcutta Gazette* and circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the statement of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette*.

Ordered also that a copy of this Resolution, and of the statement referred to, be forwarded, for information, to the Commissioners of the Rajshahi, Chittagong, Bhagalpur, and Chota Nagpur Divisions; Superintending Engineers of the Northern and Western Circles; Inspectors of Works, Eastern and Bhagalpur Circles, and to the Financial Department of this Government.

By order of the Lieutenant-Governor of Bengal,

W. A. INGLIS,

Offg. Secretary to the Government of Bengal.

From—R. A. D'O. BIGNELL, ESQ., Commissioner of Police, Calcutta,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit, in accordance with section 41, Act I of 1893, the following report on the working of the Fire Brigade in the Town and Suburbs of Calcutta and in Howrah during the year 1901-1902.

2. The force at the close of the year under review was as follows:—

Lall Bazar.	*Howrah.*	*Bhowanipore.*
1 Superintendent.	1 Engineer.	2 Tindals.
1 Chief Engineer.	1 Native Driver.	12 Khalasis.
2 Assistant Engineers.	5 Tindals.	—
1 European Driver.	1 Fireman.	14
3 Tindals.	18 Khalasis.	—
2 Native Drivers.	3 Syces.	
1 Fireman.	—	
18 Khalasis.	29	
13 Syces.	—	
1 Inspector of Jute Warehouses.		
—		
43		
—		

Watgunge.	*Chitpur.*	*Palmer's Bridge.*
2 Tindals.	1 Engineer.	2 Tindals.
12 Khalasis.	1 Native Driver.	12 Khalasis.
—	2 Tindals.	—
14	1 Fireman.	14
—	12 Khalasis.	—
	3 Syces.	
	—	
	20	
	—	

Hose Carts with 400 feet of hose are also kept at the Sukea's Street, Fenwick Bazar, Jora Bagan, Coomertolly and Alipore Police Stations for emergencies.

A statement showing the receipts and expenditure of the Fire Brigade is annexed to this report. The year opened with a balance of Rs. 19,750-3-11, the receipts amounted to Rs. 85,951-5-3. The total expenditure during the year amounted to Rs. 87,755-9-3, leaving a balance of Rs. 17,945-15-11 at the close of the year.

The increase of expenditure under the head "Establishment" is due to the pay of the khallasis being raised from Rs. 7 to Rs. 8 under Government orders.

The savings under the head of contingencies is principally due to the fact that Rs. 2,300 worth of coal and clothing ordered during the year was undelivered, and therefore not paid for. There was also a saving of Rs. 900 from the sum budgeted for the purchase of hose, and Rs. 650 for the purchase of horses and Rs. 802 for the repair of the Howrah Fire Station, the total savings being Rs. 5,324-12-8.

Rupees 1,500 due to the Calcutta and Rs. 50 to the Manicktollah Municipalities for cost of collection, remained undisbursed at the close of the year, the total decrease under the head of "Other charges" being Rs. 1,663-14-2.

The receipts under the heads of "Hire of Fire Engine," "sale-proceeds of unserviceable hose" and "of horses" considerably improved, and these, together with the decrease already noted, are responsible for the large closing balance.

3. The following table gives the number of fires and the way they were dealt with :—

Description of fire.	Number of fires.	Number of fires attended by Fire Brigade.	Number of fires extinguished by residents.	Number of fires attended by Port Fire Engine	REMARKS.
1	2	3	4	5	6
Fires at which property destroyed valued at Rs. 50 or more.	42	27	12	*3	* Fire Brigade also attended at these fires.
Fres at which property destroyed valued at less than Rs. 50.	82	16	64	†2	† Steam Engine "Damooda" attended in one case.

4. Ten of these fires occurred in buildings licensed under Act I (B.C.) of 1893 and Act I of 1894, in which property to the total value of Rs. 6,37,400 was destroyed.

5. The total estimated value of property destroyed by fire was Rs. 9,17,632-8 against Rs. 8,80,265-10, the value of the property destroyed in 1900-1901.

6. No lives lost during the year at fires, but two of the European crew of the S. S. "Forth" that caught fire at the Hooghly Docks, Howrah, were severely burnt and had to be removed to hospital, where they recovered.

7. The following were the most serious fires :—

(a) On the 3rd December 1901, a masonry building at Ghoosary, Howrah, containing cotton and machinery caught fire and burnt for seven hours and forty minutes. Estimated loss Rs. 80,000.

(b) On the 22nd December 1901, five jute godowns containing jute caught fire at Sulkea, Howrah, and burnt for seven hours. Estimated loss Rs. 1,00,000.

(c) On the 7th January 1902, a fire broke out at Watson's Patent Hydraulic Jute Press at Bag Bazar and lasted for two days and a half. Estimated loss Rs. 3,95,000.

(d) On the 21st February 1902, the contents of masonry jute godowns in Chitpore caught fire and burnt for five hours and forty-five minutes. Estimated loss Rs. 9,300.

(e) On the 24th February 1902, the S. S. "City of Bombay" laden with jute, cotton, gunny and rice, caught fire in the Kidderpore Docks; the fire lasted for 7 hours and 15 minutes. Loss estimated at Rs. 1,05,000.

(f) On March 5th, 1902, a masonry jute godown on Dhurmahatta Street caught fire. Loss estimated at Rs. 1,500. Fire lasted for five and a half hours.

(g) On the 7th March 1902, the flat "Debong" laden with jute caught fire in the Kidderpore Docks. The fire lasted for twenty-three hours. Estimated loss Rs. 1,40,000.

(h) On the 27th March 1902, a masonry godown containing jute caught fire at Shibpore, Howrah, and burnt for thirteen hours and forty-five minutes. Estimated loss Rs. 50,000.

8. Four licenses were granted under section 36, Act I of 1893 for letting off fire-works, rockets, &c. None of the licenses were suspended under Section 37 of the Act.

9. Two prosecutions were instituted under Act IV of 1884 for manufacturing fireworks without licenses : in both cases the accused were convicted and fined.

Statement showing the actual receipts and disbursements of the Fire Brigade Fund for the year ending 31st March 1902.

Calcutta;
The 25th June 1902.

R. BIGNELL,
Commissioner of Police.

WEATHER AND CROP REPORT.

For the week ending on 21st July 1902.

Burdwan.—Rainfall at Sadar 1·01, Kalna 0·66, Katwa 0·75, Raniganj 4·50. Weather cloudy. Ploughing continues. Transplantation going on in places. Fodder and water sufficient. Condition of cattle good. Common rice sells at 12 seers per rupee.

Birbhum.—Rainfall at Sadar 5·17, Rampur Hât 4·52. Weather unsettled. More rain wanted. Sugarcane promising. Fodder sufficient. Common rice sells at 12 seers per rupee.

Bankura.—Rainfall at Sadar 4·93. Vishnupur 1·95. Weather seasonable. Heavy showers on 20th and 21st morning. Transplantation going on well. Sugarcane growing well. Fodder and water sufficient. Common rice sells at 12½ seers per rupee.

Midnapore.—Rainfall at Sadar 1·90, Contai 3·52, Tamluk 1·95, Ghatal 3·04. More rain wanted in Tamluk and part of Sadar. Transplantation going on. Jute and *aus* doing well. Fodder and water sufficient. Weather rainy. Cattle disease reported from thana Binpur. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Contai	12	8	
Tamluk	11	12	
Ghatal	12	0	

Hooghly.—Rainfall at Sadar 2·07, Serampore 0·92, Arambagh 0·52. Weeding of *aus*, sugarcane and jute progressing. Seedlings are suffering for want of rain. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Serampore	10	9	
Arambagh	12	1½	

Howrah.—Rainfall at Sadar 1·43, Ulubaria 0·66. Fall general from 15th to 18th. No fall was recorded at Uluberia on the remaining days of the week, but rain fell on all the days at Sadar. A little more rain wanted for the high lands. Agricultural prospects are generally promising. Lands are being prepared for transplantation, and weeding going on, on lands sown with paddy. No cattle-disease. Fodder and water sufficient. Common rice sells at 10½ seers at Sadar and at 11 seers at Ulubaria.

24-Parganas.—Rainfall at Sadar 1·09, Barasat 1·05, Basirhat 3·05, Diamond Harbour 3·47. Weather rainy and cool. State and prospect of standing crops good, but more rain is wanted in Barasat and Basirhat. Transplantation of *aman* still going on. Common rice sells at 12 seers per rupee; in Diamond Harbour at 10½ seers. Condition of cattle good. Supply of fodder and water sufficient.

Nadia.—Rainfall at Sadar 1·52, Ranaghat 2·20, Chuadanga 2·27, Meherpur 2·22, Kushtia 1·49. Prospects of standing crops good. Fodder and drinking water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Ranaghat	11	0	
Chuadanga	11	0	
Meherpur	10	8	
Kushtia	11	4	

Murshidabad.—Rainfall at Sadar 3·96, Kandi 1·07, Jangipur 4·20, Lalbagh 6·74. Weather seasonable. Prospect of sugarcane and jute good. Transplantation of *aman* seedlings going on. State of *bhadoi* good. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	12	per rupee.
Kandi	12	4	
Jangipur	11	8	
Lalbagh	11	4	

Jessore.—Rainfall at Sadar 2·06, Jhenida 2·38, Magura 2·03, Narail 0·84, Bangaon 1·82. Weather seasonable. Prospects of crops fair to good. Fodder and water sufficient. No cattle-disease. Common rice sells at 12 seers per rupee; at Narail at 10¾.

Khulna.—Rainfall at Sadar 4·24, Bagerhat 8·01, Satkhira 5·26. Weather seasonable. *Aman* transplantation commenced. *Aus* doing well. Jute prospects fair. Fodder and water sufficient. Cattle-disease reported from out-posts Fakirhat and Kachua and thana Asasuni. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	10	per rupee.
Bagerhat	12	0	
Satkhira	9	8	

Rajshahi.—Rainfall at Sadar 6·47, Nator 1·70, Naugaon 4·39. Transplantation of winter rice continues. Condition of standing crop good. Cattle-disease reported from Lalpur thana. Common rice selling at 12 seers per rupee.

Dinajpur.—Rainfall at Sadar 3·29. Fall in the district general, varying from 1·51 to 6·29. Weather seasonable. Standing crops good. Transplantation of winter rice progressing. No cattle-disease. Fodder and drinking-water plentiful. Rice selling at 12 seers per rupee.

Jalpaiguri.—Rainfall at Sadar 2·52, Alipore Duars 4·28. Fall not general. Weather hot and cloudy with occasional showers. Harvesting of *bhadoi* commenced. Transplantation of *haimanti* going on. Prospect favourable. Common rice sells at 10½ seers per rupee. Fodder and water sufficient.

Darjeeling.—Rainfall at Sadar 11·61, Kurseong 11·79, Siliguri 4·21, Kalimpong 7·44. Weather seasonable. *Hills—Haimanti dhan* being cultivated. Maize, potato, *chota marua* and *bhadoi dhan* doing well. *Terai*—Transplanting *haimanti* paddy going on. Prospects fair. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	11	0	

Maize sells at Darjeeling at 16 seers and at Kalimpong at 20 seers per rupee.

Rangpur.—Rainfall at Sadar 3·64. Fall general. Weather cloudy and rainy. Cutting of *aus* and jute and transplantation of *aman* going on. Cattle-disease still prevails in Gaibanda. Common rice sells at 11 seers per rupee.

Bogra.—Rainfall at Sadar 1·90. Fall general. Weather hot and cloudy. Cutting of *aus* and jute and transplantation of *aman* going on in places. Prospects good. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Pabna.—Rainfall at Sadar 4·91, Sirajganj 3·00. Fall general. Weather rainy and hot. *Aus* paddy and jute are being harvested. *Aus* partly damaged by excessive rainfall. Prospects of standing crops fair. Fodder and water sufficient. No cattle-disease. Common rice sells at 10 seers per rupee.

Dacca.—Rainfall at Sadar 3·8, Manikganj 4·38, Munshiganj 5·93, Narayanganj 4·82. Prospects of crops fair. Weather seasonable. Fodder available. No cattle-disease. Common rice sells at 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 1·60, Jamalpur 3·06, Kishorganj 2·48, Nitrokona 6·08, Tangail 6·12. Weather hot and cloudy. Winter rice is being transplanted. *Aus* has suffered from heavy rain; outturn estimated at 70 per cent. Jute steeping commenced. Fodder and water sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Kishorganj	11	0	
Jamalpur	12	0	
Netrokona	12	3	
Tangail	10	2	

Faridpur.—Rainfall at Sadar 5·00, Goalundo 2·91, Madaripur 3·81. Weather—Storm and heavy rain. Harvesting of *aus* paddy and steeping of jute begun. Prospects of *aman* paddy improving. Fodder sufficient. No cattle-disease. Common rice sells at 11 seers per rupee.

Backergunge.—Rainfall at Sadar 9·33. Fall general, but heaviest at Patuakhali, 17·22. Weather seasonable. Transplantation of *aman* going on. Cattle-disease in thana Mathari. Fodder and water sufficient. Common rice sells at 10¼ seers per rupee.

Tippera.—Rainfall at Sadar 4·45, Brahmanbaria 1·95, Chandpur 6·01. Weather seasonable. Prospects not good in Sadar. Harvesting of *aus* paddy and jute commenced and transplantation of *aman* continues. Fodder and water sufficient. No cattle-disease. Common rice sells at 11 seers per rupee.

Noakhali.—Rainfall at Sadar 7·29, Feni 11·31. Fall general. Weather rainy. Transplantation of *aman* continues. Prospects of *aus* fair. Cattle-disease reported from two thanas. Fodder and water sufficient. Condition of betelnut fair. Common rice sells at Sadar at 10 seers per rupee.

Chittagong.—Rainfall at Sadar 19·72, Cox's Bazar 13·60. *Aman dhan* is being sown. Water and fodder sufficient. Common rice sells at 12¾ seers per rupee.

Chittagong Hill Tracts.—Rainfall at Sadar 4·42. Fall general. Weather uncertain. *Joom* paddy progressing favourably. Winter rice sowing proceeding. Cattle-disease reported in the jurisdiction of Mahalcherri police-station. Common rice selling at 12 seers per rupee.

Patna.—Rainfall at Sadar 1·66, Barh 1·72, Dinapore 2·97, Hilsa 2·60, Bikram 1·98. Weather cloudy. Sowing of Indian-corn and paddy continues. Sugarcane doing well. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Patna	11	0	per rupee.
Barh	11	4	
Dinapore	11	8	

Gaya.—Rainfall at Sadar 2·95, Jahanabad 2·58, Aurangabad 0·37, Nawadah 1·00. Weather hot and rainy. Sowing of maize over. Transplantation of *marua* continues. Sugarcane doing well. More rain wanted, specially in thana Sherghati. Fodder and water for cattle sufficient. Average price of common rice is 11 seers per rupee.

Shahabad.—Rainfall at Sadar 1·18, Buxar 2·12, Bhabhua 1·22, Sasaram 1·53, Dehri 0·31. Weather hot with occasional showers. Agricultural operations in progress. Fodder and water sufficient. No cattle-disease. Rice sells at Sadar at 11 seers per rupee.

Saran.—Rainfall at Sadar 1·85, Siwan 4·16, Gopalganj 3·16. Weather cloudy and rainy. Standing crops looking well. Rain wanted for transplantation of winter paddy. Fodder and water sufficient. No cattle-disease. Rice sells at 11½ seers per rupee.

Champaran.—Rainfall at Sadar 2·89, Bettiah 3·13. Weather hot and cloudy. Standing crops doing well. Weeding of *bhadoi* and transplantation and sowing of paddy going on. No cattle-disease. Fodder and water sufficient. Common rice sells at 12¼ seers and maize at 23½ seers per rupee.

Muzaffarpur.—Rainfall at Sadar 2·12, Hajipur 2·13, Sitamarhi ·70. Weather hot and cloudy generally. Sowing of *bhadoi* crops almost over. Transplantation of paddy going on. Prospects promising. More rain wanted. Fodder and water sufficient. Very few cases of cattle-disease in Sitamarhi subdivision. Prices are—Common rice 11¼ seers, maize 19 seers a rupee.

Darbhanga.—Rainfall at Sadar 1·60, Samastipur 1·19, Madhubani 0·44. Weather cloudy with east wind. Transplantation of paddy is going on. Fodder and water sufficient. Cattle-disease is reported from Sadar and Phulparas thanas. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Samastipur	12	0	
Madhubani	11	11	

Monghyr.—Rainfall at Sadar 2·32, Begusarai 1·86, Jamui 1·07. Weather seasonable. *Bhadoi* and paddy sowings continue. Weeding vigorously going on. Transplantation of *mahua* and paddy in progress. Standing crops promising. Indigo and sugarcane doing well. Fodder and water sufficient. A few cases of cattle-disease reported from Begusarai thana. Common rice sells at Sadar at 10½ seers and at subdivisions at 11 seers per rupee.

Bhagalpur.—Rainfall at Sadar 1·58, Banka 0·99, Madhipura 0·52, Supaul 0·86. Weather cloudy with occasional rains. Transplantation of winter rice going on except in Supaul, where it has stopped for want of rain. Standing crops doing fairly well, though in some places seedlings have withered. More rain wanted. *Marua* has suffered much. Sugarcane in Banka doing well. Fodder and water sufficient. Cattle-disease reported from Supaul, Banka and Sadar subdivisions. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	6	per rupee.
Banka	11	14	
Madhipura	13	0	
Supaul	13	4	

Purnea.—Rainfall at Sadar 3·05, Kishanganj 1·16, Araria 2·05. Fall general. More rain is needed for transplantation of *aghani* seedlings. Prospects on the whole good. Weather hot and cloudy with easterly wind. A few cases of cattle-disease reported from outpost Palasi. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	9	0	per rupee.
Kishanganj	11	0	
Araria	12	0	

Malda.—Rainfall at Sadar 2·33, Chanchal 3·11, Sibganj 2·62, Gojal 3·21. Fall general. Weather rainy and hot. Harvesting of *bhadoi* going on in places. This crop is reported to have been damaged to a small extent at thana Nawabganj. Transplantation of winter paddy in progress. More rain is wanted. No cattle-disease. Fodder and water available. Common rice sells at 11½ seers per rupee.

Sonthal Parganas.—Rainfall at Sadar 3·83, Deoghur 6·29, Godda 4·98, Jamtara 6·81, Pakaur 2·92, Rajmahal 1·19. Weather hot and cloudy with occasional rain. Sugarcane and Indian-corn doing well, transplantation has begun in places, but more rain needed generally. Fodder and water sufficient. Common rice sells at Sadar at 11¾ seers per rupee. Cattle-disease reported from Pakaur.

Cuttack.—Rainfall at Sadar 9·76. Smaller quantity in other parts except Banki, where it amounted to 16·01. Weather of usual monsoon character. *Beali* being harrowed and *sarad* reploughed. Prospects generally good. Fodder and water sufficient. Common rice sells at 13 seers 2 chitaks at Sadar.

Balasore.—Rainfall at Sadar 2·72. Fall general and beneficial to crops. Harrowing progressing. Prospects good. Sugarcane, jute and oilseeds doing well. Rice sells at 13 and 15 seers per rupee at Sadar and Bhadrak respectively. Fodder and water sufficient.

Angul.—Rainfall at Sadar 6·65, Chhindipada 7·43. Fall general Weather rainy. Puddling and transplantation of *sarad* paddy in progress. Cattle-disease not reported. Fodder and water sufficient. Common rice sells at 12 and 15 seers per rupee at Sadar and interior respectively.

Puri.—Rainfall at Sadar 9·53. Weather cloudy. Rainfall throughout the whole district. Winter rice and *bhadoi* paddy in good progress. Sugarcane and cotton growing well. Fodder and water-supply sufficient. Cattle-disease reported. Coarse rice sells at 13 seers 2 chitaks per rupee.

Hazaribagh.—Rainfall at Sadar 2·80, Giridih 3·98. Weather seasonable. Ploughing and sowing continue. Fodder and water sufficient. Common rice sells at 11½ seers per rupee both at Sadar and Giridih. More rain wanted.

Ranchi.—Rainfall at Sadar 4·67. Fall general. Weather of settled monsoon character. Prospects of standing crops good. Transplantation of paddy commenced in places. Cattle-disease reported from several thanas. Fodder and water sufficient. Common rice selling at 13¼ seers per rupee.

Palamau.—Rainfall general. Weather cloudy. *Bhadoi* sowings still in progress. Prospects good. Sugarcane doing well. Cattle-disease decreasing. Fodder and water sufficient. Prices are at Sadar—Rice 10 seers, 2 chitaks, maize 23 seers 9 chitaks.

Manbhum.—Rainfall at Sadar 3·57, Gobindpur 2·40. Fall general except in thana Chas. Weather seasonable. Prospects of crops good. Transplantation of winter rice in progress. Fodder and water sufficient. Cattle-disease not reported. Average price of common rice is at Sadar 12 seers and at Gobindpur 11 seers per rupee.

Singhbhum.—Rainfall at Sadar 8·87. Weather seasonable. Transplantation of paddy in full swing. Average price of rice is 13⅞ seers per rupee in the district; at Chaibassa 12 seers per rupee.

General Summary.—The rainfall during the week was general and at places heavy, but more rain is wanted in the districts of Saran, Muzaffarpur, Bhagalpur, Purnea and Hazaribagh and in parts of Gaya and Midnapore. Transplantation of winter rice in progress. Harvesting of early rice and jute continues in some parts of North and East Bengal. Sugarcane doing well. Prospects fair. Cattle-disease reported from 16 districts. No want of fodder or water. The price of common rice has risen in 11 districts, fallen in 10, and is stationary in the rest.

The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·518
	Hours.
The total number of hours of bright sunshine	19·8
The maximum possible number of hours of sunshine	93·4
	°
The mean temperature of the seven days	84·0
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	83·5
The extreme variation of temperature	14·7
The maximum temperature	93·1
	Miles.
The highest velocity of the wind in one hour	15
	%
The mean relative humidity	84
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	86
	Inches.
The total fall of rain from 13th to 19th July 1902	0·88
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·76
The total fall from 1st January to 19th July 1902	29·80
The average fall of the corresponding period for 24 years, Surveyor-General's Office	28·98

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; ∠, lightning.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 21st July 1902.

G. W. KÜCHLER,
for *Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.*

BENGAL AND NORTH-WESTERN RAILWAY.

(a) The decrease is chiefly in coal.

* Added number of passengers 5,887 and deducted Rs. 7,817 on account of difference between the approximate and audited figures for the week ended 24th May 1902.
" " " 541 and " 2,065 " supplemental figures for 31st March 1902.
" " " 8,775 and " 48,479 " special and extra troop trains, &c., not included in previous returns.

† " " maunds 2,52,537 and " 4,952 " difference between the approximate and audited figures for the week ended 24th May 1902.
" " 84,435 and " 38,893 " supplemental figures for 31st March 1902.
" " 90,000 and " 22,000 " foreign inward invoices not included in previous returns.
" " 1,80,000 and " 40,000 " adjustments in connection with Foreign Railways' Division sheets.
Deducted " 2,000 " rebooking freight to be written off.
" " 50,000 " estimated amount of outstandings relating to the half-year ended 31st December 1901.
" " 31,000 " forwarded traffic suspense account.
" " 57,000 " traffic carried in excess over E. I. Ry. route reserved for payment to Foreign Railways.
" " 10,48,000 " rebate on coal for the half-year.
" " 16,000 " demurrage to be written off.
" " 40,000 " estimated amount of overcharges to be taken credit for by stations.

‡ Added " 539 " telegraph earnings of the S. B. Ry. for the half-year creditable to the E. I. Ry. proper.
" " 310 " difference between the approximate and audited figures for the week ended 24th May 1902.
" " 3,132 " supplemental figures for 31st March 1902.
" " 1,31,181 " rents of dwelling-houses and stations and unpaid or unclaimed salaries, &c., &c., not included in previous returns
Deducted " 2,57,665 " hire and demurrage, hire of vehicles and hire of locomotives which have been shewn as a credit to expenditure.

§ Audited figures up to 24th May 1902.

1902. *Abstract of progressive weekly returns of all earnings for 1902 in comparison with 1901.*

DECLARATION OF STATE HOLIDAYS.

FINANCIAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 28th July 1902.

RESOLUTION—No. 3439Mis.

READ—

The Resolution of this Government, No. 1624T.—F., dated 31st October 1901, on the subject of the holidays given in Government offices and the practice regarding their enjoyment by clerks and other servants of Government.

Read also—

A letter from the Government of India in the Home Department, No. 1799, dated 12th June 1902.

IN paragraph 4 of the Resolution above cited, it was remarked that, under the orders of the Government of India, the State holidays declared by the Local Government by notification under section 25 of the Negotiable Instruments Act to be public holidays would be in future ordinarily confined to the 24th May, the birthday of Her late Majesty, and the 9th November, the birthday of His Majesty the King-Emperor, and that these days would be declared by notification in the *Calcutta Gazette* to be public holidays.

2. In their letter of the 12th June 1902, the Government of India direct, in modification of these orders, that in future years a State holiday shall be notified under the Negotiable Instruments Act on May 30th or such other date as may be appointed for the celebration of the King's birthday in India, and that no holiday shall be declared on May 24th or November 9th in future.

ORDER.—Ordered that a copy of these orders be forwarded to all Heads of Departments, Commissioners and District Magistrates (through Commissioners), and to the several Departments of the Secretariat for information and guidance.
Ordered, also, that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

E. W. COLLIN,
Offg. Secretary to the Govt. of Bengal.

REPORT UNDER SECTION 41 OF BENGAL ACT I OF 1893 ON THE WAREHOUSES IN CALCUTTA FOR THE YEAR 1901-1902.

NOTIFICATION—No. 1831M.

The 22nd July 1902.—The following report is published for general information.

E. W. COLLIN,
Offg. Secy. to the Govt. of Bengal.

No. 7090M., dated Calcutta, the 23rd June 1902.

From—The HON'BLE MR. R. T. GREER, I.C.S., Chairman of the Corporation of Calcutta,

To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit the following report under section 41 of Act I of 1893 (B.C.) of warehouses in Calcutta for the year 1901-1902.

2. The fees under section 10 of the aforesaid Act continued to be levied at $7\frac{1}{2}$ per cent. on the annual valuation of warehouses.

3. The following statement gives the results of applications for licenses:—

Applications: Pending since last year.	Applications: Received during the year.	Total.	Nature of application.	Number sanctioned.	Number refused.	Number pending.
2	1	3	Jute	1	1	1*
6	57	63	Wood, &c.	60	2	1
8	58	66	...	61	3	2

* Pending opinion of the Commissioner of Police.

4. Eight licenses issued for 1900-1901 and 569 for 1901-1902. The following is a statement of the aggregate amount of receipts:—

	Rs.	A.
License fees for 1900-1901	402	8
Ditto 1901-1902	22,653	0
Mutation fees and fines, &c.	189	2
Total ...	23,244	10

5. Of 597 licenses for warehouses in 1900-1901, 539 were renewed and 17 were cancelled as vacant or unoccupied or not assessable under the Act, while the license fees of 41 remained unrealised at the close of the year.

6. The following statement shows the receipts and disbursements of the warehouse fund during the year 1901-1902:—

RECEIPTS.	Amount. Rs. A. P.	Total. Rs. A. P.	DISBURSEMENTS.	Amount. Rs. A. P.	Total. Rs. A. P.
To Jute warehouse license fees ...	23,055 8 0		By contribution to the Fire Brigade	30,557 8 0	30,557 8 0
Miscellaneous receipts and fines ...	189 2 0	23,244 10 0

RESOLUTION ON THE ANNUAL REPORT ON THE POLICE ADMINISTRATION OF THE TOWN OF CALCUTTA AND ITS SUBURBS FOR THE YEAR 1901.

RESOLUTION No. 3258J.

POLICE.

Dated Calcutta, the 29th July 1902.

READ—

The Annual Report on the Police Administration of the Town of Calcutta and its Suburbs for the year 1901.

Read also—

The Reports for the two previous years and the orders of Government recorded thereon.

IN contrast to previous years, the Commissioner of Police, Calcutta, has submitted his Annual Report on the Police Administration in the Town and Suburbs of Calcutta, with excellent punctuality.

2. The office of Commissioner of Police was held from the beginning of the year to 16th April by Mr. A. H. James: on his retirement, Mr. E. M. Showers was appointed to the post, but retired on the 5th September to join a responsible appointment under Government in South Africa. For the remainder of the year Mr. F. L. Halliday, Officiating Deputy Commissioner, acted as Commissioner. The constitution of the force under the Commissioner's control underwent practically no change during the year, and the number of casualties amongst its members, and of punishments inflicted, presents little variation from the figures of preceding years.

3. As regards the working of the force, the number, both of cognizable offences reported and of non-cognizable cases instituted, shows a remarkable decrease in comparison with the figures for the two preceding years 1899 and 1900 Under cognizable offences there were 25,115 cases reported, against 38,353 in 1900 and 34,282 in 1899: the decrease in the matter of the more serious heads of crime, offences against public tranquillity, persons and property calls for little notice, and it is only when the figures under the more unimportant heads, such as 'Public and Local nuisances,' 'Police Act' and 'Cruelty to Animals Act' come to be examined, that the decrease becomes significant. The figures in Statement A, Part III, in the two Reports for 1900 and 1901, show that there were in 1900, 3,571 cases of Public and Local nuisances and 10,037 cases under the Police Act reported by the Police, against 1,852 and 5,809, respectively, in 1901. Similarly, there were in 1901 only 3,602 offences reported under the Cruelty to Animals Act, as compared with 6,780 in 1900.

These figures are of offences reported and not of prosecutions instituted: the percentage of the latter to cases reported, as also of the success of such prosecutions, is much the same in 1901 as in previous years, and calls for no notice.

Though this was not explained in the Report, it has subsequently been elicited that the decrease under 'Public and Local nuisances' is fictitious and due to the non-inclusion by the Chief Presidency Magistrate under this head of 'drunk and disorderly cases,' which have this year for the first time been shown under the Police Act. This departure has made a difference roughly of 2,000 in the cases returned under 'Public and Local nuisances' by the Court in question, and explains the apparent decrease in the Commissioner's Report. The explanation, however, makes the decrease in the figures under the 'Police Act' the more remarkable: there is nothing to show that the number of 'drunk and disorderly' cases in 1901 was less than in 1900, and for the purposes of comparing the Commissioner's figures under the Police Act for the two years, it is necessary to eliminate from the figures for the later year the 2,000 (roughly) cases, which have now been shown there for the first time,

with the remarkable result that the figures under this head fall from 10,037 in 1900 to 3,809 in 1901.

In his Report the Commissioner contents himself with briefly ascribing this noticeable decrease, as well as the little less marked diminution in the 'Cruelty to Animals' cases, to the general strike amongst carters and hackney-carriage drivers, which took place in Calcutta and its Suburbs in June 1901, merely noting that the average of offences reported under 'Public and Local nuisances,' 'Police Act,' and 'Cruelty to Animals' averaged 1,912 per month in the five months preceding the strike, and 731 per month in the seven months which followed it. He has not discussed in the Report how far these significant figures bear out the findings of Government as to the causes which led to this widespread strike, though the desirability of such discussion would appear to be obvious. From subsequent communications, however, with the Commissioner, it appears that as regards the 'Cruelty to Animals' cases, the number sent up by the Police shows little variation from that sent up by them in previous years, and that the decrease noticed is due to the employment by the Calcutta Society for the Prevention of Cruelty to Animals of fewer Agents, and to diminished activity amongst the numbers so reduced since the strike. The reasons for the decrease under this head are therefore to be sought for outside the actual working of the Police, and need not be further examined here.

The case with regard to the falling off of offences under the Police Act is different: the Commissioner of Police attributes the result under this head to the fact that the men under him refrained from making arrests under clauses (3), (6), and (7) of section 66, Act IV of 1866, and the corresponding section in the Suburban Act, in order to minimise the chance of another strike: the sections in question contain provisions against the driving of carts, carriages or vehicles on the wrong side of the road, the leaving of such conveyances without due control, and the obstruction of thoroughfares by such conveyances. The full enquiry into the strike of June 1901 brought out clearly that one of the chief causes which led to it was the habitual black-mailing by the Police of hackney-carriage drivers and cartmen in Calcutta: on the figures now under examination there can thus be set only one of two interpretations; either that the Calcutta Police misused their powers under the Act even more seriously than appeared from the facts and figures before the Committee which enquired into the strike, or that since the strike the Police have neglected to carry out the provisions of the law with regard to the regulation of traffic. It appears that the late Commissioner was of opinion that too much power was given to the rank and file of the Police, and gave them to understand that such cases should be dealt with by officers of the force only. This was, it is stated, one cause of the decrease, another cause was that the Police were unnerved by the punishments inflicted on some of their number, so that they preferred to remain passive spectators of the infringement of the law. It is clear that they failed in the proper performance of their duties either before or after the strike. The Lieutenant-Governor would have been better pleased if the Commissioner's Report had contained some discussion of the facts, and he trusts that with improved supervision the Police will show more consistent work, neither excess of zeal nor neglect of their duties in future.

It is understood that the Commissioner has now under examination the figures for the present year so far as they are available, and in view of the fact that there was within the last month a second, though abortive, attempt at a cart strike in Calcutta, the Lieutenant-Governor trusts that the figures will be very closely scrutinised with a view to seeing that the attempted strike was not the outcome of revived practices of blackmailing on the part of the local Police. In this connection it may be noted that the arrangements which have lately been sanctioned for the better supervision of the control of the cart traffic between the East Indian Railway station at Howrah and the Strand Road should do much to put a final stop to such illegal practices so far as they affect the cartmen who ply within this area.

The large decrease in non-cognizable cases from 27,508 in 1900 to 9,640 in 1901 is almost entirely the result of a diminution under municipal cases from 22,429 to 5,893. This is chiefly the outcome of the changes in procedure

introduced by the new Municipal Act, which did not come into force till April 1900. Under the new Act the professional and license tax, and the tax on carriages and animals are generally realized without recourse to the Courts, and prosecutions are seldom resorted to. Thus in 1900 there were 12,500 license-tax prosecutions, and only 69 in 1901: the figures for 1900 were also swollen by 4,245 cases under the old Act, all such cases being required by the law to be filed before 1st April 1900.

4. Apart from the large decrease in cognizable and non-cognizable offences, there is little in the report to call for notice. The Fire-Brigade did good work, and it is satisfactory to notice that there was no loss of life by fire during the year. The finger-impressions of 1,971 persons charged with offences against property were taken during the year, with the result that in no less than 763 cases the men concerned were identified in the office of the Inspector-General of Police.

5. There were 62 false cases in the Town against 44 in 1900, and 20 in the Suburbs against 29 in 1900. It appears that of the five prosecutions for bringing a false charge decided in the Town, in four a sentence of fine only was passed. The Lieutenant-Governor regrets to find that his remarks last year on the desirability of imposing a deterrent sentence, which a fine can often not be, in such cases have been so disregarded, and trusts he will not have occasion again to call attention to this matter.

6. There has been an increase from 2,979 to 3,321 in the number of fire-arms, rifles, guns and pistols imported, and from 782 to 838 in the number of weapons purchased in India by dealers. During the present year restrictions have, however, been imposed on the importation of rifles, and of Government bore ammunition, as also on the sale and possession of European revolvers and magazine pistols.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Commissioner of Police, Calcutta, for information, and for communication to the Presidency Magistrates.

Ordered that a copy of this Resolution be forwarded to the Commissioner of the Presidency Division, the Chairman of the Corporation of Calcutta, and the Municipal Department of this Government, for information.

Ordered, also, that a copy of the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Chief Secy. to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending on the 28th July 1902.

Burdwan.—Rainfall at Sadar 2·17, Kalna 1·42, Katwa 5·71, Raniganj 1·73. Weather cloudy with occasional showers. Transplantation going on. Fodder and water sufficient. Condition of cattle good. Common rice sells at 12 seers per rupee.

Birbhum.—Rainfall at Sadar 2·37, Rampur Hat 4·16. Weather cloudy and rainy. Transplantation going on. Sugarcane promising. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Bankura.—Rainfall at Sadar 5·77, Vishnupur 2·60. Transplantation of paddy going on. More rain is wanted. Sugarcane promising well. No cattle-disease. Fodder and water sufficient everywhere. Common rice sells at 12¼ seers per rupee.

Midnapore.—Rainfall at Sadar 3·24, Contai 3·32, Tamluk 6·20, Ghatal 5·25. Weather rainy. Transplantation of *aman* going on. Sugarcane doing well. Fodder and water sufficient. State of bombyx mori fair at Ghatal. Cattle-pox reported from thana Binpur. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Contai	12	0	
Tamluk	11	12	
Ghatal	12	0	

Hooghly.—Rainfall at Sadar 3·39, Serampore 2·72, Arambagh 2·97. More rain wanted. State of standing crops good. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Serampore	10	10	
Arambagh	12	1½	

Howrah.—Rainfall at Sadar 4·27, Ulubaria 3·78. Fall general. No more rain wanted for some time. Agricultural prospects fair except in the lowlying lands within the jurisdiction of thana Jagatballavpur and the Ampta basin which have been submerged, and where the crops are under water, and the seedlings are too short to be transplantated. No cattle-disease. Common rice sells at 10½ seers at Sadar and at 11 seers at Ulubaria.

24-Parganas.—Rainfall at Sadar 4·78, Barasat 3·11, Basirhat 1·18, Diamond Harbour 2·66. Frequent rain, good monsoon weather. State of standing crops good. Prospect fair. More rain wanted in all subdivisions. Transplantation going on. Common rice sells at 11 seers per rupee. A few cases of cattle-disease reported from thana Basirhat. Supply of fodder and water sufficient.

Nadia.—Rainfall at Sadar 2·22, Ranaghat 3·10, Chuadanga 1·89, Meherpur 2·43, Kushtia 1·53. Weather rainy. Prospects of standing crops good. Transplantation of *aman* seedlings going on. Fodder and drinking water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Ranaghat	11	0	
Chuadanga	11	0	
Meherpur	10	8	
Kushtia	11	4	

Murshidabad.—Rainfall at Sadar 3·13, Kandi 2·31, Jangipur 5·01, Lalbagh 9·05. Weather seasonable. Transplantation of *aman* seedlings going on. Prospects of jute, sugarcane and *bhadoi* good. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	12	per rupee.
Kandi	12	0	
Jangipur	11	8	
Lalbagh	10	0	

Jessore.—Rainfall at Sadar 5·34, Jhenida 1·36, Magura 0·89, Bangaon 3·12, Narail report not received. Weather seasonable. More rain wanted. Prospects of crops generally fair to good. Fodder and water sufficient. Cattle-disease reported from one village in Magura subdivision and from Kotwali thana. Common rice sells at 12 seers per rupee.

Khulna.—Rainfall at Sadar 2·51, Bagerhat 2·76, Satkhira 0·52. Weather seasonable. Transplantation of *aman* continues. *Aus* harvesting commenced. Fodder and water sufficient. Cattle-disease reported from Paikgachha, Fakirhat and Assasuni. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Bagerhat	12	8	
Satkhira	10	8	

Rajshahi.—Rainfall at Sadar 2·96, Nator 3·11, Naugaon 5·40. Transplantation of winter rice and harvesting of *aus* and jute continues. Prospects of standing crop good. Weather seasonable. Common rice sells at 12 seers per rupee.

Dinajpur.—Rainfall at Sadar 5·04. Fall in the district general, varying from 1·57 to 10·17. Weather seasonable. Standing crops good. Transplantation of winter rice is progressing. No cattle-disease. Fodder and drinking-water plentiful. Rice selling at 12 seers per rupee.

Jalpaiguri.—Rainfall at Sadar 7·13, Alipore Duars 8·55. Fall general. Weather hot and cloudy with occasional showers. Transplantation of *haimanti* and harvesting of *bhadoi* paddy going on. Prospects favourable. Common rice sells at 11 seers a rupee. Fodder and water sufficient.

Darjeeling.—Rainfall at Sadar 11·08, Kurseong 9·11, Siliguri 8·46. Weather seasonable. *Hills—Haimanti dhan* being cultivated. Maize, *chota marua* and *bhadoi dhan* doing well. *Terai*—Transplanting of *haimanti* paddy going on. Prospects good. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	11	0	

Maize sells at Darjeeling at 16 seers and at Kalimpong at 18 seers per rupee.

Rangpur.—Rainfall at Sadar 2·32. Fall general. Weather cloudy and rainy. Cutting of *aus* and jute and transplantation of *aman* going on low lands. Jute a little damaged in Nilphamari by rain and insects. Cattle-disease still prevails in Gaibanda. Common rice sells at 11 seers per rupee.

Bogra.—Rainfall at Sadar 7·13. Fall general. Weather hot and cloudy. Cutting of *aus* and jute and transplantation of *aman* going on in places. Prospects good. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Pabna.—Rainfall at Sadar 1·01, Sirajganj 3·09. Fall general. Weather rainy and hot. *Aus* paddy and jute are being harvested. Prospects of standing crops fair. Fodder and water sufficient. No cattle-disease. Common rice sells at 10 seers per rupee.

Dacca.—Rainfall at Sadar 1·34, Manikganj 1·95, Munshiganj 3·86, Narayanganj 3·19. Prospects of crops fair. Weather seasonable. Fodder available. No cattle-disease. Common rice sells at 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 2·68, Jamalpur 4·84, Kishorganj 4·70, Netrokona 3·77, Tangail 1·05. Weather seasonable. *Aus* and jute are being harvested. They have suffered from excessive rain. Transplantation of winter rice going on. Fodder and water sufficient. No cattle-disease. Common rice selling as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Kishorganj	11	2	
Jamalpur	12	0	
Netrokona	12	3	
Tangail	10	4	

Faridpur.—Rainfall at Sadar 2·81, Goalundo 4·08, Madaripur 6·39. Weather seasonable. Harvesting of *aus* paddy continues. Prospects of *aman* paddy fair. Common rice sells at 11 seers a rupee. Fodder sufficient. No cattle-disease.

Backergunge.—Rainfall at Sadar 5·53. Fall general, lightest at Pirojpur, 1·31. Weather seasonable. Transplantation of *aman* going on. Cattle-disease at Matbari and Berhanaddi thanas. Fodder and water sufficient. Common rice sells at 11 seers per rupee.

Tippera.—Rainfall at Sadar 1·77, Brahmanbaria 3·24. Weather seasonable. Prospects not good in Sadar. Harvesting of *aus* paddy and jute continues. Fodder and water sufficient. No cattle-disease. Common rice sells at 12 seers. No report from Chandpur.

Noakhali.—Rainfall at Sadar 7·65, Feni 11·27. Fall general. Weather seasonable. Transplantation of *aman* continues. Prospects of *aus* fair. Cattle-disease reported from two thanas. Fodder and water sufficient. Common rice sells at Sadar at 11 seers and at Feni at 12 seers per rupee.

Chittagong.—Rainfall at Sadar 9·99, Cox's Bazar 14·74. *Aman dhan* is being sown. Cattle-disease prevalent in parts of the district. Fodder and water sufficient. Common rice sells at 12 seers 10 chitaks per rupee.

Chittagong Hill Tracts.—Rainfall at Sadar 3·55. Fall general. Weather cool and showery. Winter rice sowing continues. More sunshine is wanted for the *joom* crops. No fresh cases of cattle-disease in Mahalcherri reported. Common rice sells at 11 seers per rupee.

Patna.—Rainfall at Sadar 4·40, Barh 2·30, Bihar 6·47, Dinapore 4·47, Hilsa 5·5, Bikram 2·85. Weather cloudy. More rain needed. Sowing of Indian-corn nearly completed. Transplantation of paddy will soon commence. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Patna	11	4	per rupee.
Barh	11	4	
Bihar	10	0	
Dinapore	11	8	

Gaya.—Rainfall at Sadar 7·49, Jahanabad 5·26, Aurangabad 6·41, Nawadah 2·64. Weather rainy. Transplantation of *marua* almost over. Paddy seedling doing well. No cattle-disease. Fodder and water for cattle ample. Average price of common rice 11¾ seers per rupee.

Shahabad.—Rainfall at Sadar 4·63, Buxar 4·90, Bhabhua 7·57, Sasaram 7·68, Dehri 3·20. Weather seasonable. *Bhadoi* and paddy doing well. Fodder and water sufficient. Sugarcane good. No cattle-disease. Rice sells at Sadar at 11 seers a rupee.

Saran.—Rainfall at Sadar 1·90, Siwan 2·14, Gopalganj 4·03. Weather cloudy and rainy. Rainfall has been general and has proved most beneficial to agricultural operations. Transplantation of paddy in progress. Fodder and water sufficient. No cattle-disease. Common rice sells at Sadar at 11 seers per rupee.

Champaran.—Rainfall at Sadar 7·19, Bettiah 2·83. Weather rainy and cloudy. Transplantation of *aghani* paddy and weeding of *bhadoi* crops going on. Prospects good. Cattle-disease reported. Fodder and water sufficient. Common rice sells at 12¼ seers and maize at 22½ seers per rupee.

Muzaffarpur.—Rainfall at Sadar 7·14, Hajipur 5·15, Sitamarhi 7·93. Weather cloudy and rainy. Rainfall general. Sowing of *bhadoi* crops finished. Transplantation of paddy in progress. Prospects excellent. Fodder and water sufficient. Very few cases of cattle-disease in Sitamarhi subdivision. Prices are—Common rice 11½ and maize 19 seers a rupee.

Darbhanga.—Rainfall general. Transplantation of paddy in progress. Prospects of standing crops good. Sugarcane doing well. Fodder and water sufficient. Cattle-disease is reported from Warisnagar and Phulparas thanas. Weather hot and cloudy. Common rice sells at 12 seers in Sadar and subdivisions.

Monghyr.—Rainfall at Sadar 4·16, Begusarai 1·34, Jamui 3·43. Weather seasonable. *Bhadoi* and paddy sowings going on. Weeding still continues. Transplantation of *marua* and paddy in progress. Standing crops promising. Sugarcane doing well. Fodder and water sufficient. A few cases of cattle-disease reported from Begusarai thana. Common rice sells at 11 seers 2 chitaks per rupee.

Bhagalpur.—Rainfall at Sadar 6·04, Banka 3·02, Madhipura 6·50, Supaul 4·26 Weather windy and cloudy with rain. Prospects of *aghani* and *bhadoi* good, but more rain is wanted to help transplantation. Transplantation of winter crops going on. Recent rain falls have done immense good. Sporadic cases of cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	6	per rupee.
Banka	11	14	
Madhipura	13	0	
Supaul	13	0	

Purnea.—Rainfall at Sadar 3·08, Kishanganj 8·51, Araria 3·98. Weather cloudy and rainy. Fall general. Jute and *bhadoi* doing well. Transplantation of *aghani* crops going on. Cattle-disease reported from Palasi outpost. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	9	0	per rupee.
Kishanganj	11	0	
Araria	12	0	

Malda.—Rainfall at Sadar 1·66, Chanchal 3·14, Sibganj 3·52, Gojal 1·98. Fall general. Weather hot and cloudy. Harvesting of *bhadoi* continues. Transplantation of winter rice going on. No cattle-disease. Fodder and water sufficient. Common rice sells at 11 seers per rupee.

Sonthal Parganas.—Rainfall at Sadar 2·73, Deoghur 3·76, Jamtara 6·76, Pakaur 3·31, Rajmahal 5·67. Weather cloudy with occasional showers. Transplantation of winter rice in progress. Prospects of Indian-corn and sugarcane favourable. Fodder and water sufficient. Common rice sells at 11¾ seers in Sadar. No cattle-disease. Godda report not received.

Cuttack.—Rainfall at Sadar 7·76. Fall general, but smaller in all other parts. Weather of usual monsoon character. Harrowing of *beali* and reploughing and transplantation of *sarad* in progress. Prospects generally good. Slight cattle-disease in some parts. Fodder available except in parts submerged by flood water. Common rice sells at 13 seers 2 chitaks at Sadar.

Balasore.—Rainfall at Sadar 5·97. Fall general and beneficial to crops. Puddling, weeding and transplantation progressing. Prospects good. Sugarcane, jute and oilseeds doing well. Rice sells at 13 and 15 seers at Sadar and Bhadrak respectively. Fodder and water sufficient. Burabalang and Subarnarekha rivers in flood.

Angul.—Rainfall at Sadar 5·83, Chhendipada 4·06, Bissipara 4.40. Fall general. Weather cloudy. Transplantation and puddling of paddy in progress. Common rice sells at 12 and 15 seers per rupee at Sadar and interior respectively.

Puri.—Rainfall 1·71. Weather seasonable. Rainfall general throughout the district, has done good to the standing crops. Puddling and weeding in progress. Transplantation of paddy and *mandia* seedlings has commenced. Sugarcane and other miscellaneous crops doing well. Fodder and water-supply sufficient. Common rice sells at 13 seers 2 chitaks per rupee. Cattle-disease prevailing at places.

Hazaribagh.—Rainfall at Sadar 5·64, Giridih 7·34. Fall general. Weather seasonable. Transplanting of paddy commenced. Sugarcane doing well. Fodder and water sufficient. Common rice sells at 11¼ seers per rupee.

Ranchi.—Rainfall at Sadar 4·39. Fall general and beneficial to crops. Transplantation of winter rice begun in places. Cattle-disease reported from Ranchi, Silli and Lohardaga thanas. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Palamau.—Rainfall at Sadar 2·40. Weather cloudy. Rainfall general. *Murua* is being transplanted throughout the district. Maize and sugarcane are doing well. Fodder and water sufficient. Price of common rice at Sadar is 10 seers 6 chitaks per rupee.

Manbhum.—Rainfall at Sadar 1·63, Gobindpur 2·27. Weather seasonable. Prospects of crops good. Transplantation of winter rice in full swing. Fodder and water sufficient. Cattle-disease not reported. Average price of common rice is at Sadar 12 seers and at Gobindpur 11 seers per rupee.

Singhbhum.—Rainfall 5·06. Weather seasonable. Transplantation going on vigorously. Young paddy promising well. Average price of rice is 12 seers per rupee.

General Summary.—Prospects much improved by the rainfall of the week which was general and moderately heavy. More rain is wanted in the districts of Bankura, Hooghly, 24-Parganas, Jessore, Patna and Bhagalpur; the transplantation of winter rice is proceeding. *Autumn* crops and sugarcane are promising. Early rice and jute being harvested. Cattle-disease reported from a few districts. Fodder and water sufficient. The price of common rice has risen in 9 districts, fallen in 9, and is stationary in the rest.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,

The 29th July 1902.

	%
The mean relative humidity	86
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	86
	Inches.
The total fall of rain from 20th to 26th July 1902	4·51
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·92
The total fall from 1st January to 26th July 1902	34·31
The average fall of the corresponding period for 24 years, Surveyor-General's Office	31·90

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 28th July 1902.

RESOLUTION REVIEWING THE TRIENNIAL REPORT ON VACCINATION IN BENGAL FOR THE YEARS 1899-1900, 1900-1901 AND 1901-1902.

MUNICIPAL DEPARTMENT—SANITATION.

Calcutta, the 30th July 1902.

RESOLUTION—No. 1962S.

READ—

The Triennial Report on Vaccination in Bengal for the years 1899-1900, 1900-1901 and 1901-1902.

Read again—

The Triennial Report on Vaccination in Bengal for the years 1896-97, 1897-98, an 1898-99, and the Resolution recorded by Government thereon.

THE report, which was due to Government on 1st June, was received o 4th July. The delay is unexplained, and is not compensated for by any specia merits in the report.

2. There was an increase of operations, as compared with the last trien nial period, amounting to 6 per cent. in rural areas and 13 per cent. i municipalities and dispensaries. In Calcutta the increase was 64 per cen The increase in rural areas and mufassal municipalities would, it is said, hav

been greater, if plague had not interfered with the work of vaccination. This cause had clearly no effect in Calcutta, where the plague was worst. A large proportion of the vaccinations in Calcutta, however, are secondary, while the vaccination of infants is known to be in an unsatisfactory state. This has attracted the attention of the Lieutenant-Governor, and measures are being taken by the Corporation to improve it, by providing a better system of registration of births, and by increasing the number of vaccination stations and rendering them more attractive.

3. The average work of a vaccinator has considerably increased during the triennium. In rural areas the increase from 620 to 793 is due to the exclusion of apprentices and the work done by them from the calculation. No explanation is given of the increase of work in Calcutta from 542 cases per vaccinator to 1,013. In the mufassal municipalities the increase from 482 to 569 operations is attributed to the greater activity of the Department owing to the strictures of Government in past Resolutions, but there is room for still further improvement. It is now estimated that, on an average, 1,060 operations are performed by each paid vaccinator, against 944 by licensed agency. The question of the relative merits of the licensed and paid systems is under consideration, and Government reserves its judgment on the subject until the Sanitary Commissioner has reported on it.

4. The increase of vaccination in rural areas and mufassal towns is small, and the Lieutenant-Governor trusts that the wakened interest of Magistrates and Civil Surgeons will be maintained. The increase in the districts of Mymensingh (43,215), Midnapore (35,927), 24-Parganas (33,177) is noticeable, but it is unfortunately due mainly to the prevalence of the severe epidemic of small-pox with which these districts were visited. The explanation given by the Sanitary Commissioner for the fluctuations in different districts is altogether insufficient, when they occur in neighbouring districts as Shahabad (15 per mille) and Gaya (28 per mille). In the former district the number of vaccinations was only 9·76 per mille in 1899-1900, while the average of the Patna Division was 23 per mille. Similar fluctuations are noticeable elsewhere. This point has been repeatedly noticed, and the Lieutenant-Governor regrets to find that Major Dyson has done little or nothing to examine and account for the discrepancies between the returns of different districts or, by personal supervision of the staff, to bring backward districts nearer the level of their neighbours.

5. The Sanitary Commissioner reports an improvement during the triennium in the protection afforded to the infant population. His conclusions are based on an arbitrary ratio of births of 50 per mille instead of the actual estimated figures of the year, viz., 38·57. The latter should be adopted in future. These show that 32·06 per cent. of the infant population was protected. This falls considerably below the average of other Provinces, which according to latest estimates is 45·52, and the question why results should be so indifferent in some districts is not satisfactorily answered. There may be defective classification of ages or greater willingness to bring forward children in some localities than in others, but the effect of these causes should be more closely examined. In Darbhanga 41 per cent. of the infants were vaccinated during the last year against an average of 7·4 per cent. in the years 1896—1899. And similar results are to be noticed in the 24-Parganas, Bankura, and Birbhum. In Muzaffarpur only 10 per cent. of infants were vaccinated against 41 in the neighbouring district of Darbhanga, while in Rangpur the number doubled that of Bogra. If the causes which led to these inequalities were investigated, defects might be removed. The same results are to be seen in towns where vaccination is compulsory. In the Burdwan towns practically all the infants were vaccinated, while in those of Midnapore less than 40 per cent. were protected. The figures in Statement VII, which show the protection afforded to infants in towns, are, however, of doubtful value, and in some cases the number of vaccinations greatly exceed the number of births. Until these points are explained, and it is established that the Vaccination Department and the local officers have done all that is possible, Government cannot consider the suggestion to extend compulsory measures to rural areas.

6. In the Resolution on the last triennial report, a hope was expressed that further experience would enable some conclusion to be based on the

statistics of vaccination as to its effect in reducing the mortality from small-pox. This subject has not been discussed in the present report, and, so far as can be gathered from the diagrams in paragraph 13 and the figures in Statement VI, the results are not encouraging. In Mymensingh there has always been a comparatively large percentage of vaccinations, amounting to over 4 per cent. of the population, but in 1901 the deaths from small-pox considerably exceeded those of other districts in the Division. In Shahabad, where vaccination has been very restricted, the deaths from small-pox have been less than in the neighbouring districts of Patna and Gaya. On the other hand, a comparison of the three districts of the Orissa Division shows that Balasore, where vaccination is normal, has been freer from small-pox than Cuttack and Puri, where it is defective. The percentage of population which is protected is unfortunately so small everywhere that no conclusions are possible from the statistics now available. It will be sufficient in future reports to give one diagram for the last year of the triennial period. The space so saved can be utilised in those explanations of the statistics, and comments upon them, which are so lacking upon the present occasion. The Lieutenant-Governor repeats the remark that more useful and telling work is done in small areas where the vaccination is careful and complete than by vaccination on an apparently much larger scale, where it is only occasional. It is from the former that the most clear and unmistakeable evidence can be given to all around of the protection which vaccination gives.

7. The average cost of vaccination for the period was Rs. 1,86,782, which shows a steady decline on the averages of the two preceding triennia. Of the total amount, a sum of about Rs. 1,30,000 was expended on the cost of supervision and travelling charges, and about Rs. 28,000 on paid vaccinators. The total cost in 1901-1902 to Provincial funds was Rs. 1,44,225. The balance, with the exception of a small payment of Rs. 2,844 made by the Native States of Chota Nagpur, was met from local funds. This is exclusive of the fees paid to the licensed operators.

8. The mortality from small-pox was greater during the triennium than during any period of the past ten years. The epidemic was severest in the Midnapore district and in Orissa. In the report of the Sanitary Commissioner the spread of the disease is attributed to the practice of exposing children to its attack when the small-pox is believed to be mild in character. This practice should be more fully investigated. Vigorous measures were taken to combat the disease, and vaccination increased in the affected districts.

9. The standard of inspection work, both that done by Civil Surgeons and the subordinate inspecting staff, shows a general improvement, but the work done by the Civil Surgeons is very unequal. In Midnapore, where there was a severe outbreak of small-pox, the work of the District Inspector was very defective. There was also a failure in the Sonthal Parganas. Explanations should be submitted. The work done by the Deputy Sanitary Commissioner of the Metropolitan and Eastern Bengal Circle, who inspected only 115 cases, was altogether insufficient.

10. In paragraph 19 of his report the Sanitary Commissioner comments upon the disadvantages under which the Vaccination Department labours in Bengal. The Lieutenant-Governor is disposed to think that the Sanitary Commissioner has exaggerated the unpopularity of vaccination, and adheres to the opinion which he expressed in the Resolution on the report for the last triennium that its advantages are fairly recognized by the people of Bengal, and that such opposition as is encountered is based on a reluctance to pay the fees demanded by the licensed vaccinators. This subject will be more fully examined when the report on the proposal to substitute paid for licensed vaccinators is received.

By order of the Lieutenant-Governor of Bengal,

E. W. COLLIN,

Offg. Secretary to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending on the 4th August 1902.

Burdwan.—Rainfall at Sadar 2·20, Kalna 4·99, Katwa 3·63, Raniganj 3·07. Weather cloudy. Transplantation going on. Fodder and water sufficient. Condition of cattle good. Common rice sells at 12 seers per rupee.

Birbhum.—Rainfall at Sadar 6·99, Rampur Hât 5·44. Weather cloudy and rainy. Transplantation vigorously pushed on. Sugarcane promising. Fodder sufficient. Common rice sells at 12 seers per rupee.

Bankura.—Rainfall at Sadar ·98, Vishnupur 5·95. More rain wanted. Transplantation going on. Weather hot. Sugarcane growing well. Fodder and water sufficient. Common rice sells at 12¾ seers per rupee.

Midnapore.—Rainfall at Sadar 5·54, Contai 7·64, Tamluk 2·22, Ghatal 6·69. Weather rainy. Transplantation of *aman* going on. Agricultural prospects fair. Fodder and water sufficient. Cattle-disease reported from thana Binpur. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Contai	12	0	
Tamluk	11	12	
Ghatal	12	0	

Hooghly.—Rainfall at Sadar 4·06, Serampore 5·40, Arambagh 4·38. State of standing crops good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Serampore	10	9	
Arambagh	12	0	

Howrah.—Rainfall at Sadar 5·50, Ulubaria 2·90. Fall general. No more rain wanted. Transplantation of *aman* paddy going on briskly, except on lowlying lands which are still under water, though they are being satisfactorily drained by khals. Agricultural prospects are hopeful. No cattle-disease. Fodder and water sufficient. Common rice sells at both Sadar and Ulubaria at 11 seers per rupee.

24-Parganas.—Rainfall at Sadar 4·76, Barasat 4·45, Basirhat 4·15, Diamond Harbour 1·29. Heavy rain except in the south. State of standing crops good, but more rain still wanted. Prospect fair. *Aus* and jute sown in normal area, but growth retarded considerably for want of rain. Transplantation of *aman* retarded for the same reason, its extent on 1st being—Sadar 37·5 per cent., Barasat 75 per cent., Basirhat 35 per cent., Diamond Harbour 62·5 per cent. Transplantation of *aman* continues: jute and *aus* being harvested in Barasat and Basirhat. Common rice sells at 11 seers per rupee. Condition of cattle good. Supply of fodder and water sufficient.

Nadia.—Rainfall at Sadar 4·05, Ranaghat 4·83, Chuadanga 3·78, Meherpur 2·29, Kushtia 2·98. Transplantation of *aman* in progress. Harvesting of *aus* commenced. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Ranaghat	11	0	
Chuadanga	11	0	
Meherpur	10	8	
Kushtia	11	4	

Murshidabad.—Rainfall at Sadar 6·15, Kandi 3·47, Jangipur 4·81, Lalbagh 4·76. Weather seasonable. Transplantation of *aman* being pushed on. Harvesting of *aus* going on. Prospects of jute and sugarcane good. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	12	per rupee.
Kandi	12	0	
Jangipur	11	8	
Lalbagh	11	0	

Jessore.—Rainfall at Sadar 3·41, Jhenida 4·02, Narail 3·09, Bangaon 3·29, Magura 2·54. Weather seasonable. Prospects of crops good. Fodder and water sufficient. Cattle-disease reported from Kotwali thana and Salkhia outpost of Magura. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	0	per rupee.
Jhenida	12	0	
Narail	10	12	
Bangaon	12	0	
Magura	13	0	

Khulna.—Rainfall at Sadar 3·93, Bagerhat 4·65, Satkhira 6·21. Weather seasonable. Transplantation of *aman* and harvesting of *aus* continue. Prospects of *aus* fair. Fodder and water sufficient. Cattle-disease reported from Asasuni. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	5	per rupee.
Bagerhat	12	8	
Satkhira	10	8	

Rajshahi.—Rainfall at Sadar 6·01, Nator 2·05, Naugaon 1·10. Weather seasonable. Harvesting of *aus* and transplantation of winter rice continues. Prospects of crops good. Condition of cattle good. Common rice sells at 12 seers per rupee.

Dinajpur.—Rainfall at Sadar 2·10. Fall in the district general, varying from 1·59 to 4·61. Weather seasonable. Standing crops good. Steeping of jute has commenced. Transplanting of winter rice is in full swing. No cattle-disease. Fodder and drinking-water plentiful. Rice selling at 12 seers per rupee.

Jalpaiguri.—Rainfall at Sadar 4·05, Alipore Duars 2·77. Weather cloudy and hot. Transplantation of *haimanti* and harvesting of *bhadoi* paddy going on. Prospect of *haimanti* paddy favourable, that of *bhadoi* not so favourable. Common rice sells at 11¼ seers a rupee. Fodder and water sufficient. Cattle-disease reported from three thanas in Sadar subdivision.

Darjeeling.—Rainfall at Sadar 6·52, Kurseong 13 51, Siliguri 11·48. Weather seasonable. *Hills—Haimanti dhan* being cultivated. Maize, *chota marua* and *bhadoi dhan* doing well. *Terai—Haimanti* paddy being transplanted. Prospects good. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	11	0	

Maize sells at Darjeeling and Kalimpong at 18 seers per rupee.

Rangpur.—Rainfall at Sadar 2 24. Fall general. Weather cloudy and rainy. Cutting of *aus* and jute and transplantation of *aman* going on low lands. Jute a little damaged in Nilphamari by rain. Cattle-disease still prevails in Gaibanda. Common rice sells at 11 seers per rupee.

Bogra.—Rainfall at Sadar 1·12. Fall general. Weather hot and cloudy. Cutting of *aus* and jute and transplantation of *aman* going on. Prospects good. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Pabna.—Rainfall at Sadar 1·32, Sirajganj 1·09. Fall general. Weather cloudy and rainy. *Aus* and jute are being reaped. Prospects of standing crops fair. Fodder and water sufficient. Cattle-pox at certain places. Common rice sells at 10 seers per rupee.

Dacca.—Rainfall at Sadar ·61, Manikganj 3·89, Munshiganj 1·54, Narayanganj 1·64. Prospects of crops fair. Weather seasonable. Fodder available. No cattle-disease. Common rice sells at 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 0·75, Jamalpur 0·32, Kishorganj 0·69, Netrokona 5·55, Tangail 1·36. Weather seasonable. Harvesting of *aus* and jute and transplantation of winter rice continue. Jute have suffered from excess of rain and outturn will probably not exceed 50 per cent. Fodder sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Kishorganj	11	4	
Jamalpur	13	0	
Netrokona	12	0	
Tangail	10	4	

Faridpur.—Rainfall at Sadar 3·31, Goalundo 1·37, Madaripur 3·88. Weather seasonable. State and prospects of standing crops good generally. Fodder sufficient. Common rice sells at 11 seers per rupee.

Backergunge.—Rainfall at Sadar 6·61. Fall general, lightest at Pirojpur, 4·11, Weather seasonable. Transplantation of *aman* going on. Cattle-disease at Kotwali. Matbari and Barmuddin thanas. Fodder and water sufficient. Common rice sells at 11 seers per rupee.

Tippera.—Rainfall at Sadar 1·30, Brahmanbaria 1·60, Chandpur ·96. Weather seasonable. Harvesting of *aus* and jute in progress. Flood has caused slight damage to paddy in Brahmanbaria. Fodder and water sufficient. Cattle-disease reported from Matlab thana. Common rice sells at 12 seers per rupee.

Noakhali.—Rainfall at Sadar 10·55, Feni 3·27. Fall general. Weather seasonable. Transplantation of *aman* continues. Prospects of *aus* fair. Cattle-disease reported from one thana. Fodder and water sufficient. Condition of cocoanut good. Common rice sells at Sadar at 11 seers and at Feni at 13 seers per rupee.

Chittagong.—Rainfall at Sadar 1·14, Cox's Bazar 13·41. Transplantation of *aman* crops going on. Fodder and water sufficient. Cattle-disease still reported in parts of the district. Rice sells at 12¾ seers per rupee.

Chittagong Hill Tracts.—Rainfall at Sadar 2·96. Fall general. Weather alternately fine and showery. Winter rice sowing continues. *Joom* crops progressing. Common rice selling at 12 seers. No cattle-disease.

The total fall from 1st January to 2nd August 1902	39·30
The average fall of the corresponding period for 24 years, Surveyor-General's Office	35·75

The mean pressure, temperature, etc., are deduced from the traces of the Barogrpah and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; t, thunder; d, drizzling rain; ∠, lightning; p, passing temporary showers.

N.B.—In the weekly report from 20th to 26th July 1902, *read* 133·4 *for* 120·2 as maximum in sun of the 20th July 1902.

G. W. Küchler

RESOLUTION ON THE ANNUAL REPORT OF THE CIVIL VETERINARY DEPARTMENT, BENGAL, AND OF THE BENGAL VETERINARY COLLEGE.

REVENUE DEPARTMENT—AGRICULTURE.

Calcutta, the 11th August 1902.

RESOLUTION—No. 3122.

READ—

The Annual Report of the Civil Veterinary Department, Bengal, for the year 1901-1902 and of the Bengal Veterinary College.

Read also—

Letter No. 101T.A., dated 3rd July 1902, from the Director of the Department of Land Records and Agriculture, Bengal, submitting the above report with his remarks.

The Annual Report of the Civil Veterinary Department and of the Bengal Veterinary College has this year been considerably curtailed, and is comprised, together with its appendices, within the prescribed limits of 15 pages.

2. *Veterinary Dispensaries.*—The year under review was marked by an important increase in the number of veterinary dispensaries from twelve to nineteen; and the number of patients treated, viz., 737 in-patients and 8,892 out-patients, was more than double that of the preceding year. The Lieutenant-Governor has read with pleasure the good accounts given of the veterinary dispensaries at Howrah, Gaya, Sitamarhi, Darbhanga, Patna, Balasore, Dumraon, Muzaffarpur, and Chittagong, and he notices that at Monghyr the new dispensary building has been built entirely from funds raised by public subscription.

Government in its Resolution No. 4051, dated 10th December 1901, has undertaken on certain conditions to contribute one-half of the expenses incurred by District Boards in the maintenance of veterinary dispensaries and one-sixth in the case of dispensaries maintained jointly by District Boards and Municipalities. The application from the Cuttack Dispensary for assistance is under consideration.

3. *Epidemic Disease.*—The Government of India in commenting on last year's report expressed the fear that glanders is very rife in Calcutta, and stated that they trusted that measures to check this disease would shortly be brought into force. The figures available support the conclusion that glanders and farcy are prevalent both in Calcutta and in the districts. Altogether at the instance of public officers 51 horses were destroyed on account of this disease last year. It has been reported to the Government of India that the introduction of Act XIII of 1889 into Calcutta in supersession of Act VIII (B. C.) of 1880 will involve an annual expenditure of Rs. 10,000 with a probable increase in the near future, and that therefore on financial grounds its introduction must await the next revision of the Provincial contract.

The year under review showed a marked decrease in reported cattle-disease; but rinderpest was again rife in Birbhum, and there were severe outbreaks in Khulna, Gaya, and Hazaribagh, where the number of cattle attacked exceeded 2,000 in each district. In Murshidabad, Chittagong, Shahabad, Palamau, and Manbhum over 1,000 cases were reported in each district. The Veterinary Assistants were able to immunise 12,829 head of cattle during the year, and could have done more work under this head if more serum had been available. It is satisfactory that there was no friction between the operators and the owners of cattle.

Under recent orders from the Government of India instruction in rinderpest inoculation will in future be imparted to veterinary assistants at Muktesar and Bareilly. It has accordingly been arranged to send this year four assistants monthly for instruction until 24 have been trained.

4. *Improvement of stock.*—It is trusted that the attempt made by the importation by the Civil Veterinary Department and by the District Board of Patna of Australian cows and bulls to improve the Patna breed of milch cattle may be successful. Of the animals imported by the Veterinary Department, two unfortunately died soon after their arrival.

5. *The Veterinary College.*—The session opened with 47 students in the three classes, of whom 5 were Muhammadans. Withdrawal and removal reduced the total number to 35. The results of the examination at the end of the year were creditable both to the students and the lecturers. All the students in the three classes held stipends provided either by Government or District Boards and Municipalities or private individuals. Since the close of the year the rules for admission to the College have been revised, and the curriculum of studies modified on the lines suggested by the Umballa Veterinary Conference of 1900.

6. *The Belgachia Infirmary.*—There was a decrease in the number of in-patients and out-patients in the Belgachia Infirmary, which has not been explained either by the Superintendent or by the Director of Land Records. The fees for admission have, however, been recently reduced in the case of horses and ponies belonging to persons of small means and hackney-carriage drivers, and the fee charged to cartmen, *goalas*, and pack-bullock drivers for the treatment of their cattle has been reduced by one-half. This should improve the use of the institution.

7. *Financial.*—The cost of maintaining the Department exceeded that of last year by about Rs. 11,000. This was chiefly due to increased establishment, increased travelling of the Inspectors, increased rent of land, charges on account of fencing the College grounds, and purchase of models and specimens.

8. The Lieutenant-Governor has pleasure in acknowledging the zeal and success with which Veterinary Major Raymond managed the Department during the year.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

LIBERALITY OF MAHANTA SUMERU GIRI GOSSAIN, OF MAHIGUNGE.

" 187J., dated 28th July "

WITH reference to your endorsements noted in the margin, forwarding copies of the letters from the Magistrate of Rangpur, in which he reports that Mahanta Sumeru Giri Gossain, of Mahigunge, has given the sum of Rs. 3,000, to be spent on constructing a pauper ward for the new dispensary at Nowabgunge, in the town of Rangpur, I am directed to request that you will be so good as to convey the thanks of Government to the donor for his public spirit and liberality.

2. This letter will be published in the *Calcutta Gazette.*

WEATHER AND CROP REPORT.

For the week ending on the 11th August 1902.

Burdwan.—Rainfall at Sadar 1·27, Kalna 0·29, Katwa 0·10, Raniganj 0·97. Weather cloudy. Transplantation going on. Fodder and water sufficient. No cattle-disease. Common rice sells at 11 seers per rupee.

Birbhum.—Rainfall at Sadar 2·94, Rampur Hât 3·52. Transplantation going on. Sugarcane promising. Weather cloudy and raining. Fodder sufficient. Common rice sells at 12 seers per rupee.

Bankura.—Rainfall at Sadar ·61. More rain wanted. Transplantation going on. Weather hot and cloudy. Sugarcane doing well. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Midnapore.—Rainfall at Sadar 2·63, Contai 2·17, Tamluk 3·08, Ghatal 1·41. Weather hot and raining. Transplantation of *aman* continues. Agricultural prospects good. Fodder and water sufficient. Cattle-disease reported from Binpur. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Contai	11	14	
Tamluk	11	12	
Ghatal	12	0	

Hooghly.—Rainfall at Sadar 0·77, Serampore 1·26, Arambagh 0·34. Transplantation of *aman* continues. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Serampore	10	5	
Arambagh	11	12	

Howrah.—Rainfall at Sadar 2·64, Ulubaria 2·48. Fall recorded on all days of the week except on 6th at Ulubaria, the 5th to 7th at Sadar. The rain has done no harm. Transplantation of *aman* going on briskly. Agricultural prospects hopeful. Fodder and water-supply sufficient. Common rice sells at both Sadar and Ulubaria at 11 seers per rupee.

24-Parganas.—Rainfall at Sadar 2·97, Barasat 4·69, Basirhat 1·11, Diamond Harbour 1·76. Weather seasonable. State of standing crops good, but more rain still wanted. Prospects fair. *Aus* and jute being harvested. Transplantation of *aman* continues. Common rice sells at 11½ seers per rupee; at 10½ seers in Diamond Harbour. A few cases of cattle-disease reported from Basirhat. Supply of fodder and water sufficient.

Nadia.—Rainfall at Sadar 2·70, Ranaghat 0·75, Meherpur 2·20, Chuadanga 1·44, Kushtia 0·71. Harvesting of *aus* paddy and transplantation of *aman* paddy going on. Jute being steeped. Fodder and drinking water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Ranaghat	11	0	
Chuadanga ... Report not received			
Meherpur	10	8	
Kushtia	11	4	

Murshidabad.—Rainfall at Sadar 1·06, Kandi 1·87, Jangipur 2·29, Lalbagh 0·39. Weather seasonable. Transplantation of *aman* going on vigorously. Harvesting of *bhadoi* going on. Jute being cut and steeped in Jangipur. Small-pox among cattle reported from Raghunathganj. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Kandi	12	0	
Jangipur	11	8	
Lalbagh	11	0	

Jessore.—Rainfall at Sadar 2·56, Jhenida 0·19, Magura 0·47, Narail 1·12, Bangaon 0·52. Weather seasonable. Prospects of crops generally fair, but more rain wanted. Fodder and water sufficient. Cattle-disease reported from Kotwali, Jhenida and Salikia outpost of Magura. Common rice sells at 12 seers a rupee.

Khulna.—Rainfall at Sadar 4·38, Bagerhat 0·83, Satkhira 1·11. Weather seasonable. Transplantation of *aman* and harvesting of *aus* continue. Fodder and water sufficient. Cattle-disease reported from Paikgachha, Fakirhat and Asasuni. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	4	per rupee
Bagerhat	12	0	
Satkhira	10	8	

Rajshahi.—Rainfall at Sadar 1·02, Nator 2·62, Naugaon 0·73. Weather seasonable. Harvesting of *aus* and jute continues. Transplantation of winter rice in progress. Prospects of crops good. Common rice selling at 12 seers per rupee.

Dinajpur.—Rainfall at Sadar 1·11. Fall in the district general, varying from 1·11 to 5·36. Weather seasonable. Steeping of jute and transplantation of winter rice are in full swing. *Bhadoi* doing well. No cattle-disease. Fodder and drinking-water plentiful. Rice selling at 12 seers per rupee.

Jalpaiguri.—Rainfall at Sadar 2·04, Alipore Duars 5·13. Weather cloudy and hot with occasional showers. Harvesting of *bhadoi* and transplantation of *haimanti* paddy continue. Prospect favourable. Common rice sells at 11¼ seers a rupee. Fodder and water sufficient. Cattle-disease reported from two thanas.

Darjeeling.—Rainfall at Darjeeling 10·96, Kurseong 6·49, Siliguri 1·61, Kalimpong 1·51. Weather seasonable. *Hills—Haimanti dhan* being cultivated. Maize, *chota marua* and *bhadoi dhan* doing well. *Terai—Haimanti* paddy being transplanted. Prospects good. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	11	0	

Maize sells at Darjeeling at 18 and at Kalimpong at 20 seers per rupee.

Rangpur.—Rainfall at Sadar 2·66. Fall general. Weather cloudy and rainy. Cutting of *aus* and jute and transplantation of *aman* going on. Jute on low lands a little damaged at Nilphamari by rain. Common rice sells at 11 seers per rupee.

Bogra.—Rainfall at Sadar 2·67. Fall general. Weather hot and cloudy. Cutting of *aus* and jute and transplanting of *aman* going on. Prospects fair. Fodder and water. sufficient. Common rice sells at 12 seers per rupee.

Pabna.—Rainfall at Sadar 4·12. Fall general in Sadar. Weather cloudy and rainy. Reaping of *aus* and jute over. Prospects of standing crops fair. Fodder and water sufficient. No cattle-disease. Common rice sells at 10 seers per rupee.

Dacca.—Rainfall at Sadar ·75, Manikganj 4·08, Munshiganj 4·22, Narayanganj 2·33. Prospects of crops fair. Weather seasonable. Fodder available. No cattle-disease. Common rice sells at 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 10·99, Jamalpur 1·74, Kishorganj 1·68, Netrokona 2·32, Tangail 1·36. Weather seasonable. Harvesting of *aus* and jute continues. Transplantation of *aman* rice in progress. Fodder and water sufficient. No cattle-disease. Common rice selling as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Kishorganj	10	11	
Jamalpur	12	0	
Netrokona	12	3	
Tangail	10	4	

Faridpur.—Rainfall at Sadar 3·81, Goalundo 4·37, Madaripur 1·43. Weather very wet. State and prospects of standing crops good. Fodder sufficient. No cattle-disease. Common rice selling at 11 seers per rupee.

Backergunge.—Rainfall at Sadar 5·02. Fall general, lightest at Patuakhali, 1·75. Weather rainy. Transplantation of *aman* continues. Cattle-disease at Rajapur outpost and Matbari thana. Fodder and water sufficient. Common rice sells at 11 seers (*aman*) and 13¼ seers (*aus*) per rupee.

Tippera.—Rainfall at Sadar 4·43, Brahmanbaria 1·37, Chandpur 2·02. Weather seasonable. Reaping of *aus* paddy nearly finished in Chandpur. Transplantation of *aman* going on. Fodder and water sufficient. No cattle-disease. Common rice sells at 12 seers per rupee.

Noakhali.—Rainfall at Sadar 9·92, Feni 9·10. Fall general. Weather seasonable. Transplantation of *aman* continues. Prospects of *aus* fair. Fodder fair. Water sufficient. Common rice sells at Sadar at 11 seers and at Feni at 14 seers per rupee.

Chittagong.—Rainfall at Sadar 9·61, Cox's Bazar 4·62. Transplantation of *aman* crops going on. Water and fodder sufficient. Cattle-disease still reported in parts of the district. Rice sells at 12⅞ seers per rupee.

Chittagong Hill Tracts.—Rainfall at Sadar 3·28. Fall general. Weather fair till 10th. *Aus* paddy doing well. Maize bad owing to heavy rain. Transplantation of winter rice going on. Common rice selling at 11 seers per rupee. No cattle-disease.

Patna.—Rainfall at Sadar 4·40, Barh 0·55, Bihar 1·67, Dinapore 5·08, Hilsa 1·75, Bikram 0·81. Weather cloudy. More rain wanted. Paddy transplantation going on. *Bhadoi* has suffered a good deal. No cattle-disease. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	ch.	
Patna	11	0	per rupee.
Barh	11	8	
Bihar	10	0	
Dinapore	11	12	

Gaya.—Rainfall at Sadar 1·29, Nawadah 1·4, Jahanabad 3·07, Aurangabad 3·78. Weather seasonable. Transplantation of paddy continues. Sugarcane and *bhadoi* doing well. No cattle-disease. Fodder and water ample. Average price of common rice is 10 seers 14 chitaks per rupee.

Shahabad.—Rainfall at Sadar 2·12, Buxar 5·18, Bhabhua 3·60, Sasaram 2·62, Dehri 2·68. Weather seasonable. Paddy being transplanted. *Bhadoi* and sugarcane doing well. Fodder and water sufficient. No cattle-disease. Rice sells at Sadar at 11 seers a rupee.

Saran.—Rainfall at Sadar 1·04, Siwan 2·71, Gopalganj 4·26. Weather seasonable. Standing crops doing well and transplantation of paddy continues. Cattle-disease reported from one village at Sonpur. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Champaran.—Rainfall at Sadar 2·31, Bettiah 3·52. Weather rainy and cloudy. Transplantation of *aghani* paddy and weeding of *bhadoi* crops going on. Prospects of standing crops very good. Cattle-disease reported. Fodder and water sufficient. Common rice sells at 14 seers and maize at 22 seers per rupee.

Muzaffarpur.—Rainfall at Sadar 3·15, Hajipur 2.07, Sitamarhi 2·07. Weather cloudy occasionally. Transplantation of paddy still going on. Prospects of crops good. Fodder and water sufficient. Very few cases of cattle-disease in Sitamarhi subdivision. Prices are—Common rice 11½ seers and maize 20½ seers a rupee.

Darbhanga.—Rainfall at Sadar 1·10, Samastipur 5·90, Madhubani 0·98. Weather hot and cloudy. Transplantation of paddy in progress. Prospects of standing crops good. Harvesting of *marua* and *makai* in progress. Fodder and water sufficient. Cattle-disease is reported from Warisnagar, Tajpore, Phulparas, Singhia and Darbhanga police-stations. Common rice sells as follows :—

	Srs.	ch.	
Sadar	12	0	per rupee.
Samastipur	12	8	
Madhubani	11	11	

Monghyr.—Rainfall at Sadar 2·64, Begusarai 3·02, Jamui 3·50. Weather seasonable. Transplantation of paddy going on. *Bhadoi* crops progressing. Prospects of standing crops good. Fodder and water sufficient. No cattle-disease. Common rice sells as follows :—

	Srs.	ch.	
Sadar	10	13	per rupee.
Begusarai	11	0	
Jamui	11	0	

Bhagalpur.—Rainfall at Sadar 2·21, Banka 2·05, Madhipura 2·12, Supaul 1·83. Weather seasonable. Transplantation of winter crops continues. More rain wanted on the eastern side of Banka subdivision. Harvesting of *marua* commenced in Madhipura and Supaul subdivisions. The outturn in Supaul will not be more than 75 per cent. Sporadic cases of cattle-disease reported. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	ch.	
Sadar	11	6	per rupee.
Banka	11	14	
Madhipura	13	0	
Supaul	13	8	

Purnea.—Rainfall at Sadar 6·65, Kishanganj 3·03, Araria 3·74. Fall general. Prospect of standing crops good. *Bhadoi dhan* and jute are being harvested. Transplantation of *aghani* progressing. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	8	per rupee
Kishanganj	11	8	
Araria	13	0	

Malda.—Rainfall at Sadar 1·60, Chanchal 4·50, Gajol 1·20. Weather hot and cloudy with occasional rain. Harvesting of *bhadoi* is going on. Transplantation of winter rice in progress. Cutting of jute commenced. No cattle-disease. Fodder and water sufficient except in parts of Old Malda thana. Common rice sells at 12 seers per rupee.

Sonthal Parganas. Rainfall at Sadar 1·11, Deoghur 0·59, Godda 0·38, Jamtara 3·23. Rajmahal 1·67. Weather hot and cloudy with occasional light showers. Paddy transplantation still going on. Prospects of *bhadoi* favourable. Fodder and water ample. Rice sells at 11¾ seers in Sadar. Pakaur report not received.

Cuttack.—Rainfall at Sadar 1·13. Fall general and more copious in all other parts. Weather hot and cloudy. Transplantation and reploughing of *sarad* going on. *Biali* in ears. Prospects fair. No cattle-disease. Fodder and water sufficient. Common rice sells at 13 seers 2 chitaks per rupee at Sadar.

Balasore.—Rainfall at Sadar 0·55. Fall general. Transplantation and weeding continues. Prospect good. Sugarcane, oilseeds, jute and cotton thriving. Rice sells at 13 and 14 seers per rupee at Sadar and Bhadrak respectively. Fodder and water ample. Floods in parts of Chandbally.

Angul.—Rainfall at Sadar 1·16, Chhendipada 2·65, Bissipara 2·21. Weather cloudy with occasional showers. Transplantation and puddling of winter rice continue. Cattle-disease reported from the interior. Common rice sells at 12 and 11¼ seers per rupee at Sadar and Khondmals respectively.

Puri.—Rainfall 2·27; it is general throughout the district and favourable to standing crops. *Bhadoi* paddy and *mandua* in ears. Weeding, puddling and transplantation of winter rice in progress. *Bhadoi* crop expected to be bumper. Other miscellaneous crops doing well. Common rice sells at 14 seers 7 chitaks per rupee.

Hazaribagh.—Rainfall at Sadar 3·05. Fall general. Weather seasonable. Transplantation of paddy going on vigorously. Sugarcane doing well. Fodder and water sufficient. Common rice sells at 11½ seers per rupee. Giridih return not received.

Ranchi.—Rainfall at Sadar 6·86. Fall general. Weather seasonable. Harvesting of *gundli* and transplantation of paddy in progress. Cattle disease reported from four thanas. Fodder and water plentiful. Common rice sells at 13½ seers per rupee.

Palamau.—Rainfall at Sadar 2·17. Rainfall general. Sowing of *bhadoi* still continues in places. Transplantation of paddy has commenced in most places. Standing crops are good. Fodder and water sufficient. Rice sells at Sadar at 10 seers 2 chitaks per rupee.

Manbhum.—Rainfall at Sadar 2·34, Gobindpur 0·63. Fall insufficient in Jharia, Topchanchi, Katras, Rajganj, Nirsha and Raghunathpur. Weather seasonable. Prospects of crops on ground good. Transplantation of winter rice continues. Fodder and water sufficient. Cattle-disease not reported. Average price of common rice at Sadar is 12 seers and at Gobindpur 11 seers per rupee.

Chaibassa.—Rainfall 1·89. Transplantation nearly finished. Young paddy promising Average price of rice 13 seers 10 chitaks in the district; at Chaibassa 12 seers per rupee.

General Summary.—The rainfall during the week was general and at places heavy. Bankura, 24-Parganas, Jessore, Patna and parts of Bhagalpur are still in need of more rain. Transplantation of winter rice and harvesting of early rice and jute still continue. Autumn crops and sugarcane promising. Prospects favourable. Cattle disease reported from 15 districts. Fodder and water generally sufficient. The price of common rice has risen in 8 districts, fallen in 12, and is stationary in the rest (27).

The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	1·8		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	2·9	2nd	
	Miles.		
The mean movement of the wind per day	132·3		
The greatest movement of the wind in one day	271·0	22nd	
The greatest movement of the wind in one hour	17·0	22nd	1 to 2 p.m.

The number of hours with winds from each of the eight points—
N. 15, N.E. 37, E. 57, S.E. 151, S. 220, S.W. 184, W. 39, N.W. 9, Calm 32.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·6 higher; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.

The total fall from 1st January to 9th August 1902	39·88
The average fall of the corresponding period for 24 years, Surveyor-General's Office	38·44

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 8(formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; p, passing temporary showers.

CONTENTS.

PRELIMINARY FORECAST OF THE SUGARCANE CROPS OF BENGAL, 1902.

THE following report is published for general information.

C. MACPHERSON,
Offg. [illegible]. *to the Govt. of Bengal.*

The 19th August 1902.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Preliminary Forecast of the Sugarcane Crop of Bengal, 1902.

Explanatory.—In accordance with the instructions received with Government order No. 144T,—R., dated the 22nd May 1899, an estimate of the raw sugar produced in these provinces from other sources than cane has been included

in this forecast, but the information available on the subject is yet far from complete.

2. *The character of the season.*—In January and February there was little or no rain. The drought which commenced in the middle of September 1901 lasted till the end of February 1902. In March, the weather was generally seasonable, but in April there was excessive rain in East Bengal. May was a seasonable month, though East Bengal again got too much rain. The monsoon was late and the June rainfall was seriously defective except in North and East Bengal. July has been generally a seasonable month. Excessive rain has caused some contraction of area, and has damaged the young plants in parts of North and East Bengal; while a few districts in Bihar, on the other hand, have suffered from drought at the planting season. On the whole, the season has been generally favourable, except in East Bengal and part of Bihar.

3. *Area sown.*—The normal area under sugarcane in this Province is now estimated at 740,200 acres, against 843,400 returned last year, the reduction being mainly due to a revised estimate of the area in the Palamau district. It is estimated that the area planted this year is 716,000 acres, the contraction has been previously explained.

4. *Character of the crop.*—It will be seen from the summary of the district returns appended to this report, that in eleven districts the outturn is expected to reach or exceed the normal, while eleven other districts anticipate an outturn of over 90 per cent. In twelve districts the estimate varies between 80 and 89 per cent., while in the remaining eleven districts crops from 60 to 79 per cent. of the normal are anticipated.

5. *Outturn.*—According to the estimates of the District Officers, the outturn of the crop for the Province as a whole will this year amount to 90 per cent. of a normal crop. But a tendency to underestimate the crop is observable in the important sugarcane-growing districts of East Bengal, and I anticipate that under normal conditions for the rest of the year the provincial outturn will reach 94 per cent. of a normal crop.

C. G. H. ALLEN,

Offg. Director of Land Records and Agriculture, Bengal.

CALCUTTA,

The 11th August 1902.

Preliminary Forecast of the Sugarcane Crop of Bengal, 1902.

Division.	District.	Total area of district, in acres.	Total area estimated to be under cultivation, in acres.	Approximate normal area under sugarcane, in acres.	Approximate area under sugarcane last year (1901), in acres.	Estimated area under sugarcane this year (1902), in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year (1901)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1902)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.

Bardwan	Burdwan ...	[illegible]	[illegible]	[illegible]	[illegible]	27,900	83	81	...	No cause for the low outturn anticipated is stated.
	Birbhum ...	[illegible]	960,000	[illegible],000	9,000	9,000	100	100		
	Bankura ...	1,677,440	642,800	15,000	14,090	13,800	95	100		
	Midnapore ..	3,292,800	2,190,000	20.400	18,100	17,900	84	77	Excessive rain at the time of cultivation interfered with the progress of sowing. The outturn is expected to be considerably below the normal on this account.	
	Hooghly ...	1,087,360	702,300	14,500	14,400	14,300	80	99		
Presidency	24-Parganas ...	1.344,640	1,102,000	4,500	4,800	4,400	107	103		
	Nadia ...	1,788,160	1,303,000	11,400	10,300	7,500	90	75	The normal area has been revised. The decrease in the area and outturn is due to want of seasonable rain.	Rainfall statistics do not bear out the explanation.
	Murshidabad	1,373,440	985,500	14,700	15,000	14,600	82	82	The decrease in area of the sugarcane crop is due to want of rain since first week of June.	No cause is given for the low outturn anticipated.
	Jessore ..	1,873,000	1,142,100	15,000	15,000	12,400	84	68	The decrease in area and outturn is due to excessive rainfall at the time of planting.	

Division.	District.	Total area of district, in acres.	Total area estimated to be under cultivation, in acres.	Approximate normal area under sugarcane, in acres.	Approximate area under sugarcane last year (1901), in acres.	Estimated area under sugarcane this year (1902), in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year (1901)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1902)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11
Presidency—*concld.*	Khulna ...	3,103,948	870,000	3,100	1,800	1,200	100	100	...	The cause of the steady decrease in the area occupied by this crop should have been explained.
Rajshahi	Rajshahi ...	1,663,040	1,262,100	18,000	15,500	16,00	100	100		
	Dinajpur ...	2,536,960	1,697,600	35,000	30,000	30,000	110	110	Timely rainfall has favoured the growth of sugarcane, and a more than average outturn is expected.	
	Jalpaiguri ...	1,894,400	1,075,000	3,100	2,900	2,800	80	80	(1) The decrease in area is due to the low price of molasses this year. (2) Early and heavy rain is likely to affect the outturn.	This explanation is scarcely borne out by the rainfall statistics, which show a moderate excess only.
	Darjeeling ...	744,960	148,000	400	200	200	67	75		The cause of the low outturn anticipated is not stated.
	Rangpur ...	2,231,040	1,602,700	24,100	22,900	22,900	100	95	Excessive rainfall in April and May somewhat affected the crop in the Gaibanda subdivision.	
	Bogra ...	869,760	669,000	12,000	12,000	11,000	90	85	Frequent rain caused some injury to the crop: hence the decrease in area and outturn.	
	Pabna ...	1,176,960	882,500	66,000	60,000	55,000	100	80	Excessive rainfall has caused a diminution in the area under sugarcane and affected the prospects of its outturn.	

Division	District								Remarks	
Dacca	Dacca ..	1,780,480	1,213,500	20,000	19,900	20,000	88	91	The short outturn is due to the excessive rain.	
	Mymensingh	4,062,480	2,406,700	35,000	33,600	34,000	95	85		I shall ask the Collector to explain the cause of the low outturn anticipated.
	Faridpur ...	1,460,460	1,037,500	42,000	40,000	35,000	100	75	The cultivation of sugarcane is gradually decreasing in this district. The decrease in outturn is due to excessive rainfall.	
	Backerganj ...	2,335,360	1,408,000	20,000	20,000	20,000	100	80	The outturn is expected to be below normal owing to heavy rainfall at the sowing season. The area sown with sugarcane remains normal.	
Chittagong	Tippera ...	1,594,880	1,179,800	15,900	14,700	13,700	82	63	The decrease in the outturn and in the area under the crop is due to unseasonable and excessive rain.	
	Noakhali ...	1,062,800	818,800	900	600	600	80	70	The decrease in the outturn is due to excessive rainfall.	
	Chittagong ...	1,694,815	559,800	9,300	9,000	9,000	75	80	The decrease in the outturn is due to heavy rainfall at the time of planting.	
Patna	Patna ...	1,332,560	998,500	5,400	2,700	5,200	98	94	The figures in columns 5 and 6 have been revised according to thana units. Prospects at first favourable, but the continued drought is devastating everything.	
	Gaya ...	3,015,680	2,207,500	29,000	31,200	22,500	98	96		
	Shahabad ..	2,795,520	1,841,800	36,000	40,000	41,000	80	80	The reduced outturn is due to want of rain.	
	Saran ...	1,696,087	1,384,000	36,500	36,500	46,800	80	95	The figures in columns 3 and 4 have been revised according to survey records.	
	Champaran ...	2,079,815	1,447,700	10,800	11,400	9,900	75	90	The decrease in the area and outturn is due to insufficiency of rain.	
	Muzaffarpur	1,941,254	1,627,000	8,800	9,700	9,300	73	75	......	The cause of the low outturn has not been explained.
	Darbhanga ...	2,134,400	1,820,700	17,000	16,000	15,100	83	99	The figures in columns 3 to 5 have been revised according to the settlement figures. There is a decrease in column 7 due to drought in the Madhubani subdivision.	
Bhagalpur	Monghyr ...	2,509,440	1,582,800	6,800	6,600	6,600	83	79	The low outturn is due to the insufficient and untimely rainfall.	
	Bhagalpur ...	2,704,640	2,097,000	63,700	63,700	63,700	112	117		

Division.	District.	Total area of district, in acres.	Total area estimated to be under cultivation, in acres.	Approximate normal area under sugarcane, in acres.	Approximate area under sugarcane last year (1901), in acres.	Estimated area under sugarcane this year (1902), in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year (1901)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1902)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11
Bhagalpur—concld.	Purnea ...	3,196,520	1,639,800	9,500	9,000	9,600	87	86	....	The low outturn has not been explained.
	Malda ...	1,216,000	672,800	5,000	3,000	3,900	75	100		
	Sonthal Parganas.	3,500,160	1,725,100	17,000	18,000	18,000	111	106	The season is favourable for sugarcane cultivation.	
Orissa ...	Cuttack ...	2,323,200	1,161,200	5,000	4,500	4,600	75	93	The estimated outturn is below the normal owing to insufficient rainfall which retards the growth of sugarcane.	
	Balasore ...	1,334,398	870,800	4,400	2,000	2,000	95	109	....	The cause of the decrease in area should have been explained.
	Angul ...	1,075,840	260,000	2,300	2,300	2,300	63	75	....	The cause of the low outturn should be reported in the final forecast.
	Puri ...	1,599,640	738,300	3,500	2,700	2,700	82	90		
Chota Nagpur.	Hazaribagh ...	4,493,440	2,213,200	35,600	28,300	35,600	97	94		
	Ranchi ...	4,569,600	2,954,200	300	200	300	75	75	The figures in column 5 have been revised after further enquiry. The decrease in the outturn is due to want of rain at the time of planting.	
	Palamau ...	3,139,200	768,900	4,300	4,800	4,500	100	85	The successive bad rice crops have caused land which would otherwise have been put under rice to be planted with sugarcane. The normal area has been revised in accordance with Mr. Sunder's Settlement Report.	The cause of the low outturn should have been explained.
	Manbhum ...	2,654,080	1,419,200	12,300	12,160	11,800	100	84	The figures in columns 5 and 6 have been revised.	Ditto ditto.
	Singhbhum ...	2,526,019	833,800	1,000	1,000	1,000	93	100		
	Total ...	95,301,960	57,306,900	740,300	717,500	716,600	93	84*	....	* Estimated by this Department.

WEATHER AND CROP REPORT.

For the week ending on the 18th August 1902.

Burdwan.—Rainfall at Sadar 0·35, Kalna 2·07, Katwa 2·83, Raniganj 2·52. Weather showery but more rain wanted. Transplantation going on. Fodder and water sufficient. Condition of cattle good. Common rice sells at 10½ seers per rupee.

Birbhum.—Rainfall at Sadar 3·22, Rampur Hât 6·76. Weather cloudy. Transplantation continued with better prospects. Sugarcane promising. Fodder sufficient. Common rice sells at 12 seers per rupee.

Bankura.—Rainfall at Sadar ·82. More rain wanted. Condition of paddy crops backward. Sugarcane doing well. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Midnapore.—Rainfall at Sadar 1·21, Contai 2·79, Tamluk 0·41, Ghatal 3·24. Weather hot and cloudy. *Aman* transplantation going on smoothly. About 80 per cent. finished in Contai and Ghatal subdivisions, 85 per cent. in Tamluk. More rain wanted. *Aus*, jute, hemp and sugarcane doing well. Jute being cut in Contai and Tamluk. Cattle-disease reported from thana Binpur. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	ch.	
Sadar	12	0	per rupee.
Contai	11	0	
Ghatal	11	0	
Tamluk	11	12	

Hooghly.—Rainfall at Sadar 1·82, Serampore 4·06, Arambagh 1·34. Transplantation of *aman* continues. Fodder and water sufficient. Price of common rice stationary. Prospect of standing crops good.

Howrah.—Rainfall at Sadar 2·48, Ulubaria 1·16. Fall general on the 11th and 12th. It was recorded at Ulubaria also on the 13th and at Sadar on the 16th. Transplantation of *aman* paddy still going on. Agricultural prospects in general hopeful. No cattle-disease. Fodder and water-supply sufficient. Average price of common rice is 11 seers throughout the district.

24-Parganas.—Rainfall at Sadar 0·97, Barasat 2·36, Basirhat 3·85, Diamond Harbour 0·84. Weather very hot, occasional local showers. State of standing crops good, but more rain is wanted in all the subdivisions, especially Diamond Harbour. Prospect fair. *Aus* and jute being harvested and steeped. Transplantation of *aman* continues. Common rice sells at 11½ seers per rupee; at Diamond Harbour 10½ seers. Condition of cattle good. Supply of fodder and water sufficient.

Nadia.—Rainfall at Chuadanga 2·21, Ranaghat 2·62, Meherpur 2·30, Kushtia 4·27. Fall insufficient in Sadar. Weather hot. Harvesting of *aus* paddy and transplantation of *aman* paddy going on. Jute growing up well, being steeped. Fodder and water sufficient. No cattle-disease. Common rice sells as follows :—

	Srs.	ch.	
Sadar	12	0	per rupee.
Ranaghat	11	0	
Chuadanga	10	0	
Meherpur	13	8	
Kushtia	11	4	

Murshidabad.—Rainfall at Sadar 5·71, Kandi 8·51, Jangipur 5·92, Lalbagh 7·10. Weather seasonable. Transplantation of *aman* continues. Harvesting of *bhadoi* going on. Jute being cut and steeped in Jangipur subdivision. Prospect of sugarcane and jute good. No cattle-disease. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	ch.	
Sadar	11	8	per rupee.
Kandi	12	0	
Jangipur	12	0	
Lalbagh	11	0	

Jessore.—Rainfall at Sadar 0·88, Jhenida 5·46, Magura 5·91, Narail 3·04, Bangaon 2·05. Weather seasonable. More rain wanted in Sadar. Prospects of crops generally fair. *Aus* being harvested. Fodder and water sufficient. Cattle-disease reported from Salkhia outpost in Magura subdivision. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Jhenida	12	0	
Bangaon	12	0	
Narail	10	12	
Magura	13	0	

Khulna.—Rainfall at Sadar 4·00, Bagerhat 6·41, Satkhira 6·53. Weather seasonable. Transplantation of *aman* and harvesting of *aus* continue. Prospects favourable. Fodder and water sufficient. Cattle-disease reported from Paikgachha and Asasuni. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	5	per rupee
Bagerhat	12	0	
Satkhira	10	8	

Rajshahi.—Rainfall at Sadar 6·06, Nator 7·31, Naugaon 8·23. Weather seasonable. Prospects of standing crops good. Transplantation of *aman* and harvesting of *bhadoi* and jute going on. Common rice selling at 12 seers per rupee.

Dinajpur.—Rainfall at Sadar 7·87. Fall in the district general, varying from 5·38 to 11·80. Weather seasonable. Standing crops good. Steeping of jute and transplantation of winter rice are in full swing. *Bhadoi* is being reaped. No cattle-disease. Fodder and drinking-water plentiful. Rice selling at 11 seers per rupee.

Jalpaiguri.—Rainfall at Sadar 9·32, Alipore Duars 19·15. Weather rainy with occasional high winds. Transplantation of *haimanti* and harvesting of *bhadoi* paddy going on. Common rice sells at 11 seers a rupee. Fodder and water sufficient. Cattle-disease reported from two thanas in Sadar subdivision.

Darjeeling.—Rainfall at Sadar 3·39, Kurseong 17·53, Siliguri 13·39. Weather seasonable. *Hills*—Maize being harvested, *chota* and *bara marua*, *bhadoi* and *haimanti dhan* doing well. *Terai*—Transplanting of *haimanti* paddy and reaping of jute going on. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	11	0	

Maize sells at Darjeeling at 18 seers and at Kalimpong at 25 seers per rupee.

Rangpur.—Rainfall at Sadar 8·02. Fall heavy, excessive at Kurigram, 14·73. Prospect of the standing crops is fair. Weather cloudy and rainy. More rain is expected. Gaibanda is reported to be over flooded. No loss of life or property reported. Damage to crop is apprehended. Transplantation of *aman* and cutting of jute at Kurigram retarded by heavy rain. Progress at Sadar and Nilphamari good. Common rice sells at Sadar at 10½ seers per rupee.

Bogra.—Rainfall at Sadar 13·82. Fall general. Weather hot and cloudy. Cutting of *aus* and jute and transplantation of *aman* going on. Prospects fair. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Pabna.—Rainfall at Sadar 1·42, Sirajganj 5·11. Fall general. Weather rainy and hot. Harvesting of *aus* nearly over and that of jute being continued. Prospects of standing crops fair. Fodder and water sufficient. No cattle-disease. Common rice sells at 10 seers per rupee.

Dacca.—Rainfall at Sadar 4·25, Manikganj 3·96, Munshiganj 4·81, Narayanganj 5·44. Prospects of crops fair. Weather seasonable. Fodder available. No cattle-disease. Common rice sells at 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 5·68, Jamalpur 9·68, Kishorganj 4·34, Netrokona 13·55, Tangail 4·20. Weather seasonable. Harvesting of *aus* and jute and transplantation of *aman* continue. Outturn of jute estimated at 50 per cent. Nearly 75 per cent. of normal area transplanted with *aman*. Fodder and water sufficient. No cattle-disease. Common rice selling as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Kishorganj	10	8	
Jamalpur	12	4	
Netrokona	11	12	
Tangail	10	4	

Faridpur.—Rainfall at Sadar 5·43, Goalundo 3·85, Madaripur 3·33. Weather very wet. State and prospects of crops good. Fodder sufficient. No cattle-disease. Common rice sells at 11 seers a rupee.

Backergunge.—Rainfall at Sadar 2·12. Fall general, heaviest at Patuakhali, 7·23. Weather seasonable. Transplantation of *aman* continues. Cattle-disease at Matbari thana. Fodder and water sufficient. Common rice sells at 11 seers (*aman*) and 14 seers (*aus*) per rupee.

Tippera.—Rainfall at Sadar 3·50, Brahmanbaria 5·66, Chandpur 3·10. Weather seasonable. Prospects of standing crops good. The harvesting of *aus* paddy and jute, and transplantation of *aman* continues. Fodder and water sufficient. No cattle-disease. Common rice sells at 12 seers per rupee.

Noakhali.—Rainfall at Sadar 5·25, Feni 6·67. Fall general. Weather seasonable. Transplantation of *aman* continues. *Aus* being harvested. Fodder and water sufficient. Cattle-disease at Sundip. Common rice sells at Sadar at 11 seers and at Feni at 13 seers per rupee.

Chittagong.—Rainfall at Sadar 3·95, Cox's Bazar 9·32. Transplantation of *aman* crops going on. Common rice selling at 12 seers 14 chitaks per rupee. Fodder and water sufficient.

Chittagong Hill Tracts.—Rainfall at Sadar 2·43. Fall general. Weather fine with occasional showers. *Joom* paddy crop about average. Transplantation of *aman* paddy continues. No cattle-disease. Common rice sells at 11 seers per rupee.

Patna.—Rainfall at Sadar 0·39, Barh 1·29, Bihar 0·38, Dinapore 0·47, Bikram 0·45, Hilsa 0·85. Weather hot and cloudy. Rain urgently wanted. Prospects of Indian-corn good. Transplantation of paddy going on in low lands. No cattle-disease. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	ch.	
Patna	11	4	per rupee.
Barh	11	4	
Bihar	10	0	
Dinapore	12	8	

Gaya.—Rainfall at Nawadah 0·43, Jahanabad 0·59, Aurangabad 0·97. Weather hot and rainy. Sugarcane and *bhadoi* doing well. Transplantation of paddy going on, but retarded for want of sufficient rain in places. Fodder and water for cattle ample. Average price of common rice 10 seers 10 chitaks per rupee.

Shahabad.—Rainfall at Sadar 0·93, Buxar 0·70, Bhabhua 0·16, Dehri 0·02. Weather hot. Paddy being transplanted. *Bhadoi* and sugarcane doing well. Fodder and water sufficient. No cattle-disease. Rice sells at Sadar at 11 seers a rupee.

Saran.—Rainfall at Sadar 0·16, Siwan and Gopalganj nil. Weather seasonable but very hot. *Bhadoi* crops being weeded. Transplantation of paddy continues, but more rain wanted. Fodder and water sufficient. No cattle-disease. Common rice sells at 12 seers per rupee.

Champaran.—Rainfall at Sadar 5·05, Bettiah 4·85. Weather hot and cloudy. Transplantation of winter rice approaching completion. Harvesting of *bhadoi* commenced. Prospects of standing crop very good. Cattle-disease reported. Fodder and water sufficient. Common rice sells at 13½ seers and maize at 22 seers per rupee.

Muzaffarpur.—Rainfall at Sadar ·44, Hajipur .95, Sitamarhi 1·62. Rainfall on 12th to 14th at Sitamarhi not recorded, rain-gauge being under flood water. Weather hot and cloudy occasionally. Transplantation of paddy still going on, and prospects fair except in Sitamarhi subdivision, where Bagmati flood damaged crops considerably, and swept away many cattle; elsewhere fodder and water sufficient. Prices are—Common rice 11½ seers and maize 20½ seers a rupee.

Darbhanga.—Rainfall at Sadar 2·85, Samastipur 0·78, Madhubani 5·30. Weather hot and cloudy. Transplantation of paddy in progress. Heavy flood came down from Nepal Terai, and has inundated portions of country near rivers. It is slowly subsiding. Loss to *bhadoi* is feared in places. Fodder and water sufficient. Cattle-disease reported from Warisnagar thana. Common rice sells as follows :—

	Srs.	ch.	
Sadar	12	9	per rupee.
Samastipur	12	0	
Madhubani	11	11	

Monghyr.—Rainfall at Sadar 1·33, Begusarai 1·69, Jamui 1·98. Weather hot and occasionally cloudy. Transplantation of paddy continues. *China* being harvested. Prospects of standing crops good. No cattle-disease. Fodder and water sufficient. Common rice sells at 11 seers per rupee.

Bhagalpur.—Rainfall at Sadar 0·18, Banka 1·64, Madhipura 4·10, Supaul 6·12. Weather hot and cloudy. Transplantation of *aghani* paddy nearly complete. Standing crops doing well. Harvesting of *marua* continues. More rain wanted in Banka. Sporadic cases of cattle-disease reported. Water and fodder sufficient. Floods have occurred in North Bhagalpur, but no damage to crops is reported. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	6	per rupee.
Banka	11	14	
Madhipura	13	8	
Supaul	14	0	

Purnea.—Rainfall at Sadar 1·48, Kishanganj 8·57, Araria 10·61. Fall general, heavier towards the north. River Kossy and Mohananda in flood. *Bhadoi dhan* and jute are being harvested. The crops are average. Winter crops progressing. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	0	per rupee.
Kishanganj	11	8	
Araria	13	0	

Malda.—Rainfall at Sadar 4·83, Chanchal 6·84, Sibganj 1·74, Gajol 4·43. Fall general. Weather rainy and cloudy. Harvesting of *bhadoi* nearly finished. Transplantation of winter rice approaching completion. Cutting of jute still going on. Cattle-pox reported from Tulsihatta thana. Fodder and water sufficient. Common rice sells at 10 seers per rupee.

Sonthal Parganas.—Rainfall at Sadar 4·42, Deoghur 1·32, Godda 1·83, Jamtara 1·78, Pakaur 5·20, Rajmahal 3·37. Weather hot with occasional showers. The extent of paddy transplantation was nearly fourteen annas. The outturn of *makai* is expected to be good except at Jamtara. Fodder and water sufficient. Rice sells at 11¾ seers per rupee in the Sadar.

Cuttack.—Rainfall at Sadar 2·92. Fall general. Weather hot and cloudy. Transplantation and reploughing of *sarad* going on. Early *beali* in maturity but slightly damaged in places by insects. Late *beali* doing well. Prospects on the whole fair. Slight cattle-disease in parts. Fodder and water sufficient. Common rice sells at 13 seers 2 chitaks per rupee at Sadar.

Balasore.—Rainfall at Sadar 1·10. Fall general. Transplantation, weeding and puddling going on. Prospects good. Sugarcane, oilseeds, jute and cotton thriving. Rice sells at 13 and 16 seers per rupee at Sadar and at Bhadrak respectively. Floods in Chandbally has done little damage. Fodder and water sufficient. Some damage done in Bhograi pargana by excess rainfall.

Angul.—Rainfall at Sadar 1·58, Chhendipada 1·27, Bissipara 3·63. Weather hot and cloudy. Puddling and weeding of winter paddy in progress. Common rice sells at 11¼ seers per rupee.

Puri.—Rainfall 0·04; it is general throughout the district and favourable to standing crops. *Bhadoi* paddy and *mundua* in ears. Weeding, puddling and transplantation of winter paddy in progress. *Bhadoi* crop expected to be bumper. Other miscellaneous crops doing well. Common rice sells at 14 seers 7 chitaks per rupee. Cattle-disease prevailing at places.

Hazaribagh.—Rainfall at Sadar 0·03. Giridih 3·68. Fall not general. Weather hot and cloudy. Sugarcane doing well. Prospect of *bhadoi* fair. Cattle-disease reported from three thanas. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Ranchi.—Rainfall 0·09. Weather bright and hot, more rain wanted. Harvesting of *gundli* continues. Cattle-disease reported from several thanas. Fodder and water sufficient. Average price of common rice is 13¾ seers per rupee.

Palamau.—No rain. Weather not seasonable. Rain urgently wanted. *Bhadoi* still doing fairly well. Transplantation of winter paddy continues. Fodder and water sufficient. No cattle-disease. Rice sells at Sadar at 10 seers 6 chitaks per rupee.

Manbhum.—Rainfall at Sadar 1·80, Gobindpur 2·18. Fall not general. Weather seasonable on the whole. More rain wanted. Prospects of crops on ground good. Transplantation of winter rice continues. Fodder and water sufficient. Cattle-disease reported from Rajganj outpost. Average price of common rice is at Sadar 12 seers and at Gobindpur 11 seers per rupee.

Singhbhum.—Rainfall 0 28. Transplantation finished. Standing crops promising. Average price of rice at Sadar is 11 seers per rupee.

General Summary.—Rain fell early in the week in every district except Palamau. The fall in parts of North Bengal was excessive and elsewhere was moderately heavy. The districts of Bihar, Chota Nagpur, and the Burdwan and Presidency Divisions generally require more rain. In Sitamarhi subdivision of the Muzaffarpur district considerable damage has been done to crops, cattle and houses by floods. Floods are also reported in North Darbhanga, North Bhagalpur, and Rangpur. Harvesting of jute and early rice continues. Transplantation of winter rice is going on. Standing crops generally doing fairly. Cattle-disease reported from 15 districts. Fodder and water adequate. The price of common rice has risen in 11 districts, fallen in 9, and is stationary in the rest.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,

The 19th August 1902.

Meteorological Report of the Province of Bengal for the month of July 1902.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JULY 1902.

TOWARDS the end of June changes of an exceptional kind began in North Bengal and Assam. Those extended westward and southward, with the result that in a few days south-west monsoon conditions became established over the greater part of Northern India. On the 1st of July, therefore, ordinary monsoon weather prevailed in Bengal, and the only trace of the preliminary disturbance was seen in the heavy rainfall which was reported on that date from Orissa.

Throughout July well-marked south-west monsoon conditions continued without interruption, and the most noticeable feature is the general heavy rainfall as shown by the average rainfall in the various divisions of the Province. In Orissa the fall was 19·6 inches, 8 inches in excess of the normal, in East Bengal 22·7 inches, 5 inches in excess, while in the other divisions there was excess of at least 1 inch on an average for the whole area.

But while a general view of the rainfall by this method of averages gives excess in all parts of the Province, an inspection of the individual reports shows considerable tracts of country in which rainfall has been deficient, though not to any great extent. These areas are chiefly in Bihar and the southern parts of Bengal Proper, but there has been a small deficiency in part of Chota Nagpur and North Bengal also. Orissa is the only division in which rainfall during the month was uniformly in excess.

Rainfall in every year is more or less irregularly distributed, but during the month just past the irregularity was more marked than usual. This was probably due to the local storms which were a not uncommon feature during the early part of the month, and to the fact that rainfall on more than one occasion appeared to commence in the north-east and extend southward and westward, instead of, as usually happens, accompanying cyclonic disturbances from the Bay of Bengal.

This disturbing influence which proceeds from the north-east, and which I have made frequent reference to before, has been very noticeable during the present season. The phenomenon which no doubt is connected with the causes of the abnormal monsoon seasons of the past few years awaits explanation. All that can be said is that up to the time when rainfall begins and temperature falls rapidly in North Bengal and Assam, the observations at the ground level give little or no indication of the approach of disturbed weather, and that therefore the causes are probably to be found in the upper rather than the lower air.

Three periods of disturbed weather, each with more or less general heavy rainfall, occurred. The first of these began as a diffused depression about the 4th, extending over the south of the Bay, and causing, if the reports from Diamond Island be accepted, very strong winds in the east of the Bay. The depression formed further south than is usual in July, and moving westward or north-westward, crossed the coast of the Circars on the 6th. At 8 A.M. on that date, when the centre of the depression was near the coast, its existence was shown more by the cyclonic arrangement of the light winds then prevailing than by the pressure differences, and there was no deficiency in pressure except in the extreme south-west of the Bay. On the other hand there was a large excess in Bengal, varying from ·08 inch in Orissa to ·2 inch in North Bengal. Notwithstanding the high pressure then prevailing in Bengal, heavy rainfall occurred on the 5th and 6th—on the latter in the extreme north of the province. With the westward movement of the depression the heavy rainfall ceased; but as pressure steadily fell for several days subsequent to the 6th, the large excess slowly disappeared, and before the end of the second week there was an equally large defect.

During the second week and after the westward movement of the depression, rainfall was less general and lighter than at any other time during the month. After the reduction of pressure rainfall recommenced in the north and east of the Province, and on the 13th a depression began to form in the north of the Bay. This depression never attained to more than moderate depth at the centre, but there was a very steep pressure gradient over the whole Bay area, and with it exceptionally strong winds and rough sea. The strongest winds at Diamond Island were on the 14th and 15th, about 24 miles an hour on an average; and at Saugor Island between the 16th and 18th, when the average velocity was 30, 42 and 37 miles an hour respectively.

Up to the 15th the depression was moving slowly northwards, but thereafter it moved north-westward. On the 16th the centre was between Midnapore and Chaibassa, and on the 7th it had moved beyond the western boundary of the Province.

While the depression was in the north of the Bay heavy rain fell in Orissa and Arakan, and after its passage westward the strong influx of monsoon winds from the Bay caused heavy rain inland, chiefly in Bengal Proper Moderately heavy rainfall occurred in Bihar on the 19th and 20th, but generally the falls caused by the disturbance in the western districts, whether at the time of, or subsequent to, its passage. were comparatively light.

At the end of the third week the pressure gradient was steep over the Bay, but that was due to excess in the extreme south, as readings in Bengal were practically normal. A wave of rising pressure was at that time passing westward over the Province, and probably owing to the wind changes which accompanied it, heavy rain fell in the south-western districts. The most noticeable of these changes was the rapid increase of wind velocity at Saugor Island from 19 to 36 miles an hour on the 22nd and the heavy rainfall (7 inches) at that station.

The rise of pressure was followed by a similar fall, and along with that heavy rainfall began in Arakan on the 23rd, then in North Bengal on the 24th, and afterwards became general over the Province, except in the south-western districts. On the 26th the heavy rainfall was confined to the west of Bihar, but on that date a depression had begun to form

in South-West Bengal. This depression remained shallow; but as there was a steep gradient over the north of the Bay, wind velocity at Saugor Island again increased to about 40 miles an hour. The depression moved slowly westward, and during its passage general and in places heavy rainfall occurred in the southern and western districts.

The depression had practically ceased to affect weather in Bengal on the 29th, and during the closing days of the month ordinary monsoon weather prevailed with general but usually light or moderate rainfall.

Pressure underwent oscillations rather more frequent than usual and moderate in amount; but as the depressions which formed were not deep, the greatest defect was rarely more than ·2 inch. On an average for the whole month it was normal at the coast stations and in defect inland. This defect varied from less than ·01 inch in the south-western and eastern districts to ·03 inch in the west of Bihar.

Temperature was more frequently low owing to the cloudy rainy weather which prevailed with but little interruption throughout the month. Day readings were more frequently above the normal in the western districts, but generally there was defect at night. In Assam, Bengal Proper and Orissa mean defect was half a degree or less, and in Bihar and Chota Nagpur there was a mean excess of about half a degree.

Rainfall, as already stated, was on an average above the normal in all divisions of the Province, especially in Orissa and North Bengal, where there was excess of 8 and 5 inches, respectively. Owing to the local heavy falls which were more frequent than usual, the distribution of rainfall was irregular; and there are cases of variation from a moderate deficiency to a large excess over a limited stretch of country. The more striking examples of such variation are in the east of Bihar, the eastern parts of North Bengal and in parts of South-West Bengal. The greatest excess is 10 inches in part of Chittagong, the east of the Sunderbans, the south of Orissa and the east of North Bengal, and generally there is excess of between 5 and 10 inches in Orissa, the southern part of East Bengal, and the northern part of North Bengal, with the exception of the Jalpaiguri and Rangpur districts. The area of difficient rainfall includes a great part of Bihar, the extreme west of Chota Nagpur and most of the central districts. Generally, however, the defect is small, and there are only two tracts, chiefly in the Dinajpur and Burdwan districts, over which defect is more than 5 inches.

For the individual falls, which, owing to their irregularity, it is impossible to discuss in a brief description, reference to the accompanying tables is suggested.

The following table gives a comparison of the falls in the various divisions during the month of July with the normal fall, the actual being given as a percentage of the normal fall. The table also shows the actual falls for each of the previous months of the year expressed in the same way, and the last column of the table shows the total of the falls of the past seven months of the year in each division expressed as a percentage of the normal fall:—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	Actual rainfall of first seven months of 1902 expressed as a percentage of the normal fall for the period.

	Inches.
The total fall of rain from 10th to 16th August 1902	3·32
The average fall of the corresponding period for 24 years, Surveyor-General's Office	3·85
The total fall from 1st January to 16th August 1902	43·20
The average fall of the corresponding period for 24 years, Surveyor-General's Office	42·29

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; p, passing temporary showers; t. thunder; g. gloomy.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 18th August 1902.

(a) The decrease is due (1) to the running of 7 extra troop trains from Kidderpore Docks to Agra Fort, Fyzabad and Jheelum and (2) to "Ulta Rath Jatra" festival in the corresponding period of 1901.
(b) The decrease is chiefly in coal and seeds.

(a) The decrease is due to the running of several extra troop trains from Kidderpore Docks and extra trains for "Rajgir Mela" in the corresponding period of 1901.
(b) The decrease is chiefly in coal and seeds.

RESOLUTION ON THE REPORT OF THE WORKING OF THE SHIPPING OFFICES AT CALCUTTA AND THE OUTPORTS.

No. 1560Marine.

Government of Bengal.

MARINE DEPARTMENT.

MARINE.

Dated Calcutta, the 19th August 1902.

RESOLUTION.

READ—

Letter No. 891B., dated 25th July 1902, from the Secretary to the Board of Revenue, submitting the Report on the working of the Shipping Offices at Calcutta, Chittagong and Orissa Ports for the year 1901-1902.

The receipts of the Calcutta Shipping Office amount to Rs. 69,066, showing an increase of Rs. 1,692 over the previous year. The chief cause of the increase is the sale of discharge certificates, from which Rs. 4,760 were realized. There were larger shipments under Indian articles, and no seamen were shipped without certificates. Under discharging fees there was a decrease of Rs. 1,662 due to the discharge of fewer seamen in port, owing to vessels discharging their crews at outports and returning them as passengers; fresh crews were then engaged and sent out in the same way.

In order to cope with the increase of work in the Native Department, and to afford a needed improvement, it has been proposed to open a branch Shipping Office in the vicinity of the Kidderpore Docks, and the matter is now under the consideration of the Board. It will materially lessen the distance to be travelled by masters and men, and will effect considerable convenience to all concerned.

The disbursements of the office show a decrease of Rs. 965. There is a large decrease of Rs. 2,456 under overtime fees due to the orders of Government, under which the entire amount of fees earned during the year was brought to account, and the officer doing the work was paid a fixed allowance instead of a portion of the fees as heretofore.

Under Trust Funds the receipts amounted to Rs. 46,422, or a falling off of Rs. 22,048. The decrease is accounted for by the fact that fewer seamen under European articles were shipped and discharged during the year. The undisbursed balance at the close of the year was Rs. 8,695, the remainder being paid out in the usual way.

The number of seamen shipped and discharged were—

Shipped	37,382
Discharged	31,451

Under those shipped under European articles there is a decrease of 398, while under Indian articles, notwithstanding the unusually large numbers shipped during the previous year as crews on vessels chartered for Government transport, the figures of the year under review again show a small advance. It has been decided by the Government of India that the law as it stands does not preclude the employment of Eurasians in merchant vessels on the same terms as Europeans, and since then 37 Eurasians have been shipped under European articles and 97 under Indian articles, or a total of 134, against 72 under Indian articles only during the previous year. A few are able-bodied seamen, but the greater number are Engineers and clerks, with a few gunners, mess-room stewards and ordinary seamen. In addition to the above 43 seamen were shipped and 59 discharged by Foreign Consuls.

Owing to the decrease in the number of discharges under European articles, the value of seamen's money-orders fell from Rs. 16,634 to Rs. 7,622.

At the request of the American Consul an American cabin boy, who complained of ill-treatment by the Steward, was given his discharge. Two other complaints in regard to provisions were made. These were found to be true and the necessary steps taken.

In regard to the condition of seamen, there is nothing special to note on the condition of European seamen. The numbers of shipped and discharged Europeans are steadily decreasing; and, judging from the complaints of Masters and bearing in mind their relative cost, the Shipping Master is of opinion that lascars will gradually but surely displace European crews.

At the Port of Chittagong the number of seamen shipped and discharged were 161 and 539, respectively, against 45 and 43 in the previous year. Of the number discharged, 521 represented the crew of seven steamers of the Clan Line, who were paid off on termination of their agreement.

As a consequence of the larger number shipped and discharged, the receipts of the Shipping Office increased from Rs. 78 in the previous year to Rs. 1,314. Under overtime fees there is an increase of Rs. 568, which is now being brought to account under the recent orders of the Government of India.

The disbursements amounted to Rs. 238, which represent three-fourths of the overtime fees earned by the Shipping Officers. No expenditure was incurred on the relief of distressed seamen.

The receipts from Trust Funds amounted to Rs. 37,340. The whole amount was disbursed.

At the Orissa Ports only one seaman was discharged. The Shipping Master at False Point paid four visits to vessels, but no complaints were made nor defects discovered.

By order of the Lieutenant-Governor of Bengal,

D. B. HORN,

Secretary.

REPORT ON THE STATE OF THE SALT MARKET FOR THE FIRST QUARTER OF 1902-1903.

No. 993B., dated Calcutta, the 19th August 1902.

From—H. WHEELER, Esq., Secretary to the Board of Revenue, L. P.,
To—The Secretary to the Government of Bengal, Financial Department.

THE HON'BLE MR. BOURDILLON, C.S.I.

I AM directed to submit the following report on the state of the salt market for the first quarter of 1902-1903, comprising the months of April, May and June 1902.

2. The quantity of salt of every description cleared during the quarter amounted to 32,49,311 maunds, as compared with 25,77,904 maunds in the preceding quarter, and 28,02,529 maunds in the corresponding quarter of the previous year; and the net amount of duty levied thereon was Rs. 76,80,087, as against Rs. 59,82,014 in the previous quarter, and Rs. 65,33,524 in the corresponding quarter of the previous year.

3. The quantity of locally-made salt removed from the *golas* in Orissa during the quarter are shown in Table I below:—

TABLE I.

1	2
	Puri.
	Mds.
Balance at the close of the previous quarter ...	70,562
Manufactured or added during the quarter ...	Nil
Total ...	70,562
Sold during the quarter	50,350
Wastage	20,212
Total ...	70,562
Balance at the close of the quarter	Nil

The total sales of locally-made salt during the quarter amounted to 50,350 maunds, and taking into account the wastage of 20,212 maunds, the total stock was exhausted. In the preceding quarter 91,796 maunds of this salt were sold, and 39,768 maunds were so disposed of in the corresponding quarter of the previous year.

4. The subjoined Table (II) shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter, as compared with the figures of the corresponding quarters of the two previous years:—

TABLE II.

WHENCE IMPORTED.	1900-1901.		1901-1902.		1902-1903.	
	First quarter.		First quarter.		First quarter.	
	Imported.	Cleared.	Imported.	Cleared.	Imported.	Cleared.
1	2	3	4	5	6	7
	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.

Rawayah	......	1,52,912	......	14,334	1,76,944	62,087
Aden	93,917	2,93,608	2,77,134	3,68,440	4,60,090	5,07,134
Muscat, Linga, Hanjam	......	94,184	98,000	80,074	......	21,416
Rock salt	......	......	19,056	8,444	......	5,100
Diago-Suares (Madagascar)	......	......	8,036	2,400	......	3
North Africa, Egypt, &c....	......	......	......	......	......	2,000
Bombay	3,16,366	1,68,926	1,53,424	1,70,425	1,01,400	1,70,397
Coconada	840	......	......	......	......	......
Total ...	19,91,751	26,67,086	24,94,934	24,00,577	25,16,811	27,84,670

Compared with the corresponding quarter of the previous year, there was an increase both in the importations and clearances. The increase was mainly contributed by salts from Port Said, Aden and Rawayah.

5. Table III shows the quantity of sea-imported salt remaining in the warehouses at the close of the quarter, as compared with the previous four quarters:—

TABLE III.

WHERE STORED.	First quarter of 1901-1902.	Second quarter of 1901-1902.	Third quarter of 1901-1902.	Fourth quarter of 1901-1902.	First quarter of 1902-1903.
1	2	3	4	5	6
	Mds.	Mds.	Mds.	Mds.	Mds.
Sulkea Government Salt Golas	5,56,063	8,23,419	14,61,516	23,67,681	16,19,937
Kidderpore Dock ditto	2,46,029	5,86,570	8,28,233	9,29,664	8,60,421
Chittagong ditto	30,044	1,07,319	60,732	1,14,509	77,257
Narayanganj (private bonded salt warehouses) ...	34,294	15,720	41,555	50,072	54,082
Khulna (ditto ditto) ...	59	......	......	......	......
Chandbali (ditto ditto) ...	6,505	3,621	11,152	6,862	8,846
Bhairab Bazar (ditto ditto) ...	21,996	28,900	3,330	26,731	24,636
Jhalakati (ditto ditto) ...	19,930	50,324	30,692	96,415	80,354
Ashuganj (ditto ditto) ...	......	......	......	5,000	5,190
Dacca (ditto ditto) ...	......	......	......	......	3,030
Total ...	9,22,420	16,16,882	24,37,216	34,96,534	27,40,713

Stocks at the close of the quarter under review were less than those of the previous quarter, but were much larger than those of the corresponding quarter of the previous year.

6. The despatches of salt from Calcutta by boat and by the several railways passing through the different pass-stations into the interior of the country both east and west of the river Hooghly, as well as the despatches by steamers and flats during the quarter and the corresponding quarters of the last two years, are shown in Table IV below:—

TABLE IV.

PERIOD.	BY WATER.					BY RAIL.			BY STEAMERS AND FLATS.	
	Viâ Balikhal.	*Viâ* Sankrail.	*Viâ* Gewankhali.	*Viâ* Kidderpore.	*Viâ* Balliaghatta.	By the East Indian Railway.	By the Eastern Bengal, Bengal-Central, and South-Eastern Railways, or *viâ* Chitpur.	By the Bengal-Nagpur Railway or *viâ* Shalimar.	Quantity despatched into the interior (excluding Orissa).	Quantity despatched to Orissa
1	2	3	4	5	6	7	8	9	10	11

7. The quantity of salt despatched during the quarter by the East Indian Railway to stations beyond Buxar amounted to 1,620 maunds, against 810 maunds in the previous quarter, and 2,025 maunds in the corresponding quarter of the previous year.

8. The quantity of saltpetre removed from the refineries during the quarter on payment of duty amounted to 4,742 maunds, as compared with 7,379 maunds in the previous quarter, and 6,016 maunds in the corresponding quarter of the previous year.

9. The shipments of Liverpool salt during the quarter for the port of Calcutta, according to the published market reports, amounted to 26,740 tons. It is reported that no vessel for Calcutta with salt from Hamburg was afloat at the end of the quarter.

10. Table V shows the average wholesale prices per 100 maunds of Liverpool and other descriptions of salt during each fortnight of the quarter:—

TABLE V.

Description of Salt.	Fortnight ending 15th April 1902.	Fortnight ending 30th April 1902.	Fortnight ending 15th May 1902.	Fortnight ending 31st May 1902.	Fortnight ending 15th June 1902.	Fortnight ending 30th June 1902.
1	2	3	4	5	6	7
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
Liverpool *panga*	57 2 8	62 1 9	64 10 8	64 8 10	62 14 6	62 6 8
Hamburg *karkatch*	49 12 0	53 6 5	53 0 0	53 2 8	53 8 0	52 8 0
Muscat ditto	43 0 0	....	......	......	......	.. ..
Jeddah ditto	51 0 0	51 0 0	51 0 0	49 14 8	48 0 0	42 13 0
Bombay ditto	37 9 7	37 4 0	36 7 1	36 0 0	30 0 0	41 0 0
Aden crushed	44 1 10	44 1 2	44 12 9	44 7 0	42 5 4	38 11 7
Salif ditto	42 15 1	42 14 6	43 7 4	41 10 8	41 1 4	40 11 2

During the quarter the prices of Jeddah *karkatch*, Aden crushed and Salif crushed showed a tendency to fall. Those of Liverpool *panga* and Hamburg *karkatch* rose up till May and the 1st fortnight of June respectively; they then fell, though not to the level of the commencement of the quarter. The price of Bombay salt rose steadily during the quarter, with the exception of the month of May.

11. The following Table (VI) shows the quantity of sea-imported salt admitted into bond and cleared from bond and shipboard at the several outports and inland warehousing stations:—

TABLE VI.

	Total ...	3,64,200	3,61,641	3,62,184	4,14,251

No transactions in sea-imported salt have been reported for the quarter from Cuttack and Puri.

WEATHER AND CROP REPORT.

For the week ending the 25th August 1902.

Burdwan.—Rainfall at Sadar 3·42, Katwa 1·37, Raniganj 2·63. Weather cloudy with occasional showers. Transplantation going on, but more rain wanted. Fodder and water sufficient. Condition of cattle good. Common rice sells at 10½ seers per rupee.

Birbhum.—Rainfall at Sadar 2·25, Rampur Hât 0·51. Weather cloudy. Transplantation still continues. Sugarcane promising. Fodder sufficient. Common rice sells at 12 seers per rupee.

Bankura.—Rainfall at Sadar 1·67. Recent rain has done some good to paddy. Sugarcane doing well. Fodder and water sufficient. Common rice sells at 12 seers a rupee.

Midnapore.—Rainfall at Sadar 2·89, Contai 1·47, Tamluk 2·38, Ghatal 1·15. Weather hot and rainy. Transplantation of *aman* going on. Agricultural prospects good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	12	per rupee.
Contai	12	0	
Ghatal	12	0	
Tamluk	11	12	

Hooghly.—Rainfall at Sadar 1·09, Serampore 1·93, Arambagh 1·57. Weather seasonable. Transplantation of *aman* still continues. Harvesting of *aus* commenced. Prospect of standing crops good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Serampore	10	5	
Arambagh	12	0	

Howrah.—Rainfall at Sadar 1·61, Ulubaria 1·34. Fall general except on the 22nd instant on which date it was recorded only at Ulubaria. Transplantation of *aman* paddy still going on. Harvesting of *aus* has commenced. Agricultural prospects hopeful. Fodder and water-supply sufficient. No cattle-disease. Average price of common rice is 11 seers per rupee throughout the district.

24-Parganas.—Rainfall at Sadar 4·66, Barasat 1·30, Basirhat 0·81, Diamond Harbour 1·68. Weather hot and cloudy. State of standing crops good, but more rain is wanted in all the subdivisions, especially in Diamond Harbour subdivision, where rainfall of the season has been insufficient. Prospect fair. *Aus* and jute being harvested and steeped; transplantation of *aman* continues. Common rice sells at 11 seers per rupee. In Bhangar and the adjoining thanas a kind of insect locally known as "Madhupoka" is said to have damaged the *aus* paddy to the extent of two annas. Condition of cattle good. Supply of fodder and water sufficient.

Nadia.—Rainfall at Sadar 1·09, Ranaghat 1·41, Chuadanga 1·63, Meherpur 0·58, Kushtia 0·50. Harvesting of *aus* and transplantation of *aman* paddy still going on. Prospects of standing crops good. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.

For previous 4½ weeks of half-year.	1,859,371	17,82,922 10 0	2,12,96,405 0	36,67,481 3 0	1,17,521 0 0	55,67,924 13 0	512,731	823,672	1,336,403
Total for 5½ weeks ...	2,210,899	21,29,690 2 0	2,53,85,694 30	43,80,560 14 0	1,40,067 0 0	66,50,318 0 0	622,482	985,929	1,608,411
Comparison.									
Total for corresponding week of previous year.	418,883	4,53,908 12 10	53,28,299 0	8,91,255 14 9	20,578 8 2	13,65,743 3 9	113,264	205,882	319,146
Per mile of railway corresponding week of previous year.	......	246 15 3	......	481 14 4	11 3 1	713 0 8	......	......	......
Total for corresponding 5½ weeks of previous year.	2,375,526	25,13,889 12 11	3,15,22,457 10	57,09,657 4 5	1,14,249 12 3	83,37,796 13 7	643,372½	1,249,125½	1,892,498

(a) The decrease is due to the running of several extra troop trains from Kidderpore Docks and extra passenger trains for "Rajgir Mela" during the corresponding period of 1901.
(b) The decrease is chiefly in coal.

1902. *Abstract of progressive weekly returns of all earnings for 1902 in comparison with 1901.*

CONTENTS.

WEATHER AND CROP REPORT.

For the week ending the 1st September 1902.

Burdwan.—Rainfall at Sadar 1·67, Kalna 1·70, Katwa 0·82, Raniganj 2·25. Weather cloudy and showery. Transplantation still continues. Harvesting of *aus* paddy begun in places. Fodder and water sufficient. Condition of cattle good. Common rice sells at 10½ seers per rupee.

Birbhum.—Rainfall at Sadar 3·12, Rampur Hât 0·16. Weather monsoonic. Paddy crop and sugarcane doing well. Fodder sufficient. Common rice sells at 12 seers per rupee.

Bankura.—Rainfall at Sadar 1·36. Condition of standing paddy and sugarcane crops good. Fodder and water sufficient. Common rice sells at 11 seers 10 chitaks per rupee.

Midnapore.—Rainfall at Sadar 5·49, Contai 2·68, Tamluk 3·65, Ghatal 4·31. Weather hot and cloudy. Transplantation of *aman* almost finished. Agricultural prospects good. Fodder and water sufficient. Cattle-disease reported from Dinpur thana. Common rice sells as follows:—

	Srs.	ch.	
Sadar	13	8	per rupee.
Contai	12	0	
Ghatal	11	8	
Tamluk	11	0	

Hooghly.—Rainfall at Sadar 3·47, Serampore 4·66, Arambagh 2·29. Weather seasonable. Transplantation of *aman* still continues. Harvesting of *aus* and steeping of jute commenced. Prospect of standing crops good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Serampore	10	7	
Arambagh	11	9	

Howrah.—Rainfall at Sadar 3·79, Ulubaria 5·41. Fall general. Transplantation of *aman* paddy still going on. Harvesting of *aus* and jute going on and the latter is being steeped. Sugarcane progressing. Agricultural prospects good. Fodder and water-supply sufficient. No cattle-disease. Common rice sells on an average 11 seers everywhere in the district.

24-Parganas.—Rainfall at Sadar 3·66, Barasat 5·77, Basirhat 2·69, Diamond Harbour 5·74. Heavy rain everywhere. State of standing crops good, but more rain still wanted in places. Prospects fair. *Aus* and jute being harvested and the latter is being steeped. Transplantation of *aman* continues. Common rice sells at 11 seers per rupee. Condition of cattle good. Supply of fodder and water sufficient.

Nadia.—Rainfall at Sadar 1·79, Ranaghat 2·28, Chuadanga 2·07, Meherpur 1·92, Kushtia 1·49. Harvesting of *aus* paddy and transplantation of *aman* paddy finished. Jute being cut and steeped. Prospects of standing crops good. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Ranaghat	11	0	
Chuadanga	11	8	
Meherpur	13	5	
Kushtia	11	5	

Murshidabad.—Rainfall at Sadar 1·62, Kandi ·85, Jangipur 1·03, Lalbagh 1·40. Weather seasonable. Transplantation of *haimanti* nearly over. Harvesting of *bhadoi* continues at Lalbagh. Prospects of sugarcane and jute good. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Kandi	12	8	
Jangipur	12	4	
Lalbagh	11	0	

Jessore.—Rainfall at Sadar 0·47, Jhenida 0·86, Magura 1·82, Narail 1 0, Bangaon report not received. Weather cloudy with occasional light showers. Prospects of crops generally fair. Harvesting of *aus* nearly completed. More rain wanted for the *aman*. Fodder and water sufficient. Cattle-disease reported from the Muhammadpur thana in Magura. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Jhenida	12	0	
Magura	12	0	
Narail	10	12	

Khulna.—Rainfall at Sadar ·91, Bagerhat 2·77, Satkhira 1·77. Weather seasonable. Transplantation of *aman* and harvesting of *aus* continue. State of *aus*, sugarcane, and jute fair. Fodder and water sufficient. Cattle-disease reported from Paikgachha and Asasuni. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	4	per rupee.
Bagerhat	12	0	
Satkhira	10	8	

Rajshahi.—Rainfall at Sadar 1·39, Nator 1·81, Naugaon 0·95. Weather hot. Prospects of standing rice and jute good. Transplantation of *aman* and harvesting of *bhadoi* and jute going on. Cattle-disease reported from Lalpur and Burigaon thanas. Common rice selling at 12 seers per rupee.

Dinajpur.—Rainfall at Sadar 0·60. Fall in the district general except at Thakurgaon. Maximum fall 1·51. Weather seasonable. Standing crops good. Transplanting of winter rice and steeping of jute continue. No cattle-disease. Fodder and water plentiful. Rice sells at 11½ seers per rupee.

Jalpaiguri.—Rainfall at Sadar ·85, Alipore Duars 1·79. Fall not general. Weather hot. Transplantation of *haimanti* paddy nearly finished. Harvesting of *bhadoi* paddy continues. Cutting of jute going on. Common rice sells at 11 seers a rupee. Fodder and water sufficient. Cattle-disease prevails in Debiganj outpost.

Darjeeling.—Rainfall at Darjeeling 5·05, Kurseong 5·80, Siliguri 3·28. Weather seasonable. *Hills*—Maize and *bhadoi dhan* doing well. *China* and *bara marua, haimanti dhan* being cultivated. *Terai*—Transplanting of *haimanti* and *bhadoi* paddy progressing well. Prospect good. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	10	0	

Maize sells at Darjeeling at 18 seers and at Kalimpong at 32 seers per rupee.

Rangpur.—Rainfall at Sadar 0·58, Gaibanda 0·53, Kurigram 0·34, Nilphamari 0·18. Weather very hot. Transplantation of *aman*, harvesting of *aus*, and cutting and steeping of jute going on. Flood water in Gaibanda subsiding. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	8	per rupee.
Gaibanda	10	0	
Kurigram	12	0	
Nilphamari	10	8	

Bogra.—Rainfall at Sadar 0·80. Fall general. Weather hot and occasionally cloudy. Cutting of *aus* and jute and transplantation of *aman* continue. Prospects fair. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Pabna.—Rainfall at Sadar 1·44, Sirajganj 1·88. Fall general. Weather cloudy and rainy. Prospects of standing crops fair. Harvesting of *aus* and jute continues. *Aman* sowing estimated 75 per cent. in Sadar. Fodder and water sufficient. Cattle-disease in Sadar. Common rice sells at 10 seers per rupee.

Dacca.—Rainfall at Sadar 3·57, Manikganj 3·47, Munshiganj 3·65, Narayanganj 2·28. Prospects of crops fair. Weather seasonable. Fodder available. No cattle-disease. Common rice sells at 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 1·41, Jamalpur 1·42, Kishorganj 0·21, Netrokona 2·35, Tangail 2·90. Weather hot. Harvesting of *aus* and jute still continues. They have suffered from excessive rain. Twelve annas of *aman* rice transplanted and doing well. Fodder reported scarce from Netrokona subdivision, but sufficient elsewhere. No cattle-disease. Common rice selling as follows:—

	Srs.	ch.	
Sadar	10	4	per rupee.
Kishorganj	10	8	
Jamalpur	11	6	
Netrokona	12	0	
Tangail	10	4	

Faridpur.—Rainfall at Sadar 1·48, Goalundo 1·38, Madaripur 0·74. Weather very hot and sultry. State and prospects of crops good. Fodder sufficient. No cattle-disease. Common rice sells at 11 seers a rupee.

Backergunge.—Rainfall at Sadar 4·05. Fall general. Weather squally. Prospects fair. Transplantation of *aman* continues. Cattle-disease in Matbari and Tuzamuddin thanas. Fodder sufficient. Common rice sells at 12 seers (*aman*) and 13 seers (*aus*) per rupee.

Tippera.—Rainfall at Sadar 6·33, Brahmanbaria 1·23, Chandpur 2·71. Prospects of standing crops good. Harvesting of *aus* and transplantation of *aman* not yet completed. Fodder and water sufficient. No cattle-disease. Common rice sells at 13 seers per rupee.

Noakhali.—Rainfall at Sadar 2·12, Feni 4·19. Harvesting of *aus* continues. Transplantation of *aman* in full swing. Prospects good. Cattle-disease at Sundip. Water sufficient. Fodder not so. Common rice sells at Sadar at 11 seers and at Feni at 13 seers per rupee.

Chittagong.—Rainfall at Sadar 1·85, Cox's Bazar 1·73. *Aus dhan* is being reaped. *Aman dhan* is being sown. Water and fodder sufficient. Common rice selling at 12 seers 11 chitaks per rupee.

Chittagong Hill Tracts.—Rainfall at Sadar 2·50. Fall general. Weather fair with showery. Harvesting of *joom* paddy continues all round. Prospects good. No cattle-disease. Rice sells at 13 seers per rupee.

Patna.—Rainfall at Sadar 1·84, Barh 2·59, Bihar 0·94, Dinapore 1·31, Bikram 2·53. Weather hot and cloudy. Rain very urgently needed. Transplantation of paddy retarded for want of rain; paddy seedlings began to decay in many places. Harvesting of Indian-corn continues. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Patna	11	4	per rupee.
Barh	11	4	
Bihar	10	0	
Dinapore	12	8	

Gaya.—Rainfall at Sadar 2·19, Jahanabad 0·74, Aurangabad 0·18, Nawadah 0·83. Weather hot and rainy. *Bhadoi* and sugarcane doing well. Transplantation of paddy still going on, widely delayed for insufficiency of rain. More rain wanted badly for paddy. Fodder and water for cattle ample. Average price of common rice is 11½ seers per rupee.

Shahabad.—Rainfall at Sadar 2·67, Buxar 1·60, Bhabhua 0·08, Sasaram 1·23, Dehri 0·58. Weather hot and cloudy. Transplantation of paddy in progress. More rain wanted. Harvesting of *bhadoi* commenced. Fodder and water sufficient. No cattle-disease. Rice sells at Sadar at 11 seers a rupee.

Saran.—Rainfall at Sadar 1·73, Siwan 0·21, Gopalganj 1·34. Weather seasonable. *Bhadoi* crops still doing well, but more rain wanted. Transplantation of rice continues. Fodder and water sufficient. Cattle-disease reported from three villages. Common rice sells at 12 seers per rupee.

Champaran.—Rainfall at Sadar 3·55, Bettiah 1·30. Weather very hot and cloudy. Harvesting of *bhadoi* paddy and transplantation of winter rice continues. Outturn of indigo estimated at 43 per cent. Prospect of standing crops very good. Cattle-disease reported. Fodder and water sufficient. Common rice sells at 14¼ seers and maize at 22 seers per rupee.

Muzaffarpur.—Rainfall at Sadar 3·45, Hajipur 3·01, Sitamarhi ·67. Weather cloudy generally. Transplantation of paddy nearly completed. Harvesting of *bhadoi* crops commenced in places. The floods in Sitamarhi have subsided. Prospects generally fair. Fodder and water sufficient. Prices are—Common rice 11½ seers and maize 20 seers a rupee.

Darbhanga.—Rainfall at Sadar 0·77, Samastipur 3·83, Madhubani 0·13. Transplantation of paddy in progress. Harvesting of *bhadoi* going on. Sugarcane doing well. Fodder and water sufficient. Cattle-disease is reported from Dalsingsarai, Samastipur, and Warisnagar thanas. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Samastipur	12	8	
Madhubani	11	11	

Monghyr.—Rainfall at Sadar 1·01, Begusarai 2·90, Jamui 1·37. Weather hot and cloudy. Transplantation of paddy continues. Harvesting of *china*, *shama*, and *kauni* going on. *Bhadoi* crops and sugarcane doing well. More rain urgently wanted. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	9	per rupee.
Begusarai	12	0	
Jamui	11	0	

Bhagalpur.—Rainfall at Sadar 1·96, Banka 0·68, Madhipura 0·60, Supaul 0·75. Weather hot and dry. Harvesting of *marua* and transplantation of *aghani* crops nearing completion. Prospects of *bhadoi* unfavourable in Madhipura for want of rain, but favourable in Supaul. More rain wanted in Banka for paddy crops. Fodder and water sufficient. Sporadic cases of cattle-disease reported. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	6	per rupee.
Banka	11	14	
Madhipura	14	8	
Supaul	16	0	

Purnea.—Rainfall at Sadar 1·68, Kishanganj 0·10, Araria 0·56. Fall general. *Bhadoi* and jute are being harvested. Transplanting of *aghani* nearly completed. Sporadic cases of cattle-disease reported from Araria. Fodder and water sufficient. Common rice sells at Sadar and Kishanganj at 11 seers and at Araria at 13 seers per rupee.

Malda.—Rainfall at Sadar 0·85, Chanchal ·99, Sibganj 1·79, Gajol ·93. Weather very hot and sometimes cloudy. Transplantation of winter rice finished. Rain urgently wanted for winter rice in thana Malda. Harvesting of *bhadoi* and cutting of jute not yet finished. Cattle-pox reported from thana Gajol. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Sonthal Parganas.—Rainfall at Sadar 1·01, Deoghur 0·98, Godda 0·87, Jamtara 1·75, Pakaur 1·07, Rajmahal 2·18. Weather hot. Transplantation of paddy is nearly finished. More rain generally needed. *Makai* being harvested. Outturn good. Fodder and water sufficient. The market rate of common rice at Sadar is 12 seers per rupee.

Cuttack.—Rainfall at Sadar 3·62. Fall general. Weather cloudy. Weeding and transplantation of *sarad* progressing. Early *beali* being cut. Prospects fair. Fodder and water sufficient. Common rice sells at 13 seers 2 chitaks per rupee at Sadar.

Balasore.—Rainfall at Sadar 2·70. Fall general. *Beali* flowering. *Sarad* being transplanted and weeded. Prospects good. Standing crops flourishing. Rice sells at 11 and 16 seers per rupee at Sadar and Bhadrak respectively. Fodder and drinking-water sufficient.

Angul.—Rainfall at Sadar 1·67, Chhendipada 2·47, Tikerpara 4·62, Bissipara 5·20. Weather cloudy with occasional heavy showers. Winter paddy being transplanted and weeded. Slight cattle-disease in parts Fodder and water sufficient. Common rice sells at 12 and 10½ seers per rupee at Sadar and Khondmals respectively.

Puri.—Rainfall 6·92. It is general all over the district. *Bhadoi* paddy and *mandua* are ripening and also being harvested in places. Puddling and weeding of winter rice continue. Insect-pest, locally called *haldigundi*, attacking paddy crops in northern part of the district. Sugarcane and other miscellaneous crops doing well. Common rice sells at 14 seers 7 chitaks per rupee. Fodder and water-supply sufficient. Cattle-disease appearing at places.

Hazaribagh.—Rainfall at Sadar 0·99, Giridih 3·15. Fall not general. Weather seasonable. Transplantation still backward in parts. Rain much wanted. Sugarcane doing well. Cattle-disease reported from one thana. Fodder and water sufficient. Common rice sells at 11 seers per rupee.

Ranchi.—Rainfall at Sadar 1·50. Weather hot and cloudy. Prospects of standing crops good. Harvesting of *gundli* continues. Cattle-disease reported from Ranchi, Khunti, and Palkot thanas. Fodder and water sufficient. Price of common rice is 13½ seers per rupee.

Palamau.—Rainfall 0·69. Weather not seasonable. More rain wanted for rice crop. *Bhadoi* now doing well. Paddy transplantation continues. Cattle-disease reported from some thanas. Fodder and water sufficient. Prices at Sadar—Rice 10 seers 2 chitaks, maize 12 seers 15 chitaks.

Manbhum.—Rainfall at Sadar 2·23, Gobindpur 1·44. Fall general. Weather seasonable. Prospects of crops good. Transplantation of winter rice continues. Fodder and water sufficient. Cattle-disease not reported. Average price of common rice at Sadar is 13 seers; at Gobindpur 10½ seers per rupee.

Singhbhum.—Rainfall 2·30. Weather seasonable. Crops promising well. Average price of rice is 12 seers 10 chitaks in the district; at Chaibassa 12 seers per rupee.

General Summary.—Rain fell in every district during the week, and the fall was moderately heavy at places. The districts of Bihar, Chota Nagpur, and the Presidency Division generally require more rain. Harvesting of early rice and jute still continues. Transplantation of winter rice is approaching completion. Prospects fair. Cattle-disease reported from 16 districts. Fodder sufficient except in Noakhali and in the Netrokona subdivision of the Mymensingh district. No want of water. The price of common rice has risen in 4 districts, fallen in 16, and is stationary in the rest (27).

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal,

	Inches.
The mean pressure of the seven days	29·635
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·592
	Hours.
The total number of hours of bright sunshine	39·4
The maximum possible number of hours of sunshine	89·5
The mean temperature of the seven days	84·2°
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	83·1
The extreme variation of temperature	17·1
The maximum temperature	93·6
	Miles.
The highest velocity of the wind in one hour	12
	%
The mean relative humidity	84
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	87
	Inches.
The total fall of rain from 17th to 23rd August 1902	3·04
The average fall of the corresponding period for 24 years, Surveyor-General's Office	3·39
The total fall from 1st January to 23rd August 1902	46·24
The average fall of the corresponding period for 24 years, Surveyor-General's Office	45·68

The mean pressure, temperature, etc., are deduced from the traces of the Barograph and Thermograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; ∠, lightning.

J. LIGHTFOOT,
Chief Auditor.

GORAKHPUR, the 26th *August 1902.*

Weekly Return of Traffic Receipts on Indian Railways

EAST INDIAN RAILWAY.

Approximate Return of Traffic for week ended 16th August 1902 on 1,913·49 miles open.

	Coaching Traffic.		Merchandise and Mineral Traffic.		Other earnings (estimated).	Total earnings.	Traffic Train-miles run.		
	Number of passengers.	Coaching receipts.	Weight carried.	Receipts.			Coaching.	Merchandise.	Total.
		Rs. A. P.	Mds. s.	Rs. A. P.	Rs. A. P.	Rs. A. P.			
Total traffic for the week ...	(a) 357,679	(a) 3,46,045 13 0	41,45,085 0	(b) 7,10,908 5 0	19,639 0 0	10,76,593 2 0	108,933	157,635	266,568
Or per mile of railway ...	......	180 13 6	......	371 8 5	10 4 3	562 10 2	......	......	......
For previous 5¾ weeks of half-year.	2,222,897*	21,17,906 2 0*	2,56,23,195 30†	43,98,737 14 0†	1,33,672 0 0‡	66,50,316 0 0	634,887§	996,336§	1,621,223
Total for 6¾ weeks ...	2,580,576	24,63,951 15 0	2,97,68,280 30	51,09,646 3 0	1,53,311 0 0	77,26,909 2 0	782,820	1,153,971	1,887,791
Comparison.									
Total for corresponding week of previous year.	398,607½	4,41,653 2 10	51,37,112 0	8,18,701 14 7	21,789 7 11	12,82,144 9 4	110,408½	191,060	301,468½
Per mile of railway corresponding week of previous year.	......	240 4 7	......	445 6 9	11 13 8	697 9 0	......	......	......
Total for corresponding 6¾ weeks of previous year.	2,773,023½	29,55,542 15 9	3,66,59,569 10	65,28,359 3 0	1,36,039 4 2	96,19,941 6 11	753,781	1,440,185½	2,193,966½

(a) The decrease is due to the running of several extra troop trains from Kidderpore Docks and of several extra passenger special trains for "Rajgir, &c., Melas" in the corresponding period of 1901.

(b) The decrease is chiefly in coal.

* Added No. of passengers 11,998 and deducted Rs. 11,784 } On account of difference between the approximate and audited figures for the first 12 days of July 1902.
† Do. Mds. 2,37,501 and ,, 18,177 }
‡ Deducted ,, 6,395 }
§ Audited figures up to 12th July 1902.

CONTENTS.

The 2nd September 1902.—The following extracts from the Report of the Collector of Customs, Calcutta, on the Administration of the Customs Department in the year 1901-1902, and the letter from the Board of Revenue submitting the report to Government, are published for general information.

E. W. COLLIN,
Offg. Secy. to the Govt. of Bengal.

REPORT ON THE MARITIME TRADE OF BENGAL FOR THE YEAR 1901-1902, BY THE COLLECTOR OF CUSTOMS, CALCUTTA.

CHIEF PORT CALCUTTA.

GENERAL SUMMARY.

THE aggregate sea-borne trade of Calcutta with foreign countries and with other Indian ports for the past five years is shown in the subjoined statement :—

	1897-98.	1898-99.	1899-1900.	1900-1901.	1901-1902.	Increase or decrease in 1901-1902 as compared with 1900-1901.	Percentage of difference.

In this statement transactions on account of Government are included; but it should be noted that such transactions are excluded from all other statements and figures, embodied or annexed to this report, and are dealt with in a separate section of it.

2. It will be observed that the aggregate trade has fallen slightly, by 79 lakhs or under 1 per cent. But this decrease is caused by smaller transactions in the coasting trade, for the total foreign trade has expanded in the past year, and is the highest of any year shown. The decrease in the coasting trade is to be found in exports of Indian produce, imports having improved considerably. The falling off is really a matter for congratulation, as an evidence that the stimulus to export of food-grains provided in the two previous years by the requirements of famine-stricken tracts had ceased.

3. The statement shows fluctuations in treasure separately, and the result of the combined foreign and coasting transactions was a net importation of $3\frac{3}{4}$ crores as compared with a net importation of $7\frac{1}{4}$ crores in the previous year. The corresponding figures for foreign and coasting trade separately are $3\frac{1}{2}$ crores and 18 lakhs, respectively, net importation, as against 6 and $1\frac{1}{2}$ crores in the previous year. In merchandise in the foreign trade exports exceeded imports by 18 crores, and the aggregate trade in both increased by 2 crores, or 1·9 per cent. In imports the heaviest increases were in wood and its manufactures, jewellery, carriages, and carts, machinery and millwork, salt, silk manufactures, and paper and pasteboard: the decreases were chiefly in railway materials, umbrellas, and spices. Under exports of Indian produce, the more important increases were in cotton twist and yarn, drugs and narcotics, raw hemp, raw cotton, and oilseeds: decreases occurred under tea, indigo, hides and skins, grain and pulse, and woollen manufactures. Imports were greatest in September, October, and January: exports attained the highest values in October, November, and December, while the total trade of Calcutta reached its highest value in October, November, and January.

4. In the coasting trade in merchandise there was an increase of 1·4 per cent. in imports and a decrease of 13·5 per cent. in exports. The aggregate coasting trade in merchandise was less by 7·7 per cent.

5. The following table gives the ranges of prices of the more representative articles, taking the year 1900-1901 as the basis of comparison :—

		1897-98.	1898-99.	1899-1900.	1900-1901.	1901-1902.

The table shows that both volume and value of the total foreign trade of Calcutta have risen in the past year, but the value, owing to a lower range of prices, not in proportion to the volume. Prices generally fell by 5·7 per cent.; in imports by 7·9 per cent., and in exports by 4·3 per cent., but the level in both cases, though lower than in the previous year, is higher than in 1899-1900. All items of imports, with the exception of grey cotton piece-goods, fell in average price, and 10 out of 15 items of export, the exceptions being shellac, rice, linseed, indigo, and gunny cloths.

FOREIGN TRADE.

6. The following statement shows the value of the import and export trade of Calcutta for the past five years grouped according to the classes under which they are shown in the Government accounts:—

	IMPORTS.			EXPORTS.		
	1899-1900.	1900-1901.	1901-1902.	1899-1900.	1900-1901.	1901-1902.

V.—Oils	1,90·91	1,78·21	2,09·92	24·70	30·01	33·15
VI.—Raw materials and unmanufactured articles	22·28	36·44	88·20	19,53·60	22,48·52	23,21·54
VII.—Articles manufactured and partly manufactured—						
(A) Yarns and textile fabrics ...	16,67·85	16,97·94	16,90·52	6,99·57	8,10·52	9,64·28
(B) Apparel (excluding hosiery)	45·90	44·61	40·23	8·62	8·29	11·97
(C) Other articles	2,08·25	2,27·03	2,32·72	1,36·31	1,35·67	1,29·66
Total of No. VII ...	19,22·00	19,69·58	19,63·47	8,44·50	9,63·48	11,05·91
Total of merchandise ...	29,66·13	31,79·44	32,68·93	49,57·84	54,22·40	53,62·03
Treasure	5,60·56	5,74·93	5,11·70	39·67	62·72	54·65
GRAND TOTAL ...	35,26·69	37,54·37	37,80·63	49,97·51	54,85·12	54,16·68

Imports show an advance in all groups except those for chemicals, dyeing materials, &c. (IV), and for yarns and textile fabrics (VIIA). The fall in the former case is attributed chiefly to diminished receipts of chemicals for paper-making, and in the latter case to contraction of the trade in woollen shawls. Group I, animals, consists almost entirely of horses from Australia. The advance in Group II is accounted for by salt; jute and electrical machinery are chiefly responsible for the rise in Group III. The increase in Group V represents more kerosine oil from Russia, and in Group VI it is entirely in precious stones.

7. In exports there was a decline in the first four groups, and an advance in the remainder. The falling off in Group I was very small, and in Group II it was caused by a contraction in shipments of rice. Copper accounts for the decline in Group III, and indigo in Group IV. Increased shipments of castor oil explain the greater trade in Group V and raw jute and oilseeds account for that in Group VI. The increase in cotton twist and yarn is entirely responsible for the advance in Group VII.

With reference to the distribution of the trade with different countries, it is important to note that the figures throughout refer only to the port of destination or exportation as shown in shipping bills and bills-of-entry, and should not be taken as indicating the country of final destination or of production, as the case may be.

IMPORTS.

(FOREIGN TRADE.)

8. Imports represented 37·8 per cent. of the aggregate value of the foreign trade in merchandise during the year. Cotton goods were, as usual, the most important item, but the proportion they represent of the total imports fell from 50·02 per cent. of the

previous year to 48·84 per cent. Next to cotton goods come metals, 9·67 per cent. ; oils 6·42 per cent. ; sugar 5·04 per cent. ; machinery and millwork 4·59 per cent. ; woollen goods 2·18 per cent. ; hardware and cutlery 2·01 per cent. ; salt 1·98 per cent. ; jewellery 1·80 per cent. ; liquors 1·45 per cent. ; apparel 1·41 per cent. ; drugs and narcotics 1·37 per cent. ; provisions ·99 per cent. ; spices ·98 per cent. ; and railway materials ·71 per cent.

* * * Jewellery and precious stones have shown a remarkable expansion in the past year, their total value amounting to 59 lakhs. Of this amount, 53 lakhs represented precious stones and pearls, but chiefly the latter, which have risen considerably in price. The increased trade was in the latter half of the year, and may be attributed to the demand for the approaching Coronation ceremonies at Delhi. The value of carriages and carts, &c., rose by 82·7 per cent., or from 6¾ to 12½ lakhs, owing to large receipts of cars for the local Tramway Company, also of rolling-stock for various light railways. In spite of local competition, there was a marked rise of 33·5 per cent. in the value of paper imported, which amounted to 12⅓ lakhs; the increase was largest in paper for printing. Imports of wood and manufactures of wood rose to a value of nearly 10 lakhs, increasing by 277·2 per cent. A considerable quantity of teakwood from Siam and of "other" descriptions of wood from the United States and Canada was imported in the past year.

* * * * * * * *

EXPORTS.

FOREIGN TRADE.

27. Exports amount to 62·2 per cent. of the aggregate value of the foreign trade in merchandise during the year.

Raw jute, the chief item, represents 20·40 per cent. of the total exports as against 19·18 per cent. in the previous year. Jute manufactures follow, with a percentage of 16·25 per cent., showing a considerable rise from the 14·37 per cent. of the previous year. Next in order of importance comes tea 13·31 per cent. ; opium 11·68 per cent.; oilseeds 9·70 per cent.; hides and skins 8·37 per cent.; grain and pulse 6·82 per cent.; indigo 2·32 per cent.; lac 1·79 per cent.; raw cotton 1·52 per cent.; cotton twist and yarn 1·34 per cent.; raw silk 1·11 per cent.; and coal and coke 1·06 per cent.

* * * * * * * *

47. DISTRIBUTION OF FOREIGN TRADE OF CALCUTTA BY COUNTRIES.

The following table shows how the trade of Calcutta with foreign countries was distributed in the past three years:—

* * * * * * * *

The value of the trade of Calcutta passing through the Suez Canal was 69½ crores in 1901-1902, against 67½ crores in 1900-1901, but the proportion of the total trade of the port using this route increased from 73 to 75·6 per cent.

United Kingdom.—The proportion of the trade of Calcutta with the United Kingdom shows a small decrease. Imports into Calcutta increased by 66 lakhs, the increase being most marked in machinery and millwork, salt, carriages, and ships or parts of ships. In exports, on the other hand, there was a fall of 120 lakhs chiefly in tea and jute manufactures.

Continent of Europe.—The trade with the Continent of Europe, which has been advancing for some years, received a slight check, which did not, however, extend to France and Russia. Imports into Calcutta improved by 86 lakhs, the improvement being chiefly noticeable in mineral oil, sugar, cotton goods and metals. Exports, on the other hand, declined by more than a crore, and are mainly accounted for by a restricted trade in hides and skins, indigo and lac.

United States of America.—There was an advance of only 16 lakhs in the trade with this country, but the fluctuations in some of the articles were very pronounced; jute manufactures increased by 87 lakhs, and raw jute and lac improved in value by 12 and 7 lakhs respectively. Decreases occurred principally in indigo, hides and skins, kerosine oil, caoutchouc and oilseeds.

Rest of America.—Here again there was an advance of 31 lakhs, attributed mainly to jute manufactures, and in a lesser degree to grain and pulse.

Mauritius, Cape Colony and Natal.—The trade with these countries shows a decline of 23 lakhs. Shipments of grain and pulse fell off in value by 18 lakhs, and receipts of sugar declined by 8 lakhs.

Egypt.—Trade with this country is again reviewed separately. It is chiefly a transhipment trade so far as exports from Calcutta are concerned, which are frequently shipped to "Port Said for orders," the real destination not being stated. Imports improved by 5½ lakhs, which is practically covered by a rise of 4½ lakhs in sugar and a lakh in salt. Exports receded by 32 lakhs, which is fully accounted for by a fall of a similar amount in seeds, chiefly linseed.

Rest of Africa.—The trade with the rest of Africa was stationary.

Eastern Asia.—The total trade advanced by 27 lakhs. Imports declined by 71 lakhs, but exports rose by nearly a crore. In the case of the former, sugar and spices contributed to the decline, and in that of the latter, cotton twist, jute manufactures, opium and raw cotton to China accounted for the expansion.

Western Asia.—Here again there was a rise in value. Imports rose by 7 lakhs and exports by 6 lakhs. The former is entirely accounted for by increased importations of salt from Arabia, and the latter by larger shipments of rice and indigo to Turkey in Asia: against this there were smaller shipments of rice to Arabia.

Ceylon.—The trade with this island declined by 144 lakhs, 46 lakhs of which represent imports and 98 lakhs exports. Under imports, treasure, most of which was transhipped from Australia, contracted by nearly 47 lakhs. The contraction was confined to gold, silver increasing by 4 lakhs. Under exports grain and pulse show a fall of 99 lakhs.

Australasia.—The treasure coming from Australia has been mentioned under Ceylon above. In general, Australasian trade with Calcutta receded by 9 lakhs: imports of wheat fell off by nearly 8½ lakhs, and shipments of tea by nearly 6 lakhs. On the other hand, horses advanced by almost 3 lakhs, and shipments of manure and jute manufactures substantially increased.

* * * * * * * *

CUSTOMS REVENUE.

(FOREIGN TRADE.)

51. The revenue realised in the past year from Customs duties amounted to 414 lakhs representing an increase of 2 per cent., and giving the highest total collections recorded If the proceeds on salt imported into Calcutta, but paid into district treasuries for clearances from inland bonded warehouses amounting to over 30 lakhs, be added, the total revenue becomes 444¼ lakhs, equivalent to an increase of 3 per cent. Deducting refunds and drawbacks (which amounted to 4·77 lakhs, as compared with 4·70 lakhs in the previous year), the net revenue was 440 lakhs, giving an improvement of 3 per cent.

The fluctuations of the more important articles of trade, upon which the Customs revenue depends, have been discussed in the previous paragraphs of this report, and there is little to add to them. The revenue under Schedule III of the tariff was 254 lakhs and represents 61·4 per cent. of the total trade. Of this amount, 233 lakhs accrued from salt and 21 lakhs from liquors. Under Schedule IV, oils account for 6·2 per cent. of revenue, equivalent to 25½ lakhs, whilst metals contributed 3·7 per cent. Cotton goods represent a percentage of 12·4 per cent. ; while articles of food and drink have given 3 per cent. of revenue, of which sugar provided 2·2 per cent. The receipts from countervailing duties on sugar show an increase of 5 lakhs in the past year, producing as much as 12 lakhs, or 2·9 per cent. of the total revenue, as compared with about 7 lakhs in the previous year and 2 lakhs in 1899-1900. Fourteen and-a-half lakhs were derived from exports of rice and paddy, equivalent to 3·5 per cent. of the whole, as against 4·8 per cent. in the previous year. No other articles have contributed more than 1 per cent. to the Customs revenue of Calcutta.

The excise duty on local cotton manufactures expanded in the past year by 16·3 per cent. The collections were Rs. 5,863, as against Rs. 5,038 in the previous year.

A remark may be added here on the amount of revenue repaid to importers either by refund or drawback. In the past year the total sum so repaid was Rs. 4,77,355, as compared with Rs. 4,70,453 in the previous year. Of this amount, Rs. 2,12,808 represents refund of duty on salt. As much as Rs. 1,01,632 is due to refund of the difference between the specific and *ad valorem* duty payable on arms : this represents 50·4 per cent. of the total revenue collected on arms and ammunition which, in the past year, amounted to Rs. 2,01,457. A further sum of Rs. 43,837 represents refund of countervailing duty on sugar, caused by the adjustment from time to time of these duties. These three heads—salt, arms, and countervailing duties on sugar—account for 75·1 per cent. of the total amount repaid. Drawback amounted to Rs. 17,440.

* * * * * * * *

No. 901B., dated Calcutta, the 28th July 1902.

From—H. Wheeler, Esq., Secretary to the Board of Revenue, L.P.,
To—The Secretary to the Government of Bengal, Financial Department.

Member in charge :
The Hon'ble Mr. Bourdillon, C.S.I.

I am directed to submit, for the information of Government, the report compiled by the Collector of Customs, Calcutta, on the maritime trade of Bengal for the year 1901-1902.

* * * * * * *

3. The Collector of Customs, when furnishing the statistics under the different heads, has briefly indicated the causes to which the fluctuations noticeable may be attributed, and the Board do not propose to rediscuss them at length. Taking the foreign trade of the port of Calcutta, the value of which, during the year under review, was the highest on record, the Board note as of interest on the import side (*a*) the large increase in the value of precious stones imported, which is attributed to the preparations for the Coronation ceremonies; (*b*) the greater importations of carriages and carts, due to the demand for rolling-stock on the Calcutta Tramways and on light railways; (*c*) the unprecedented number of horses for army remounts brought up from Australia, surpassing even that of the preceding year; and (*d*) an increase of 17·8 per cent. in the value of arms and ammunition imported. The figures of the liquor trade seem to indicate an increase in the popularity of malt liquors at the expense of spirits and wines, and a rise of 14·3 per cent. in the value of matches imported would seem to be an indication of prosperity, the benefit of which, however, has mainly gone to Japan. The importations of unwrought iron and steel both show a large advance, the former being favoured by lower prices, but the latter being in spite of a rising market. The displacement of English by Belgian steel is very marked.

4. The large increase in the value of machinery imported, noticeably for jute, cotton, and sugar mills, would appear a favourable sign, and the increasing popularity of electric lights and fans is strikingly exemplified by the figures. The depression in the tea industry showed itself in a fall of six lakhs in the value of the machinery imported for gardens. The importations of mineral oil both

from Russia and Burma increased considerably under the influence of cheap prices combined with some degree of speculation, and the extraordinarily heavy cargoes of salt, induced by cheap freights, have necessitated the preparation of special proposals for the extension of the bonding accommodation available in Calcutta.

5. The statistics showing the importation of sugar, with an increase in quantity of 11·7 per cent. over the figures of the previous year, including an increase for beet sugar in particular, of no less than 66·4 per cent., indicate that the countervailing duties imposed have not so far seriously interfered with the trade, and the results of the most recent legislation on the point will be watched with interest. The operations of the new Sugar-refining Company in Bihar have scarcely had an effect on the market so far.

Importations of tobacco, noticeably in the form of cigarettes, for which there seems to be a growing taste among the natives, were again very heavy.

6. On the export side, also, the trade of Calcutta exhibits various points of interest. The coal trade, under the influence of the competition of Welsh coal, sustained a check in its hitherto rapid progress, though still recording an advance, and raw cotton also, thanks to a better crop outturn, was shipped in considerably larger quantities. The exportation of food-grains showed a smart decline, though, in so far as the falling off in the quantities shipped to Indian ports betokened a recovery in the prosperity of districts previously affected by scarcity, the figures afford ground for congratulation. The effect of famine conditions is also seen in the trade in hides and horns, which having been unduly stimulated by the previous great mortality amongst cattle is now resuming more normal conditions, though the supply of hides is now somewhat below the demand. The large trade in goat skins to the United States is deserving of mention. The figures of indigo exported bear evidence to the keen competition of the synthetic dye and the precarious position of the industry, but the value of the important trade in jute was the highest yet recorded, and the year must have been a profitable one for all concerned. For tea, as for indigo, the year was a bad one, though at its close there were some signs of improvement.

7. Looking to the trade of the minor ports in Bengal, the most noticeable feature is the rapid advance of Chittagong. With the advantages of direct steamer communication between that port and England, large shipments of salt, railway materials and rice on the import side, and heavy exports of jute and tea contributed mainly to this result. As in previous years, the trade of the Orissa ports is gradually dwindling.

8. It is noticeable that the revenue derived during the year from Customs duties (414 lakhs) was the highest on record.

RESOLUTION ON THE REPORT OF THE AGRICULTURAL BRANCH OF THE DEPARTMENT OF LAND RECORDS AND AGRICULTURE FOR THE YEAR 1901-1902.

REVENUE DEPARTMENT—AGRICULTURE.

Calcutta, the 5th September 1902.

RESOLUTION—No. 1765T.R.

READ—

The Report of the Agricultural Branch of the Department of Land Records and Agriculture for the year 1901-1902.

Letter No. 678A, dated 30th July 1902, from the Board of Revenue, submitting the report with their remarks.

Read again—

Resolution on the same report for 1900-1901.

In accordance with suggestions approved by the Government of India, the present report on the Agricultural Branch of the Department of Land Records and Agriculture does not notice work done in connection with maintenance of land records: this topic will in future be dealt with in the Director's Settlement Report.

The Director Mr. P. C. Lyon, and the Officiating Director, Mr. C. G. H. Allen, who succeeded Mr. Lyon on the 4th November 1901, spent altogether 160 days on tour, in the year under report, in connection with settlements, land records and agricultural work, and made useful inspections.

2. *Scientific Enquiries.*—Of the agricultural enquiries made during the year the most important are those as to the effect of the imposition of the countervailing duties on the prospects of the sugar-refining industry, and as to the alleged deterioration of jute. Under the last named head, experiments are being conducted with selected jute seed at the Burdwan and Chittagong farms, on lines suggested by the Reporter on Economic Products. On both subjects special reports will be awaited.

3. *Experimental Farms and Experiments in Government Estates and Wards' Estates.*—Experiments with manures were continued at the Burdwan and Dumraon Farms, and it is claimed that the experiments conducted at Burdwan show that a high rate of profit is to be got by applying carefully selected manures to rice, sugarcane and potatoes and especially by green manuring. The Burdwan Farm and the Sripur Farm in the Hathwa Estate were well managed, but the Dumraon Farm not so well during the year. The Inspector-General of Agriculture has advised with regard to the future management of the last named Farm. The Chittagong farm has continued to attract much local interest. The question of establishment of an Experimental Farm at Pusa, to which reference was made in last year's Resolution, is still unsettled.

The Director again urges the necessity for a closer supervision of the money expended on agricultural experiments in Government Estates and Wards' estates and proposes to increase the number of travelling overseers. Mr. Lyon stated in his Report for the year 1900-1901, that a travelling overseer had been appointed for the district of Backergunge to visit the various estates managed by the Collector and to advise generally in matters connected with agricultural improvement. On this it was ordered that the results obtained by this appointment in Backergunge should be reported. The Director has not, however, mentioned the result of the experiment in the Backergunge district; and it will be best that he should deal with the matter in a separate report.

It is understood that the Board will favour Government with their views on the expediency or otherwise of creating central agencies or farms in the case of Wards' estates.

4. *The Sibpur Agricultural class.*—The success of the Sibpur Agricultural students in obtaining employment both in Government service and under private landowners, which is noticed in paragraph 48 of the Report is very satisfactory.

5. *Sericulture.*—The efforts of the Bengal Silk Committee to assist production of healthy silk-worms were attended, except in the district of Birbhum, with successful results. Enquiry is being made into the causes of the failure of the operations in that district. To enable the Committee to further expand the scope of their operations and to meet additional expenditure in connection with the erection of new model nurseries in the centres of important silk districts, the annual grant of Rs. 3,000, hitherto made by Government, was raised to Rs. 6,000 for the year 1902-1903, with the prospect of its being continued at this increased rate for two years more.

The course of sericultural instruction imparted at the Rampur Boalia Industrial School was remodelled on a more popular basis, the main object of the school being the training of cocoon rearers' sons. In their case the course of training was reduced to six months, and no educational qualifications are required. The one-year rearers' class has been retained for educated students to be trained for the posts of sub-overseers and inspectors in the villages. To encourage the training of rearers' sons in the elementary course, the majority of the District Board scholarships are to be assigned to them.

6. The many heads of work indicated in the Director's Report sufficiently establish his claim for more expert assistance, and the Lieutenant-Governor expresses the hope that this may soon be sanctioned.

The Lieutenant-Governor thanks Mr. Lyon and Mr. Allen for their zeal in discharge of their duties, and also notices with pleasure the good work done by Mr. Nagendranath Banerji in the Sripur Farm.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Government of Bengal.

RESOLUTION REVIEWING THE COMMISSIONERS' REPORTS ON THE WORKING OF THE PURI LODGING-HOUSE ACT DURING THE YEAR 1901-1902.

MUNICIPAL DEPARTMENT—MUNICIPAL.

Darjeeling, the 5th September 1902.

RESOLUTION—No. 1671T.—M.

READ—

The reports from the Commissioners of Divisions on the working of the Puri Lodging-house Act, IV (B.C.) of 1871, as amended by Acts II (B.C.) of 1879 and I (B.C.) of 1884, during the year 1901-1902, in the various places to which it has been extended.

Read also—

The Resolution reviewing the Commissioners' reports on the working of the Act during the year 1900-1901.

During the year under review the Puri Lodging-house Act (Bengal Act IV of 1871, as amended by Bengal Acts II of 1879 and I of 1884) was extended to the village of Jessidih Bazar in the Deoghar subdivision of the district of the Sonthal Parganas.

2. The total number of lodging-houses was 1,912, providing accommodation for 68,500 lodgers, against 1,997 houses, accommodating 71,642 persons in the preceding year. In Gaya and Nadia (Nabadwipa) there was a rise both in the number of lodgers and lodging-houses, while elsewhere there was a steady decline. The decrease at Sitakund is ascribable partly to scarcity in the neighbouring districts, which chiefly send pilgrims to this shrine, and partly to the lateness of the season of Sivaratri *méla*. The falling off in the Burdwan and Orissa Divisions was principally due to the opening of the Bengal-Nagpur Railway. Since the opening of the line, the pilgrim traffic is gradually concentrating on one main centre, and in a short time few lodging-houses will be left outside the town of Puri.

3. The health of the places where the Act was in force is reported to have been generally good. The number of deaths among pilgrims fell from 730 in the preceding year to 510, being 27 per cent. less than the proportionate decrease in the number of pilgrims. Plague was wholly absent from Gaya, but appeared in Deoghar without, however, causing any serious mortality.

4. There was no complaint in the past year in regard to the water-supply. The proposal of the Magistrate of Chittagong to bring down the water of the Mandakini spring by means of pipes to the Sitakund bazar, referred to in the last year's Resolution, was carried out with the help of a liberal donation of Rs. 5,000 given for the purpose by Raja Srinath Roy of Bhagyakul, in the Dacca district, and his brothers. At Garhbeta, in the district of Midnapore, the sinking of a well, which was sanctioned in 1899-1900, was completed last year, while two new wells were sunk at Puri. The special attention of the Commissioners of the Puri Municipality will be invited to the remarks of the District Magistrate that none of the money given by the Lodging-house Committee in previous years for the introduction of certain sanitary schemes has yet been expended on the assigned objects, and it is hoped that the Commissioners will not fail to realise their responsibilities and take early steps in the matter.

5. The total income of the year under review was Rs. 63,106—a slight increase on that of 1900-1901. The total expenditure was Rs. 57,415, against Rs. 43,186 in 1900-1901. The services of the Health Officer attached to the *chatties* in the Balasore district were dispensed with from 31st March 1902, his work being made over to the officers in charge of the several local dispensaries.

6. The Act has worked satisfactorily during the year in all places in which it was in force.

ORDER.—Ordered that a copy of the Resolution be submitted to the Government of India in the Home Department, and that copies be forwarded to the Commissioners of the Burdwan, Presidency, Chittagong, Patna, Bhagalpur, and Orissa Divisions for information.

Ordered also that a copy of the Resolution be communicated to the Sanitary Commissioner, Bengal, and to the Sanitary Board, and that it be published in the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

E. W. COLLIN,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORT OF THE PORT OFFICER, CALCUTTA, FOR THE YEAR 1901-1902.

No. 1663Marine.

Government of Bengal,

MARINE DEPARTMENT.

Dated Calcutta, the 4th September 1902.

RESOLUTION.

READ—

Letter No. 2529, of 9th July 1902, from the Port Officer, Calcutta, submitting the Annual Report of his Department for the year 1901-1902.

THE year opened with 46 Pilots on the list; but as those in the Leadsman grade became qualified they were promoted, and at the end of the year the number stood at 49, or 3 short of the sanctioned number of 52. There were no casualties in the service during the year.

The number of vessels arriving at and leaving the port was 1,347 and 1,356, or a small decrease of 112 on the number of the previous year. The previous year's figures were exceptional, owing to the large number of transports for South Africa and China. The numbers given above represent a gross tonnage of 4,575,267 inwards and 4,618,217 outwards. The average tonnage of steamers and sailing ships, inwards and outwards, was 3,401 against 3,247 during the previous year.

The pilotage receipts during the year amounted to Rs. 11,30,390 against Rs. 11,60,603 during the previous year, or a decrease of a little over 2½ per cent. This is due to the smaller number of vessels that visited the port. Of the total number of vessels which visited the port, only 29 were sailing vessels.

Nine vessels were neaped for want of sufficient depth of water over the Royapore and Moyapore bars against five during the previous year. The average detention was 2·7 days. The number of vessels detained at the Sandheads for want of Pilots was 24, compared with 41 in the previous year. The shortest detention was 1 hour 15 minutes, the longest 40 hours 15 minutes, the average being 13 hours 14 minutes. These detentions were due to a number of vessels arriving at the same time.

There were only two collisions during the year, while the number of groundings was 24. In both cases of collisions the Pilots were to blame, while in the cases of groundings in three instances only were the Pilots to blame.

Thirty-five preliminary enquiries into casualties to vessels were held by the Port Officer, of which two were referred to Special Marine Courts. Two other Special Marine Courts were held to enquire into casualties to vessels while in charge of Assistant Harbour Masters. In five cases the Pilots were held to blame, and they were suitably dealt with.

One hundred and sixty-two candidates appeared for Colonial and Home Trade certificates of competency, of whom 85 passed. One hundred and fifty-four candidates also appeared for certificates of competency as masters, serangs, engineers and engine-drivers under Act VI of 1884. Of these, 52 passed.

Mr. G. Robertson, 1st Engineer and Shipwright-Surveyor, returned from furlough on 17th October 1901, relieving Mr. E. G. Venn, who reverted to the Royal Indian Marine. Mr. F. Olford, the Acting 2nd Engineer and Shipwright-Surveyor, was confirmed in that appointment. The gross receipts from surveys amounted to Rs. 40,877, while the expenditure, including the travelling allowances of surveyors to out-stations, was Rs. 25,912.

The work of the department was conducted by Commander E. J. Beaumont throughout the year, assisted by Lieutenant W. B. Huddleston as Assistant Port Officer. The latter officer went on 90 days' privilege leave from the 20th February 1902, when his place was taken by Lieutenant C. B. Henley, Royal Indian Marine.

By order of the Lieutenant-Governor of Bengal,

D. B. HORN,

Secretary to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 8th September 1902.

Burdwan.—Rainfall at Sadar 0·79, Kalna 0·52, Katwa 1·37, Raniganj 6·13. Weather threatening. Transplantation still continues. Harvesting of *aus* going on. Fodder and water sufficient. Condition of cattle good. Common rice sells at 11 seers per rupee.

Birbhum.—Rainfall at Sadar 1·49, Rampur Hât 1·83. Transplantation is over. Paddy thriving. Weather seasonable. Common rice sells at 12 seers per rupee.

Bankura.—Rainfall at Sadar 2·80. Condition of standing paddy and sugarcane crops good. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Midnapore.—Rainfall at Sadar 2·52, Contai 2·22, Tamluk 1·74, Ghatal 2·68. Weather hot and cloudy. Harvesting of *aus* going on. Prospect of *aman* good. Fodder and water sufficient. Cattle-disease reported from Binpur thana. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Contai	11	8	
Ghatal	11	8	
Tamluk	11	0	

Hooghly.—Rainfall at Sadar 2·50, Serampore 3·90, Arambagh 3·52. Weeding of *aman*, harvesting of *aus* and steeping of jute going on. Prospect of standing crops good. Weather seasonable. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Serampore	10	4	
Arambagh	11	9	

Howrah.—Rainfall at Sadar 2·79, Uluberia 2·12. Fall general. Cutting and thrashing of *aus* and reaping and steeping of jute still continue. Transplantation of *aman* paddy on high lands continues. Agricultural prospects hopeful. No cattle-disease reported. Fodder and water sufficient. Common rice sells at 11 seers per rupee on an average everywhere within the district.

24-Parganas.—Rainfall at Sadar 2·60, Barasat 4·76, Basirhat 1·03, Diamond Harbour 3·22. Weather hot and frequent showers. Good September weather. State of standing crops good. Prospect good. *Aus* and jute still being harvested, and the latter is being steeped. Transplantation of *aman* nearly finished. Common rice sells at 11 seers per rupee. Condition of cattle good. Supply of fodder and water sufficient.

Nadia.—Rainfall at Sadar 1·32, Ranaghat 1·57, Chuadanga 0·53, Meherpur 1·96, Kushtia 1·17. Harvesting of jute continues. *Aman* and sugarcane doing well. Lands being prepared for *rabi* crops. Fodder and water sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Ranaghat	11	0	
Chuadanga	11	8	
Meherpur	13	5	
Kushtia	11	0	

Murshidabad.—Rainfall at Sadar 1·97, Kandi 1·74, Jangipur 1·88, Lalbagh 4·55. Weather seasonable. Harvesting of *bhadoi* not yet completed at Lalbagh and Jangipur Subdivisions. Prospects of *aman*, sugarcane, mulberry and jute good. Cow-pox reported from Burdwan thana. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Kandi	12	8	
Jangipur	12	0	
Lalbagh	11	0	

Jessore.—Rainfall at Sadar 1·52, Jhenida 2·00, Magura 0·94, Narail 0·77, Bangaon 1·27. Weather seasonable with occasional rain. Prospects of crops fair. Harvesting of *aus* paddy almost completed. More rain wanted. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Khulna.—Rainfall at Sadar 1·69, Bagerhat 2·04, Satkhira 2·70. Weather seasonable. Harvesting of *aus* and transplantation of *aman* still continues. Prospects favourable. Fodder and water sufficient. Cattle-disease reported from Paikgachha and Asasuni. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	4	per rupee
Bagerhat	12	0	
Satkhira	10	8	

Rajshahi.—Rainfall at Sadar 1·49, Nator 2·65, Naugaon 0·59. Weather seasonable. Harvesting of jute and *bhadoi* nearing completion. Transplantation of *aman* continues. Condition of cattle good. Common rice selling at 12 seers per rupee.

Dinajpur.—Rainfall at Sadar 1·06. Fall in the district scattered. Maximum fall 3·15. More rain wanted. Weather seasonable. Standing crops good. Transplanting of winter rice and steeping of jute continue. Cattle-disease reported at Kaliaganj. Fodder and water plentiful. Rice selling at 12 seers per rupee.

Jalpaiguri.—Rainfall at Sadar 4·91, Alipore Duars 1·82. Fall moderate. Weather cloudy. Transplantation of *haimanti* paddy almost finished. Harvesting of *bhadoi* paddy continues. Cutting of jute going on. Common rice sells at 11 seers a rupee. Fodder and water sufficient. No cattle-disease reported.

Darjeeling.—Rainfall at Sadar 6·55, Kurseong 4·78, Siliguri 3·01. Weather seasonable. *Hill—Bhadoi* and *haimanti dhan*, maize, *bara* and *chhota marua* doing well. *Terai*—Transplanting of *haimanti* paddy nearly finished. Reaping of jute and *bhadoi* paddy going on. Prospects good. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	10	0	

Maize sells at Darjeeling at 20 seers and at Kalimpong at 40 seers per rupee.

Rangpur.—Rainfall at Sadar 2·76, Nilphamari 3·57, Kurigram 0·7, Gaibanda 0·18. Weather cloudy and rainy. Harvesting of *bhadoi* nearly finished. Transplantation of *aman*, and cutting and steeping of jute still going on. Water and fodder sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	8	per rupee.
Gaibanda	10	0	
Kurigram	12	0	
Nilphamari	10	8	

Bogra.—Rainfall at Sadar ·95. Fall general. Harvesting of *aus* and transplantation of *aman* nearly finished. Steeping of jute going on. Fodder and water sufficient. Prospects fair. Common rice sells at 12 seers per rupee.

Pabna.—Rainfall at Sadar 2·32. Fall general. Weather cloudy and rainy. Prospects of *aman*, sugarcane and tamarind fair. Fodder and water sufficient. Cattle-disease in Sadar. Common rice sells at 10 seers per rupee.

Dacca.—Rainfall at Sadar 4·29, Manikganj 3·80, Munshiganj 1·82, Narayanganj 1·94. Prospects of crops fair. Weather seasonable. Fodder available. No cattle-disease. Common rice sells at 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 1·49, Jamalpur ·51, Kishorganj 1·40, Netrokona 2·60, Tangail 1·99. Weather hot and rainy. Harvesting of *aus* nearly over. Steeping of jute and transplantation of *aman* going on. *Aman* doing well. Fodder sufficient except at Netrokona. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	4	per rupee.
Kishorganj	10	12	
Jamalpur	11	6	
Netrokona	12	0	
Tangail	10	4	

Faridpur.—Rainfall at Sadar 3·23, Goalundo 1·92, Madaripur 1·93. Weather sultry and lately rainy. Prospects of crops good. Fodder and water sufficient. Common rice sells at 11 seers a rupee. No cattle-disease.

Backergunge.—Rainfall at Sadar 4·53. Fall general. Weather cloudy with occasional high wind. Prospects fair. Harvesting of *aus* and transplantation of *aman* continue. Cattle-disease at Matbari thana. Common rice sells at 13 seers (*aus*) and 11 seers (*aman*) per rupee. Fodder sufficient.

Tippera.—Rainfall at Sadar 2·75, Brahmanbaria 2·25, Chandpur 2·54. Weather seasonable. Prospects of standing crops good. Harvesting of *aus* completed. Reaping of jute, transplantation of *aman* paddy still going on. Fodder and water sufficient. No cattle-disease. Common rice sells at 14 seers per rupee at Sadar.

Noakhali.—Rainfall at Sadar 5·11, Feni 1·85. Fall general. Weather rainy. Harvesting of *aus* nearly finished. Transplantation of *aman* continues. Prospects good. Outturn of cocoanut estimated at 75 per cent. Cattle-disease at Sudharam. Water sufficient. Fodder not so. Common rice sells at Sadar at 11 seers and at Feni at 13 seers per rupee.

Chittagong.—Rainfall at Sadar 3·86, Cox's Bazar 1·85. *Aus dhan* is being reaped and *aman dhan* is being transplanted. Water and fodder sufficient. Rice selling at 12 seers 11 chitaks per rupee.

Chittagong Hill Tracts.—Rainfall at Sadar 2·34. Fall general. Weather showery. Harvesting of *joom* paddy continues. Winter rice progressing satisfactorily. No cattle-disease. Rice selling at 12 seers per rupee.

Patna.—Rainfall at Sadar 4·88, Bihar 1·42, Dinapore 4·44, Hilsa 5·30, Bikram 1·71. Weather cloudy. Rain urgently needed for paddy. Paddy being used as fodder for cattle for want of rain. *Bhadoi* being reaped. No cattle-disease. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	ch.	
Patna	11	8	per rupee.
Bihar	10	0	
Dinapore	12	0	

Gaya.—Rainfall at Sadar 3·57, Jahanabad 3·52, Aurangabad 3·04, Nawadah 2·15. Weather hot and rainy. Transplantation of paddy still continues. Want of sufficient rain is reported to be the cause of delayed transplanting. *Madua* harvested in places in Nawadah subdivision. No cattle-disease. Fodder and water ample. Average price of common rice is 11¼ seers per rupee.

Shahabad.—Rainfall at Sadar 2·10, Buxar 2·02, Bhabhua 4·20, Sasaram 1·94, Dehri 4·20. Weather hot and cloudy. The rain of the week has benefited the paddy crop which was suffering for want of rain. Harvesting of *bhadoi* continues.. No cattle-disease. Rice sells at Sadar at 11 seers a rupee.

Cutting of *shama* and *kauni* continues. Sugarcane doing well. No cattle-disease. Ample fodder and water. Common rice sells as follows :—

	Srs.	ch.	
Sadar	11	6	per rupee.
Begusarai	12	0	
Jamui	11	0	

Bhagalpur.—Rainfall at Sadar 1·18, Banka 3·50, Madhipura 2·89, Supaul 0·78. Weather rainy and cloudy Harvesting of *marua* and *bhadoi* paddy going on. Transplantation of *aghani* paddy also going on. Rain favourable, More rain wanted in Banka. Sporadic cases of cattle-disease reported. Water and fodder sufficient. Common rice sells as follows :—

	Srs.	ch.	
Sadar	11	6	per rupee.
Banka	11	10	
Madhipura	14	8	
Supaul	14	0	

Purnea.—Rainfall at Sadar 1·25, Kishanganj 1·12, Araria 0·55. Fall general· jute and *bhadoi* are being harvested. Weather variable. No cattle-disease. Fodder and water sufficient. Common rice sells at Sadar and Kishanganj at 11 seers and at Araria at 16 seers per rupee.

Malda.—Rainfall at Sadar ·19, Chanchal ·84, Silganj 1·39, Gajol ·78. Fall general. Weather hot. Harvesting of *bhadoi* finished except in parts of thana Gajol and Tulshihatta. Cutting of jute in progress. No cattle-disease. Fodder and water sufficient. Common rice sells at 12½ seers per rupee.

Sonthal Parganas.—Rainfall at Sadar 1·66, Deoghur 4·04, Godda 1·10, Jamtara 2·38 Pakaur 1·05, Rajmahal 0·86. Weather hot and cloudy with occasional showers. Paddy transplantation is almost over. Prospects so far good. Harvesting of *makai* continues. Fodder and water sufficient. Common rice sells at Sadar at 12 seers per rupee.

Cuttack.—Rainfall at Sadar 0·46. Fall general and more copious in other parts. Weather cloudy. Weeding and transplantation of *sarad* progressing. Early *beali* being cut. Prospects fair. Fodder and water sufficient. Common rice sells at 13 seers 2 chitaks at Sadar.

Balasore.—Rainfall at Sadar 1·61. Fall general. *Beali* ripening. *Sarad* being transplanted and weeded. Prospects good. Standing crops doing well. Sugarcane growing well. Rice sells at 14 and 16 seers a rupee at Sadar and Bhadrak respectively. Fodder and drinking water sufficient.

Angul.—Rainfall at Sadar 5·21, Chhendipada 1·76, Bissipara 4·30. Fall general. Weather cloudy with heavy showers. Weeding of winter paddy and *rabi* sowing continue. Common rice sells at 12 and 10½ seers per rupee at Sadar and Khondmals respectively.

Puri.—Rainfall 3·44. Fall general. Weather cloudy. Harvesting of *beali* and *mundua* continues. Weeding and transplanting of winter rice in progress. Prospect good. Sugarcane and other miscellaneous crops doing well. Cattle-disease prevailing in places. Fodder and water-supply sufficient. Common rice sells at 14 seers 7 chitaks per rupee.

Hazaribagh.—Rainfall at Sadar 2·29, Giridih 2·59. Fall not general. Weather seasonable. Transplantation retarded for want of rain. Harvesting of *makai* commenced. Common rice sells at 11½ seers per rupee. Fodder and water sufficient.

Ranchi.—Rainfall at Sadar 3·93. Weather cloudy and rainy. Crops promising well. Harvesting of *gundli* still continues. Cattle-disease reported from Ranchi, Silli, and Khunti thanas. Fodder and water sufficient. Common rice selling at 13 seers 14 chitaks per rupee.

Palamau.—Rainfall at Sadar 3·51. Weather seasonable. *Sawan* and *gundli* being harvested in places. *Bhadoi* outturn about 80 per cent. Paddy transplantation nearly finished. All still doing well. Cattle-disease in few places. Fodder and water sufficient. Prices at Sadar—Rice 10 seers 11 chitaks, Maize 14 seers 10 chitaks per rupee.

Manbhum.—Rainfall at Sadar 1·21, Gobindpur 2·91. Fall general. Weather seasonable. Prospects of crops good. Transplantation of winter rice nearly completed. Fodder and water sufficient. Cattle-disease not reported. Average price of common rice at Sadar is 12 seers and at Gobindpur 10 seers 10 chitaks per rupee.

Singhbhum.—Rainfall 2·92. Standing crops excellent. Average price of rice is 12 seers 2 chitaks in the district; at Chaibassa 12 seers per rupee.

General Summary.—Rainfall continued to be general and moderately heavy at places, but the greater part of Bihar, especially the Patna district, is in great need of more rain. More rain is also required in the districts of Jessore, Dinajpur and Hazaribagh. Sugarcane doing well. Harvesting of *bhadoi* crops continues. Transplantation of winter rice is nearly finished and weeding has commenced at places. Prospects fair. Sporadic cases of cattle-disease reported from 12 districts. Fodder and water generally sufficient. The price of common rice has risen in 7 districts, fallen in 11, and is stationary in the rest (29).

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of August 1902.

		Date.	Hour.
	Inches.		
The mean pressure of the month	29·615		
The average pressure of August from 24 years' registers ...	29·598		
The highest pressure in the month	29·751	21st	10
The lowest pressure in the month	29·391	24th	16
The range of pressure	0·360		
	Hours.		
The total number of hours of bright sunshine during the month	140·9		
The maximum possible number of hours of sunshine ...	398·4		
	°		
The mean temperature of the month	84·0		
The average temperature of August from 24 years' registers ...	83·1		
The highest temperature in the month	94·2	13th	
The lowest temperature in the month	74·7	11th	
The range of temperature during the month	19·5		
The mean daily range of temperature	11·2		
The greatest range of temperature in one day	15·4	13th	
	Per cent.		
The mean humidity of the month	86		
The average humidity of August from 24 years' registers ...	86		
	Inches.		
The mean vapour tension of the month	1·002		
The average vapour tension of August from 9 years' registers ...	1·002		
The mean cloud proportion of the month	8·13		
The average cloud proportion of August from 25 years' registers	8·00		
	Inches.		
The total rainfall of the month	14·01		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	12·92		
The average fall of August from 48 years' registers ...	13·94		
The greatest fall in 24 hours	2·71	11th	
	Days.		
The number of rainy days in the month	16

The mean movement of the wind per day	88·3		
The greatest movement of the wind in one day	233·0	10th	
The greatest movement of the wind in one hour	17·0	24th	10 to 11 a.m.

The number of hours with winds from each of the eight points—
N. 24, N.E. 23, E. 62, S.E. 160, S. 184, S.W. 135, W. 53, N.W. 20, Calm 83.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·6 higher; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermometer which is the standard of reference at the present Observatory.

G. W. KÜCHLER,
for Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 8th September 1902.

The total fall from 1st January to 6th September 1902	53·48
The average fall of the corresponding period for 24 years, Surveyor-General's Office	50·50

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; p, passing temporary showers; t, thunder; ∠, lightning.

RESOLUTION ON THE ANNUAL REPORT OF THE ARCHÆOLOGICAL SURVEY, BENGAL CIRCLE, FOR THE YEAR ENDING WITH APRIL 1902, AND THE REPORT.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 9th September 1902.

RESOLUTION—No. 2915.

READ—

The Annual Report of the Archæological Survey, Bengal Circle, for the year ending with April 1902.

The Second Annual Report of the Archæological Survey Department, Bengal Circle, has been submitted by Dr. Bloch, the Archæological Surveyor, who has been in charge of the Department since its constitution in April 1900. During the first year of his appointment the Archæological Surveyor visited the Puri, Cuttack, Murshidabad, Southal Parganas, Malda, and Dinajpur districts, spending about 60 days on tour. During the year under report he spent 145 days on tour in the districts of Champaran, Muzaffarpur, Gaya, Patna, Shahabad, Birbhum, Hooghly, Puri, Khulna, Dacca, and Mymensingh. The object of those tours of general inspection has been to ascertain what localities from their antiquarian interests are deserving of detailed and systematic exploration, and what antiquities should be preserved. Dr. Bloch has recently submitted programmes for future work; and the Lieutenant-Governor has decided that the

Buddhistic antiquities in the Bihar districts and especially the exploration of the site of the ancient Vaisali in Muzaffarpur district deserve first attention.

2. Dr. Bloch gave special attention during the year to the antiquities in the districts of Champaran, Patna, Gaya, and Shahabad. The most important remains in the district of Champaran are the three Asoka pillars, viz., the Rampurwa pillar and the two Lauriya pillars at the villages of Nandangarh and Araraj. In accordance with Dr. Bloch's recommendation, an estimate of the cost of replacing in position the Rampurwa pillar has been called for from the Superintending Engineer. The Lieutenant-Governor hears with regret of the vandal scribbling of names on the two Lauriya pillars, and desires that the district authorities will protect monuments from such acts so far as is possible.

The suggestion that the ancient rock-cut caves on the Barabar and Nagarjuni Hills should be protected from intrusion of *jogis* and *sadhus* must be considered by the Magistrate of Gaya, as also the proposal for the removal to the Indian Museum of the Buddhistic statues that are lying uncared for in the village of Bishenpur, in the district of Gaya.

The hill fort of Shergarh, an important relic of Sher Shah, in the district of Shahabad, is reported to be uncared for and overgrown with jungle. The local Public Works officer will be requested to make arrangements for the better protection of this interesting building. The Temple of Mundesvari and the tomb of Bakhtiyar Khan in this district are also worth preserving. A separate report on these monuments has been received from Dr. Bloch, and estimates for repairs have been called for from the Executive Engineer, Arrah Division.

Repairs of the Bhubaneswar and Kanarak Temples in the district of Puri are going on, and Dr. Bloch's recommendation regarding the cleaning of the carvings in some of the temples may be commended by the District Magistrate to the authorities in charge of these temples.

The Archæological Surveyor has submitted a separate report on the remains at Tribeni and Pandua, in the district of Hooghly, and has suggested certain petty repairs, which will be taken up when funds are available.

3. The total expenditure incurred last year on the repairs of ancient monuments amounted to Rs. 29,679, out of which a sum of Rs. 15,646 was expended on the repairs of the ruins at Gaur and Pandua, in the district of Malda, and Rs. 12,778 was spent on the repairs of the temples in the district of Puri; the gateway of the Juma Masjid near Rajmahal was also repaired, and wire netting was placed over the openings in Hasan Khan Sur's tomb and Sher Shah's tomb at Sassaram.

4. The "List of Ancient Monuments in Bengal" was prepared and published by the Public Works Department in 1895. To bring the work up to date and to correct inaccuracies and supply omissions, it has been decided to publish a revised edition. At the suggestion of the Director-General of Archæology, the work of revision has been entrusted to the Archæological Surveyor.

5. The Lieutenant-Governor thanks Dr. Bloch for his very interesting report.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

(No limit has been fixed as to the number of pages).

ANNUAL REPORT

OF THE

ARCHÆOLOGICAL SURVEY, BENGAL CIRCLE.

For the year ending with April 1902.

PART I.—GENERAL REMARKS.

1. *Constitution of the Department.*—The non-gazetted staff of the Department remained as it stood at the time of my last report, up to the 13th March 1902, when the Pandit of the Survey, Babu P. C. Mukherji, joined the office of the Director-General of Archæology in the capacity of a draftsman. The vacancy thus created has not yet been filled up, and a proposal for doing so will be soon submitted. It appears to me most essential to engage the services of a good photographer, as neither I nor my draftsman are able to take photographs, and I shall propose accordingly.

2. *Tours of the Archæological Surveyor.*—I have been on tour from the 6th November 1901 to the 7th April 1902, that is, altogether 145 days, not counting two short interruptions in February and March, when I returned to Calcutta. My original programme included a visit to the Patna Division, Assam, and Dacca. I had, however, to postpone my visit to Assam until next year, as on my return from Bihar the season was already too far advanced to complete this journey. Instead of this I added some shorter tours to my programme, which I could still conveniently undertake. Having received information about the excavation having begun around the Black Pagoda at Kanarak in district Puri, I went down there on the 20th February 1902, in order to see how the work was done, and if necessary, to offer any suggestions to the Engineer in charge. I also took this opportunity to inspect the work, which is now in progress at Bhubaneswar and Khandagiri in the same district. At all these places, I was accompanied by Rai Prasanna Kumar Pal Bahadur, the Honorary Assistant Engineer in charge of the work. The results of my observations will be detailed in Part II of this Report. On my way to Dacca, I visited Khulna, in order to see the important remains at Bagerhat, viz., the tomb of Khanja Ali, as he is locally called, and the big mosque with 77 domes, called Sat Gumbaz, close to his tomb. Finally, I was ordered to inspect the remains at Atia in the Tangail subdivision of the district of Mymensingh, about which some information had been submitted to Government through the Collector of Mymensingh. I visited this place after the completion of my tour in Dacca district, and I have submitted a special report on the remains there in my letter No. 37, dated the 29th April 1902. I was also ordered to inspect the Siva temples at Bakresvar in the Birbhum district, and the tomb of Zafar Khan Ghazi at Triveni and the mosque and minar at Pandua, both in the Hooghly district. I did this on my way back from the Patna Division, and I have submitted special reports on these remains in my letters Nos. 13 and 16, dated the 18th and 19th February 1902, respectively.

My journeys during the last touring season thus include the following districts: Champaran, Muzaffarpur, Patna, Shahabad, Gaya, Birbhum, Hooghly, Puri, Khulna, Dacca, and Mymensingh. Their results will be detailed in Part II of this Report. The principal object of these preliminary inspection tours was to inspect as many ancient remains as possible, in order to ascertain what is really worth preserving, and also which places or areas should be surveyed in a more detailed and systematic way.

With regard to the latter point, I have submitted certain proposals in my letter No. 38, dated the 29th April 1902. I consider it essential that good photographs, plans, and drawings should be prepared of some of the more important groups of monuments in this province. Very little has been done in this direction, and scarcely anything has been published. It seems, however,

advisable to me to undertake such works always with a view to publication; otherwise, money and labour spent on them will be almost lost to those who take an interest in archæology. Conservation, it is true, is the primary object of the present survey; but as owing to the liberality of the Local Government during the last years, the most important monuments in Bengal are now in a fair state of repairs, time appears to have come to make some of them better known to the general public interested in them by means of *facsimile* reproductions of good photographs and drawings accompanied by the necessary explanatory text, as has been done with regard to other important ancient remains in India.

3. *Tours of Babu P. C. Mukherji.*—Up to the Puja holidays, the Babu travelled in the districts of Champaran, Darbhanga, Gaya, Shahabad, and Patna, where he inspected and reported on a number of ancient nonuments, and from where he brought down impressions of a good many inscriptions. He then visited several places in the Bhagalpur district, the Burdwan Division, and the district of Balasore, until, on the 13th March 1902, he joined his new appointment as draftsman to the Director-General of Archæology. The results of his journeys have been submitted to me in several preliminary reports at the end of each month as well as in a general report, and they will be found detailed in Part III of this Report. As regards inscriptions, the discovery of one important new document is due to him. He found it inside the Gadadhar temple at Gaya, but, unfortunately, the greater portion of it is now covered by a statue of Vishnu in the sanctum of the temple, and his attempts to get permission from the owner of the temple to remove the statue in order to take an impression of the inscription have not met with success. He thus was able to copy only the beginning. As the inscription opens with an invocation to the Sun God, it is probable that it records the erection of a temple of that deity; it is certainly not *in situ* at present. The next two verses are found also in another, hitherto, unpublished Gaya inscription, which also escaped the notice of the Babu. It is now inside a small shrine in the compound of the Vishnupad temple. It refers to the time of Nayapala, tenth century A.D., and mentions the names of three persons, father, son, and grandson, *viz.*, Paritosha, Sudraka, and Visvarupa, who are known to us already from an inscription in the Krishna Dvarika temple at Gaya. The inscription, discovered by Babu P. C. Mukherji, only contains the first name, Paritosha, but it is almost certain that in the portion now covered by the Vishnu statue the two other names follow, and that it belongs to the same period.

4. *Preservation of ancient Monuments.*—Apart from repairs which are going on since previous years, such as the repairs to the temples at Bhubaneswar in the district of Puri, and to the Muhammadan remains at Gaur and Panduah in the district of Malda, or from other repairs which have been sanctioned at the motion of the local Engineers in charge of those buildings, and of which intimation has reached me from time to time, such as the closing by wire-netting of the doors and windows of the tombs of Sher Shah and his father at Sassaram in the district of Shahabad, and certain repairs to the palace at Rohtasgarh in the same district,—apart from those, I have submitted proposals with regard to the preservation of the following ancient monuments:—

(*a*) Certain minor repairs to the great Siva temple at Bakresvar in the district of Birbhum. I have, later on, received a communication intimating that the local Sebaits of the place will provide for the cost of these repairs.

(*b*) Repairs to the minar and mosque at Panduah, and to the tomb of Zafar Khan Ghazi and the mosque at Triveni, both in the district of Hooghly. My proposal principally concerns the minar at Panduah, which, though not of any great artistic value, seems to me well worthy of preservation on account its being quite unique in this province. It is evidently an imitation of the Qutub Minar at Delhi. Its fifth storey and top piece have broken down, and I have proposed to re-build these portions, which may be easily done with the help of a lithograph published in 1871 by the late Mr. Blochmann, on which the entire structure is still seen. With regard to the other buildings, I have thought it sufficient if only such preventive measures are taken as may preserve those portions of them which are still standing from complete destruction.

(*c*) Repairs to the broken Asoka column near Pipariya, in the district of Champaran, commonly called the Rampurwa Asoka pillar. It will be

necessary to remove the larger portion of the pillar, now lying in the open field for a distance of some 800 or 1,000 feet to the south, to its original site, where its broken base is still standing, and to put it up there in its original position. I again beg to emphasize the necessity of these repairs owing to the high antiquity and great importance of this monument, and I shall deem it a special favour if the Local Government may see its way to provide the necessary funds for these probably comparatively expensive repairs.

The following proposals have not yet been submitted to Government, but will be so before I go on privilege leave in the beginning of July :—

(*d*) Repairs to the tomb of Bakhtiyar Khan, near Chainpur, in the Bhabuah subdivision of the district of Shahabad. It is almost a copy of the tomb of Hasan Khan Sur, the father of Sher Shah, at Sassaram, evidently of the same time. But it is a very fine specimen of its kind, and now in such a condition as to make repairs urgently required, if the monument is not to be allowed to tumble into pieces. A separate report will be submitted shortly.

(*e*) Repairs to the tomb of the Bengal Sultan Ghiyasuddin Azam Shah, near Mograpara, the site of Sonargaon, the ancient capital of Eastern Bengal, in the Naraingani subdivision of the district of Dacca. It is a plain basalt sarcophagus, resting on a basalt platform. No inscription is found on it, and only tradition points to it as the burial place of this king, who is best known on account of his literary correspondence with the famous Persian poet Hafiz. What will be required to do to it, is merely to raise the platform and the sarcophagus, which have now sunk, and the stones of which have become dislocated. This probably can be done without any great outlay of money. I shall also propose to add a suitable inscribed tablet to it, saying that this tomb is traditionally pointed out as the resting-place of Ghiyasuddin Azam Shah. Similar tablets are now erected at various places of historical interest all over India. A special report will be submitted later on.

5. *Photographs, drawings, and inscriptions.*—As I have already remarked in paragraph 1 of this report, no photographer has been employed by me, and consequently I have not been able to take any photographs of the monuments inspected by me. I intend, however, making provision for this before I start on my next journey. As to drawings, my stay at the places visited by me generally was limited to a short time only. In order to procure good drawings it is necessary to provide for a prolonged stay of several days at each place, in cases even for several weeks. It will even sometimes become necessary to make special preparations, such as scaffolding, wherever the building to be sketched is very high, in order to take the necessary measurements. I do not think that drawings based on mere rough sketches, such as I might have procured during my last journey, are of any value, and it is for this reason that I have not brought back any drawings to speak of. Of inscriptions I have copied and read a great number, partly on the spot from the original stone, partly from impressions on paper. I have already in paragraph 3 of this report referred to the discovery of two new inscriptions at Gaya of the 10th century A. D. I also took an impression of the unpublished Sanscrit inscription at the Akhshaya-vata at Gaya, which is of the same time, and of another small but valuable inscription in Sanskrit at the Prapita-Mahesvara temple close to it. Its date corresponds to Thursday, the 1st May 1242 A.D. As I shall show later on in Part II, those inscriptions are of special interest for the local history of the sacred tirthas of Gaya, helping us to put back their date to a period far anterior to the time when the present temples were erected, which, as I need scarcely remark, are all of comparatively recent age. Some of the many votive inscriptions on Buddhistic images in the districts of Gaya and Patna are also of some interest on account of the names which they preserve. In Dacca, I found on a loose slab an apparently new inscription in Persian poetry mentioning a king Ruknuddin, who is evidently the Bengal Sultan Ruknuddin Barbak Shah (1459—1474A.D.. It is the first instance of an inscription of a Bengal Sultan composed entirely in Persian poetry. I think that for the first time I have succeeded in deciphering the inscription of the time of Sher Shah on the dargah of Shah Juman Madari at Hilsa, near Bihar, and of the short inscription over the prayer niche of the tomb of Sher Shah's father at Sassaram. I regret

that I was unable to procure an accurate copy of the inscription over the central arch of the Alamgiri Masjid at Rohtasgarh. It is written in very small characters, and put up in a position very high up, so as to make it impossible to read it while standing down below. But from what I could make out, it is evidently a record of Sher Shah's time, thus helping us to fix the accurate date of this Mosque, which local tradition ascribes to the time of Alamgir. Another, evidently unpublished, inscription of the time of Shah Jahan was found over the door to a tomb at the foot of Rohtasgarh hill. It is of some interest, as it mentions the several parganas forming the jagirs of the then Qiladar and Darogah of the fort. A great many new inscriptions of the Moghul time also have been copied; their principal value consists in enabling us to determine the accurate date of the buildings to which they are attached. I shall refer to these inscriptions in connection with my notes on the places where they are found in Part II of this report, and I do not, for this reason, consider it necessary to add to this report a list of all the inscriptions of which copies have been taken.

6. *Sculptures and statues.*—In two of the districts visited by me, *viz.*, Gaya and Patna, a great many ancient statues are found scattered all over the country. Generally, they are now put up in modern temples and worshipped as something quite different, of course, than what they originally were meant to represent. But many of them are still lying loose, and there is scarcely a single village where not at least some fragments of ancient statuary are collected under the village pipal tree. Those statues generally belong to the time of the Pala kings, who ruled over Bihar and portions of Western Bengal from 800 to 1200 A.D They are both Buddhistic and Brahmanical, and they afford a very graphic illustration of the connection between these two rival sects, which seems to have developed more and more towards a gradual intermixture of both, the result being that Buddhism became more and more Hinduized. As an instance of this, I may quote the statue of Karttikayini, the female energy of the war god, inscribed with the Buddhist creed. I found this curious image at Dharawat, in the district of Gaya.

The Buddhistic images are of special interest. With the exception of the Græco-Buddhistic sculptures from Gandhara, found all along the North-Western frontier of India, they are the only class of Indian Buddhistic art, which has come down to us with a fair amount of completeness. The Indian Museum in Calcutta is the only institution which possesses a good collection of this particular branch of Buddhistic art, and it is a matter of great regret that many rare specimens, which would greatly add to the value of this collection, are at present put up in local shrines, and thus have become objects of religious worship, so as to make it impossible to remove them to this institution, where not only they would be better cared for than at their present places, but also serve a more useful purpose in the interest of archæology, than they now do. I have, however, noticed a few valuable specimens, now lying uncared for, which it will be possible to procure for the Indian Museum, and I shall later on submit a special report with regard to this point.

7. *Concluding remarks.*—The staff of this Department has worked to my entire satisfaction. Babu P. C. Mukerji has shown great zeal in completing the tours which he was ordered to undertake, for a great part of the year under trying circumstances. My draftsman, Babu Haridas Dutta, has been of great use to me in copying inscriptions, for which he is particularly skilled. For reasons above stated, I am not able to submit any specimens of his drawings; but drawings of his, previously submitted, have met with great approval. My clerk, Babu Krishna Chandra Mozumdar, was left in sole charge of my office during my absence on tour, and he has given me much satisfaction by the great care with which he discharged his duties.

PART II.—NOTES ON ANCIENT MONUMENTS VISITED BY THE ARCHÆOLOGICAL SURVEYOR.

A.—DISTRICT CHAMPARAN.

8. *General remarks.*—The following is a list of ancient remains in the district of Champaran, inspected by me:—

The three Asoka pillars, *viz.*, the two Lauriya pillars, one near Thana Gobindganj and the other fifteen miles north of Bettiah, and the broken

pillar near village Pipariya, Thana Shikarpur, in the Bettiah subdivision. The last is commonly known as the Rampurwa pillar, while the others are called, respectively, the Lauriya-Araraj and Lauriya-Navandgarh, or Radhia and Mathia pillars. The last two names are misnomers, they having been chosen, as it appears, by Mr. Hodgson's Pandit in order to avoid the obscene-sounding name Lauriya;

The ancient Buddhist stupa, two miles south-west of Thana Kesariya;

Another mound, evidently the ruins of a Buddhist stupa, called Sagardih, on the road from Pipra to Kesariya;

The earthen barrows, probably sepulchral mounds, close to the second Lauriya pillar, fifteen miles north of Bettiah;

The Nandangarh, wrongly called Navandgarh, close to the same place;

The Chankigarh, three miles west of Thana Shikarpur;

Ancient fort and modern temples at Simraon, in Nepalese territory, five miles from Purnahia factory;

The Nonachaur-ka-garh, five miles east of Motihari;

Fort and temples at Sitakund and Bediban, close to Pipra railway station.

I shall deal with them in the order of this list.

9. *The Asoka pillars.*—These pillars, together with another one near Bakhra, in the district of Muzaffarpur, which will be mentioned later on, mark the stages of the journey to Nepal, which Asoka undertook in the 21st year of his reign in order to visit some of the holy sites of Buddhism. In the 27th year of his reign he ordered six religious edicts to be engraved on them. These edicts are not on the Bakhra pillar, but from its general style, as also for other reasons, there can be no doubt as to its origin. Of the three Champaran pillars, that at Lauriya-Nandangarh, fifteen miles north of Bettiah, is best preserved. With the exception of some injuries to the jaw of the lion on its capital, evidently the effect of a cannon shot, the mark of which may still be seen on the northern face of the pillar, it is still almost perfect. I think General Cunningham is right in attributing this damage to some zealous followers of the army of Mir Jumla, which was then on its way back from Bengal after the defeat of Sultan Shuja, the brother of Aurangzeb. The date Hijra Era 1071=A. D. 1660-61, which is found inscribed on the pillar in connection with the Muhammadan creed and the name of Aurangzeb, points to this. I believe that the destruction of the northernmost pillar near Pipariya, some twenty miles distant from the Lauriya-Nandangarh pillar, is due to the same agency. The Lauriya-Araraj pillar, near Thana Gobindgunj, has lost its capital, but is otherwise in a fair state of preservation. Both Lauriya pillars seem to suffer considerably on their northern faces from the effect of the weather; they look quite black there, and their polish, although beautifully preserved otherwise, has gone in these portions. A few small cracks also begin to spoil the writing, which, however, is still in a very fair state. I am afraid no preventive measures against this are available. Perhaps the pillars might be cleaned from time to time, provided this is done with great care. Although they are now surrounded by iron railings, vandal scribbling of names on them is still going on. The latest addition to this illustrations list is the name of S. P. Sinha, a Sub-Inspector of Police from the Lauriya out-post, who recorded his name on the Lauriya-Nandangarh pillar as lately as the 31st May 1898. Luckily the ancient edicts are so high up that they cannot be reached without the help of a ladder. These modern names are all on the lower, uninscribed surface of the pillars.

The northernmost, so-called Rampurwa pillar, near village Pipariya, is still deplorably neglected. I have accordingly, in my letter No. 40, dated the 1st May 1902, submitted a special report on this pillar, proposing that it might be put up again in its original position. Its broken base still stands *in situ*, midway between two low earthen mounds covered with brick fragments, evidently the remains of some Buddhistic monuments. The greater portion of its shaft now lies within a swamp, almost entirely under water, some 800 or 1,000 feet to the north of its base. Evidently an attempt was made to remove it, which, however, soon was given up on account of its difficulty and costliness. Close to it stands the capital, which was disconnected from the shaft by Mr. Garrick in 1881 in order to take a photograph of it. It still stands in the same position as put up by Mr. Garrick, but the lion was

already then lost, and it seems hopeless to recover it. Only the broken feet of the lion are still on the top of the capital.

The three Asoka pillars are by far the most important remains in the district, and range among the most valuable ancient monuments of India. It is for this reason that I venture to hope that my suggestions with regard to the conservation of the Rampurwa pillar will meet with favourable consideration by Government.

10. *The Kesariya and Sagardih Stupas.*—The first stupa stands two miles to the south-west of Thana Kesariya. It consists of a round brick tower raised upon a brick platform. I think General Cunningham is right in identifying it with one of the monuments described by the Chinese pilgrim Hiuen Thsang. It was at that time, in the 7th century A. D., believed to have been erected over a place where Buddha, in one of his former births, had appeared as a Chakravartti or universal monarch. From its general appearance it may well be ascribed to the first centuries of the Christian Era. The absence of any surface ornamentation around the tower is remarkable. Apparently these have disappeared in the course of time. A hole has been dug into the tower, probably by some treasure-seeker. There is, however, little probability that it contains any relic deposit, as for the reason stated above, the monument seems to belong to the class of memorial stupas, of which many existed in India at various places, connected with some remarkable event in the life of Buddha or other saints. The platform of the stupa is now covered with thick jungle, and difficult of access. Without clearing away the jungle and making some excavations all around it, it is impossible to form an idea of its exact structure. I think, however, that this would be worth undertaking, although the site does not seem promising with regard to statues and sculptures. Probably the stupa had only some plain ornaments around its surface. I did not find the statue of Buddha inside a low brick mound close to the stupa which General Cunningham mentions; the mound, which has been excavated several times, may still be seen.

The mound called Sagardih by General Cunningham is locally known simply as 'bhisa' or mound. The village Sagar is close to it. It stands at a distance of some three or four miles from Pipra, on the road to Kesariya. Although it is now too thickly overgrown with jungle vegetation to allow of forming an accurate idea as to its original shape, I do not hesitate to accept General Cunningham's opinion that it was a Buddhistic stupa. At the foot of the mound is the tomb of a Muhammadan saint called Mallang. It is a very insignificant, modern looking brick building, with vaulted roof. At a little distance there is a large tank with a debi-ka-asthan on its borders, such as hundreds may be seen all over the country. Altogether, this place does not look like a promising site for any detailed investigation.

11. *Earthen barrows probably sepulchral mounds at Lauriya, 15 miles north of Bettiah.*—I believe these mounds would very well repay a systematic exploration. It would thus be possible to form an opinion as to their original destination. Hitherto, the only clue seems to be a short reference in the Bengal Administration Report from 1863-69, saying that a short time ago, a leaden and perhaps a second iron coffin with human bones was found in some of them. The various excavations by General Cunningham and his assistants have not yielded any results to speak of. When I was at Lauriya, Mr. Moore, the present Manager of the Lauriya farm, showed me some copper vessels, which, together with two ancient copper coins, had been dug up from one of the mounds. The copper vessels were of exactly the same shape as those at present in use, and, although covered with verdigris, may be of quite recent date. Of the coins, one belonged to Mahmud Shah of Jaunpur and had the date 847 A.H.= 1443 A.D. The other was very much worn off and could not be identified. From its size, it looked like a Græco-Indian or Indo-Scythic coin from the North-West, rather a remarkable find considering the locality; but nothing definite could be made out with regard to it.

I counted altogether fifteen mounds, some very small, some higher. They are arranged in three rows, one running from west to east up to the place where the Asoka pillar stands, and two parallel rows, running from north to south, at the western end of the first row. This arrangement suggests that they were erected according to some definite plan or scheme. Some of the eastern

mounds show fragments of brick on their surfaces; others seem to consist merely of earth, which in course of time has hardened and developed into a stiff clay, which is now to a large degree used by the natives of the place, who mix it with water in order to paint the walls of their houses.

12. *The Nandangarh and Chankigarh.*—These two remarkable ruins, which are situated in sight of each other, one close to Lauriya, 15 miles north of Bettiah, and the other some 10 or 11 miles north of it, are locally believed to be forts built by some ancient and fabulous Rajas. The former is generally called Navandgarh, but the actual local pronunciation is Nandangarh. From time to time attempts have been made to identify them with some of the large Buddhist stupas, mentioned by the Chinese pilgrims, which, from the distances and directions recorded by them, may be looked for in these or adjacent tracts of the country. Even recently Mr. V. A. Smith has upon similar calculations pronounced the Nandangarh to be the stupa erected by Asoka over the ashes of Buddha, but he freely admits the impossibility to affirm this positively, until an adequate survey of the entire groups of ruins is made, and well-devised excavations are effected. From my own preliminary observations I am not inclined to believe that these huge and, as it seems, solid masses of bricks are the remains of any buildings of this kind, and I should rather look upon them as some sort of fortifications. Around the Nandangarh the traces of an old ditch are still visible. On its top, which forms an oblong terrace, traces of some small brick buildings, perhaps watch-towers, remain. The Chankigarh, which is much higher, consists of two parts, one platform with sloping sides upon which rests an oblong building, the sides of which fall down perpendicularly, while only the top seems to be a little rounded. A broad winding pathway leads up to the top from the south. Above, no remains are seen, except some small insignificant shrines. At one place some digging has been done, apparently by Mr. Garrick in 1881, although in his report he makes no mention of this. Some sheets of water run around the mound, perhaps the remains of an old ditch. Both mounds seem to consist of solid masses of bricks some 300 to 500 feet in circumference, but I could not observe anything in their structure that resembles a Buddhist stupa. A detailed and systematic exploration of both the Nandangarh and Chankigarh is well worth undertaking, but this will require time and special funds.

13. *The remains at Simraon, Nonachaur-ka-garh, Sitakund and Bediban.*—The remains at Simraon are already within Nepalese territory. It once must have been a large town surrounded by walls, traces of which are still visible; the boundary now runs along the southern wall. Close to the Isra tank is a math with a temple of Kankali, bearing an inscription, the date of which corresponds to 1747 A.D. It seems, however, to refer not to the temple to which it is at present attached, but to another older structure. Another larger math is at some distance from the Isra tank, at a place called Ranivas. It contains a large temple of the Nepalese style, enshrining images of Rama and Sita. All these buildings are of quite recent date and possess very little interest. Some unimportant specimens of ancient statuary are found inside of them.

The Nonachaur-ka-garh is wrongly called Sarongarh in the List of Ancient Monuments in Bengal. Sarongarh is about two miles distant and does not contain any ancient remains. The Nonachaur-ka-garh is an oblong fort, divided into four smaller sections by two roads running through it, one in each direction. At the place where they meet an ancient tank exists, which is now silting up. All the four sides of each of the four smaller sections seem to have been protected by walls. They are now mostly dangerous of access, owing to the thick jungle which covers them.

Sitakund and Bediban are two places close to the Pipra Railway Station. The remains at the former place are within an oblong enclosure wall, with a way running through each of its four sides. They consist of a deep circular pond, surrounded by bricks, with four ghats leading down to it, and of several modern looking temples and shrines, together with some Samadhs of Sadhus. The principal temple enshrines eight well-preserved images of an older date, *viz.*, two Ganesas, one seated with four arms, and one dancing with eight arms; one Surya; one Hanuman; one Ravana, with 20 arms and 10 heads, five of which are only shown on the carving; one Vishnu; one Durga; and one Mahishamardini, or Durga, in the act of killing the buffalo-demon. The most

remarkable object of worship inside the Bediban temple, which stands on a high mound, apparently the remains of an older structure, is a slab bearing an inscription in Arabic or Persian. This stone now receives poojah from the Hindus of the place. Unfortunately, it is covered with such a thick layer of cement that it is impossible to read it. General Cunningam thought he could read the name of Mahmud Shah, whom he identified with the Jaunpur king of this name (1450 A.D.). This is probable. Guided by the fact that a Muhammadan inscription had become an object of Hindu worship, and by the style of the principal temples at Sitakund and Bediban, which closely resemble Muhammadan tombs, General Cunningham further started a theory that these places had originally belonged to the Muhammadans and had later on been appropriated by Hindus, a remarkable fact, if true, as generally the reverse has been the case. But I believe this theory has very little to speak in its favour. The peculiar style of the two temples may be observed at several places in Bihar, and does not point to a Muhammadan origin.

The remains mentioned in this paragraph are not worth preserving. Other still more insignificant remains at the same places have been left unmentioned.

B.—DISTRICT MUZAFFARPUR.

14. *The remains at Bakhra-Busar and at Hajipur.*—The remains at these two places are the only ancient monuments inspected by me in the Muzaffarpur district. At the former place the principal object of interest is the Asoka pillar already referred to in paragraph (9) of this report. Although it does not contain any inscription of Asoka, yet its style as well as its material distinctly point to its having been set up by order of this king. Moreover, it is possible to identify it with one of the Asoka pillars, mentioned by Hiuen Thsang at the site of the ancient Vaisali, as General Cunningham has shown. No ancient inscription is found on it, but it has been scribbled all over by modern visitors. The pillar is much lower than the other ones, probably on account of the subsequent rising of the surface around it; also the polish is not as fine as on the other pillars, and the lion on its capital is clumsier than that at Lauriya-Nandangarh, and rests not on a circular abacus with the geese ornament around it, as at Lauriya-Nandangarh and Rampurwa, but on a square base without any ornamentation. Close to it is a low mound, upon which some Buddhist statues of the Pala time are enshrined within in a modern hut. Extensive remains are scattered all over the country for several miles distant. These have been identified by General Cunningham with the ruins of Vaisali, the capital of the Lichhavi country, a famous place in the history of Buddha. Dr. Hoey has recently attempted to set aside this identification, but his arguments are very little convincing. To check the various identifications put forward by General Cunningham would require a detailed and systematic survey of the whole area, accompanied by judicious excavations, a work which, for various reasons, seems to be promising of valuable results. The pillar at Bakhra is in good state of preservation.

Hajipur, an important place in later Muhammadan times, contains an old mosque with three domes, built by Makhsus, in the time of Akbar. This we learn from an inscription over its gateway. Unfortunately the exact date of this record could not be made out. The mosque is built of stone and in a fair state of preservation, except that some of the carvings in its outer walls have become defaced, owing to the influence of time. It is not very remarkable, neither on account of its style, nor for any other reason.

C.—DISTRICT GAYA.

15. *Preliminary remarks.*—The ancient remains inspected by me in this district will be dealt with in the following order:—

The city of Gaya;
Budh-Gaya and adjacent places;
Kauwa Dol;
The Barabar and Nagarjuni Hills;
The remains at Dharawat, close to these hills;

The remains at Bela and Ner;
The remains at Pai Bigha, Ghenjan, and Kispa;
The Hindu temples at Konch, Pali, Utern, Deo, and Umga;
The remains at Pachar and Cheon, near Rafiganj;
The remains at Kurkihar, Punawa, Hasra Kol, and Bishenpur;
The remains at Afsand and Parbati Pahar;
The Muhammadan remains at Miranpur Nadera, Jaru, and Hasanpur Kako.

This arrangement endeavours to group together those ancient remains, which either geographically or for other reasons are connected with each other. With the exception of the last item, all other remains are either Buddhistic or Brahminical. There is scarcely any ancient place in this district as well as in the neighbouring district of Patna, where not ruins of both classes are found together. This is not a mere chance, but, as I have already pointed out in paragraph (6) of this report, it represents fairly accurately the state of affairs which prevailed throughout ancient Magadha in the last centuries before the downfall of Buddhism.

16. *The City of Gaya.*—The many temples which now adorn the sacred tirthas of Gaya, are more or less modern and afford but little archæological interest. They contain, however, a number of ancient inscriptions and statues, with which I shall principally deal in this paragraph.

As regards inscriptions, I have already, in paragraph (5) of this report, mentioned the discovery of some new or unpublished documents at Gaya. One was found by Babu P. C. Mukherji, inside the Gadadhar temple. It probably refers to the erection of a temple to the Sun-God, and dates from the time of Nayapala, *i.e.*, the 10th century A.D. Unfortunately, it is now covered by a statue of Vishnu, and as there seems to be no chance of the owners of the temple agreeing to remove this image, only the beginning of it could be copied. Another very similar record of the same period was found by myself inside a small shrine in the compound of the Vishnupad temple. It tells us that Visvarupa, apparently a high official, well known to us from other Gaya inscriptions, adorned Gaya with a multitude of temples erected to Gadadhara and other deities. The inscription is not *in situ*, and it is impossible to say to which Gadadhar temple it refers; it is certainly not the present shrine of this name. The inscription near the Akshaya-vata or eternal banyan tree is of the same time and is interesting for the local history of Gaya, as it mentions this tree and thus shows that it existed as a tirtha already in the 10th century A. D. Close to it is the temple of Prapitamahesvara, to which a small Sanskrit inscription is attached. It is interesting both on account of its date and the light which it throws on the local history of Gaya. Its date is the Samvat year 1299, the new-moon tithi of Jyaishtha, a Thursday, while the Suratrana (*i e.*, Sultan) Maujadina was reigning. This Sultan must be identified with Muizuddin Bahram Shah of Delhi, who was taken prisoner on the 10th May 1242 A.D., and murdered on the 19th May of the same year. Calculating all the possible European equivalents of the Indian date, I find that both the 1st May 1242 A.D. and the 18th June 1243 A.D. would agree, both being a Thursday, coupled with the new-moon tithi of Jyaishtha. But, as the inscription refers also to the reign of Muizuddin Bahram Shah, the first date only, *viz.*, 1st May 1242 A.D., is admissible, and the inscription thus was written only a few days before the end of this king. Its purpose is to record a pilgrimage to Gaya, which some Rajput minister, apparently from the North-West, had undertaken. He says: "I have done Gaya. Witness thereof is Prapitamaha." A statement of this kind is now technically called 'Sakshi-Sravana,' or 'invocation of witnesses.' It is incumbent upon every pilgrim either at the end of each of the stations which he has to go through, or at the completion of the whole pilgrimage, on the seventh day, to invoke the gods as witnesses that by completing the prescribed rites he has freed himself from the debt which he owes to his ancestors. In the present ritual, the 'eternal fig-tree' and the temple of Prapitamahesvara are the last station to which the pilgrim goes, and as a record of this kind refers just to the deity of the temple where the pilgrimage now ends, we may conclude that in one important point at least, the ritual to be observed at Gaya some 650 years ago was exactly the same as it now is.

I also copied a small Sati inscription at the Gadadhar temple and an inscription in Telugu characters near one of the ghats leading down to the river Phalgu. The latter I am unable to read myself. Other well-known inscriptions have been left unnoticed.

The only ancient statue, which I found at Gaya, is the figure of an elephant, represented in the act of culling flowers or fruits from a tree, a favourite subject in ancient Indian art. It is decidedly a carving of at least the beginning of the Christian era. It stands inside a small shrine on the way to the Vishnupad temple, and is locally called Gaya-gaja, or the Gaya elephant. I find it mentioned already in Narayanabhatta's Gayanushthana-Paddhati, a manual on the ritual to be observed at Gaya, about 300 years old. All the other images are of the style and material used in the Pala time (800—1200A D.), and probably also later on, but some are remarkable for various reasons, and will be noticed here accordingly. An image of Vishnu, seated cross-legged, with four arms, two of which rest on his lap, while the others hold club and wheel, is rare and not often met with. His female energy, Vaishnavi, is generally represented as seated on Garuda, but I found one image of her, where she is shown standing, with four arms, two of which hold a shell over her breasts, so that the top of the shell just touches her chin, while the other two hold club and wheel. A statue of Hari-Hara, *i.e.*, half Vishnu, half Siva, was remarkable on account of its showing the phallic emblem of Siva; it must be very old, as subsequent ages considered such representations too indecent, and left out this emblem. I found also an image of Siva and Durga, representing them standing, their hands joined together with the nine planets above, and the bull and lion on the pedestal. This is a rare type, the common representation showing Durga seated on Siva's lap in an amorous posture A standing figure of her, with bull kneeling to her right, and lion to her left side, probably might better be called an image of Mahesvari. On an image of Chamunda, one of the seven mothers, I found an inscription saying that it was the pious gift (deva-dharma, *sic !*) of Valahaka, the son of Adhu; this term is generally met with only in Buddhistic votive inscriptions, where it is exceedingly frequent. A curious piece of carving, not altogether rare, represents five round balls, resting on a square plate. When questioned as to its meanings, the local people explained it as a representation of the breasts of Bhagavati. Rude figures of the same meaning are certainly found almost in every village of Bihar, but their shape is different, and I do not know whether the local explanation holds good. I need scarcely refer to the multitude of lingas or Mahadevas found at Gaya. Some imitate nature with a certain accurateness, while others are merely conventional. Some show a great number of small lingas carved around them; they are called 'Sahasra-lingas;' others have one, four, or even five heads of various gods and goddesses carved upon their round surfaces. They are called: ek-mukhi, chau-mukhi, and panch-mukhi Mahadeos respectively. A chaturmukha Mahadeva is already mentioned in an ancient inscription from Budh-Gaya, published by General Cunningham in his Mahabodhi, where he has misunderstood the term.

The absence of Buddhistic images in Gaya is remarkable. I found only a few inside the shrine on the top of the Pretsila Hill, and also at some other places. The temple on the Pretsila Hill contains an inscription both in Nagari and Bengali characters, the date of which corresponds to Saturday, the 23rd July 1774 A. D. (new style). It says that the steps leading up to the hill were built, for the convenience of pilgrims, at the expense of Madan Mohan Dutt of Calcutta; the gomasta was Ganga Narayan Kar of Orissa, village Gopalpur, pargana Balu, Sirkar Cuttack; the tahvildar was Kali Charan Chaudhuri, of village Simlagadi, pargana Pandua, in Burdwan. It took one year to complete this work.

A modern dharamsala in front of the Prapitamahesvara temple bears a date corresponding to Sunday, the 4th February 1849 A. D. Inside the temple, on the Brahmayoni Hill, are some footprints dedicated by Maharaja Jayaji Rao Sindhia. The last hill receives its name from a small natural fissure in the rocks on its top, which just enables a person to crawl through it. This is looked upon as a symbol of the yoni or womb, and the pilgrim by going through this procedure escapes the fate of being reborn from a human womb.

Other temples and shrines visited by me call for no remarks here.

17. *Budh-Gaya and environs.*—I do not consider it necessary to offer any remarks here on the great temple at Budh-Gaya and its surroundings, as they at present stand. In addition to the known inscriptions on the ancient railing, I found another unnoticed one on one of the pillars, which are now inside the Bakraur Math. It says that the pillar was the gift of Nagadeva, the wife of Raja Bujhamita. On one of the statues inside the great temple, I found an inscription saying that it was presented by Indrabhadra, who came from Samatata, *i.e.*, Lower Bengal. He appears to have been a spiritual descendant of Silabhadra, of the royal family of Samatata, who at the time of Hiuen Thsang's visit (635 A. D.) was a venerable man of over eighty years. The monastery, where he resided, has been identified with some site near the modern Dharawat. I have met with other instances showing that monks adopted names formed with the same compound as the names of their gurus and praguras, teachers and teacher's teachers. Evidently, they chose a new name on entering the order, as modern sanyasis still do. On a railing pillar outside the great temple is an inscription in modern characters saying that a pandit Jinadasa, who came from the hills, visited the Mahabodhi-bhattaraka,' evidently the Bodhi-tree. He has forgotten to record the year; the inscription concludes abruptly with Samvat, without any numerical figures, but the characters are scarcely older than the 15th century A. D. There is, however, nothing remarkable about this record, as the Bodhi-tree still is, and apparently long ago has been, one of the sacred places visited by the Hindu pilgrims going to Gaya.

Other places near Budh-Gaya, to which Hindus have to make a pilgrimage, are Dharmaran and Maltangi. The latter name is a corruption of Matanga linga. It contains a tank, called Matanga-vapi, which has been dug out later on within the area of an older and larger one, which has now entirely silted up Close to it is a modern temple with a linga, called Matangesa. As the ancient stupa identified by General Cunningham with the Gandhahasti stupa, or the place where Buddha formerly had appeared as a large elephant, is very near to it, and as Matanga in Sanskrit means 'Elephant,' it seems obvious that the names Matanga-vapi and Matangesa contain a reminiscence of this ancient Buddhist site. Another place near Budh-Gaya deserves mention for one reason. It is visited by the Burmese as the traditional spot where Buddha was sheltered by the snake-king Muchilinda. Locally it is called Mucharin, which is evidently a corruption of Muchilinda. There is nothing to be seen there except an old tank. General Cunningham tells us that in 1861 he made this identification with the help of Hiuen Thsang, and that he suggested the same to the members of some Burmese embassy, whom he happened to meet there, and who at once accepted his theory. I think there is little doubt that the worship, which this wholly insignificant spot now receives from the Burmese, is due to General Cunningham's identification.

The cave on the Mora Hill, to the north-east of Budh-Gaya, is traditionally believed to be the Pragbodhi, a place where Buddha resided for some time before he reached Uruvilva, the modern Budh-Gaya The cave is a natural fissure in the rock, about midway to the top of the hill. Its entrance has recently been closed by a masonry wall, put up by the Jogi who resided in the cave. It admits access only through a small door. No ancient remains of any importance are to be seen at this place.

18. *Kauwa Dol.*—The remains here are the ruins of an ancient Buddhist temple and a number of rock carved images, all along the foot of the hill. The temple enshrines a large statue of Buddha, seated, in the act of invoking the earth, when he was attacked by Mara and his army. This is one of the largest statues of Buddha which exist, and in fair preservation, except that a portion of the halo has broken. It still is *in situ* inside a small brick-built cell, but the temple is otherwise in utter ruins, only parts of its original brick-walls and some 13 granite pillars being traceable. The pillars probably supported an open hall in front of the temple.

The rock carvings represent almost exclusively Brahmanical deities. I only observed three Buddhist figures among them, *viz.*, one Vajrasattva, one Prajnaparamita, and one seated Buddha. The row in which I found these images continued with other Hindu deities, a further instance of the intermixure of both sects, to which I have already had occasion to point. The great

prevalence of figures of Mahishamardini among these carvings deserves to be noted. All the carvings may belong to the period from 800 to 1200 A.D. The stone does not withstand the influence of the climate, and some carvings have become very faint.

19. *Barabar and Nagarjuni Hills.*—The ancient rock-cut caves on those hills belong to the most interesting remains in this province; they exhibit fine specimens of the high proficiency with which in those remote ages, 3rd century B.C., Indian masons were able to handle such a hard material as the granite stone of those hills. Their polish is of a high order, and still almost perfect. Unfortunately, it has in some places become spoilt by Jogis and Sadhus, who consider it their right to reside inside the caves, and who put up crude stone walls against them. I found four of the caves inhabited by those worthies: one was a Bengali from Howrah, with University education. An immediate stop should be put to such a nuisance, and every modern occupant should be turned out at once.

There are altogether seven caves, four on the Barabar and three on the Nagarjuni hills. The former were dedicated by Asoka and the latter by his grandson, Dasaratha, to members of the Ajivika order, an ancient class of Brahmanical ascetics. Subsequent inscriptions show that in the middle ages also Hindu ascetics dwelt in them; probably they were never appropriated by Buddhist. It is evidently for this reason that they were not visited by the Chinese pilgrims, although their routes took them into the immediate vicinity of the caves.

20. *Dharawat.*—The remains of an ancient stupa, described by General Cunningham, are to the south of the Chandokar talao, midway up the hill. Only fresh excavation can throw new light on these structures. Two modern temples in the north-eastern corner of the tank, and a small shrine at some distance to the east, contain a large collection of ancient statues. I have already, in paragraph 6 of this report, referred to the remarkable image of Karttikayini with the Buddhist creed, which I saw there. A large statue of Avalokitesvara is lying, apparently uncared for, between both temples. It is a very curious piece of carving, and might, probably, without difficulty be removed to the Indian Museum. I observed also a curious figure of Surya inside the southern temple, which represents him with four arms, two of which rest on his knees, one holding a rosary and the other a water-vessel, while the other two are uplifted and hold each one full-blown *lotus*. The horses drawing his chariot are represented not, as usual, *en face* but *en profil*.

21. *Bela and Ner.*—The modern temple close to the Bela Inspection Bungalow contains one remarkably well-preserved big statue of Chamunda and a number of smaller ones, notably a carving showing three goddesess standing in one row, which seem to represent Brahmani, Sivani, and Vaishnavi. Close to the modern temple are the ruins of an older one, now mere heaps of bricks with two lingas standing upon them.

The temple at Ner is of little interest only. Its walls, and a pillared hall in front of it, are still standing. They are just inside the village, obstructed by modern mud-huts, and seem to be used as a cow pen. To the west of the village are the ruins of another temple, which seems to have stood inside a tank. They are very much gone, and very little remains of this structure.

I noted here some remarkable lingas, with four male figures around them, two standing and two dancing, both groups on corresponding sides; on each side of the pedestal, which is a square, a male figure is represented lying. I was unable to make out the meaning of those carved figures.

22. *Pai Bigha, Ghenjan, and Kispa.*—Pai Bigha is a large village near Makhdumpur station, where, according to the list of ancient monuments in Bengal, some antiquarian remains are said to exist. The place had better be struck out from the list. The collection of ancient sculptures inside the village shrine is of no importance at all; a dilapidated Idgah outside the village deserves no mention; and what Mr. Beglar considers the remains of an ancient Siva temple, are merely some crude fragments of granite pillars, marked with the *trisul*, such as may be found in almost every village of the district.

At Ghenjan, some ancient Buddhist and Hindu statues may be seen, among others an image of Brahmani and Sivani. The principal figure is a large seated Buddha, wearing necklace and three-pointed diadem. Statues

of this kind are exceedingly common, but their meaning still remains a matter of doubt. They exhibit all the various postures and attitudes of the ascetic Buddha; but why in them he wears a necklace and a diadem,—a garb not suitable for an anchorite, is puzzling. The ruins of an ancient brick temple also exist to the north-east of the village.

At Ghanjan I found on the pedestal of a large statue of Avalokitesvara an inscription, which says that it was the gift of the Sthavira Ratna Sinha, who came from Nalanda, and was the disciple of the Sthavira Vriddha Sinha, and that it was dedicated by him for the benefit of his disciples Jnana Sinha and Uddyota Sinha. This is a remarkable instance of the adoption by Buddhist monks of names formed with the same compound as the names of their spiritual fathers, to which I had already previously, in paragraph (17), occasion to allude. A fragment of another identical inscription was lying close by. The modern temple at this place contains a large standing figure of Tara, now worshipped as Bhagavati, and carefully hidden by a yellow piece of cloth, which the priests at first refused to remove, under the pretext that the lady had to be kept in *purdah*; but they yielded to my request later on Many minor images are collected at this temple, and at some distance stand in the open field a large Buddha, and Vishnu on Garuda. I observed also a broken Suraj Narain, a peculiar form of linga, with small figures of Siva, Surya, and Lakshmi.

23. *Konch Pali, Utren, Deo, and Umga.*—I have grouped these places together, because I consider it evident that the temple at Konch is of the same period as the temples at Deo and Umga. The resemblance in style is remarkable. It originally had in front a flat-roofed pillared hall or mandapa, which still may be seen on an old photograph, taken by Mr. Peppé, but which now has fallen in, the stone pillars supporting it, still lying in front of the temple. The same is characteristic for the temples at Deo and Umga and the ornamentation of the spire at Deo also is of the same kind as at Konch. The temple at Umga is plain, without ornaments. Moreover, tradition points to Bhairavendra, who lived about 1450 A.D., as the builder of the Konch temple. From his time also date, as we know from local inscriptions, the principal monuments at Deo and Umga. For these reasons, I think that the hitherto accepted date of the Konch temple, *viz.*, eighth century A.D., should be put back for some seven centuries. The temple at Konch is not in a good state of preservation; although repaired some time ago, a great portion of the brick wall in front of the spire has fallen down. The building is worth being kept in a permanent state of repairs.

Inside the temple, the most remarkable piece of carving is a slab representing the Avataras or incarnations of Vishnu. It is distinguished from other similar representations by dividing the Vamana Avatara into two scenes, by leaving out the ninth or Buddha Avatara, and by representing Vishnu in his tenth or Kalki Avatara in the company of a female deity, with a small horse standing in front of them. I am unable to suggest a reason for these peculiarities. Other statues, also Buddhistic images, and remains of other minor temples abound at this place.

Pali and Utren are two small places near Konch, where some remains of no great interest may by seen. The temple at Pali is almost entirely gone, only some pillars and a statue of Brahma still standing amongst its brick ruins. At Utren are the remains of an old fort, probably Muhammadan, with a Muhammadan dargah.

Umga contains a great number of temples on the rocky spur close to the village, mostly in a very ruinous state, with the exception of the principal one, which stands lowest on the hill and closest to the village. The inscriptions found there have already been mentioned; they help us to settle the date of these monuments. Besides, they contain a list of fourteen local Rajas down to Bhairavendra (1450 A.D.) He died childless, and his widow adopted two Rajputs who happened to come to Umga on a pilgrimage to Gaya. Some 150 years hereafter, the family removed their residence from Umga to Deo, where they still reside. Traces of the old palace near Umga may still be seen. The temple at Deo probably dates from this time, although local tradition gives it a fabulous age. It is in very good preservation, and still in use. Among the sculptures collected inside of it, the prevalence of

the Suraj-Narain symbol deserves to be noted. The temple is dedicated to this deity, as also the principal temple at Umga.

24. *Pachar, Cheon and Deokuli.*—These places are all close to Rafiganj. The principal object of interest is a cave in the southern face of the Pachar hill. It is a natural fissure in the rocks, the opening of which has been closed by a brick-wall, giving access to the cave through a small, stone-faced door. In front of it stands a portico, resting on stone-pillars. Inside the cave is a large statue of Parsvanatha, seated, and other minor images, evidently all Jain. I could find no traces of any Buddhist remains in this cave, and it evidently belonged to the Jains. An inscription on its wall in rather modern characters says that a certain person, whose name could not be read, worships constantly Parsvanatha. The existence of a Jain sanctuary in this locality is of some interest on account of its isolation. All other remains at Cheon, Deokuli and neighbouring villages are either Hindu temples or Muhammadan mosques and dargas. They are of very little importance and need not be detailed here. Close to Cheon, in the open field, stands a rather well preserved large statue of Hari-Hara

25. *Kurkihar, Punawa, Hasra Kol and Bishenpur.*—The extensive remains near Kurkihar still yield a great number of fine Buddhist images. A large collection of these may be seen in the modern village temple. Others, recently found, are now placed inside the zamindar's bungalow. These it will be possible to remove to Calcutta, where other statues, previously found there have already gone to. The great mound south of the village is also an extensive quarry for bricks, and is dug into by the natives of the place at random. It is a great pity that never any judiciously devised excavations have been carried out at this place. It is a promising site, and the work would be worth undertaking. The vandal digging for bricks, which is now going on there. is likely, in course of time, to destroy all that exists.

This has happened already at Punawa, a place close to Kurkihar, where now scarcely anything exists. The remains of the temple of Triloknath, described by General Cunningham, have all been carried away since by the local zamindars, and nothing is left of them.

Hasra Kol has been identified recently by Dr. Stein with the Kukkuta-pada-Vihara, or the cock's foot monastery, mentioned by Hieun Thsang, which Cunningham erroneously located at Kurkihar. The valley between the two parallel ridges of hills abounds in ruins of ancient temples, &c., evidently both Hindu and Buddhist A detailed survey of this area will be worth undertaking, as very little is yet known about it, and no accurate description exists. Three very fine Buddhist statues, said to have come from the Hasra Kol, are now placed inside a wretched small brick-house in the neighbouring village, Bishenpur. The principal figure is a large seated Buddha, with two attendants, one being Maitreya, the future Buddha, and the other evidently some form of Avalokitesvara. They are the finest specimens of Buddhist sculpture of the Pala time that I have seen, and for this reason it is a matter of regret that they are now hidden away at such an out-of-the-way place, where they are hardly accessible to any student of Art. I shall accordingly later on submit a special proposal for their removal to the Indian Museum.

26. *Afsand and Parabati Pahar.*—The big statue of a boar at Afsand, representing the Varaha Avatara of Vishnu, is one of the most interesting remains in the district. Its style, as well as its material, grey sandstone, distinctly point to the Gupta period. It closely resembles the boar statue at Eran, in the Central Provinces, which belongs to the same period. The earth, represented as a female, grasps one of the boar's tusks in order to mount the boar's neck. The whole body of the boar is covered with small figures of Rishis, represented generally in worshipping gestures. The statue stands in front of a high brick mound, evidently the temple of Vishnu, built by Adityasena, one of the later Guptas of Magadha, of about 600 A. D., whose long and important inscription, found at the same place, has become lost, it appears, soon after Major Kittoe discovered it and took a copy of it. His copy fortunately still exists. The structural remains of this temple, which are now buried below this mound, seem to be fairly well preserved, and a judicious excavation of the mound probably will reveal a great deal

of the ancient building. It would be a work worth undertaking, as Hindu temples of such a remote period are very rare and as, in this province at least, scarcely any remains of the same kind exist, which seem to be such a promising field for excavation. Other later statues are seen close to the mound, all were Hindu images, and I found no Buddhist statue at this place.

The remains at Parbati Pahar are of very little interest. They consist principally of the dargah of Haji Chand, Saudagar on the hill, a small insignificant building, occupying, as it seems, some ancient Buddhist site. Many heaps of bricks, also a few images, are found all over the hill and around the village.

27. *Miranpur Nadera, Jaru, Hasanpur Kako.*—The remains at these places are the only Muhammadan buildings inspected by me in the district of Gaya. The first two places are in the vicinity of the Barabar Hills, the last place lies some 5 miles to the east of Jahanabad. The dargah of Miran Shah at Nadera and some mosques close to it seem to be rather modern, and afford little of interest. They are kept in permanent repairs, and covered with white-wash. On one of the tombs I observed a linga put up against the head end. The mosque at Jaru is a building of the Moghul period. It can, on no account, be anterior to Sher Shah's time, but I am inclined to consider it as later. It is built partly of brick and partly of granite stones. Every detail of its ornamentation, which is not without taste, points to the Moghul period. It has three domes, and three prayer niches in back wall. The dargah of Bibi Kamal at Hasanpur Kako is very modernized, and little remains of its ancient structure. Fragments of glazed tiles, now placed in the walls, show that it must have been a monument of some consequence. No information with regard to its date is available. Fragments of some Arabic or Persian inscriptions on tiles are now placed over one of its gates, but they are not *in situ* and give no connected reading. Another inscribed stone slab is too much defaced to be read. A second mausoleum, called chota dargah, at the same place, deserves no mention.

D.—PATNA DISTRICT.

28. *General remarks.*—A number of the ancient remains in the district are of the same order as those in the district of Gaya. The modern city of Patna, Hilsa, Telara, Bihar, and Maner contain prominently and almost exclusively Muhammadan monuments. The dargah at Maner is one of the finest buildings of the Moghul time in this province. The ancient monuments inspected by me in the district of Patna will be described in the following order:—

Ancient Pataliputra and modern Patna;
Rajgir and Giryek;
Silao, Jagdispur and Baragaon (Nalanda);
Ghosrawan, Tetrawan and Pawapuri;
Hilsa and Telara;
Bihar;
Maner.

29. *Ancient Pataliputra and modern Patna.*—The remains of ancient Pataliputra, the capital of Asoka, which, for some years past, have formed the object of extensive excavations, lie partly to the south of the East Indian Railway line, partly under the modern towns of Patna and Bankipur. The result of these excavations cannot be said to have answered the rather sanguine hopes, which some eminent Indian archæologists, such as the late Professor Bühler, has entertained with regard to them. However, some of the ancient sites mentioned by the Chinese pilgrims have now been located with more or less certainty, and some fragments of ancient sculpture found during the excavations show that perhaps later on a day may come, when this ancient place will yield some important finds. The huge, solid mass of bricks, now buried under the Choti Pahar, evidently represents the ruins of a Buddhist stupa of great age, but the various excavations, which have been carried on there down to a considerable depth below surface, have brought to light no object of any interest. Another larger mound close to it, called the Bari Pahar, has not been dug into. The modern Agam Kua, a large well, evidently stands on an ancient site. Some 15 minutes distant from it stands an ancient carved

stone showing on each side a female standing, and holding the branch of a tree. Close to it lie the fragments of an Asoka pillar, which have been found during the excavations. Although no inscription is on them, yet their polish as well as the material, sandstone, so closely resemble the other Asoka pillars, that no doubt can be entertained with regard to this find. A large capital of Greek style of the Ionian order also was brought to light during the excavations. It was placed inside the golah at Bankipur, but at the time of my visit, it was no more there, and nobody seemed to know anything about it.

The oldest monument among the ancient buildings of the modern city of Patna, which are exclusively Muhammadan, is the mosque of the time of Sher Shah. There is no inscription on it, but there is no reason to doubt its traditional date. It is built of bricks, and covered by one large dome in centre resting on an octagonal spring. In each corner is a smaller dome, and between these four smaller domes, on each side, are one larger and two smaller vaulted roofs. The back wall has three prayer niches. Some repairs have been done to this mosque, but it is still in bad order, and some more might be done, as the building is remarkable on account of its style. Outside the mosque are a number of tombs, mostly modern. The oldest are the tomb of Koka Khan, who died in 1772 A. D., and of Mirza Aziz, who died in 1808 A. D. Another mosque, called Pather-ka-masjid, is of some interest on account of its inscription, which tells us that it was built by Parwez Shah, the son of Jahangir, out of the materials of the fort Majauli and a Hindu temple, which he had destroyed. Its date is the Hijra year 1036, which began on the 22nd October 1626 A.D. Numerous other mosques and dargahs call for no remarks here, except that some of the ancient carved stones from Gaur, in the district of Maldah, are found built into them, as also into private houses. These materials have been carried away rather a long distance.

30. *Rajgir and Giryek.*—Rajgir, the ancient Rajagriha, the first capital of Magadha, is now principally a sacred place of the Jains, who come there in great numbers from far away. They visit all the shrines on the tops of the five hills. These shrines are all of very recent date. They generally contain a stone with the foot-prints or padukas of some Jain Tirthankar. Older ruined shrines of the middle ages are also found there, but they no longer from an object of worship. Numerous Jain images are seen inside of them. I think the Jains had settled there already from the beginning of our era, as I believe that the famous Sonbhandar, or Gold Treasury cave, at the southern foot of the Baibhar hill, was made by a Jain monk for the use of his own sect. This I conclude from an inscription in the outside wall of the cave. It is a Sanskrit verse, telling us that the famous teacher Muni Vairadeva made two caves which are a suitable resort for ascetics who wish to attain to nirvana, and which are renowned on account of Arhants. The two caves referred to in this inscription can only be the caves where the record is engraved; in fact, there are two caves there close to each other, one the so-called Sonbhandar, and the other now in ruins. The mention of the Arhants, as also other technical terms in this inscription, distinctly point to the Jains. There is, moreover, just below the inscription a now mutilated carving of Jain Tirthankar of apparently the same period. The period of the inscription may be stated as the 3rd century A.D. on account of the shape of its writing. As the caves at the time when the Chinese pilgrims visited Rajgir probably were still occupied by Jain monks, we may assume that they have been left unnoticed by them, as, for a similar reason, the caves on the Barabar and Nagarjuni hills (see above paragraph 19), and we need not try any further identification of them with some of the sacred Buddhist sites mentioned by the pilgrims. I need scarcely remark here that General Cunningham's identification of the Sonbhandar cave with the Saptaparna cave, the traditional site of the first Buddhist Synod, has never met with any approval. The latter site, in all probability, is identical with the large natural caves near the top of the Baibhar hill, on its northern face.

A detailed and systematic exploration of all the hills near Rajgir, which seems to me worth undertaking, probably will bring to light more Buddhist remains, which at present are comparatively scanty. To the Hindus the hot springs at the foot of the Baibhar hill now form the principal object of

worship. There is also an old ruined temple of Mahadeva on the same hill, close to the old Jain temples.

The stupa at Giryek is undoubtedly a Buddhist monument of considerable age. If some clearing of rubbish around it could be done, it would be easy to prepare a good drawing of this important monument, showing its restoration to scale. The drums upon which the large hemispherical dome rested appear to have been comparatively low; they were probably only from three to five in number. They again rested on square terraces, divided by small pilasters in several niches or recesses Some of the surface ornaments are still well preserved. They exhibit various patterns of flowers. The stupa was built entirely of bricks. A hole has been dug into it from the western side to take out the relic deposit. But, as shown by General Cunningham, the building was evidently a memorial stupa, and did not contain any relics. It is the best preserved building of its kind in my circle, and a good drawing of it seems desirable; but it can only be prepared by help of excavation of the *débris* around the stupa. Close to it exist the remains of a water reservoir, and at a little distance to the west there are extensive brick ruins, the remains of a monastery or vihara, which was connected with the stupa by a pathway, which still may be traced. This monastery is now in too ruinous a state to allow of forming an opinion as to its structure without making extensive excavations.

31. *Silao, Jagdispur, and Baragaon* (*Nalanda*).—Silao, which is an important village on the road from Rajgir to Bihar, is mentioned here merely on account of some ancient stones with Buddhist carvings which have been used as building materials for the principal mosque of this place. Jagdispur is only a short distance from Baragaon. It contains a very interesting large statue of Buddha, which, with minor images, now stands on the top of a low mound, apparently the *débris* of a Buddhist temple. This statue shows Buddha attacked by Mara and his army, and around this are seven minor relief scenes representing other events in the life of Buddha. His nirvana is represented at the head of the image. Similar statues are by no means rare among the Bihar sculptures, but the relief scenes on them as a rule show Buddha, the principal figure, only, with not more than one or two attendants, while on the Jagdispur statue each relievo exhibits a great number of attendant figures. This seems to point to a greater age of the Jagdispur statue than that of the bulk of Bihar statues, as it resembles more the character of older Buddhist sculptures, such as those from Gandhara. Some of the figures with animal heads in the army of Mara also remind one of similar ones in well-known Gandhara carvings, and in the nirvana scene we observe above some hands without a body playing drum and cymbal, representations of the heavenly music which filled the air at all the great events in Buddha's career, a motive which is also frequently met with in Gandhara art.

The high mounds which now bury the principal buildings of the once famous Nalanda, near the modern village of Baragaon, may be seen for a long distance. Some of the principal mounds have been dug into previously, but, unfortunately, no records were kept, and no good accounts are available with regard to these excavations. Other mounds have remained untouched, and some of them seem to be promising sites for exacavation. The buildings here do not seem to be in such a ruinous state as to have been reduced to mere heaps of bricks. A detailed and systematic exploration of the whole area seems very desirable. Among the Buddhist statues here, the most remarkable is an image of Buddha seated with an attendant on each side, and two flying figures holding garlands above. It is notable for one reason, *viz.*, because to each of these four minor figures is added a short inscription, which tells us the name of the person which it is meant to represent. This is unfortunately very rare in Buddhist statues, and the work of identifying all the numerous representations from the Buddhist Pantheon consequently labours under great difficulties. We here recognize, by means of those inscriptions, the two attendants below as Arya-Vasumitra and Arya-Maitreya, while the two flying figures above are Arya-Sariputra and Arya-Maudgalyayana, the two principal disciples of Buddha. No objection can have been raised against representing them in such a posture, as, being Arhants, they were possessed of the power of flying through the air.

In the village of Baragaon is also a modern Jain temple with some ancient sculptures, which is now visited by some of the Jain pilgrims on their way from or to Rajgir.

32. *Pawapuri, Ghosrawan, and Tetrawan.*—Pawapuri is a very holy tirtha of the Jains, it being the place where, according to their tradition, the last founder of their sect, Vardhamana Mahavira, attained to nirvana. It contains absolutely nothing ancient. The large temples here are all modern and are of no antiquarian interest. It lies close to the Bihar-Nawadah road.

Ghosrawan and Tetrawan are both some three or four miles distant to the east, and can only be reached *viâ* Pawapuri. Both places must once have contained large Buddhist settlements, as a great number of Buddhist statues are now collected inside of them, which evidently have been dug up in the neighbourhood. At Ghosrawan some ruined brick mounds are still to be seen; also a big mud fort. The principal figures at Tetrawan are a colossal seated Buddha, now on a brick terrace at the southern border of a large tank, outside the village; also a large statue of Marichi, in one of the modern temples there. A short inscription on a small Buddhist statue at the same place is of some interest, as it probably contains the old name of the village. It says that the statue was the gift of Tantava Ateka. This may be interpreted as Ateka from Tantava, and the latter may be an older form of the modern Tetrawan.

33. *Hilsa and Telara.*—The dargah of Shah Juman Madari at Hilsa is a place of far-reaching fame. It is a simple, square brick building, covered by one dome. It has one door only, in its southern wall. The three other walls have each one prayer niche inside. There are seven tombs inside, of which the westernmost is said to be that of the saint. An inscription over the gate, the date of which corresponds to the 3rd June 1543 A.D., tells us that in the time of Sher Shah the tomb (gumbaz) of Miran Sayyid Juman Madari was repaired by order of Miyan Shaikh Alam Adam Shah Juman Madari, at the expenses of Darya Khan Zangi, an officer of the body-guard. The original building thus appears to be older than 1543 A.D., but it cannot have been much anterior, as Shah Madar, the founder of the Madari order, to which the saints mentioned in the inscription belonged, is said to have been a contemporary of Ibrahim Shah of Jaunpur, who reigned from 1400 to 1440 A.D. Another inscription refers to the building of a mosque near the dargah, by a person called Riza. Its date corresponds to 1604 A.D., and it is of some historical interest, as it refers to Jahangir, who is called Shah Salim, as the reigning King. His father, Akbar, was still alive at that time, but Jahangir was already in open rebellion against him. He already then struck coins, with the name Salim, of which numerous specimens exist. The mosque, built by Riza, is no longer in existence, and the present one is an insignificant, modern building. The dargah is kept in fair order.

Telara, the ancient Tailadhaka, is the site of a famous Buddhist monastery, of which, however, very little remains. Some ancient stones have been used as building materials for the mosque there, which is called the Sangi Masjid, and for the dargah of Sayyid Yusuf Abdal, close to it. Both stand on a high mound, apparently the site of some Buddhist building. On one of the stones, which is now used as a lintel over the door to the mosque I found the ancient name of the place, Tailadhaka, written in characters of the Pala time. Inside the dargah is an inscription of Sher Shah's time, which has become very much defaced. Both the mosque and the dargah are of no special interest.

34. *Bihar.*—The only Hindu remains in Bihar are the sandstone pillars, now put up in the Subdivisional Officer's compound. One of them bears an important Sanskrit inscription of the time of the Gupta kings. It has been put up upside-down, apparenty because, below the inscription, no vacant space remains to afford a support for the pillar.

The fort is in utter ruins, but traces of its walls, &c., remain. A gateway, which was still standing some 30 years ago, has now entirely broken down. Ancient Buddhist carvings have been used in building the various mosques and dargahs, which now adorn the place. The principal dargah is that of Malik Ibrahim Bayyu, who, according to the inscriptions on its walls, died on the 20th January 1353 A.D. It stands on the top of the Bihar hill and closely

resembles the dargah of Juman Madari at Hilsa (paragraph 33). The curved battlement, which is so common a feature in similar buildings of the same period in Bengal, is not met with here; in fact, this peculiarity seems to have been confined to Bengal only. The tomb of the saint is in the centre, with ten smaller ones around it. The dargah is in a fair state of repairs. Other dargahs have no domed buildings, but consist merely of open tombs, with mosques, musafirkhanas, and other houses in their compound. The principal ones are the dargah of Sharafuddin, Qadir Qumaish, and Shah Ahmad Charamposh. The dargah of Qadir Qumaish contains merely buildings of very recent date, not more than sixteen years old; but some ancient carvings may be seen here. The dargah of Shah Ahmad Charamposh has an ancient gateway, coming from some Buddhist or Hindu temple, with elaborate delicate carvings. Some of the carvings have been chiselled off, and Persian verses, expressing moral and religious precepts, have been engraved in their place. The Juma mosque was built in the time of Akbar, at the instance of Said Khan, who was Governor of Bihar from 1004 to 1010 Hijra era. The date of the inscription is the Hijra year 1004 which began on the 6th September 1595 A.D. Said Khan is said to have had a special passion for eunuchs, of which he had 1,200. One of them, Ikhtiyar Khan, who acted as his Vakil, was the builder of this mosque. Another mosque was built in Shah Jahan's time by Habib Khan, an Afghan of the Sur clan. Its date is the Hijri year 1047, which began on the 26th May 1637 A.D. There are other mosques of the same period, but they have no inscriptions. All these buildings are generally in a fair state of preservation. Numerous ancient Muhammadan inscriptions have been carried away from Bihar to Calcutta; others are still lying inside the principal dargahs. They all have been deciphered and translated previously.

35. *Maner.*—A special report on the Maner tombs has been submitted in my letter No. 12, dated the 17th February 1902. There are two tombs at this place, viz., that of Shah Daulat, called the choti dargah, and that of Shaikh Yahya Maneri, called the bari dargah. The former is a very fine building, the best specimen of a mausoleum of the Moghul style in this province. The stone carvings on its walls are of a delicate taste and high finish, and by this it far excels the widely famed mausoleum of Sher Shah at Sasseram (see paragraph 39), which, on the other hand, is of grander and more imposing outlines. Good photographs and drawings of the mausoleum at Maner should be prepared, with a view to publication. The saint died 1017 A H. (=1608 A.D.); the mausoleum was completed in 1025 A.H. (=1616 A.D.); the mosque inside its compound was built by Ibrahim Khan in 1028 A H. (=1619 A.D.), while the gateway bears an older inscription, the date of which corresponds to 1603-4 A.D. Ibrahim Khan was then Governor of Bihar. He also built the mosque near the bari dargah of Shaikh Yahya Maneri; the date of its inscription corresponds to 1605-6 A.D. It is at present in a ruinous state, but not worth repairing. The mausoleum of Shah Daulat, the choti dargah, is in very good order and regularly looked after by the Public Works Department. Its gateway is becoming dilapidated and the roof of its mosque had to be supported by wooden beams, as it became unsafe. I did not consider it necessary in my previous communication to recommend any further repairs to it.

Outside these two dargahs I found some other tombs, one with an inscription, the date of which corresponds to 1575-76 A.D. It is in a ruinous state.

E.—DISTRICT SHAHABAD.

36. *General remarks.*—In coming to the district of Shahabad from the neighbouring district of Gaya, the traveller is struck with the absence of Buddhist remains, which suddenly seem to disappear, as soon as one crosses the Sone. In fact Buddhism when it flourished in Magadha from 800 to 1200 A.D., does not seem to have extended beyond that river. Wherever, in the district of Shahabad, I found some fragments of ancient statuary collected under the village pipal tree, I hardly anywhere observed Buddhist sculptures among them, and those collections too, are not as frequently met, as in the district of Gaya. There is, however, one very ancient Hindu

temple at Mundesvari in the Bhabua subdivision of the district of Shahabad which, I think, cannot be later than 600 or 700 A.D. It is evidently the oldest and most important building of its kind within this province. The principal other buildings belong to the Muhammadan time, especially the tombs at Sasseram and Chainpur, and the hill forts at Rohtas and Shergarh. The ancient monuments inspected by me in the district of Shahabad, will be dealt with in the following order:—

The temple of Mundesvari;
The remains at Tilothu and Tutrahi;
The remains at Sasseram and Chainpur;
Rhotasgarh;
Shergarh.

37. *The temple of Mundesvari.*—This temple stands on the top of a hill close to the village of Ramgarh, 7 miles south-west of Bhabuah. It appears to have been a square outside and an octagon inside, covered by a pyramidal roof. The principal entrance was from the east through a door, which originally had a pillared porch in front of which, however, only a few pillars are still standing. There was another door in the western wall, while the northern and southern walls each had one latticed stone window. The northern one is still well preserved, and the carvings around it are of exactly the Gupta style. Their design is very tasteful. The temple was built entirely of stone, and is now in a very ruinous state. Many of the stones have fallen down, and now form a huge pile around the temple. I am afraid, to put it into proper repair, would be a very costly matter, and I have for this reason not yet submitted a special report on it. But I intend doing so later on, as Hindu temples of such a high antiquity are very rare, especially in this province, and as, for this reason, it seems desirable to have the building tested by an experienced architect, who would be able to pronounce an opinion as to what can be done to it, and at what cost. My statement with regard to the age of the temple is based partly on the form of the writing which is found all along the way up to the temple incised on the rocks, evidently pilgrims' records, partly on the style of its carvings, and of various ancient statues found among the *débris* around the temple. Among the latter I observed a statue of Siva, which still shows the phallic emblem of the god. As I have observed already previously, this is decidedly a sign of antiquity, for, in later periods, this mark was left out in statues of the god. Inside the temple now stand a large Chau-mukhi Mahadeo, and a statue of Durga, both of later date than the temple. Various other remains, partly of brick buildings, are seen all along the eastern slope of the hill, also some rock-carvings, apparently of ancient times.

38. *The remains of Tilothu and Tutrahi.*—Tilothu is a large village, half-way between Sasseram and Rohtasgarh, where the two roads from Sasseram and Dehri meet together. Its large Hindu temple is modern and of no interest. Among the numerous Muhammadan mosques and dargahs, which I saw at this place, the oldest is a mosque of the time of Aurangzeb, the date of which corresponds to 1677 A.D. The builders of the mosque are called Golha and Haitam. The mosque is of no special interest. The place is, however, already mentioned in older records, and from the inscription on a tomb at the foot of Rohtasgarh from the beginning of 1638 A.D., we learn that it was a part of the jagir of Ikhlas Khan, who was then the Qiladar or commandant of the Rohtas fort

Tutrahi is about 5 miles west of Tilothu. It is a place where the neighbouring range of hills forms a knee. Here a small streamlet of water runs down the precipitous cliff, and collects into a pool in front. It is for this reason that the place has become an object of worship. High upon the rocks, on a small natural terrace, a small statue of Mahishamardini has been put up. In an inscription close to it, which apparently refers to the consecration of this image, she is spoken of as Jagaddhatri. This inscription is evidently several centuries later than other records, which are found at the same place, around a crude, rock carved figure of a female deity, and the date of which, as calculated by me, corresponds to Saturday, the 19th April, 1158 A.D. The inscription is one of the Nayaka Pratapadhavala, a local chief of whom we possess other records from Rohtasgarh and the Tara Chandi rock near Sasseram. He appears to have made a pilgrimage to the Tutrahi falls

accompanied by his whole household, for, besides his own name, he mentions his brother's wife, Sulhi; Tribhuvanadhavala, Somali, Lakshmaditya, and Padmaditya, persons whose rank is not specified; his sons, Satrughna, Viradhana, and Sahasadhavala; five female slaves, called Luduma, Nayakama, Alhi, Puttriki, and Ekali; his treasurer, Devaraja; his door-keeper, Vimala, and his Court Pandit, Visvarupa, who remarks that he constantly meditates over and praises the goddess.

39. *The remains at Sasseram and Chainpur.*—The most ancient monument at Sasseram is the Asoka inscription which is found inside a small natural cave on the top of Chandan Pir's hill to the east of the modern town. The inscription probably contains a date referred to the death of Buddha; but the passage still remains a great puzzle, and no absolutely convincing interpretation has yet been found. Other versions of the same edict exist at Rupnath in Central India; at Bairat, near Jaipur, and at Siddapur in the Mysore State. The hill where the inscription is incised evidently was an old Buddhist site, which appears to have been appropriated later on by the Muhammadans. They now worship there at the dargah of Chandan Pir, a saint of whose life and history they know absolutely nothing, although they insist upon his being called Shahid, or martyr. A small building close to the dargah was erected by Faqir Muhammad Chaudhuri, a tobacco-seller. Its date corresponds to the 28th January 1804 A. D. A ruined mosque of the time of Jahangir, at the foot of the hill, bears a date which corresponds to 1613 A.D.

The magnificent mausoleum of Sher Shah inside the town, and the other smaller one of his father, Hasan Khan Sur, east of it, are among the most important ancient monuments in this province. When the tomb of Sher Shah was restored some time ago by order of Government, the small cupola, which originally was placed on the top of the big dome, was pulled down and replaced by a pinnacle similar to that on Hasan Khan's tomb. Why this was done, I am not able to understand. It can hardly be called a restoration, and such an example should never be followed in carrying out a work of this kind It has been proposed to close the doors and windows of both mausoleums by wire-netting, in order to prevent bats from entering, and I recommended this proposal to be sanctioned. When I was at Sasseram, the work had not yet been taken up. On a bright day in the cold weather, bats will hardly enter, as the interior receives too much light to afford a pleasant resort for those animals; but on rainy days they seem to like seeking shelter inside, as I could observe at my subsequent visit to the tomb, when it had been raining heavily for two or three days. The dome of the mausoleum of Sher Shah also seems to be leaking.

No repairs can be done to the unfinished tomb of Islam Shah or Salim Shah and to the tomb of Alawal Khan. The latter has some fine carving around its principal door. It is said to be a building of Sher Shah's time, but this seems doubtful. The Idgah near Sher Shah's tomb, was built by Mujahid Khan in the time of Shah Jahan. The dates of its four inscriptions cover the period from the middle of 1633 to the middle of 1636 A. D. It seems very unlikely that it has taken such a long time to complete a small building of this kind, and I do not understand the difference between the four dates. There is also at Sasseram an ancient private house called Nawab's Garh, which is now in a very ruinous state, and a Turkish Bath, which may be old as local tradition asserts. Other buildings there are modern, and call for no remarks.

At Chainpur, the principal monument is the mausoleum of Bakhtiyar Khan. As I shall later on submit a special report on this tomb, I need here only say that it is an exact counterpart of the mausoleum of Hasan Khan at Sasseram, but of larger dimensions, and with a small cupola, instead of a pinnacle, on the top of its great dome. It is just on the verge of falling into ruins, and, if repairs are not done to it now, it will soon become destroyed. I consider these repairs worth undertaking, as it is the finest specimen of its kind, together with the tombs of Sher Shah and Hasan Khan at Sasseram. Many similar tombs of smaller size are seen all around Chainpur, but I need not go into details with regard to them. The fort at Chainpur is evidently a building of the time of Sher Shah or Akbar, as seen by the style of its principal gate, the only portion of it that is still fairly intact. Inside the fort, there is a small Hindu shrine where a piece of stone is worshipped as Hamsu Brahma. I was told that it represents a holy man who, after death, had become a Brahma.

I have nowhere else met with this curious form of worship. The Juma mosque at Chainpur has an inscription the date of which corresponds to 1668-69 A.D. It is a building of no special interest, but looked upon with great veneration by the Muhammadans of the place, who are either too poor or unwilling to keep it in proper order.

40. *Rohtasgarh.*—The extensive remains of the hill fort at Rohtas are a very interesting specimen of this kind, and together with the similar ones at Shergarh, which will be dealt with in the next paragraph, they are decidedly unique in this province. No good photographs and drawings of the remains at both places exist, and it would be worth the while to prepare such with a view to publication. The principal remains are generally in a good state of repairs and regularly looked after. Some of the tombs, however, as also portions of the walls and fortifications will in course of time fall down entirely, and it partly seems impossible to prevent this, and partly the monuments are not of such a great value as to make it desirable to spend large sums of money upon them. There is, however, one private house of an officer of some standing close to the palace, which is still buried within jungle. It is the only building of this kind at Rohtas, and for this reason of some interest. It is a two-storied house with an open verandah, the roof of which was originally supported by pillars, but it has now fallen down. All that needs be done to it is to keep the place clear of jungle, to make the house easier accessible. The elephant gate of the place bears an inscription both in Sanskrit and Persian referring to the completion of the gate. The dates of both are identical, that of the Sanskrit portion corresponding to the 14th March 1597 A.D., and that of the Persian part to the 16th of the same month and year. When Blochmann translated the Persian inscription, he was misled by the word Alif, which follows the Persian text, and referred the date to the Alfi era, which would put it back to a later time. But the Sanskrit inscription clearly shows that the Persian date refers to the Hijri era. The inscription mentions the Purohit Sridhar; the darogha Bal Bhadr, a Brahman; and the architect Ustad Mabarak. We meet the same persons again in an inscription over the Kathautiya gate, the date of which corresponds to the 28th February 1607 A.D. Besides we find here mentioned Gopal Das Chauhan, who, with Sridhar, held the office of Shiqdar. This inscription also has a Sanskrit portion, but it is written in very small letters and put up very high, so that I was unable to read it, and I had no ladder with me at the time of my visit. The same unfortunately was the case with another inscription over the central arch of the Alamgiri mosque, which stands on the road from the palace to the Lal Darwaza. I think, however, I could read the date 950 Hijra era, and the name of Sher Shah. Also the words Sultan-as-Salatin seemed certain to me, and this shows that the king cannot have been a Moghul Emperor, as the title Sultan was never borne by them. The style of the mosque agrees very well with its supposed erection by Sher Shah. It is in a fair state of repairs, and worth being kept in order. There is only one other mosque close to the tombs, which was built by Habsh Khan, evidently a eunuch. Its inscriptions, which now lies inside the palace. bear a date corresponding to 1580 A.D. Tombs abound, but only one is inscribed, while on four others I noticed the vacant space for the reception of the inscribed tablet, which has been lost The date of the inscription corresponds to 1578 A.D., and it tells us that it is the tomb of Shafi Sultan, who died suddenly, when he was just expecting to be promoted to the rank of Khan. It has the finest specimen of stucco ornamentation on its back wall. Another large domed tomb closely resembles that of Hasan Khan at Sasseram. It is evidently the tomb of the darogha of Sher Shah mentioned by Buchanan. The tomb of Shafi Sultan, as others too, is remarkable for this reason that it is covered by a dome, supported on pillars. Similar structures are called Chattris in Rajputana, where they are frequently met with. Evidently they are an importation from this country, due perhaps to the fact that the garrison of the fort largely recruited from there. I have also observed similar tombs near Chainpur, but they are by no means frequent in Bihar, and never found in Bengal. Another importation from the North-West appears to be the octagonal open pillared hall, covered by a hemispherical dome, which stands in front of some of the Rohtas temples. tI is common in Rajputana and thereabout, but rare in Bihar. Of one of

the best temples of this class, which stands on the way to Ra jghat, the porch has broken down, and is now lying in front of the temple. It would probably be very costly to put it up again. The two small temples in the south-eastern corner of the plateau, one of which is called by Buchanan the Chauri of Rohtas, are fine specimens of their kind, especially the small pillared hall, covered by five domes.

At the foot of the plateau there is a large tomb which consists of an oblong compound wall, the west side of which has inside a raised stone terrace and three prayer niches. The gate is in the northern wall. Inside are seven stone sarcophagi, standing on a stone platform. A tomb of this kind is called a Chardiwarrah or 'four-walled enclosure.' Over the gate is a long Persian inscription, which tells us that the tomb was built for himself and his family by Malik Wisal, the Darogah of the Rohtas Fort, in the time of Shah Jahan, when Ikhlas Khan was the Qiladar or commandant of the fort, with the rank of a commander of 3,000. It also mentions a number of parganas, which formed the jagir of Ikhlas Khan, among which we find the well-known names of Tilothu, Akbarpur, and Bilaunja, which are all close to Rohtasgarh. The tomb was begun on the 6th September 1636 A.D., and completed between the 17th January and 15th February 1638 A.D.

41. *Shergarh.*—This hill fort, according to Buchanan, was built by Sher Shah, after he had already begun fortifying the Rohtas hill, as the place seemed more favourable to him. It is covered with jungle and never seems to have been looked after. The ground around the palace, which is an interesting building, at least should be cleared. This must needs be done before measurements can be taken in order to prepare plans and drawings, which, I think, is desirable to undertake. Not even a complete and accurate account of the buildings there exists. My notes, which I took down on the spot, will enable me to add considerably to the meagre account in the List of Ancient Monuments in Bengal, if I should be called upon to prepare a revised edition of the same. I do not, however, intend here to enter into a lengthy description of details, but I shall merely mention such points as seem to me remarkable.

The plateau of Shergarh is much lower than Rohtas hill. It may be four miles in circumference. It consists of two elevations, divided by a depression of the ground, where there is a large tank. The palace or Qilah stands upon the highest of southern elevation. All along the edge of the plateau runs a stone wall with several bastions and fortified ghats exactly as that at Rohtas. The entrance to the palace leads through three strongly fortified gates. The palace, which is the principal building at Shergarh, consists of two square open courtyards, surrounded by four open galleries, which are supported by pillars in front, with only a few closed rooms. Owing to the peculiar shape of the ground, the southern courtyard is much higher than the northern one, and of the latter again the northern gallery is lower than the other three. Thus, standing on the roof of one of the galleries around the southern courtyard, one could overlook the entire northern courtyard, while a person standing on the roof of the galleries around the northern courtyard, could observe nothing that was going on in the southern compound. The people now believe that this arrangement was made because the northern court was occupied by the ladies of the zanana. They could thus easily be watched by the men, while they were prohibited from looking into the male compartments. Some of the carvings on the pillars, supporting the galleries, are of a high order and much better than anything of the same kind at Rohtas.

Another remarkable feature are the many underground rooms inside the palace. I observed five, but others seem to exist, which are now inaccessible. Most of them were dark, and received no light from above. They may have been used as store-rooms; one was used as a water-reservior. One room was well lighted by means of skylight. It is in the northern courtyard, the supposed zanana, and may have been intended as a place of retreat for the ladies in time of a siege or during the heat of the day. Before entering the palace gates one meets two open pillared halls, which are said to have been used as Diwan khana, or offices. I found only one mosque there, which is close to one of the gates leading into the palace. No temples are there, and the absence of any tombs is very remarkable. I was at first inclined to look upon this as a sign that the fort had been occupied for a short period

only, but it seems possible that some of the heaps of stones which are scattered all around the plateau may be the remains of tombs. I found absolutely no inscriptions. Altogether the place is deserving of being better looked after than at present.

F.—DISTRICT BIRBHUM.

42. *The temples at Bakresvar.*—A special report on this place has already been submitted in my letter No. 13, dated the 18th February 1902. The place owes its sanctity to some hot, sulphuric springs, which here, as elsewhere in India, are looked upon as manifestations of some divine power. Around those springs, quite a small city of temples, enshrining lingas, has sprung into existence. The temples are generally very small; but one large temple stands in the centre, which has received some bad cracks, which will now be repaired at the cost of the Sebaits. All the temples seem to be comparatively modern, and the dates, Saka years 1677 and 1683, corresponding to A.D. 1755 and 1761, which I found in two Bengali inscriptions on tiles, may well represent the age of establishment. Altogether the place is of not more than local interest.

G.—DISTRICT HOOGHLY.

43. *The remains at Tribeni and Pandua.*—The remains at these places consist of the dargah of Zafar Khan Ghazi at Tribeni with an old mosque close to it, and of the Minar and large mosque, and the dargah of Shah Sufi Sultan at Pandua; the latter also has an old mosque standing close to it. I have submitted a special report on these remains in my letter No. 16, dated the 19th February 1902. My proposals as to the repairs of these buildings principally concern the Minar at Pandua. The fifth storey of this tower, together with the pinnacle, has fallen down, and I have suggested to restore it, as the monument, though not very tasteful in its outlines, certainly is unique in this province. An ancient lithograph, which still shows the building complete, will enable the Engineer in charge to do this with accuracy The Minar is evidently an imitation of the famous Qutub Minar in Delhi. Its accurate date, as well as that of the mosque close to which it stands, is not known, but it may well belong to the time of the Muhammadan conquest of the place, which occurred about 1300 A.D. Close to the dargah of Sufi Sultan, which is an insignificant, modernized building stand two mosques, one built in the time of Shamsuddin Yusuf Shah in 1477 A.D., and the other built by Fath Khan, an Afghan of the Sur clan, in 1727-28 A.D. I have suggested that petty repairs might be done to the old mosque near the dargah of Sufi Sultan and to the big mosque at Pandua, to prevent those parts of them that are still standing from complete destruction.

The mosque at Tribeni is evidently the oldest mosque in Lower Bengal, and I have suggested that it might be kept in proper order. The dargah of Zafar Khan Ghazi is remarkable on account of its showing many ancient Hindu carvings: here, as in Pandua also, the spoils of Hindu temples have largely been made use of as building materials. Inside even some Bengali inscriptions may be observed, such as the killing of Ravana by Rama, the marriage of Sita, Sita's exile and similar ones. Only petty repairs have been suggested by me with regard to this building.

H.—DISTRICT PURI.

44. *Remarks on the repairs done to the Black Pagoda at Konarak, the temples at Bhubaneshwar, and the caves at Khandagiri*—I am glad to report that the excavation around the Black Pagoda at Konarak, which was taken up at my suggestion, has greatly improved this important but long neglected monument. As at present sanctioned, it will be carried on up to a line running through the northern and southern doors of the Mandapa, thus the whole front part of the temple compound will be laid open, down to the original level of the ground. When I was there, the northern side of the basement and staircase had been disclosed. It shows three large wheels, and in front of them three horses. The corresponding southern portion will have similar wheels and horses. The temple was thus represented as the chariot of Sun-god, drawn by his seven chargers. Two oblong platforms also had been laid open in the

north-eastern corner of the courtyard, apparently used for bathing the images. The stones, which had become loosened, are carefully collected around the temple and it will later on be possible to put up some of them in their original places. When the work, which is now being done, has been finished, it will be necessary to decide whether the excavation should be carried on further to the southern half of the temple court.

At Bhubaneshwar, the following repairs were carried on at the time of my visit:—

(*a*) The temple of Meghesvara, which is called by R. L. Mitra the Bhaskaresvara temple, is being repaired. I suggested this on the ground that this temple is unique on account of its style;

(*b*) The four minor temples in the courtyard of the Brahmesvara temple are being repaired. The temples have to be dismantled and put up again by using partly their own materials, partly others from neighbouring shrines, which it is not intended to preserve;

(*c*) The Raja-Rani temple is being provided with a stone fencing;

(*d*) The minor temples near the Muktesvara temple are under repairs, and the tank close to it has been emptied and is being provided with a new stone facing. After the completion of these repairs, the place will look very neat and tidy;

(*e*) The repairs to the roof over the porch of the Parasuramesvara temple are not yet finished, but they will soon come to an end;

(*f*) The repairs to the Sahasralinga tank had just begun, and the tank was emptied;

(*g*) Some repairs were done to the minor temples within the courtyard of the Lingaraj.

If it should be intended to do some further repairs to other temples at Bhubaneshwar, I would suggest that something might be done to the Bhaskaresvara and Yamesvara temples, also to a small temple close to the Vetal-Deul, which is an exact copy of the Parasuramesvara, and to the Ananta Vasudeva temple. These are the finest specimens among those temples, which have not yet received any repairs. Some temples like the Brahmesvara and Muktesvara, have very fine carvings inside, which are now covered with soot. It would be well to clean them.

The repairs done at Khandagiri are as follows:—

(*a*) The carvings in the Rani Gumpha, Ganesa Gumpha, Ananta Gumpha, and Nava Muni Gumpha have been cleaned, as suggested by me, and this has greatly improved them;

(*b*) The two elephants, flanking the stairs of the Ganesa Gumpha, are put up in their original position;

(*c*) The Hathi Gumpha inscription is being provided with a shade, which, I trust, will help to preserve that, what remains of this important record, which, unfortunately has suffered badly from the effects of sun and rain;

(*d*) The Tantua Gumpha has been repaired, and the cave below it will also be put in proper order. They are on the northern slope of the Khandagiri peak, where a good deal of the jungle has been cleared;

(*e*) A modern temple, close to the Nava Muni Gumpha, has been pulled down, as it had become unsafe. The building was of no interest, and its destruction is absolutely no loss.

I.—DISTRICT KHULNA.

45. *The remains near Bagerhat.*—The remains here consist principally of the dargah of Khanja Ali and the Sat Gumbaz mosque. Khanja Ali is the local form of the name, but in the inscriptions around his tomb, he is merely called Khan Jahan. He is said to have been the cultivator of the Sundarbans. According to the inscriptions on his tomb, he died on the night of the 26th Zil Hijjah 863, that is, the night of the 23rd to 24th October 1459 A.D., and he was buried on the 25th. The tomb is a stone sarcophagus, resting on a double stone terrace. This again stands upon a brick-terrace, which was laid out with glazed tiles, showing various patterns, all in blue and white. They have now become loose, and have been collected around the

stone-terrace. The latter is covered with inscriptions, but they are all merely pious sentences in Arabic and Persian. The only historical inscriptions are those which give us the name Khan Jahan and the date of his death and burial. The sarcophagus stands inside the usual mausoleum, which is covered by a big dome. To the west of this stands another stone sarcophagus, which, as the inscription on it tells us, is the tomb of Muhammad Tahir. The date of his death could not be made out, as the inscription is too much defaced. Further to the west stands a large one-domed mosque, and another mosque, with nine domes, stands on the western borders of the tank, close to dargah. This tank swarms with alligators, who are regularly fed by the Khadims of the place. I myself watched the men standing on the steps of a ghat and calling out for an alligator to come, when, after some three minutes, he slowly approached the steps of the ghat, where he lay down lazily, and, after some hesitation, swallowed a small fowl, which was held in preparation for our visitor. Wherever, in Bengal, a holy Pir resided, he is said to have been on friendly terms with the alligators and crocodiles, living in the tank close to his place.

The dargah is in fair order, not so the mosques, but it is not worth the while spending much money upon them.

There are many other ruined mosques on the way to Sat Gumbaz, which is about one mile distant from the dargah. It is a large oblong building, covered by 77 domes, with one tower in each corner. The central transept has seven vaults instead of the usual domes. The eastern wall has eleven arched entrances, and the northern and southern ones have each seven. The western wall has ten prayer niches, a small door being let through the place to the right of the central niche, instead of adding an eleventh niche there. It is evidently a mosque, although local tradition asserts that it was used by Khanja Ali as his durbar hall. This is very incredible. No inscriptions tell us its date, but little doubt remains that it is a building of Khanja Ali, to whom this whole land belonged. Out of the 77 domes, 21 are more or less damaged, and there are also cracks in the walls. It would be well if some minor repairs could be done to it, for, although defective in taste, it is a peculiar structure, which should not be allowed to fall into utter ruins.

K.—DISTRICT DACCA.

46. *General remarks.*—Before visiting the district of Dacca I expected to find there some good specimens of the Bengali-Muhammadan style of architecture, but I was very much disappointed in this regard. In fact, having seen almost all the existing remains of this style, I have come to the conclusion that nothing can compare with the buildings at Gaur and Pandua, in the district of Malda. They are by far the best, and all other monuments of the same class are nothing but inferior copies. The remains at Dacca will be dealt with in the order as follows:—

Remains at and near Dacca.
Remains near Naraingan j.
Ancient Sonargaon.
Remains in the Munshiganj subdivision.

47. *Remains at and near Dacca.*—No Hindu remains of any importance exist at Dacca. The far-famed temple of Dhakesvari is a modern structure of no interest. Other temples, mentioned in the List of Ancient Monuments in Bengal, are still inferior to it.

The principal Muhammadan remains are the Lalbagh Fort, of which still a good deal is standing, but in a ruinous condition, and it seems impossible to do anything to it. Within the enclosure of this fort stands the mausoleum of Bibi Peri, the daughter of Shaista Khan, which, though defective in its outlines, is not without some taste inside. It is laid out with white and black marble, and kept in fairly good order. I found here an inscription in Persian verses of Ruknuddin Barbak Shah of Bengal, which is the first known inscription of a Bengal Sultan, composed entirely in Persian poetry. Nobody seemed to know where it came from. The great and small Katra are in a ruinous state and of little interest. The Husaini Dalan is an absolutely modern building, now used during the Muharram festival. A small inscription in its walls tells us that the original

building was erected in 1643-44 A.D. by Sayyid Murad, when Azim-ush-Shan was Governor of Dacca. Close to it are the tombs of four of the modern Nawabs of Dacca. Three older tombstones are now placed into the walls of the Husaini Dalan; they belonged to the tombs of Mir Fayyaz, who died in 1719 A.D., Aga Muhammad, who died in 1730 A.D., and Ashur Beg, who died in 1818 A.D. The tombs in the Shahbag at Ramna are of no interest at all. Close to it are some old ruined mosques. The Sat Gomal mosque near Mirpur, which is locally called merely the Sat Masjid, is remarkable for this only, that it has in each corner a two-storied domed pavilion with open windows. The mosque is still in use, and kept in good order. Many other ruined mosques are close to it. The dargah of Shah Ali Sahib is some two miles distant from the Sat Masjid. An inscription in Persian verses tells us the history of the place. The original building was erected in 1480-81 A.D., but in 1577-78 A.D., it had already fallen into decay. Shortly afterwards, Shah Ali came from Baghdad to India, and finally settled at this place, where he shut himself up from all intercourse with the outer world. After his death, a mausoleum was built over his tomb, and this was again repaired in 1806 A.D., at the instance of Nawab Nasir Mulk. From an older inscription at the same place, we learn that the original building was a mosque, erected 1480-81 A.D., in the time of Yusuf Shah. The dargah is in very fair order, and the late Nawab of Dacca has built a rest house for pilgrims close to it, and provided it with a road to make the place easier accessible.

48. *Remains near Naraingan*j.—The fort at Hajiganj consists of a low enclosure wall of irregular shape, with several bastions, and a gateway to the north. No traces of ancient buildings are found inside At a little distance from it, I found an old mosque of the Bengali style, which is still in use. Opposite Naraingani, at Nabiganj, is the Qadam Rasul. All the buildings at this place are modern, but they stand on the foundations of older ones. From inscriptions we learn that the mosque at this place was built in 1786 A.D., while the lofty gateway, which now leads into the enclosure, was erected 19 years later. The foot-print is kept inside a small house. It is a piece of black stone, showing the rude impression of a human foot, of natural size. In fact, all the foot-prints of this kind, which I have seen, are of natural size, in opposition to those worshipped by Hindus and Buddhists, which grow larger and larger, the later they are. An inscription from the tomb of one Amanat Khan, which is now put up near the gateway, is older than the present buildings. It tells us that Amanat Khan was buried near the holy shrine, containing the Prophet's footprints, in 1742 A.D.

49. *Ancient Sonargaon.*—This once important town, famous for its fine muslins, and for some time the capital of Eastern Bengal, has fallen into utter ruins, and very little has remained of it. The places described by Dr. J. Wise in his well-known account of Sonargaon, are scarcely worth being mentioned, and I shall not enter into any details with regard to them. The only important remain is the tomb of the Bengal Sultan Ghiyasuddin Azam Shah, near the modern village of Mograpara. It is true that only tradition points to it as the burial place of this Sultan, but I see no reason to doubt this. Another tradition tells us that he died from cholera at Atia, in the Tangail subdivision of the district of Mymensingh, on his way back to Sonargaon, and that he was buried on the spot; but this tradition deserves no credit whatever. So also does a third one which says that he lies interred in the Eklakhi mausoleum at Pandua, in the district of Malda. The tomb at Sonargaon consists of a plain basalt sarcophagus, standing on a terraced platform, of the same material. The stones now have sunk, and have become dislocated, but they can easily be put in proper order again. I shall later on submit a special report on the repairs which I consider it desirable to do to it. Close to it is seen another brick tomb, of no interest however.

50. *Remains in the Munshiganj Subdivision.*—The fort at Munshiganj is a building of the same kind, as that as Hajiganj (see paragraph 48). The tomb of Baba Adam at Rampal is a plain brick sarcophagus, standing inside a small enclosure, surrounded by brick walls. Close to it is an old mosque built in the time of Fath Shah. The date of its inscription corresponds to August 1483 A D. The mosque is in a ruinous state, but I cannot recommend spending much money on its repairs. Of the old place of Bikrampur, called the

Ballalbari, or Rajbari, only traces of the walls and ditches may be seen; there are no structural remains of any importance inside this enclosure. The Ballali bridge near Mirkadim has received some repairs from time to time and seems to be in fair order. At Rikabi Bazar, there is an old mosque of the Bengal style, of no special importance.

The Rajabari Math, 11 miles south of Munshiganj, is the most interesting ancient monument in this subdivision. It was erected by Chand Roy and Kedar Roy over the funeral pyre of their mother, and had been repaired in 1896 at the cost of Raja Srinath Roy, of Bhagyakul. It is a high tower, like a Hindu temple, built of bricks with ornamental designs in its outer surface. Among those the absence of any human or animal figures is remarkable in a Hindu monument of this kind. The statement that it was erected over the funeral pyre of the mother of Chand Roy and Kedar Roy, is based upon the modern inscription, which was put up over its door, when it was repaired in 1896. Another tradition says that it was a temple, enshrining a Mahadeo. Chand Roy and Kedar Roy were contemporaries of Akbar, and belonged to the Barah Bhuiyas, those independent chiefs who ruled over Eastern Bengal before it became annexed to the Moghul Empire.

L.—DISTRICT MYMENSINGH.

51. *The Atia ruins.*—As I have already in my letter No. 37, dated the 29th April 1902, submitted a detailed account of the ruins at Atia in the Tangail subdivision of the district of Mymensingh, I need here only repeat the principal facts. The big mosque at Atia was built by Said Khan, the son of Bayazid Khan, an Afghan of the Pani clan, in the time of Jahangir. The date of its inscription corresponds to 1609-10 A.D. When it had fallen into ruins, some person began to build another smaller mosque close to it. But as soon as Raushan Khatun Chaudhurani came to hear of this, she decided upon restoring the old mosque, and the second smaller mosque accordingly never was finished and has never been used. The inscription on the tomb of Shahinshah Baba Adam Kashmiri tells us that he died on the 14th October, 1507 A.D. He is called merely Baba Kashmir in this record, which, however, must be a mistake for Baba Kashmiri, as it is an impossible form. Close to it stands an old mosque of the Bengali style, which, according to the local tradition, was built by Ghiyasuddin Azam Shah. A ruined brick tomb in front of this mosque is pointed out as the burial place of this Sultan, a tradition, which, as I have already remarked in paragraph (49) of this report, deserves no credit whatever.

The buildings at Atia are from time time repaired at the cost of the Dilduar and Karotiya zamindars, the owners of the land, but they might be called upon to do some further repairs to the big mosque, portions of which are at present in a bad state.

PART III.—NOTES ON ANCIENT REMAINS INSPCTED BY BABU P. C. MUKERJEE.

52. *General remarks.*—Up to November 1901 the Babu travelled in the Patna Division. He then went to Bhagalpur, and hereafter visited various places in the Burdwan Division and in the district of Balasore. On the 13th March 1902 he joined the office of the Director-General of Archæology in India. As his tours brought him to many places which have later on been visited by myself and which have been described in Part II of this report, I shall here merely give some notes on such places as I have not yet seen myself. They are extracted from a final report which the Babu submitted to me on the work done by him during the last year. The discovery by him of a new inscription at Gaya has already been referred to previously.

53. *Bawangarh, Tilkesvar, and Kalhua Hill.*—Bawangarh is a place in the north of the district of Champaran. Extensive lines of earthen walls are seen here running paralled to each other and covering the sites of several villages. The citadel itself at Rajpur Soreri is of a rectangular form. Remains of houses and wells, both of brick and stone construction, are found here. At Tilkesvar, in the district of Darbhanga, the Babu found three Sanskrit inscriptions, the characters of which resemble the modern Bengali script. The remains on the Kalhua hill, in the district of Hazaribagh, are almost exclusively

Jain sculptures; but there exists a temple with an image of Mahismardini, which is now worshipped under the name of Kulesvari. The Babu found no Buddhist remains there.

54. *District Bhagalpur.*—At Barari the entrance of one cave is blocked by the gate falling, while that of the other is almost choked up for the same reason. At Kahalgaon and Patharghata the rock sculptures, temples, and caves should be cleared of rank growth, trees, and rubbish and regularly be looked after. At Sultanganj the materials of the monastery were excavated and removed, while the coating of the stupa is peeling of. The rock sculptures on the Jahngira island require to be looked after.

55. *Barakar, Katrasgarh, Bankura, Vishnupur, and Garbheta.*—These places are all in the Burdwan Division. The four stone temples at Barakar are not in a bad condition, but the trees should be uprooted. One of them has an inscription in an ancient form of Bengali. At Khatrasgarh is a mediæval temple, but it is reported to be of no interest. The stone temple of Ektesvar, near Bankura, is in a dilapidated condition. The temples at Vishnupur are said to range from 900 to about 1750 A.D. Nearly all the temples possess inscriptions with dates and the names of their builders. The brick temples exhibit elaborate ornamentations and reliefs, chiefly scenes from the life of Krishna. The only temple of note at Garbheta is that known as Sarva-Mangala. It is built of laterite in the Orissan style, and is in good condition.

56. *District Balasore.*—The principal remains at Balasore are the old Dutch and English tombs, which are in good order. The Qadam Rasul and Juma Mosque, built by Taki Khan during the reign of Aurangzeb, are maintained by the local Muhammadans. There are some ancient Buddhist statues lying in the Municipal compound. Hindu temples, generally built of laterite, in the Orissan style, are reported from several places. The most interesting part of the temple at Karnagarh is the three-storied western gate called Jogi Gopha. The temple at Danton is known by the name of Shyamalesvara. The Sahasralinga temple at Shastini is reported to be in a very dilapidated state, while the temples at Kupari are said to be beyond the possibility of conservation. Ruined forts with laterite walls are reported from the following places:—

Gope, Rai-Baniagarh (ascribed to an ancestor of the Raja of Mourbhanj), Chandrasekhargarh, and Dolgram.

57. *Satgaon and Bansbaria.*—These places lie in the district of Hooghly.

The three domes of the mosque at Satgaon have fallen in, and the whole is covered with jungle. The Hansesvari Temple at Bansbaria is of the mixed Benares style, and covered with thirteen cupolas. There is a second temple with brick ornamentation, of the style of the Vishnupur temples.

T. BLOCH,

Archæological Surveyor, Bengal Circle.

REPORT ON THE ADMINISTRATION OF THE SALT DEPARTMENT DURING THE YEAR 1901-1902.

The 6th September 1902.—The following extracts from the Report of the Board of Revenue on the administration of the Salt Department in the Lower Provinces during the year 1901-1902, are published for general information.

E. W. COLLIN,
Offg. Secy. to the Govt. of Bengal.

No. 951B., dated Calcutta, the 8th August 1902.

From—H. WHEELER, ESQ., Secretary to the Board of Revenue, L. P.,
To—The Secretary to the Government of Bengal, Financial Dept.

I AM directed by the Board of Revenue to submit the following Report on the administration of the Salt Department during the year 1901-1902.

THE HON'BLE MR. BOURDILLON, C.S.I.

* * * * *

CHAPTER I.—PRELIMINARY.

Salt Law.

3. The Indian Salt Act, XII of 1882, continued to be the salt law in force in Orissa. Outside that area in the districts of the 24-Parganas, Khulna, Midnapore, Howrah, Backergunge, Noakhali, and Chittagong that Act, and Act VII (B.C.) of 1864, remained concurrently in force.

Administration.

4. In January 1902, the district of Howrah, which, with Noakhali, had been brought within the scope of preventive operations in March 1901, was added to the charge of the Assistant Commissioner of Salt. No active measures have as yet been taken in Noakhali, but inquiries will shortly be made with a view to operations being started.

In accordance with the Government of India's order No. 3525S.R., dated the 14th July 1900, the saltpetre refineries in Calcutta and its environs were brought under the control of the Commissioner of Excise and Salt, Bengal, with effect from the 1st July 1901, the Assistant Commissioner (Mr. S. G. L. Platts) taking charge of them from the Assistant Commissioner of the Lower Division, Northern India Salt Department, on that date.

In Khulna, preventive operations, which in the previous year had been confined to the Kaliganj thana, were extended to thanas Asasuni, Paikgacha and Baitaghata. In Chittagong, three Sub-Inspectors' ranges covering the salt areas of the district, with head-quarters at Sitakund, Cox's Bazar, and Teknaf, were formed with effect from October 1901, and the salt staff was reinforced by the addition of three Sub-Inspectors, four petty officers, and 26 peons from Orissa.

* * * * *

CHAPTER II.—STOCK, IMPORTS, MANUFACTURES, AND CLEARANCES.

Accounts of stocks and issues.

7. The stocks, imports, clearances, &c., for the years 1899-1900 to 1901-1902 are shown below:—

STOCKS, IMPORTS, &c.	1899-1900.	1900-1901.	1901-1902.
	MDS.	MDS.	MDS.
Total of all stocks at the commencement of the year.	32,62,652	31,54,855	13,09,668
Total quanity imported or manufactured during the year.	1,07,81,024	89,33,305	1,33,89,363(a)
Total ...	1,40,43,676	1,20,88,160	1,46,99,031
Quantity on which duty was paid during the year.	1,07,72,858	1,06,20,120	1,09,58,475(b)
Quantity which passed free of duty for manufacture of glazed stoneware.	1,760	4,168	1,439(c)
Quantity written off during the year for wastage or otherwise.	1,14,203	1,54,204	1,20,153
Total ...	1,08,88,821	1,07,78,492	1,10,80,067
Balance at the close of the year ...	31,54,855	13,09,668	36,18,964

(a) Includes 374 maunds found in exercise in *golas* and 108 maunds surplus from bond,
(b) Includes 6,40,325 maunds of Bombay and Madras salt passed free of duty.
(c) Includes 429 maunds used for [illegible]

At the commencement of the year stocks had fallen abnormally low; the quantity of salt in all the *golas*, both public and private, amounted to a little over 13 lakhs of maunds only, or nearly 18½ lakhs of maunds less than in the preceding year. The importations during the year were, however, unusually large, and totalled nearly one crore and 34 lakhs of maunds. Since the year 1898-99 there has been no local manufacture of salt. The sales amounted to over one crore and 9½ lakhs of maunds, and after allowing for wastage, the closing balance stood at 36,18,964 maunds. In addition, at the close of the year, there were 2,06,049 maunds of salt lying afloat in ships in the port of Calcutta ready to be sold direct to purchasers, against 1,63,267 maunds at the close of 1900-1901. At Chittagong 57,169 maunds of salt were lying afloat for discharge into bond at the close of the year.

The Collector of Customs, Calcutta, reports that the importations for the year and the quantity bonded were the highest on record. The increase in the importations was due to freight being cheap and plentiful in comparison with the previous year. Steamers have almost entirely superseded sailing ships in the general trade of Calcutta and in the salt trade in particular, and as it is always necessary for a steamer to obtain a quick despatch, a very large proportion of the salt imported was delivered into bond. In consequence, the accommodation at both the Sulkea and Kidderpore *golas* was rapidly filled up, and much difficulty was experienced in providing the bonding space required by the trade. The Board are satisfied that increased space for storage is needed at Sulkea, and proposals to that effect have been submitted.

Imports.

8. * * * * * * The importations into Calcutta advanced during the year by 49·5 per cent. The major portion still comes from the United Kingdom, though its former more extensive monopoly is being encroached upon by other competitors. The imports from Aden and the Red Sea are increasing rapidly, and as these salts do not have to pay the Canal dues, they compete on favourable terms with salt imported from Europe. Salt was imported for the first time from Port Said, of similar quality to the *karkatch* salts from Aden and the Red Sea, but as the steamers importing it have to pay the Canal dues, the Collector of Customs doubts whether it will be able to compete with the other *karkatch* salts.

Taken in conjunction with the large increase during the year in the operations at the Sulkea and Kidderpore golas, which is noticed below, it is obvious that the larger importations involved a considerable addition to the work of the Preventive Salt establishments in Calcutta. The Collector of Customs reports that salt was discharged from shipboard into bond on no less than 269 nights during the year, and this alone entailed much extra labour. As much as 700,000 tons of salt were weighed under official supervision—475,000 tons on boardship, and 225,000 tons at the golas. The low rate of wastage and the results of check re-weighments testified generally to the accuracy of the work done.

The importations into Chittagong show an advance of 70 per cent. compared with those in the preceding year. No reason has been assigned for this increase, but it is believed that, as in Calcutta, it was largely due to freight being easily and cheaply procurable.

Sales of imported salt from ship board and bond.

9. * * * * * * * The total quantity of imported salt sold increased by 1·4 per cent. Of this 32 per cent. was sold from shipboard and 68 per cent. from bond. The corresponding proportions in the preceding year were 27 and 73 per cent. In Calcutta although sales from the importing vessel direct increased by 18 9 per cent., there was a decrease of 10 per cent. in the sales from bond. The increase in the total sales at Narayanganj and Jhalakati is noticeable, amounting to as much as 18 and 71 per cent., respectively.

Transactions in the Sulkea and Kidderpore Dock *golas*.

10. The following figures show the total turn-over at the Sulkea and Kidderpore Dock *golas* for the past five years:—

	Mds.
1897-98	1,03,91,078
1898-99	1,08,34,957
1899-1900	1,13,87,469
1900-1901	1 21,04,343
1901-1902	1,49,52,131

The figures for the past year were the highest ever recorded. The total turn-over at the Sulkea *golas* was 99,70,762 maunds against 81,09,104 maunds in the preceding year. At the Dock *golas* it was 49,81,369 maunds against 39,95,239 maunds. The increase in the work which these figures connote has already been referred to

Inland bonded warehouses.

11. Licenses were issued for three additional private warehouses during the year. * * * * * Twenty-one warehouses in all were open at the close of the year.

* * * * * *

The quantity of salt despatched to these inland bonded warehouses from shipboard and from bond in Calcutta amounted to 13,53,091 maunds, as compared with 10,43,871 maunds in 1900-1901, an increase of over 29 per cent. The preceding year had shown an increase of 25 per cent. as compared with 1899-1900, and it would seem that this branch of the salt trade is steadily and rapidly growing in popularity. The quantity of non-duty-paid salt removed during the year from shipboard at Chittagong for clearance at Narayanganj shows an increase of 3,505 maunds, or over 25 per cent., as compared with the preceding year, but this was far from compensating for the very large falling off during 1900-1901.

* * * * * *

Inland transport of salt.

13. The following statement shows the proportion of duty-paid salt conveyed by the various means of transport from Calcutta inland, as well as to Orissa, during the past two years:—

Period.	By boats.	By steamers and flats.	By rail.	Total despatch.
	Mds.	Mds.	Mds.	Mds.
1900-1901 ...	26,17,561	12,08,554	55,23,274	93,49,389
1901-1902 ..	24,87,009	10,66,190	64,41,580	99,94,779
	−1,30,552	−1,42,364	+9,18,306	+6,45,390

The quantity carried by boat decreased by 4·9 per cent., and that sent by steamers by 11·7 per cent. The quantity conveyed by rail, however, increased by 16·62 per cent. Of the aggregate quantity despatched from Calcutta, 24·8 per cent. was conveyed by boats, 10·6 per cent. by steamers and flats, and 64·4 per cent. by rail, as against 27·9, 12·9, and 59·07, respectively, during the preceding year. It would appear that the railways are steadily attracting the traffic to the deteriment of other means of transport. The opening of a pass station at Shalimar in February 1902, since when it is possible to convey salt to Orissa by the Bengal-Nagpur Railway, will increase this tendency.

Stocks and issues of locally-made salt.

14. There was no manufacture of salt during the year on the Chilka Lake in Orissa. The total quantity of salt in hand at the Tua and Gurubai factories at the beginning of the year was 3,16,944 maunds, inclusive of a wastage of 3,530 maunds remaining to be written off at the close of the previous year. To this have to be added 54 maunds of salt found in excess in a heap at the Gurubai factory, making the total stock 3,16,998 maunds. Of this quantity, 2,25,116 maunds were sold (1,31,654 maunds for consumption in Puri, 91,968 maunds in Cuttack, and 1,494 maunds outside the Province), against 84,687 maunds in the previous year; 21,320 maunds were written off as wastage, leaving a balance of 70,562 maunds at the close of the year. Deducting from this balance a further wastage of 13,017 maunds, which remained to be written off, the actual balance stood at 57,545 maunds. This was finally disposed of by the 23rd May 1902. The largely increased sales were due to the reduction of the wholesale price to half-an-anna a maund, which was done with the object of effecting an early clearance of the stocks in hand. It will be seen that this result was achieved within a far shorter period that was anticipated in the report of the preceding year.

Imports of Madras salt into Orissa.

15. The imports of Madras *karkatch* and refined salt into Orissa from the different factories, as shown on the margin, amounted to 6,90,989 maunds, against 6,92,918 maunds in the preceding year, showing a decrease of 1,929 maunds, or ·2 per cent. The factories at Surla and Karasa showed an aggregate increase of 1,60,270 maunds, while those at Ganjam, Naupada, Jagannaikpur, Coconada, and other places exhibited a total decline of 1,62,199 maunds, resulting in a net decrease of 1,929 maunds.

Name of factory from which the salt was imported.	Quantity imported in—		Increase.	Decrease.
	1900-1901.	1901-1902.		
	I. Mds.	I. Mds.	I. Mds.	I. Mds.
Ganjam	3,10,960	2,04,777		1,06,183
Naupada	1,69,496	1,57,466		12,030
Surla	18,128	1,52,140	1,34,012	
Karasa	9,384	30,642	21,258	
Jagannaikpur	21,572	6,478	......	15,094
Other factories in Coconada and other places.	1,08,378	1,39,486	.....	28,892
Total ...	6,92,918	6,90,989	1,60,270	1,62,199

Net decrease ... 1,929 mds.

The result is, perhaps, due to circumstances of temporary application only. The imports into the districts of Cuttack and Balasore showed an aggregated advance of 1,03,815 maunds, and it was the decrease of 1,05,744 maunds imported into Puri and the Tributary Mahals, which more than counterbalanced what would otherwise have been a large increase. In Cuttack it is said that foreign-imported salt has been driven from the market, and the results in Puri are mainly due to the abnormally low price at which the old stocks of Lake salt were offered to the public. The decrease in the Tributary Mahals is not easily accounted for. The Commissioner of Salt suggests that a portion of the increased supplies to the district of Cuttack found their way into the Tributary Mahals, there had also been a large increase in the importations into the latter area during the preceding year, and it is possible that there were old stocks in hand.

CHAPTER III.—CONSUMPTION AND PRICES.

Consumption in Bengal.

16. The total quantity of salt which passed into consumption in the entire Province of Bengal during the year under review was 1,04,31,438 maunds. This is exclusive of 5,45,011 maunds, being the net exports by land, and inclusive of 17,974 maunds educed from saltpetre. The figures show an increase of 2,03,937 maunds, or 1·9 per cent. Of the total quantity the saliferous tracts (including the whole of Orissa) took 19,54,457 maunds, or about 19 per cent., and the rest of the Province 84,76,981 maunds, or 81 per cent. The consumption per head in the saliferous tracts works out to a little over 6 seers, or 12·34lbs approximately, and in the rest of the Province to 5 seers and 3 chittaks, or 10·67lbs. The figures are, at best, approximate only; in the first place, they assume that the unconsumed stocks of the previous year, which were consumed during that under report, were equal to the balance in hand at the end of the year under review. Again it is assumed that the salt is consumed in the district to which it is registered as despatched. In the saliferous districts in which illicit manufacture is easy, it would certainly have appeared probable that the recorded consumption of licit salt per head of the population would have been less than elsewhere. The figures, however, convey the opposite impression, but it is to be borne in mind that the arrangements for the record of consumption within the salt law limits are more complete than in the districts outside them.

The rates of consumption per head of population in the Bombay and Madras Presidencies for 1901-1902 have not yet been ascertained, but during the preceding year they were 11·88lbs. and 15·84lbs., respectively.

Consumption of salt within the Salt-law limits.

17. * * * * * During the year 1900-1901 the reported consumption of salt within salt law limits rose from 8,42,529 to 8,51,271 maunds, and in the year under report it has still further increased by 15,902 maunds. There was an advance in consumption in all the saliferous districts, with the exception of Howrah and Noakhali, but it was largest in the districts of the 24 Parganas and Chittagong. Judging by the population test, however, the districts of Howrah and Backerganj show the best results and the district of Noakh ali the worst.

* * * * * *

Prices of salt in Bengal generally.

21. * * * * * In most of the districts, as in the previous year, prices advanced during the year under report. The rise in price recorded at in Darjeeling is very marked, and special enquiry will be made as to the reason. Prices ruled lowest at Puri. The average wholesale price for the whole Province was Rs. 3-12-9 per maund, as compared with Rs. 3-11-7 in 1900-1901, showing a rise of one anna and two pies. Except in Pabna and Cuttack, the average price of salt per maund, in the principal provincial bazars, was generally higher than in the preceding year. The average for the twelve marts for which figures are quoted, was Rs. 3-11-9 per maund against Rs. 3-10-4 in 1900-1901, showing an increase of one anna and five pies per maund.

The average wholesale price of Liverpool salt per hundred maunds as sold from the ship's side in the port of Calcutta, exclusive of duty, amounted to Rs. 69-11-5, as compared with Rs. 70-3-1 in 1900-1901, showing a decrease of only seven annas and eight pies. Considering the rise last year from Rs. 62-4-11, the fall is insignificant, and in view of the large importations it might have been expected that prices would have declined still further. It is also noticeable that the extension of the inland bonded warehouse system does not so far appear to have had much effect in cheapening salt in the interior of the province. The selling price of Liverpool salt per hundred maunds, exclusive of duty, which in 1900-1901 varied from Rs. 77-12-4 to Rs. 60-1-10 ranged in the year under report from Rs. 70-5-8 to Rs. 57-4-6.

CHAPTER IV.—PREVENTIVE MEASURE.

Preventive operations in the saliferous districts outside Orissa.

22. Preventive operations outside Orissa were carried on as before, in the districts of the 24-Parganas, Midnapore, Khulna, Backergunge, and Chittagong. In Midnapore, as already stated, the retention of the temporary staff has been extended for an additional period of three years. The district of Howrah was brought tentatively within the scope of operations, and a small party from the Tamluk circle, in the district of Midnapore, was sent in January 1902, to work in the Syampur and Ulubaria thanas of the Howrah district. The experience of the past two seasons having shown that illicit manufacture does not prevail to any appreciable extent in the district of Backergunge, preventive operations there have been discontinued since the close of the year. The preventive staff has been disbanded, with the exception of the Inspector whom it is proposed to depute to Noakhali to ascertain and report on the steps to be taken and the establishment required, in order to commence preventive operations in that district during the next working season.

Attachments, releases, and confiscations in the saliferous districts, including Orissa.

23. The number of cases in which salt was attached, released, and confiscated during the year under review were 929, 12, and 908, respectively, as against 1,074, 2, and 968 in the previous year, the corresponding quantities of salt being 684, 546 and 150 maunds against 640 45, and 548 maunds in the year 1900-1901. There was thus an increase of 44 maunds, or 6·8 per cent., in the quantity attached, and a decrease of 398 maunds, or 72·6 per cent., in the quantity confiscated. On an average about 29½ seers of salt were attached and 6½ seers confiscated in each case, as against 24 seers, and 22⅔ seers, respectively, in 1900-1901.

Number of seizures and unsuccessful searches.

24. The number of seizures and unsuccessful house-searches during the year under review were 1,491 and 42, respectively, as against 794 and 17 in the previous year. There were no unsuccessful house-searches in the districts of Puri and Khulna, while in the districts of the 24-Parganas, Midnapore, and Chittagong the number of failures was insignificant in comparison with the number of seizures effected. In the districts of Balasore and Cuttack the numbers were 20 and 14, respectively; the owners of the houses are said to have learned of the intended search and to have destroyed all illicit articles. The general percentage of unsuccessful house-searches to seizures exhibits a slight increase, having risen from 2·14 in the previous year to 2·81 in the year under report. In the year 1899-1900, however, it was as much as 4·1.

Number of cases instituted under Acts VII (B.C.) of 1864 and XII of 1882.

25. * * * * * There were 1,238 prosecutions during the year under review, against 898 in the previous year: out of 1,405 persons arrested and brought to trial, 1,174 were convicted, showing a percentage of 83.

24-Parganas	...	351
Chittagong ...	...	179
Balasore ...	...	141
Puri ...	...	106

Cases of illicit manufacture of salt (section 9, Act XII of 1882) numbered 953, and were most numerous in the districts marginally noted. The proportion of persons convicted of this offence was 80 per cent. of those brought to trial. In the districts of Chittagong and the 24-Parganas the increase is attributed to greater activity on the part of the salt officers, to the provision of a steam launch in the 24-Parganas, and to the strengthening of the salt force in Chittagong, which was for the first time employed throughout the year. There were no cases of possession of spontaneous or swamp salt during the year. Owing to the failure of the police to attend house searches, about 50 cases in the 24-Parganas and 42 cases in Midnapore are reported to have broken down. To prevent a repetition of these fiascos, the sanction of Government has been obtained to the appointment of nine special police head constables in Midnapore. Similar arrangements in the 24-Parganas are under the consideration of the Salt Commissioner. Salt officers were instrumental in the detection of 39 opium cases also, as compared with 37 in the preceding year. No cases under the Excise Act were reported by them.

* * * * * * *

CHAPTER V.—FINANCIAL RESULTS.

Receipts and charges.

28. * * * * * The financial results of the year, as compared with 1900-1901, show an increase of Rs. 5,83,954, or 2·3 per cent. in the receipts and an increase of Rs. 42,099, or 9·02 per cent. in the charges, giving a net revenue of Rs. 2,55,21,299, which is in excess of that obtained during 1900-1901 by Rs. 5,41,855, or 2·2 per cent. The increase in receipts occurs mainly under the two heads of Import and Excise Duties on Salt.

* * * * * * *

CHAPTER VI.—MISCELLANEOUS.

Trade in saltpetre.

35. The quantity of salt educed in the manufacture of saltpetre and removed from all refineries in the Province on payment of duty during the year, was 17,974 maunds, as compared with 17,584 maunds similarly removed in 1900-1901. The quantity of refined saltpetre produced in the refineries in Calcutta was 50,571 maunds, as compared with 61,924 maunds, and the quantity of salt educed was 5,594 maunds, against 3,496 maunds in 1900-1901. The quantity of salt excised was 2,360 maunds in comparison with 4,740 maunds in the preceding year.

* * * * * * *

Offences against officers of the Department.

38. In Midnapore there were six cases of assault on Salt officers, one in each of the thanas Khedgree, Contai, Dantan, and Egra, and two in thana Mohisadal. In the case at Nasalla Chak hât, in thana Khedgree, five men were charged under section 147 of the Indian Penal Code, all of whom were convicted, one being fined Rs. 100 and the rest Rs. 60 each. In the case in thana Contai, three men were charged under sections 114 and 353 of the Indian Penal Code, but all were acquitted for want of sufficient evidence. In the case in thana Dantan nine men were sent up under sections 353 and 147 of the Indian Penal Code, all of them being found guilty and sentenced to different terms of imprisonment, while in the two cases in thanas Egra and Mohisadal all the accused, except one, were fined. Another case in the Mohisadal thana is pending trial. * * * * * The Commissioner of Salt reports that in all the districts the attitude of the people towards the Department is hostile, but cases of active resistance are becoming scarce in the districts of the 24-Parganas and Chittagong.

* * * * * * *

WEATHER AND CROP REPORT.

For the week ending the 15th September 1902.

Burdwan.—Rainfall at Sadar 1·88, Kalna 3·52, Katwa 2·06, Raniganj 2·80. Weather fine and hot. Transplantation of *aman* nearly finished. Weeding commenced. Harvesting of *aus* continues. Fodder and water sufficient. Condition of cattle good. Common rice sells at 11 seers per rupee.

Birbhum.—Rainfall at Sadar 7·67, Rampur Hât 7·95. Weather cloudy. Rampur Hât subdivisional officer reports that considerable loss to property and some lives have been caused by recent floods. Several villages destroyed. Common rice sells at 12 seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Sadar 3·85. Paddy and sugarcane crops doing well. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Midnapore.—Rainfall at Sadar 1·33, Contai 1·73, Ghatal 5·24, Tamluk 5·23. Weather hot and cloudy. Harvesting of *aus* continues. Agricultural prospects good. Fodder and water sufficient. Cattle-disease reported from Binpur thana. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Contai	12	0	
Tamluk	11	0	
Ghatal	12	12	

Hooghly.—Rainfall at Sadar 3·48, Serampore 4·79, Arambagh 3·05. Weeding of *aman*, harvesting of *aus* and steeping of jute going on. Prospect of standing crops good. Weather seasonable. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Serampore	10	4	
Arambagh	11	6	

Howrah.—Rainfall at Sadar 2·92, Uluberia 1·64. Fall general. No more rain wanted for next 8 or 10 days. Transplantation of *aman* paddy still going on. Reaping of *aus* still continues; its threshing and the cutting and steeping of jute going on. Sugarcane and vegetables are doing very well. Fodder and water-supply sufficient. No cattle-disease. Common rice sells on an average at 11 seers per rupee everywhere within the district.

24-Parganas.—Rainfall at Sadar 2·65, Barasat 1·22, Basirhat 3·01, Diamond Harbour 1·26. Weather hot and cloudy with moderate showers. State and prospect of crops good. *Aus* and jute still being harvested, and the latter being steeped. Transplantation of *aman* nearly finished. Common rice sells at 11 seers per rupee. Condition of cattle good. Supply of fodder and water sufficient.

Nadia.—Rainfall at Sadar 3·84, Ranaghat 4·02, Chuadanga 5·44, Meherpur 3·50, Kushtia 3·16. Harvesting of jute continues. Prospects of standing crops good. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Ranaghat	11	0	
Chuadanga	11	0	
Meherpur	13	5	
Kushtia	11	4	

Murshidabad.—Rainfall at Sadar 9·13, Kandi 5·40, Jangipur 6·23, Lalbagh 7·25. Weather seasonable. Harvesting of *bhadoi* almost completed. There was a severe flood of the Kana Nadi and More river in Kandi subdivision. Jute being cut and steeped in Jangipur. Sugarcane doing well. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Kandi	13	0	
Jangipur	12	0	
Lalbagh	11	0	

Jessore.—Rainfall at Sadar 3·72, Jhenida 8·54, Magura 10·07, Narail 6·46, Bangaon 2·74. Weather seasonable. Prospect of crops fair. Harvesting of *aus* almost completed. Rain has improved prospect of *aman* paddy. Fodder and water sufficient. Cattle-disease reported from Salikhia outpost in Magura and Kalia in Narail. Common rice sells at 12 seers per rupee.

Khulna.—Rainfall at Sadar 3·41, Bagerhat 1·57, Satkhira 6·60. Weather seasonable. Transplantation of *aman* still continues. *Boro* maturing well and an average crop expected. Fodder and water sufficient. Cattle-disease reported from Paikgachha and Fakirhat. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	12	per rupee.
Bagerhat	11	10	
Satkhira	10	8	

Rajshahi.—Rainfall at Sadar 5·96, Nator 3·51, Naugaon 4·93. Prospects of standing crop good. Harvesting of jute and *aus* continues. Transplantation of *aman* nearly finished. Common rice selling at 12 seers per rupee.

Dinajpur.—Rainfall at Sadar 3·80. Fall in the district general, varying from 2·98 to 8·21. Weather seasonable. Standing crops good. Steeping of jute continues. Cattle-disease to small extent reported from Kaliaganj. Fodder and water plentiful. Rice selling at 12 seers per rupee.

Jalpaiguri.—Rainfall at Sadar 20·63, Alipore Duars 11·33. Weather rainy with high wind during the first four days. Harvesting of *bhadoi* paddy nearly finished. Steeping of jute going on. *Haimanti* paddy doing well. Prospect favourable. Common rice sells at 11¼ seers a rupee. Fodder and water sufficient.

Darjeeling.—Rainfall at Sadar 11·64, Kurseong 17·75, Siliguri 13·28. Weather seasonable. *Hills—Bhadoi, haimanti dhan,* maize, *bara* and *chhota marua* doing well. *Terai*—Transplanting of *haimanti* paddy nearly finished. Reaping of jute and *bhadoi* paddy going on. Prospects good. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	9	0	per rupee.
Terai	10	0	

Maize sells at Darjeeling at 20 seers and at Kalimpong at 34 seers per rupee.

Rangpur.—Rainfall at Sadar 7·32, Gaibanda 2·29, Nilphamari 5·84, Kurigram 7·26. Weather cloudy and hot. Transplantation of *aman*, cutting and steeping of jute going on. Harvesting of *bhadoi* nearly finished. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	9	8	per rupee.
Gaibanda	10	0	
Kurigram	12	0	
Nilphamari	10	8	

Bogra.—Rainfall at Sadar 4·63. Fall general. Harvesting of *aus* and transplantation of *aman* nearly finished. Steeping of jute going on. Outturn of jute estimated to be 70 per cent. Fodder and water sufficient. Prospects fair. Common rice sells at 12 seers per rupee.

Pabna.—Rainfall at Sadar 3·12, Sirajganj 5·05. Weather cloudy and rainy. Heavy showers general. Prospects of *aman* and sugarcane fair. Fodder sufficient. No cattle-disease Common rice sells at 10 seers per rupee.

Dacca.—Rainfall at Sadar 5·2, Manikganj 11·11, Munshiganj 7·17, Narayanganj 5·39. Prospects of crops fair. Weather seasonable. Fodder available. No cattle-disease. Common rice sells at 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 4·06, Jamalpur 2·92, Kishorganj 2·71, Tangail 4·18. Weather seasonable. Steeping of jute and transplantation of *aman* continue. Reaping of *aus* finished, its outturn estimated at 80 per cent. Fodder and water sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Kishorganj	11	4	
Jamalpur	11	6	
Tangail	10	4	

Faridpur.—Rainfall at Sadar 2·95, Goalundo 3·50, Madaripur 5·62. Weather sultry with occasional rain. Prospects of *aman* paddy good. Fodder available in sufficiency. Condition of cattle good. Water sufficient. Common rice sells at 11 seers the rupee.

Backergunge.—Rainfall at Sadar 4·09. Fall general. Weather seasonable. Transplantation of *aman* continues. Prospects fair. Cattle-disease in thana Matbari. Fodder sufficient. Common rice sells at 13½ seers (*aus*) and 12 seers (*aman*) at Sadar; at Bhola 11 seers (*aus*) and 9½ seers (*aman*) per rupee.

Tippera.—Rainfall at Sadar 1·64, Brahmanbaria ·41, Chandpur 11·53. Weather seasonable. Prospects of standing crops good. Reaping of jute and transplantation of paddy not yet completed. Fodder and water sufficient. No cattle-disease. Common rice sells at 14 seers per rupee.

Noakhali.—Rainfall at Sadar 4·26, Feni 2·68. Harvesting of *aus* and transplantation of *aman* still continues. Prospects fair. Cattle-disease at Sudharam. Water sufficient. Fodder not so. Common rice sells at Sadar at 11½ seers and at Feni at 13 seers per rupee.

Chittagong.—Rainfall at Sadar 2·26, Cox's Bazar 11·80. Reaping of *aus dhan* is finished. Transplantation of *aman dhan* is still going on. Water and fodder sufficient. Commen rice selling at 12 seers 11 chitaks.

Chittagong Hill Tracts.—Rainfall 2·50. Weather fair. *Joom* harvesting and sowings of winter rice continue. Prospects of cotton and rape crop bad owing to too much rain and too little sunshine. Common rice sells at 12 seers per rupee.

Patna.—Rainfall at Sadar 10·20, Barh 3·75, Bihar 2·04, Dinapore 4·08, Hilsa 4·27, Bikram 4·52. Weather cloudy. Rainfall proved very useful, but more wanted. Harvesting of Indian-corn progressing. *Aghani* prospects improved. Transplantation of paddy continues. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Patna	12	0	per rupee.
Bihar	10	0	
Dinapore	12	4	
Barh	11	12	

Gaya.—Rainfall at Sadar 5·34, Jahanabad 4·95, Aurangabad 8·41, Nawadah 2·25. Weather seasonable. Transplantation of paddy over, except in the Nawadah subdivision. Harvesting of the *bhadoi* crops commenced. Sugarcane doing well. No cattle-disease. Fodder and water ample. Average price of common rice is 10¾ seers per rupee.

Shahabad.—Rainfall at Sadar 1·23, Buxar 2·50, Bhabhua 3·48, Sasaram 2·41, Dehri 2·93. Weather hot and cloudy. Harvesting of *bhadoi* continues. Prospects of paddy and sugarcane good. No cattle-disease. Rice sells at Sadar at 11 seers a rupee.

Saran.—Rainfall at Sadar 5·59, Siwan 4·00, Gopalganj 6·75. Weather rainy and cloudy. Rainfall has been general and has proved most beneficial to agricultural operations. Standing crops doing well. Fodder and water sufficient. Cattle-disease reported from one village. Common rice sells at 12½ seers per rupee.

Champaran.—Rainfall at Sadar 4·73, Bettiah 5·09. Weather hot and cloudy. Harvesting and threshing of *bhadoi* crops going on. Outturn of maize estemated at 110 per cent. Transplantation of *aghani* rice finished. Sugarcane doing well. Little cattle-disease. Fodder and water sufficient. Common rice sells at 14¾ seers and maize at 22 seers per rupee.

Muzaffarpur.—Rainfall at Sadar 2·25, Hajipur 4·11, Sitamarhi 1·69. Weather cloudy generally. Transplantation of paddy nearly finished. Harvesting of *bhadoi* crops continues. Prospects fair. Fodder and water sufficient. Prices are—Common rice 11½ seers, maize 22 seers a rupee.

Darbhanga.—Rainfall at Sadar 1·67, Samastipur 9·18, Madhubani 3·89. Transplantation of paddy is still going on. Harvesting of *bhadoi* in progress. Fodder and water sufficient. Cattle-disease is reported from Warisnagar and Samastipur thanas. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Samastipur	12	0	
Madhubani	11	11	

Monghyr.—Rainfall at Sadar 5·22, Begusarai 4·51, Jamui 4·25. Weather hot and cloudy. Reaping of *bhadoi* crops and *makai* harvesting continues. Paddy benefited by rain. Sugarcane doing well. Fodder and water sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Begusarai	12	0	
Jamui	11	0	

Bhagalpur.—Rainfall at Sadar 1·94, Banka 2·06, Madhipura 4·83, Supaul 5·16. Weather cloudy. Prospects of *aghani* continue fair. Harvesting of *marua* and *bhadoi* paddy going on. Transplantation of paddy completed. Sowing of *kurthi* commenced in Banka subdivision. Sporadic cases of cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	6	per rupee.
Banka	12	10	
Madhipura	13	0	
Supaul	15	0	

Ju
2·74.
Rain h

seers pe

Purnea.—Rainfall at Sadar 6·14, Kishanganj 4·15, Araria 5·25. Fall general. Weather variable. *Bhadoi dhan* and jute are being harvested. Cattle-disease reported from Palasi outpost. Fodder and water sufficient. Common rice sells at Sadar and Kishanganj at 11 seers and at Araria at 14 seers per rupee.

Malda.—Rainfall at Sadar 3·52, Chanchal 6·70, Sibganj 4·88, Gajol 6·04. Fall general. Weather hot and cloudy. Plants of winter rice thriving. Prospects good. Harvesting of *bhadoi* not yet completed. Cutting of jute still continues. No cattle-disease. Fodder and water sufficient. Common rice sells at 12½ seers per rupee.

Sonthal Parganas. Rainfall at Sadar 9·51, Deoghur 2·90, Godda 4·15, Jamtara 5·98, Pakaur 8·03, Rajmahal 4·84. Weather rainy but hot. Prospects of *aghani* good. Standing crops doing well. Transplantation of rice over. Harvesting of *makai* continues. Common rice sells at 12 seers per rupee at Sadar.

Cuttack.—Rainfall at Sadar 0·32. Fall general. Weather seasonable. Early *beali* being cut and average outturn expected. Late *beali* growing well into maturity. *Guru* and *laghu sarad* growing well. Prospects fair. No cattle-disease. Fodder and water sufficient. Old common rice sells at 14 seers 7 chitaks and new *beali* at 18 seers 6 chitaks at Sadar.

Balasore.—Rainfall at Sadar 0·87. Fall general. *Beali* being reaped. *Sarad* being transplanted and weeded. Prospects good. Standing crops with sugarcane prospering. Rice sells at 14 and 16 seers a rupee at Sadar and Bhadrak respectively. Fodder and drinking water sufficient.

Angul.—Rainfall at Sadar nil, Chhendipada 1·07, Tikerpara 0·47, Bissipara 0·24 Weather hot. Weeding of paddy and sowing of *rabi* in progress. Harvesting of *bhadoi* crops continues. Common rice sells at 12 and 10½ seers per rupee at Sadar and Khondmals respectively.

Puri.—Rainfall 0·56. Fall general. Weather seasonable. Puddling and weeding of winter rice continues. Harvesting of *bhadoi* paddy and *mandua* in progress. Outturn expected to be normal. Sugarcane and other miscellaneous crops doing well. Fodder and water-supply sufficient. Common rice sells at 14 seers 7 chitaks per rupee. Cattle-disease has broken out at places.

Hazaribagh.—Rainfall at Sadar 3·59, Giridih 4·55. Fall not general. Weather seasonable. Harvesting of *bhadoi* crops going on. Sugarcane doing well. Cattle-disease reported from two thanas. Fodder and water sufficient. Common rice sells at 10¾ seers per rupee.

Ranchi.—Rainfall at Sadar 5·86. Fall general. Weather seasonable. Prospects good. Sowing of *sirguja* and *kurthi* in progress. Cattle-disease reported from several thanas. Fodder and water sufficient. Common rice selling at 14 seers per rupee.

Palamau.—Rainfall at Sadar 2·50. Weather seasonable. *Sawan* and *gundli* being harvested. Standing crops all doing well. Cattle-disease continues in places. Fodder and water sufficient. Prices at Sadar—Rice 11¼ seers, Maize 16 seers 14 chitaks per rupee.

Manbhum.—Rainfall at Sadar 1·99, Gobindpur 2·87. Fall general. Weather seasonable. Prospects of crops on ground good. Transplantation of winter rice completed. Palasi lac about 75 per cent. *Doha tasar* about 50 per cent. of normal harvest. Fodder and water sufficient. Cattle-disease not reported. Average price of common rice at Sadar is 12 seers and at Gobindpur 10½ seers per rupee.

Singhbhum.—Rainfall 1·13. Prospect of crop good. Harvesting of *guru* paddy commenced. Average price of rice is 12½ seers per rupee in the district; at Chaibassa 13 seers.

General Summary.—The rainfall during the week was general and heavy at places. More rain is still required in the Patna district. In Rampur Hat subdivision of the Birbhum district considerable loss of property and loss of some lives have been caused by floods. Sugarcane promising. Harvesting of *bhadoi* crops still continues. Transplantation of winter rice is almost over Standing crops doing well. Prospects fair. Cattle-disease reported from 15 districts. Fodder and water generally adequate. The price of common rice has risen in 3 districts, fallen in 12, and is stationary in the rest (32).

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,

The 16th September 1902.

Meteorological Report of the Province of Bengal for the month of August 1902.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF AUGUST 1902.

WEATHER in Bengal during the greater part of August was generally such as occurs during the monsoon season with fairly well distributed, though not in all parts normal, rainfall. The exceptional conditions noticed in earlier reports still existed in the early half of the month, but soon after the middle a change of a marked kind occurred and was chiefly shown by the movement of three shallow depressions which passed north-westward from the Bay in rapid succession between the 19th and end of the month.

The principal disturbance in the first half of the month was an exact parallel to one which occurred at the end of June and beginning of July, and which led to the commencement of general south-west monsoon weather in the greater part of Bengal. As on that occasion a fall of pressure began in Assam and North Bengal and extended southward over the Province, but chiefly westward along the Himalayan range. Rainfall began in the extreme east of Assam on the 9th, it extended to North Bengal on the 10th, and then came a general heavy fall over the whole of Bengal Proper on the 11th. This westerly and southerly extension of the rainfall area ceased suddenly, and the heavy falls on the 12th were confined to the hills and submontane districts.

The absence of any indication of disturbed weather over the Bay on the south of the Province during the days preceding the changes referred to, as well as the fact that not only pressure but also temperature began to fall in the north-east first and that the extension of those changes was southward and westward, show that the disturbance was of a kind which, though not rare in the present season, has been exceptional in previous years. Also the information obtained from the ground level observations is insufficient to account for the occurrence of the general heavy rainfall on the 11th.

The rainfall of those days forms a considerable portion of what was recorded in North Bengal during the month, as an important change began soon afterwards, a change which may not have been independent of the earlier occurrences, but which in the absence of information must be treated as separate and independent.

The first indication of the change was the formation of the shallow depression in the west or south-west of the Bay about the 15th. It remained shallow and ill-defined for several days, causing irregularly cyclonic winds on the coast of the Circars and Madras. The winds never attained to even moderate strength; and the chief feature was the fall of temperature, which, beginning in the extreme south-west of the Bay, moved north-westward into India. The central area of the depression on the 19th was near the north coast of the Circars, as shown by the northerly winds at Vizagapatam and Gopalpur. On the following day the depression having moved westward, weather was of ordinary monsoon character over the Bay and Province.

Usually when depressions are forming over the Bay, especially in August and September, and northerly winds prevail over the Province owing to the indraught towards the low pressure area, rainfall to a great extent ceases in Bengal. During the days between the 15th and 19th when the above disturbance affected weather in the west of the Bay, very little rain fell in the western districts, but showers, generally light, were of almost daily occurrence in East and North Bengal. After the depression passed inland on the 19th, general light or moderate rain fell over the greater part of the Province, but it soon ceased because of the approach from the east of another disturbance towards the north of the Bay.

This disturbance was first shown by a moderate fall of pressure in the south of Burma on the 21st. The fall was more rapid on the 22nd, and there was then a well marked depression over the area represented by Rangoon and Moulmein, with a very uniform distribution of pressure over the Province and the north of the Bay. The depression continued to move north-westward, the central area being south-east from Akyab on the 23rd and close to the Orissa Coast on the 24th. Some development had occurred during the two days the disturbance was over the Bay, and when the centre was in the north-west angle, there was a steep pressure gradient with strongish winds over the whole sea area. The highest wind velocity at Diamond Island was 20 miles an hour on the 23rd, and on the west coast 25 miles at Saugor Island and Gopalpur on the 24th.

On the 25th the depression was inland and over Chota Nagpur, and on the 26th it had moved westward beyond the boundary of the Province. A few stations in Orissa and Chota Nagpur reported heavy rainfall during the passage of the disturbance, and after it had moved westward, general light rain fell in the northern districts for a day or two.

The recovery of pressure after the passage of the above depression over Bengal was not complete when the third depression of the latter part of the month began to appear, again in the south of Burma. A moderate fall of pressure was reported from Moulmein and Tavoy on the 26th, and on the 27th the wind circulation was slightly abormal on the Burma coast between Diamond Island and Akyab. But for several days the disturbance was very slight and was shown as a wide diffused depression over the north of the Bay with light irregularly cyclonic winds at coast stations. On the 31st it was better defined, the central area was near

the south coast of Orissa, and a steeper pressure gradient had developed over the south and centre of the Bay. The depression was still shallow, and the greatest defect was ·1 inch at False Point. On the 1st September the centre was still over the Bay, but it then moved rapidly westward, and on the 2nd was to the west of Orissa.

Though there was very little wind with the disturbance and no heavy rainfall, showery weather became general over the Province after the passage inland.

The month was divided naturally into two equal parts. During the first-half fine settled weather prevailed over the Bay and general rain fell inland until the disturbance occurred in the Himalayan region in the second week. The period of general rainfall in Bengal was practically brought to a close by the heavy burst on the 11th, any heavy falls on subsequent days being chiefly in the northern district. During the second-half of the month weather was more disturbed over the Bay, and rainfall inland was not only lighter than during the first-half, but lighter than is usual at the time of the year. This was due to the westerly movement of the depressions and to the monsoon current being diverted westward from the Bay. The rainfall in Bengal generally during the latter half of the month occurred for two or three days at a time, while the depressions were in the north-west of the Bay and for a short time subsequent to the passage inland. At other times comparatively rainless weather prevailed, more especially in the western and central districts.

Pressure underwent considerable oscillations at times, but as no deep depression occurred, the daily rise or fall was never more than moderately rapid. The more noticeable changes were on the 9th and 10th, when weather was disturbed in the Himalayan region, and on the 24th and 25th, when the second of the three depressions of the latter part of the month was passing from the north-west angle of the Bay across the south-western districts. The fall in front of the depression was about ·15 inch in 25 hours, and a rise of similar amount occurred during the recovery.

The difference from the normal on an average for the month varied from excess of ·02 inch in Bengal Proper to defect of similar amount in the south of Burma and the south of Madras.

Temperature.—As cloud was not so heavy as usual in August, temperature was almost continuously higher than usual, though not by large amounts. The only occasions when comparatively cool weather was fairly general were about the 11th and the 26th after the rainfall caused by the disturbances of those dates. There was a rather large excess in Bihar while the depressions were developing over the Bay in the latter half of the month, the greatest being 5° on the 16th. At other times excess was only 1° or 2°. Owing to the continued excess from day to day the average temperature for the month is above the normal by considerable amounts. In South-West Bengal, Bihar and Chota Nagpur excess is 1°·5, in East Bengal and Orissa about 1°, and in North Bengal rather less than 1°.

Excess in maximum temperature varied from 2° to 3° in the western districts to less than 1° in the east. In minimum readings it was smaller, and generally less than 1° in Bengal Proper. In the west of Bihar and Chota Nagpur it was about 1°·5 on an average for the month.

Rainfall on an average for the larger divisions was below the normal, except in North Bengal, where there was excess of 3·5 inches, and in Orissa, where there was a small excess of a quarter of an inch. The defect was large in Chota Nagpur, more than 5 inches, and moderate in Bihar, more than 3 inches.

The reasons for the heavy rainfall in North Bengal and Orissa have been given. In the former it was due to the disturbance in the Himalayan region about the 10th and 11th, and in the latter to the series of depressions which crossed the south-western districts during the second part of the month.

The area of largest defect is the north and east of Chota Nagpur. Over that area there was a uniform defect of about 6 inches. Excluding the Orissa coast districts and the sub-montane tract in the north of Bihar, where the rainfall was generally in excess, the whole of the western half of the Province received less than the usual amount, though not to any great extent, except in the part of Chota Nagpur referred to. In Bengal Proper the variation from the normal is irregular. Generally there is defect, except in the eastern half of North Bengal and in parts of East Bengal. The greatest excess is 17 inches at Baxa, and at a few stations in the extreme north-east it is between 8 and 10 inches. In Chittagong defect is generally between 8 and 10 inches.

The actual falls were below 7 inches in the north of Chota Nagpur and the adjacent part of South Bihar, and below 5 inches at a few scattered stations in that region. In the south of Chota Nagpur, the greater part of Orissa, the southern and eastern parts of Lower Bengal, the greater part of North Bengal and the extreme north of Bihar falls were 10 inches and upwards, the larger amounts as usual being in the south-east and north-east. In Cooch Behar, Jalpaiguri and Darjeeling, Netrokona and Noakhali amounts exceed 20 inches, and at a few stations in the extreme north of North Bengal falls were upwards of 30 inches.

The comparison of the actual rainfall in the various large divisions of the Province with the normal is most accurately and conveniently shown in the form of a percentage. The figures representing the rainfall for the month, calculated in this way, are included in the table below under the heading of August. This table really gives a condensed summary of

the rainfall statistics of the present year up to date for each meteorological division, the first eight columns giving the actual average rainfall in each division in each month, expressed as a percentage of the normal, while the ninth column gives the total rainfall for the first eight months expressed as a percentage of the normal rainfall for that period:—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	Actual rainfall of first eight months of 1902 expressed as a percentage of the normal fall for the period.

The total fall from 1st January to 13th September 1902	56·71
The average fall of the corresponding period for 24 years, Surveyor-General's Office	53·64

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; *l*, lightning.

CONTENTS.

ANNUAL REPORT ON THE GOVERNMENT CINCHONA PLANTATION AND FACTORY IN BENGAL FOR THE YEAR 1901-1902.

The 12th September 1902.—The following extracts from the Annual Report on the Government Cinchona Plantation and Factory in Bengal for the year 1901-1902 are published for general information.

E. W. COLLIN,
Offg. Secy. to the Govt. of Bengal.

No. 149C., dated Royal Botanic Garden, Sibpur, the 14th July 1902.

From—MAJOR D. PRAIN, M.B., I.M.S., Superintendent, Royal Botanic Garden, Calcutta, and of Cinchona Cultivation in Bengal, and Government Quinologist,

To—The Secretary to the Government of Bengal, Financial Department.

I HAVE the honour to submit the report of the Cinchona Plantation and Factory for the official year 1901-1902.

Fortieth Annual Report of the Government Cinchona Plantation in Sikkim, being that for the financial year 1901-1902, and also the Report of the Factory for the same year, by MAJOR D. PRAIN, I.M.S., *Superintendent of Cinchona Cultivation in Bengal, and Government Quinologist.*

1. *Weather and General.*—The rainfall during the year was below normal; 92·69 inches, as against an average of 123·01 for the preceding 27 years. As compared with 1900-1901 the number of rainy days was greater, 153 as against

137; the total fall was, however, considerably less, 92·69 inches for 1901-1902, as against 126·23 inches for 1900-1901. No heavy downpours occurred and no damage has to be recorded. At Munsong, the new extension in the Dumsong Forest, 88·42 inches of rain were registered.

2. *Plantation and Crop.*—The number of plants put out during the year was 485,530. These included 397,010 *Ledgeriana*, 26,078 *Succirubra*, 55,007 *Hybrid No. I*, and 7,435 *Hybrid No. II*. This latter, which appears for the first time in this report, has been raised by crossing *Ledgeriana* with *Succirubra*; the *Hybrid* of former reports, to be designated in future *Hybrid No. I*, is a cross between *Succirubra* and *Officinalis*. It is hoped that the new hybrid may possess enough of the richness of *Ledgeriana* with enough of the vigour of *Succirubra*, to admit of its extensive cultivation on the Rungbee part of the plantation where the conditions are most unfavourable for *Ledgeriana* itself.

The area planted at the head-quarters plantation (Mungpoo and Sittong) was 88·28 acres; here 121,828 *Ledgeriana* plants, all the *Succirubra* and *Hybrid No. I* plants and 3,085 *Hybrid No. II* plants were put out. At Munsong 103·58 acres were planted with 275,182 *Ledgeriana* and 4,350 *Hybrid No. II* plants.

The nursery stock of seedlings on 31st March 1902 was 21,500. As compared with 31st March 1901 there were in the lines 2,000 plants more of *Hybrid No. I* and 3,000 more of *Hybrid No. II*, but 11,500 fewer *Succirubra* and 32,000 fewer *Ledgeriana*. There were thus 38,500 fewer plants to be put out after 1st April 1902 than there were at the same date the preceding year, indicating an earlier planting season in 1902 than in 1901.

The total number of living trees of all kinds in the permanent plantations on 31st March 1902 was 2,763,286. Of these, 1,928,422 were at Mungpoo (including Rungbee and Labdah) and 246,648 at Sittong. At Munsong, in the Dumsong forest, there were 588,216. The trees included 2,000,092 *Ledgeriana*, 234,446 *Succirubra*, 2,130 *Officinalis*, 519,183 *Hybrid No. I* and 7,435 *Hybrid No. II*. The increase as compared with 31st March 1901 was 379,758.

Planting at Munsong this year has been less successful than could be wished. A failing water-supply at the nursery-lines compelled the Deputy Superintendent to plant early as the least of two evils; the result has been a very high proportion of casualties Arrangements have already been made to meet the case and to replant where replanting is necessary.

During the year 600 maunds of bonemeal, at the rate of 10 maunds per acre, were applied to four-year-old cinchonas. This manure acts slowly, and as yet little difference is apparent in the condition of the trees so treated.

The crop taken from the plantation during the year has been 203,405 lbs. of dry bark. From Mungpoo the quantity taken was 165,808 lbs.; from Sittong 37,597 lbs. The crop has been composed of 120,294 lbs. *Ledgeriana*, 3,396 lbs. *Succirubra* and 79,715 *Hybrid No. I*. From the Mungpoo Division the bark has been taken from outlying and sparse patches of *Ledgeriana* and *Hybrid No. I*, which have been uprooted in accordance with the policy pursued during recent years of concentrating the area under cinchona so as to admit of its higher cultivation. The Sittong division has never given satisfactory results with *Ledgeriana*, and the last trees of that kind have now been harvested from the division. The whole of the bark thus harvested has been made over as usual to the Quinologist.

3. *Factory and outturn.*—Work in the factory has gone on throughout the year without accident or delay. Very considerable improvement has been effected in the arrangement and method of working. The improvements have necessitated various renewals and a number of additions to the factory plant.

The raw material worked up during the year included 390,043½ lbs. *Ledgeriana*, *Hybrid No. I* and *Officinalis* bark which provided 10,010 lbs. 12 oz. of suphate of quinine, the average yield being 2·56 per cent. The residual (amorphous) alkaloids that are left over in the process, accounted for during the year, amount to 5,867 lbs. In addition to this quantity, 99,600 lbs. of *Succirubra* and *Hybrid* barks to which 4,980 lbs. of residual alkaloids were added, yielded 3,424 lbs. of cinchona febrifuge. The total outturn of manufactured products for the year has thus been 13,434 lbs. 12 oz., an increase as compared with the previous year of 3,599 lbs. 12 oz. This increased

quantity included 2,663 lbs. 12 oz. of sulphate of quinine and 936 lbs. of cinchona febrifuge.

4. *General charges.*—The charges debitable against the department as a whole have amounted to Rs. 25,632-7-11, as against Rs. 28,769-10-6 for the preceding year. These charges include pay of clerical and menial establishment, Rs. 4,935; postal and telegraph charges, Rs. 521-12; advertising manufactured articles, Rs. 1,052; and taxes (road and public works cesses), Rs 1,475. They include, besides, the expenditure incurred in opening up new and extending existing plantations (as apart from the upkeep of permanent plantations and the harvesting of bark) and expenditure in additions to the factory (as apart from cost of working and of manufacturing quinine and febrifuge). The charges for extensions amounted to Rs. 9,895-7-8, being Rs. 6,629-1-11 for planting 103·58 acres of new plantation at Munsong and Rs. 3,266-5-9 for planting 88·28 acres at head-quarters. The corresponding general outlay in connection with the factory amounted to Rs. 7,753-4-3.

5. *Plantation charges.*—The charges directly debitable against the plantation for upkeep and for the harvesting of bark have been Rs. 55,602-8-10, as against Rs. 50,428-10-6 for 1900-1901. Against this outlay has to be placed the harvest, 203,405 lbs. of dry bark collected during the year which was thus collected at a cost of Rs. 0-4-4·5 per lb., at which rate it passes over to the Quinologist's Department.

6. *Factory charges.*—The expenditure incurred in connection with the Factory was Rs. 79,401-2. Of this sum, Rs. 38,000 represents the purchase-money, and Rs. 1,012-10-7 the cost of carriage to the factory, of 120,290 lbs. of bark acquired from private growers; the actual working expenses of the factory for the year were therefore Rs. 40,391-7-5, being Rs. 35,131-5-5 incurred in the manufacture of sulphate of quinine and Rs. 5,260-2 for the manufacture of cinchona febrifuge.

In order to produce 10,010 lbs. 12 oz. of sulphate of quinine, 259,371 lbs. of *Ledgeriana* bark, 72,5[illegible]1 lbs. *Hybrid No. I*, and 26,728 lbs. *Officinalis* from the stock held on 1st April 1901 were used. The value of this bark was Rs. [illegible]9,8[illegible]7-8. In addition 31,393½ lbs. of *Officinalis* bark, purchased during the year for Rs. 11,276-11-9, were employed. The total value of the bark used was thus Rs. 4[illegible],164-3-[illegible]; this sum, added to the manufacturing charges, gives a total of Rs. 76,295-9-2, or Rs. 7-9-11·3 per lb. Of the residual (amorphous) alkaloid left as a bye product in the manufacture of quinine, 4,980 lbs. treated along with 99,600 lbs. of *Succirubra* and *Hybrid No. I* bark, provided 3,424 lbs. of cinchona febrifuge. The value of the bark used was Rs. 8,300; of the residual alkaloids, Rs. 4,720-10; the working expenses amounted to Rs. 5,260-2. The total cost of making 3,424 lbs. of cinchona febrifuge was thus Rs. 18,280-12, or Rs. 5-5-5 per lb.

7. *Issues of manufactured articles.*—The issues of sulphate of quinine for the year amounted to 9,793 lbs. 3 oz., a decrease of 1,213 lbs. 13 oz. as compared with 1900-1901. This decrease is accounted for by the fact that the Jail Department required 1,500 lbs. less for conversion into pice-packets. The demand by Government officers for dispensaries, &c., on the other hand, increased by 391 lbs. 9 oz.

The issues of cinchona febrifuge for the year amounted to 3,670 lbs. 4 oz., a decrease as compared with the previous year of 135 lbs. 12 oz. This decrease is explained by the fluctuating character of the demands on the part of medical depôts. The Mian Mir Depôt took 100 lbs. more than in 1900-1901, but that at Calcutta required 650 lbs. less. This deficit was to some extent counterbalanced by an indent for 300 lbs. cinchona febrifuge by the Principal Veterinary Officer, South Africa. Judged by the only certain test,—the demand by the public generally,—the belief in the reliability of febrifuge as a remedy for malaria remains unchanged. These sales to the public were 113 lbs. 8 oz. in excess of those for 1900-1901.

8. *Receipts.*—The receipts for the year have amounted to Rs. 1,91,922-5-2 as compared with Rs. 2,27,087-10-3 for the preceding year. Cash receipts have amounted to Rs. 78,441-2-6, and include, besides the receipts for manufactured articles (quinine Rs. 48,521-5-6 and cinchona febrifuge Rs. 28,393-8), Rs. 1,296-3 as receipts for crude products (bark Rs. 168-3, seed Rs. 40, residual

alkaloids Rs. 1,088), and Rs. 230-2 as receipts for miscellaneous articles (empty soda-drums, gunny-bags, &c.) The book-credits for the year amounted to Rs. 1,13,481-2-8 and have included Rs. 27,550 for issues to the Bengal Jail Department, and Rs. 1,609-8 for issues to the Punjab in connection with the pice-packet systems in these provinces. The other book-credits were Rs. 81,316-10-8 for issues to medical depôts; Rs. 3,000 for issues to the Principal Veterinary Surgeon, South Africa, and Rs. 5 to the Inspector-General of Civil Hospitals, Bengal. The outstandings, representing cash-issues made within the last few days of the financial year, the transactions regarding which were not completed on 31st March, amounted to Rs. 4,401-10.

9. *Stock account.*—The manufactured articles in stock on 31st March 1902 consisted of 2,957 lbs. 15 oz. of sulphate of quinine and 2,534 lbs. 12 oz. of cinchona febrifuge; their respective values were, quinine Rs. 22,323-13-11 and febrifuge Rs. 13,533, these sums representing the cost of production of each of the articles. Raw material and unmanufactured products included 115 lbs. of residual (amorphous) alkaloids in stock at Calcutta, valued at Rs. 109-0-2 and 1,397,241 lbs. 8 oz. of cinchona bark, valued at Rs. 1,55,904-0-7. The value of stores in stock was Rs. 4,886-5-3, consisting of oils Rs. 2,850-8-3, chemicals Rs. 1,673, and sundries (plaster of Paris, charcoal for purification and spare wheel for turbine) Rs. 362-13.

* * * * *

10. * * * * * * *Balance sheet.*—The balance on the working of the Department was Rs. 59,806-1-8, but against this has to be placed the expenditure incurred in writing down the difference between the cost of production and the actual market-value of the bark harvested from the plantation. This amounts to Rs. 18,500-1-10, so that the actual surplus for the year is Rs. 41,305-15-10. This surplus, it has to be remarked, must not be looked upon as wholly profit. The quantities of the various articles in stock were not materially different at the opening and at the close of the year; the enhancement in value noted above is thus due to the fact that a somewhat different method of estimating the value of cinchona bark in store has been prescribed for observance. If this factor in the surplus be disregarded, the difference between income and expenditure, Rs. 31,283-2-5, with the depreciation charge in the bark-harvest, Rs. 18,500-1-10, deducted therefrom, thus leaving an actual surplus of Rs. 12,783-0-7, more approximately represents the profit of the Department for the year.

11. *Sale of quinine at post-offices.*—The quantity issued to the Jail Department during 1901-1902 was 1,900 lbs., a falling off as compared with the preceding year of 1,500 lbs. No explanation of this remarkably diminished demand has been received from the Departments concerned.

* * * * *

WEATHER AND CROP REPORT.

For the week ending the 22nd September 1902.

Burdwan.—Rainfall at Sadar 2·02, Kalna 0·79, Katwa 1·60, Raniganj 2·32. Weather fine and hot. Transplantation of *aman* finished. Weeding of *aman* and harvesting of *aus* continues. More rain wanted. Fodder and water sufficient. No cattle-disease. Common rice sells at 11 seers per rupee.

Birbhum.—Rainfall at Sadar ·13, Rampur Hât 1·05. Weather unsettled. Standing paddy flourishes and doing well. Fodder sufficient. Common rice sells at 12½ seers per rupee.

Bankura.—Rainfall at Sadar ·15. Paddy and sugarcane doing well, but more rain wanted. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Midnapore.—Rainfall at Sadar 0·43, Contai nil, Tamluk 1·54, Ghatal 0·59. Weather hot and cloudy. Harvesting of *aus* going on. Agricultural prospects favourable. Fodder and water sufficient. Cattle-disease reported from Binpur thana. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Contai	13	0	
Tamluk	11	0	
Ghatal	12	0	

Hooghly.—Rainfall at Sadar nil, Serampore 0·36, Arambagh 1·90. Weeding of *aman* and steeping of jute going on. Prospect of standing crops good. Weather seasonable. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Serampore	10	5	
Arambagh	11	5	

Howrah.—Rainfall at Sadar 0·02, Uluberia 0·45. Fall general and recorded two days in the week. More rain wanted for the high lands. Harvesting of the *aus* finished. Its threshing is going on. Cutting and steeping of jute still going on. Sugarcane doing well. Transplantation of the *aman* nearly finished. Fodder and water-supply sufficient. No cattle-disease. Common rice sells on an average at 11 seers per rupee everywhere within the district.

24-Parganas.—Rainfall at Sadar 1·02, Barasat 0·48, Basirhat 1·12, Diamond Harbour 0·10. Little rain. Weather hot and sunny. Rain urgently wanted in Diamond Harbour. State and prospect of standing crops good. *Aus* and jute still being harvested. Transplantation of *aman* finished. Land being prepared for the *rabi* crops in Basirhât. Condition of cattle good. Supply of fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	0	per rupee
Basirhat	10	0	
Diamond Harbour	10	8	

Nadia.—Rainfall at Sadar ·08, Kushtia 2·20, Chuadanga 1·13, Meherpur ·86, Ranaghat ·88. Weather hot. Harvesting of jute almost finished. Prospects of standing crops good. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Kushtia	11	0	
Chuadanga	10	0	
Meherpur	13	5	
Ranaghat	12	0	

Murshidabad.—Rainfall at Sadar 2·69, Kandi 2·80, Jangipur 2·00, Lalbagh 1·22. Weather seasonable. Sowing of *rabi* crop commences. Harvesting of *aus* and transplantation of *aman* over. Jute being cut and steeped in Jangipur. Prospect of sugarcane good. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Kandi	12	8	
Jangipur	12	0	
Lalbagh	11	0	

Jessore.—Rainfall at Sadar 0·05, Jhenida 2·16, Magura 1·34, Narail 0·08, Bangaon 1·02. Weather seasonable. Prospects of crops good. Harvesting of *aus* completed. More rain wanted. Fodder and water sufficient. Cattle-disease reported from Salikha outpost

in Magura subdivision and from Bagharpara thana in Sadar. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee
Jhenida	12	0	
Magura	11	0	
Narail	11	8	
Bangaon	13	0	

Khulna.—Rainfall at Sadar 2·67, Bagerhat 0·68, Satkhira 0·18. Weather seasonable. Transplantation of *aman* nearly completed. Fodder and water sufficient. A few cases of cattle-disease reported from thana Khulna. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Bagerhat	11	11	
Satkhira	10	8	

Rajshahi.—Rainfall at Sadar 6·06, Nator 2·19, Naugaon 1·82. Weather hot and rains ceasing. Prospects of standing crop very good. Harvesting of jute and transplantation of *aman* nearly finished. No cattle-disease reported. Common rice selling at 12 seers per rupee.

Dinajpur.—Rainfall at Sadar 9·43. Fall in the district general, varying from 1·61 to 8·57. Weather gloomy. Standing crops good. Steeping of jute continues. Cattle-disease reported from two thanas. Fodder and water plentiful. Rice selling at 13 seers at Thakurgaon and 12 seers at Sadar per rupee.

Jalpaiguri.—Rainfall at Sadar 14·27, Alipore Duars 16·11. Fall general and weather rainy. *Haimanti* paddy doing well. Prospect favourable. Harvesting of *bhadoi* paddy nearly finished. Steeping of jute going on. Lands are being cultivated for tobacco. Common rice sells at 11¼ seers a rupee. Fodder and water sufficient.

Darjeeling.—Rainfall at Sadar 8·23, Kurseong 13·65, Siliguri 7·81. Weather seasonable. *Hills—Haimanti dhan, bara* and *chhota marua* and maize being harvested. *Terai*—Transplanting of *haimanti* paddy pratically finished. Reaping of jute and *bhadoi* going. Prospects good. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	9	0	

Maize sells at Darjeeling at 20 seers and at Kalimpong at 34 seers per rupee.

Rangpur.—Rainfall at Sadar 8·59, Gaibanda 2·29, Kurigram 7·83, Nilphamari 6·55. Weather cloudy and rainy. Cutting and steeping of jute and transplantation of *aman* going on. Water and fodder sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	9	8	per rupee.
Gaibanda	10	0	
Kurigram	11	0	
Nilphamari	10	8	

Bogra.—Rainfall at Sadar 1·25. Fall general. Transplantation of *aman* finished and estimated at cent. per cent. of usual area, coming up well. Harvesting of jute going on. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Pabna.—Rainfall at Sadar 1·99, Sirajganj 3·93. Weather cloudy and rainy. Showers general. Prospects of *aman* and sugarcane fair. Fodder sufficient. No cattle-disease. Common rice sells at 10 seers per rupee.

Dacca.—Rainfall at Sadar ·86, Manikganj 2·75, Munshiganj ·68, Narayanganj ·2. Prospects of crops fair. Weather seasonable. Fodder available. No cattle-disease. Common rice sells at 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 2·43, Jamalpur 2·54, Kishorganj 2·93, Netrakona 7·25, Tangail 0·07. Weather seasonable. Jute steeping going on. Transplantation of *aman* nearly over. Fodder scarce in parts. Water sufficient. No cattle-disease. Common rice selling as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Kishorganj	11	4	
Jamalpur	11	7	
Netrokona	12	0	
Tangail	10	8	

Faridpur.—Rainfall at Sadar 0·65, Goalundo 3·54, Madaripur 0·10. Weather sultry. State and prospects of crops good. Fodder available. No cattle-disease. Common rice sells at 11 seers the rupee.

Backergunge.—Rainfall at Sadar 2·82. Fall general. Weather seasonable. Transplantation of *aman* continues. Prospects fair. Cattle-disease reported from thana Matbari. Fodder sufficient. Common rice sells at 13 seers (*aus*) and 12 seers (*aman*) per rupee.

Tippera.—Rainfall at Sadar 3·08, Brahmanbaria 1·19, Chandpur ·04. Weather seasonable Prospects fair. *Aman* paddy thriving but damaged by flood in places. Harvesting of jute and transplantation of *aman* almost completed. Fodder and water sufficient. No cattle-disease. Common rice sells at 14 seers per rupee.

Noakhali.—Rainfall at Sadar 1·98, Feni 1·44. Weather seasonable. Harvesting of *aus* nearly finished. Transplantation of *aman* continues. Prospects fair. Condition of betelnut good. No cattle-disease. Fodder and water sufficient. Common rice sells at Sadar at 12 seers, and at Feni at 13 seers per rupee.

Chittagong.—Rainfall at Sadar 1·75, Cox's Bazar 4·24. Transplantation of *aman dhan* is still going on. Cattle-disease continuing. Fodder and water sufficient. Rice selling at 12 seers 11 chitaks per rupee.

Chittagong Hill Tracts.—Rainfal at Sadar 1·71. Fall general. Weather warm with occasional rain. *Joom* harvesting continues. Paddy crop good. Cotton and *til* bad. Common rice selling at 16 seers per rupee. No cattle-disease.

Patna.—Rainfall at Sadar 0·85, Bihar 1·58, Dinapore 1·25, Hilsa 1·70, Bikram 2·63 Weather hot and cloudy. Harvesting of Indian-corn continues. Transplantation of paddy nearly completed. More rain still wanted. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Patna	12	0	per rupee.
Barh	12	0	
Bihar	10	0	
Dinapore	12	4	

Gaya. Rainfall at Sadar 2·64, Jahanabad 0·66, Aurangabad 1·09, Nawadah 1·04. Weather hot and cloudy. *Bhadoi* crops being harvested. Prospects of standing crops fairly good, if *hathia* rain falls general. No cattle-disease. Fodder and water for cattle ample. Average price of common rice is 11 seers 6 chitaks per rupee.

Shahabad.—Rainfall at Sadar 1·31, Buxar 1·71, Bhabhua 2·32, Sasaram 1·16, Dehri 1·50. Weather hot and cloudy. Harvesting of *bhadoi* continues. Standing crops doing well. Fodder and water sufficient. No cattle-disease reported. Rice sells at Sadar at 11 seers a rupee.

Saran.—Rainfall at Sadar 1·85, Siwan 3·29, Gopalganj 3·85. Weather cloudy and very hot. Standing crops doing well. *Bhadoi* crops being harvested in places. Transplantation of paddy nearly finished. More rain wanted. Fodder and water sufficient. No cattle-disease Common rice sells at 13 seers per rupee.

Champaran.—Rainfall at Sadar 8·62, Bettiah 2·88. Weather hot and cloudy. Harvesting and threshing of *bhadoi* crops still going on. Prospects good. Cattle-disease reported. Fodder and water sufficient. Common rice sells at 15¼ seers and maize at 24½ seers per rupee.

Muzaffarpur.—Rainfall at Sadar ·46, Hajipur ·17, Sitamarhi 2·55. Weather hot and cloudy occasionally. Transplantation of paddy finished. Harvesting of *bhadoi* crops continues. Prospects fair. Fodder and water sufficient. Prices are—Common rice sells at 11½, and maize at 22 seers a rupee.

Darbhanga.—Rainfall at Sadar 3·53, Samastipur 2·61, Madhubani 2·15. Prospect of standing crops fair. Fodder and water sufficient. Cattle-disease is reported from Dalsingsarai police-station. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	9	per rupee.
Samastipur	12	8	
Madhubani	11	6	

Monghyr.—Rainfall at Sadar 0·13, Begusarai ·91, Jamui 2·03. Weather hot and cloudy. *Bhadoi* harvesting commenced. Sowing of chillies and sweet potatoes going on. Sugarcane and standing crops doing well. Paddy benefited by recent rains. No cattle-disease. Fodder and water ample. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	7	per rupee.
Begusarai	11	8	
Jamui	11	0	

Bhagalpur.—Rainfall at Sadar 4·22, Banka 3·65, Madhipura 7·50, Supaul 8·72. Weather cloudy. Harvesting of *marua* completed and that of *bhadoi* nearly completed. Transplantation of *aghani* paddy going on. Prospects good. Water and fodder sufficient. Cattle-disease reported from a few places. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	6	per rupee.
Banka	12	8	
Madhipura	13	8	
Supaul	15	0	

Purnea.—Rainfall at Sadar 2·54, Araria 3·31, Kishanganj 1·74. Fall general and good. Weather seasonable. Jute being harvested. Prospects of *aghani* paddy good. A few cases of cattle-disease reported from Palasi outpost. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	Ch.		
Sadar	10	0	(*aghani*)	per rupee.
Kishanganj	11	0	(*aghani*)	per rupee.
Araria	14	0	(*bhadoi*)	per rupee.

Malda.—Rainfall at Sadar 2·48, Chanchal 3·25, Gajol 3·54, Sibganj ·87. Fall general. Weather hot and cloudy. Prospects of winter rice good. Harvesting of *bhadoi* completed. Cutting of jute not yet finished. No cattle-disease. Fodder and water sufficient. Common rice sells at 11½ seers per rupee.

Sonthal Parganas.—Rainfall at Sadar 1·01, Deoghur 1·25, Godda 3·67, Jamtara 1·58, Pakaur 3·26, Rajmahal 3·15. Weather hot with occasional showers. Standing crops doing well. *Aus dhan* being harvested. Fodder and water sufficient. Common rice sells at Sadar at 12 seers per rupee.

Cuttack.—Rainfall at Sadar 1·32. Fall general. Weather seasonable. Early *beali* being cut. Late *beali* and *sarad* progressing well. Prospects fair. No cattle-disease. Fodder and water sufficient. Common rice sells at 13¾ seers (old) and 15¾ seers (new) per rupee at Sadar.

Balasore.—Rainfall at Sadar nil. *Beali* being reaped. *Sarad* being weeded. Prospects good. Standing crops with sugarcane thriving. Rice sells at 13 seers a rupee at Sadar. Fodder and drinking water sufficient. No report from Bhadrak.

Angul.—Rainfall at Sadar 0·24, Tikerpara 0·92, Bissipara 2·41. Weather hot and cloudy. Weeding of paddy, sowing of *rabi* and harvesting of early miscellaneous crops continue. Common rice sells at 12 seers per rupee at Sadar and Khondmals.

Puri.—Rainfall 0·63. Weather hot. Weeding of winter rice in progress. Harvesting of *bhadoi* paddy and *mundua* continues. Sugarcane and other miscellaneous crops doing well. Fodder and water-supply sufficient. Common rice sells at 15 seers per rupee. Cattle-disease prevailing at places.

Hazaribagh.—Rainfall at Sadar 2·40, Giridih 0·93. Fall not general. Weather seasonable. Harvesting of *bhadoi* going on. Cattle-disease reported from three thanas. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Ranchi.—Rainfall at Sadar 0·28. Weather hot and cloudy. Prospects of crops good. Sowing of *sirguja* continues. Cattle-disease reported from Ranchi, Karra and Sisai thanas. Fodder and water sufficient. Common rice selling at 14 seers per rupee.

Palamau.—Rainfall at Sadar 2·01. Weather seasonable. *Bhadoi* harvesting going on. Sugarcane and rice crops doing well. *Rabi* fields being prepared. Cattle-disease continues in places. Fodder and water sufficient. Prices at Sadar are—Rice 11½ seers, maize 14 seers per rupee.

Manbhum.—Rainfall at Sadar 0·56, Gobindpur 0·64. Weather seasonable. Prospects of crops good. More rain, however, wanted. Fodder and water sufficient. Cattle-disease not reported. Average price of common rice at Sadar is 12 seers, and at Gobindpur 10 seers 6 chitaks per rupee.

Singhbhum.—Rainfall 0·32. Prospect of crop favourable. Harvesting of *gora* paddy in progress. Average price of rice is 12 seers 6 chitaks per rupee in the district; at Chaibassa 12 seers per rupee.

General Summary.—Rain fell during the week in every district except Balasore, and the fall was heavy in parts of North Bengal. The districts of Burdwan, Bankura, Howrah, 24-Parganas, Jessore, Patna, Saran and Manbhum require more rain. Harvesting of *bhadoi* crops still going on. Sugarcane doing well. Transplantation of winter rice is almost finished and sowing of *rabi* has commenced at places. Prospects fair. Cattle-disease reported from 13 districts. Fodder and water generally sufficient. The price of common rice has risen in 7 districts, fallen in 10, and is stationary in the rest (30).

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

The total fall from 1st January to 20th September 1902	58·15
The average fall of the corresponding period for 24 years, Surveyor-General's Office	55·95

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; t, thunder; p, passing temporary showers; g, gloomy; ∠, lightning.

N.B.—In the weekly abstract from 31st August to 6th September 1902, *read* 29·658 *for* 29·68 as the mean pressure barometer on the 5th September 1902.

RESOLUTION ON THE TRIENNIAL REPORT ON THE ADMINISTRATION OF THE REGISTRATION DEPARTMENT IN BENGAL FOR THE YEARS 1899-1900, 1900-1901 AND 1901-1902.

RESOLUTION—No. 1315P.—D.

REGISTRATION.

Dated Darjeeling, the 27th September 1902.

READ—

The Triennial Report on the Administration of the Registration Department for the years 1899-1900, 1900-1901, and 1901-1902.

Read also—

The Triennial Report on the Administration of the Registration Department for the years 1896-97, 1897-98, and 1898-99, and the Resolution of Government recorded thereon.

Read also—

The Statistical Returns for the years 1899-1900 and 1900-1901.

THIS is the first Triennial Report submitted to Government after the issue of the orders contained in Home Department letter No. 2741, dated the 26th March 1901, for the curtailment of annual reports, and it has been prepared by the Hon'ble Mr. Tarini Kumar Ghose, who took charge of the Registration Department from Khan Bahadur Delawar Hossain Ahmed on the 5th April 1900. Only eight statistical tables, prescribed by the Government of India, have been appended to this report, but some additional information is

furnished in five statements which are intended for the Bengal Government only.

2. Steady progress has been made during the triennium in the operations of the Registration Department. The number of offices has risen yearly since 1887, and there are now 442 offices open for the registration of documents; only seven of these do not yet pay their way, but their progress is being carefully watched, and some of them are retained in spite of the loss on their working for the convenience of isolated tracts or for the encouragement of registration in backward districts. The receipts of the department increased very largely in the last triennium, and the increase has been well maintained during the period under review, the figures for 1901-1902 being the highest yet reached. Inasmuch as by far the greatest portion of the expenditure is in the shape of commission, the cost of the department has risen in only a slightly less ratio than the receipts; in his present report the Inspector-General has omitted to include the expenses and receipts of his own office and that of the Registrar of Companies, but, even allowing for the expenditure on these, the surplus during the triennium and during the last year is higher than it has ever been before. The ordinary items of expenditure remain proportionately constant, but the expenditure on sadar registration offices finds no place in these accounts; hitherto these offices have formed part of the district offices and have been held in the same buildings; but with the increase of district work there is a growing demand for more accommodation in the Collectorate offices, and the time has come when separate buildings will have to be more frequently provided for registration offices, and, considering the large profits made by registration, it is only fair that these buildings should be a charge on that department.

3. The growing recognition of the benefits of registration is gauged not only by the larger number of offices open, but also by the increase in the number of optional registrations. The famine of 1897 caused an immense increase in the number of mortgages of immoveable property under the value of Rs. 100 and in the number of obligations for the payment of money; the circumstances were exceptional and there was a sharp fall in the next three years; but the total number of optional registrations has risen steadily during the period under review, and is now very considerably in excess of the numbers in the years preceding the famine.

4. The statistics of registration throw a side-light on the condition and tendencies of the people, and they are valuable from that point of view. The most important figures are those for the sale of immoveable property, and the registration of these deeds is compulsory. In 1895-96 the number of such transactions affecting property of the value of Rs. 100 and upwards was 90,237; in 1897-98 it rose to 116,382, but fell again in the following year; since 1899-1900 the number has steadily risen, and in the last year of the triennium it was 130,243. But an examination into the details of the figures does not support the obvious interpretation that the holders of large estates are being impoverished and forced to sell; the explanation would appear to be that the value of land has risen and brought into this category a number of petty holdings the value of which in former years would have been under Rs. 100. Roughly, the classes of estates that come under this head are—

(1) Revenue-paying estates.
(2) Shares in these.
(3) Revenue-free properties.
(4) Intermediate tenures.
(5) Raiyati holdings at fixed rates.
(6) Others.

The following table shows the number of sale transactions affecting these classes registered in the years 1894-95, 1897-98, and 1901-1902:—

	1894-95.	1897-98.	1901-1902.
Revenue-paying estates ...	2,017	2,134	1,105
Shares in revenue-paying estates ...	13,205	13,619	13,648
Revenue-free estates	9,111	7,221	8,252
Intermediate tenures	51,566	56,483	46,522
Raiyati holdings at fixed rates ...	49,398	59,870	38,469
Others	25,590	29,525	27,281

The number of such transactions is fairly constant and shows no tendency to increase; on the contrary, there has been a noticeable decrease during the last triennium in the number of whole estates, intermediate tenures, and raiyati holdings at fixed rates sold; there are no details given from which the relative price of land in these years can be worked out, but the value of holdings at fixed rates has considerably risen. In 1894 these holdings were sold at an average of 12 2 years' purchase; since then the price has gone up, and in 1902 the average is 22 years' purchase. There is a tendency to a decline in the number of purchases made by mahajans, while the other classes of purchasers remain proportionately constant. These figures can give rise to no anxiety as to the condition of the landholders of the Province; far from any signs of deterioration being apparent, they are evidently more than maintaining their position.

5. As the total of these classes in the last year shows a considerable decrease as compared with the other years, the increase in the total number of transactions affecting immoveable property above the value of Rs. 100 must, it would seem, be at all events partially due to the rise in value of raiyati holdings with occupancy rights and the consequent inclusion of some of these in this category. The increase in the number of transactions affecting this class has been most marked of recent years; in 1894-95 the number was 145,805; in 1901-1902 it had risen to 239,489. The average value has risen from 13 years' purchase in the former year to 19 years' purchase in the last year; the value seems extraordinarily high in Gaya and Ranchi. The districts where these transactions are most common are Midnapore, Mymensingh, Tippera, Muzaffarpur and Puri; the increase is common to nearly all the districts, but is most marked in Orissa, and is least in the Rajshahi Division. The number of mahajan purchasers has slightly increased in these years, but in proportion to the number of these transactions the number of such purchasers has certainly decreased; the number of landlord and other purchasers has remained fairly constant, and the great increase has been in the number of raiyat purchasers. These have increased from 109,806 in 1894-95 to 179,418 in 1901-1902. The large increase in the number of raiyat purchasers negatives the explanation that the raiyats as a body have been hard pressed and forced to sell their holdings, nor would this explanation fit in with the rise in the value of those holdings. The truth seems to be that the activity of the Settlement Department has awakened the raiyats in many parts to the fact that they possess these rights and that they are of value; the custom of allowing their transfer has been established by the settlement operations or has grown up, and the more improvident raiyats have eagerly realised this new-found asset for which they can obtain a good price from more provident persons. The facts are engaging the attention of the Revenue authorities, but, so far as these figures are concerned, they give every cause for satisfaction as regards the condition of the general body of raiyats.

6. On the other hand, mortgages of immoveable property of the value of Rs. 100 and upwards have steadily increased during the triennium; the increase is spread over almost all the districts. The registration of these is compulsory under the law, but there is reason to believe that it is only comparatively recently that the mahajan has found it necessary to comply with the law, owing to the fact that an unregistered mortgage is not accepted by the Settlement authorities, and to the fact that his personal influence over the raiyat is on the decline. For this latter reason it is reported that in many cases the mahajan will no longer accept a simple note of hand, but requires some tangible security, and this no doubt accounts for the rise in the number of mortgages on property valued at less than Rs. 100. At first sight it would appear that, if this explanation is correct, the number of obligations for the repayment of money registered should decrease; but the registration of these is optional, and if the personal hold of the mahajan over the raiyat is less than before, it would be natural for him to register these obligations as an additional security. On the whole, then, the registration statistics as far as they go give no cause for dissatisfaction as regards the condition of the landholders or raiyats in this Province, except the large increase in the transfers of occupancy rights, and the fact that by far the largest number of purchasers of these are themselves raiyats considerably lessens the anxiety on that score.

7. The remaining operations of the Department do not require much comment; the number of leases of all terms has steadily increased, and there appears to be no ground at present for the opinion that the increase in the duty on perpetual leases has stopped their execution. The Lieutenant-Governor again notes with regret that the number of inspections both by the Inspector-General and the Special Inspectors is not satisfactory. It is of the utmost importance to the proper working of the Department that as many different offices as possible should be regularly and periodically inspected. It is not clear how many of the 314 inspections were second inspections of the same office, but the Lieutenant-Governor wishes to impress on the Inspector-General the absolute necessity of inspecting as many offices as possible himself, and seeing that the rest are inspected each at reasonable intervals by the three Inspectors.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Inspector-General of Registration, for information and guidance.

Ordered also that a copy of the Resolution, together with a copy of the Report, be submitted to the Government of India, in the Home Department, for information.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal.

C. E. BUCKLAND,

Chief Secretary to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 29th September 1902.

Burdwan.—Rainfall at Sadar 1·87, Kalna 1·82, Katwa 1·81, Raniganj 1·71. Weather fine. Harvesting of *aus* still continues. More rain wanted. Fodder and water sufficient. No cattle-disease. Common rice sells at 11 seers per rupee.

Birbhum.—Rainfall at Sadar 2·25, Rampur Hât 1·80. Weather fair. Crops thriving. Common rice sells at 12½ seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Sadar 2·80. Standing crops doing well. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Midnapore.—Rainfall at Sadar 2·16, Contai 2·11, Tamluk 1·73, Ghatal 1·03. Weather hot and cloudy. Harvesting of *aus* continues. Agricultural prospects good, but more rain wanted in parts of Sadar. Fodder and water sufficient. Cattle-disease reported from Binpur thana. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Contai	12	0	
Tamluk	11	0	
Ghatal	12	0	

Hooghly.—Rainfall at Sadar 1·55, Serampore 2·59, Arambagh 1·52. Weather seasonable. Weeding of *aman* and steeping of jute continue. Prospects of standing crops good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Serampore	10	3	
Arambagh	11	5	

Howrah.—Rainfall at Sadar 0·78, Ulubaria 0·89. Fall general. The outturn of the *aus* paddy has been average. The *aman* crop doing well. Cutting and steeping of jute continues. No cattle-disease. Fodder and water sufficient. Rice sells at 11 seers per rupee everywhere within the district.

24-Parganas.—Rainfall at Sadar 0·64, Barasat 2·58, Basirhat 2·12, Diamond Harbour 1·52. Rain moderate. Weather clearing up. State and prospects of crops good. More rain wanted in Diamond Harbour. *Aus* and jute still being harvested. Lands being prepared for the *rabi* crops in Basirhât. Condition of cattle good. Supply of fodder and water sufficient. Common rice sells at 11 seers in Sadar and Barasat; 10¼ to 10½ seers in other subdivisions.

Nadia.—Rainfall at Sadar 2·31, Kushtia 4·95, Chuadanga 3·03, Meherpur 2·92, Ranaghat 1·99. Prospects improved by recent rain. Steeping of jute going on. Sugarcane coming up well. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Kushtia	11	0	
Chuadanga	11	4	
Meherpur	13	5	
Ranaghat	12	0	

Murshidabad.—Rainfall at Sadar 1·96, Kandi 2·82, Jangipur 4·90, Lalbagh 6·50. Weather seasonable. Prospects of *aman*, jute and sugarcane good. Jute being cut and steeped at Jangipur. The sowing of *rabi* crop continues. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Kandi	13	12	
Jangipur	12	0	
Lalbagh	11	0	

Jessore.—Rainfall at Sadar 1·45, Jhenida 2·34, Magura 7·48, Narail 4·28, Bangaon 1·27. Weather seasonable. Prospects of crops good. Fodder and water sufficient. Cattle-disease reported from Salikha outpost in Magura subdivision. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Jhenida	12	0	
Magura	11	0	
Narail	11	8	
Bangaon	13	0	

Khulna.—Rainfall at Sadar 3·20, Bagerhat 5·13, Satkhira 3·28. Weather seasonable. Transplantation of *aman* completed. Transplantation and sowings estimated at 100 per

cent., doing well. State of cocoanut favourable. Fodder and water sufficient. Cattle-disease reported from Khulna, Dumuria, and Fakirhat. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	5½	per rupee.
Bagerhat	11	10	
Satkhira	10	8	

Rajshahi.—Rainfall at Sadar 5·65, Nator 3·40, Naugaon 4·67. Weather seasonable. Harvesting of jute and transplantation of *aman* completed. Prospects of crop very good. Common rice selling at 12½ seers per rupee.

Dinajpur. Rainfall at Sadar 6·48. Fall in the district general, varying from 16·40 to 3·25. Weather mostly gloomy. Standing crops good. Steeping of jute continues. Cattle-disease reported from two thanas. Fodder and drinking-water plentiful. Rice selling at 12 seers at Sadar and 13 seers at Thakurgaon per rupee.

Jalpaiguri. Rainfall at Sadar 17·04, Alipore Duars 14·46. Fall general. Weather rainy with easterly high wind. Prospect of standing *haimanti* paddy favourable. Steeping of jute going on. Common rice sells at 11 seers a rupee. Fodder and water sufficient.

Darjeeling.—Rainfall at Sadar 20·42, Kurseong 19·21, Siliguri 23·58. Weather terribly wet. *Hills—Haimanti dhan, bara* and *chhota marua* doing well. *Terai*—Transplanting of *haimanti* paddy finished. Reaping of jute and *bhadoi* going on. Prospects good. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	9	0	

Maize sells at Darjeeling at 20 seers and at Kalimpong at 34 seers per rupee.

Rangpur.—Rainfall at Sadar 9·32, Gaibanda 8·37, Nilphamari 9·18, Kurigram 10·26. Weather cloudy and rainy. Cutting and steeping of jute and transplantation of *aman* still going on. Water and fodder sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	9	8	per rupee.
Gaibanda	10	0	
Kurigram	9	0	
Nilphamari	10	8	

Bogra.—Rainfall at Sadar 4·12. Fall general. Harvesting of jute going on. Prospects good. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Pabna.—Rainfall at Sadar 3·39, Sirajganj 6·83. Weather cloudy and rainy. Showers general. Prospects of *aman*, sugarcane and *hardi* fair. Fodder sufficient. No cattle-disease. Common rice sells at 10 seers per rupee.

Dacca.—Rainfall at Sadar 2·28, Manikganj 2·66, Munshiganj 2·19, Narayanganj 2·28. Prospects of crops fair. Weather seasonable. Fodder available. No cattle-disease. Common rice sells at 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 2·63, Jamalpur 3·19, Kishorganj 0·79, Netrokona 3·34, Tangail 2·89. Weather seasonable. Jute-steeping continues. *Aman* paddy doing well. Fodder scarce in parts. Water sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Kishorganj	11	2	
Jamalpur	12	4	
Netrokona	12	0	
Tangail	10	12	

Faridpur.—Rainfall at Sadar 3·38, Goalundo 4·17, Madaripur 3·19. Weather stormy and rainy. Prospects of crops good. Fodder available. No cattle-disease. Common rice sells at 11 seers the rupee.

Backergunge.—Rainfall at Sadar 6·90. Fall general. Weather seasonable. Transplantation of *aman* progressing. Prospects fair. Cattle-disease reported from thana Matbari, but abating through inoculation. Fodder sufficient. Common rice sells at 13 seers (*aus*) and 12 seers (*aman*) per rupee.

Tippera.—Rainfall at Sadar 1·19, Chandpur 2·43, Brahmanbaria 2·11. Weather seasonable. Prospects fair. Transplantation of *aman* paddy completed. Reaping of jute still going on in Brahmanbaria. *Aman* thriving well. Fodder and water sufficient. No cattle-disease. Common rice sells at 14 seers per rupee.

Noakhali. Rainfall at Sadar 2·85, Feni 2·07. Fall general. Weather stormy and cloudy. Harvesting of *aus* completed. Transplantation of *aman* nearly finished. Prospects fair. Cattle-disease at Sudharam. Fodder and water sufficient. Common rice sells at Sadar at 12 seers, and at Feni at 13 seers per rupee.

Chittagong.—Rainfall at Sadar 1·27, Cox's Bazar 3·35. Transplantation of *aman dhan* is nearly finished. Water and fodder sufficient. Common rice selling at 12¾ seers per rupee.

Chittagong Hill Tracts.—Rainfall at Sadar ·28. Weather Fair. Harvesting continues. No cattle-disease. Common rice sells at 13 seers per rupee.

Patna.—Rainfall at Sadar 5·08, Barh 7·80, Bihar 2·83, Dinapore 5·10, Hilsa 4·12, Bikram 4·45. Weather clear with west wind. Prospect of paddy crops much improved by the recent rain. No cattle-disease. Fodder and water sufficient. Common rice sells as follows: —

	Srs.	ch.	
Patna	12	0	per rupee.
Barh	12	0	
Bihar	10	0	
Dinapore	12	8	

Gaya.—Rainfall at Sadar 2·79, Jahanabad 3·67, Aurangabad 4·06, Nawadah 2·42. Weather hot in the day and cold in the night. Harvesting of the *Bhadoi* crops approaching completion. Paddy doing well so far. No cattle-disease except in a few villages in the Nawadah subdivision. Fodder and water for cattle ample. Average price of common rice is 11½ seers per rupee.

Shahabad.—Rainfall at Sadar 3·95, Buxar 4·58, Bhabhua 6·79, Sasaram 2·18, Dehri 3·65. Weather seasonable. Harvesting of *bhadoi* going on. Sugarcane and paddy doing well. Fodder and water sufficient. No cattle-disease. Rice sells at Sadar at 11 seers a rupee.

Saran.—Rainfall at Sadar 4·84, Siwan 3·11, Gopalganj 2·42. Weather seasonable. Harvesting of *bhadoi* in progress. Paddy and other standing crops doing well. Fodder and water sufficient. No cattle-disease. Common rice sells at 13 seers per rupee.

Champaran.—Rainfall at Sadar 5·38, Bettiah 3·19. Weather cloudy and rainy. Prospects of standing crops good. Threshing of *bhadoi* crops still going on. Ploughing of lands for *rubi* commenced. Cattle-disease reported. Fodder and water sufficient. Common rice sells at 15 seers and maize at 25½ seers per rupee.

Muzaffarpur.—Rainfall at Sadar 8·67, Hajipur 5·33, Sitamarhi 7·42. Weather generally cloudy. Harvesting of *bhadoi* crops continues. Prospects good. Fodder and water sufficient. Prices are —Common rice 11¼, and maize 25 seers a rupee.

Darbhanga.—Rainfall at Sadar 11·04, Samastipur 7·93, Madhubani 8·58. Prospect of standing crops good. Fodder and water sufficient. Cattle-disease is reported from Somastipur and Dalsingsarai thanas. Common rice sells as follows: —

	Aghani. Srs.	ch.	*Aus.* Srs.	ch.	
Sadar	12	9	14	0	per rupee.
Samastipur	12	8			
Madhubani	11	11	14	4	

Monghyr.—Rainfall at Sadar 5·08, Begusarai ·83, Jamui 0·56. Weather very hot, cyclonic latterly. *Makai* harvesting nearly completed. *Marua* being harvested. Sowing of chillies and sweet potatoes going on. Paddy crops and sugarcane doing well. Standing crops in Bariarpur outpost in Begusari subdivision reported to be somewhat damaged by Gandak flood. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	14	per rupee.
Begusarai	12	0	
Jamui	11	0	

Bhagalpur.—Rainfall at Sadar 4·00, Banka 1·90, Madhipura 11·51, Supaul 4·67. Weather seasonable. Prospects of *aghani* continue fair. Harvesting of *bhadoi* nearly finished. Sowing of kurthi going on. Fodder and water sufficient. No cattle-disease. Common rice sells as follows: —

	Srs.	ch.	
Sadar	11	6	per rupee.
Banka	12	8	
Madhipura	13	8	
Supaul	16	0	

Purnea.—Rainfall at Sadar 3·79, Kishanganj 14·19, Araria 10·47. Fall general. Jute and *bhadoi* are still being harvested. Prospects on the whole good. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	Ch.	
Sadar	19	0	per rupee.
Kishanganj	11	0	
Araria	14	0	

Malda.—Rainfall at Sadar 3·33, Gajol 4·53, Sibganj 3·39, Chanchal 4·75. Fall general. Weather—mornings cool, days hot. Prospects of winter rice good. Cutting of jute still

going on. No cattle-disease. Fodder and water sufficient. Common rice sells at 11½ seers per rupee.

Sonthal Parganas.—Rainfall at Sadar 5·89, Deoghar 3·77, Godda 4·80, Jamtara 3·45, Pakaur 5·63, Rajmahal 4·37. Weather rainy. Prospects of standing crops favourable. Harvesting of *aus* continues. Fodder and water sufficient. The market rate of common rice is 13 seers at Sadar.

Cuttack.—Rainfall at Sadar 2·80. Fall general. Weather seasonable. Early *beali* being cut. Late *beali* and *sarad* progressing well. Prospects fair. Cattle-disease reported from places. Fodder and water sufficient. Common rice sells at 13¾ seers (old) and 15¾ seers (new) per rupee at Sadar.

Balasore.—Rainfall at Sadar 1·50. Fall general. *Beali* being harvested and *sarad* weeded. Standing crops with sugarcane progressing. Rice sells at 13 and 15 seers a rupee at Sadar and Bhadrak respectively. Fodder and drinking-water sufficient.

Angul.—Rainfall at Sadar 0·53, Chhendipada 0·39, Tikerpara 0·37, Bissipara 1·49. Weather hot and cloudy. Sowing of *rabi* and harvesting of *bhadoi* crops continue. Common rice sells at 13 and 12¾ seers per rupee at Sadar and Khondmals respectively. Fodder and water ample.

Puri.—Rainfall 2·50, which is general throughout the district. Weather seasonable. Harvesting of *mandua* and *bhadoi* paddy is nearly over ; outturn cent. per cent. Winter rice, sugarcane, and other miscellaneous crops growing well. Fodder and water-supply sufficient. Common rice sells at 15 seers per rupee.

Hazaribagh.—Rainfall at Sadar 3·09, Giridih 5·34. Fall general. Cattle-disease reported from two thanas. Harvesting of *bhadoi* going on. Lands being prepared for winter crops. Fodder and water sufficient. Common rice sells at 14¼ seers per rupee.

Ranchi.—Rainfall at Sadar 2·10. Weather seasonable. Harvesting of *bhadoi* paddy and sowing of *sirguja* in progress. Cattle-disease reported from Ranchi, Silli and Karra thanas. Fodder and water sufficient. Average price of common rice is 15 seers per rupee.

Palamau.—Rainfall at Sadar 6·83. Weather seasonable. *Bhadoi* harvesting continues. Sugarcane and rice crop doing well. Cattle-disease in a few places. Fodder and water sufficient. Prices at Sadar are—Rice 11¼ seers, and maize 26 seers per rupee.

Manbhum.—Rainfall at Sadar 9·34, Gobindpur 4·22. Fall general except in thana Katras. Weather seasonable. Prospects of crops good. Fodder and water sufficient. Cattle-disease not reported. Average price of common rice at Sadar is 12 seers, and at Gobindpur 10 seers 14 chitaks per rupee.

Singhbhum.—Rainfall 3·66. Prospect of crop excellent. Harvesting of *gora* paddy continues. Average price of rice is 12 seers 10 chitaks per rupee in the district; at Chaibassa 12 seers per rupee.

General Summary.—The rain fall during the week was general and heavy at places. In parts of North Bengal the fall was excessive. More rain is required in Burdwan and parts of Midnapore and the 24-Parganas. Crops in one outpost of the Begusarai subdivision of the Monghyr district are reported to be somewhat damaged by flood. Sugarcane doing well. Harvesting of *bhadoi* crops approaching completion. Transplantation of winter rice is almost over and weeding has commenced at places. Prospects fair. Cattle-disease reported from 11 districts. Fodder and water generally sufficient. The price of common rice has risen in 5 districts, fallen in 11, and is stationary in the rest (31).

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,

The 30th September 1902.

IRRIGATION DEPARTMENT, BENGAL.

Statement showing heights over mean sea-level and low water in the rivers Ganges, Bhagirathi, Jalangi, and Brahmaputra for the month of August 1902, and the highest reading of each gauge over M. S. L. since 1876.

	Inches
The total fall of rain from 21st to 27th September 1902	0·64
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·19
The total fall from 1st January to 27th September 1902	58·79
The average fall of the corresponding period for 24 years, Surveyor-General's Office	58·14

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; ⌓ dew; t, thunder.

G. W. KÜCHLER,
for Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Alipore (Calcutta), the 29th September 1902.

FINAL FORECAST OF THE JUTE CROP IN BENGAL FOR THE SEASON, 1902.

THE following Noto is published for general information.

W. C. MACPHERSON,
Offg. Secy. to the Govt. of Bengal.

The 2nd October 1902.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final forecast of the Jute Crop in Bengal for the Season 1902.

SINCE the issue of the preliminary forecast, weather conditions in the jute districts have been normal, and the prospects of the crop remain on the whole unchanged.

2. As the result of further enquiries, District Officers now return the area cropped at 2,106,250 acres, as compared with 2,107,500 acres in the preliminary forecast, but I see no reason to alter my estimate of 2,200,000 acres as the area sown.

3. Of the 26 jute-growing districts, seven increase their estimates, nine lower them, while from the remaining ten districts the estimates are unchanged. The estimate for Pabna is reduced from 93 to 75 per cent., while that for the Dacca district is raised from 58 to 79 per cent. Rangpur increases its estimate from 75 to 88 per cent.; while, on the other hand, Rajshahi and Dinajpur each reduce theirs by 10 per cent., and Burdwan district from 100 to 76 per cent. of a normal crop.

4. Taking the Province as a whole, the average outturn estimated by District Officers works out to 75·8 per cent. of a normal yield, as compared with 75 per cent. previously estimated. For the reasons stated in my preliminary forecast, I believe that the outturn has been underestimated, and I adhere to my previous estimate of 80 per cent. of a normal crop. Taking the normal yield as three bales per acre, the outturn for the Province may be expected to reach $\frac{80}{100}$ths of 3 × 2,200,000 acres = $52\frac{4}{5}$ lakhs of bales, as previously estimated.

C. G. H. ALLEN,

Offg. Director of the Dept. of Land Records and Agriculture, Bengal.

DARJEELING,

The 22nd September 1902.

APPENDIX I.

Final Report on the Jute Crop of Bengal, 1902.

Division.	District.	Total area of the district.	Estimated total area under cultivation.	Approximate normal area under jute.	Approximate area sown last year (1901).	Estimated area sown this year (1902).	Taking 100 to represent the normal outturn, how much represented outturn last year (1901)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1902)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11
		Acres.	Acres.	Acres.	Acres.	Acres.				
Burdwan ...	Burdwan	1,726,080	1,284,200	11,000	11,000	11,000	87	76	The decrease in estimated outturn is due to insufficient rainfall.	
	Midnapore ...	3,292,800	2,100,000	14,000	12,500	12,900	84	100	....	
	Hooghly	1,057,360	489,900	12,000	13,600	13,300	98	90	Unfavourable rain in Serampore and Sadar subdivisions have caused a slight reduction in the final estimate.	
Presidency	24-Parganas ...	1,344,640	1,054,200	68,000	53,700	59,300	115	100	The figure in column 4 has been revised.	
	Nadia	1,788,160	630,500	47,800	36,000	31,000	78	97	The normal area has been revised. The area sown this year as shown in the preliminary forecast has been verified and correct figures are reported now. There was no extension of cultivation this year owing to the low prices of jute. The crops actually grown and harvested in this district are little below the normal crops ordinarily obtained.	

Division.	District.	Total area of the district.	Estimated total area under cultivation.	Approximate normal area under jute.	Approximate area sown last year (1901).	Estimated area sown this year (1902).	Taking 100 to represent the normal outturn, how much represented outturn last year (1901)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1902)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.

Presidency—*concld.*	Murshidabad ...	1,873,440	985,500	21,700	24,000	16,600	93	95	The jute in this district is mostly a poor crop, grown for local consumption. The lack of rain in June is said to account for the poor outturn in the Sadar this year.	
	Jessore	1,872,000	1,203,800	40,800	33,800	33,600	81	74	The figures in columns 4, 5, and 7 have been revised.	
	Khulna	3,103,948	870,000	20,300	13,000	11,600	98	85	The decrease in the area is due to excessive early rains.	
	Rajshahi	1,663,040	1,262,100	108,100	112,200	100,000	95	75	As stated in the first forecast reduction of area is due to low price of jute last year and low percentage of outturn due to rain in excess.	
	Dinajpur ...	2,526,080	1,697,800	102,000	70,000	80,000	89	90	The outturn in the district as a whole is normal, though from Thakurgaon subdivision it is reported to be below the average owing to excess of rain.	

Division	District								Remarks
Rajshahi	Jalpaiguri	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	77	76	The figure in column 7 has been revised after careful enquiry. Excessive rainfall retarded the growth of the plants.
	Darjeeling (plains)	744,960	148,000	2,500	2,500	2,500	76	90	The outturn has been slightly better than was anticipated when the preliminary forecast was submitted.
	Rangpur	2,231,640	1,362,750	340,000	370,500	327,200	[illegible]	53	Heavy rainfall at the time of sowing and weeding was unfavourable to the crop, hence the outturn is estimated to be below the normal.
	Bogra	562,750	600,000	85,000	71,000	70,000	[illegible]	70	The decrease in the area and outturn is due to the untimely and excessive rainfall this year. On enquiry no reason could be found to change the area estimated in the preliminary forecast. The crop grown this year is found to be below the normal crop for the causes shown above.
	Pabna	[illegible]	[illegible]	144,[illegible]	[illegible]	153,000	10[illegible]	75	It is reported by the Subdivisional Officer of Sirajganj where jute is more extensively cultivated than in the Sadar subdivision that excessive rainfall having caused damage to the crop of about one-eighth of the area originally sown with jute, this area was subsequently resown with paddy. The excessive rainfall also stunted the growth of jute plants and retarded the weeding operations. High floods also damaged the crop to some extent, hence the outturn is estimated to be smaller.
Dacca	Dacca	1,780,[illegible]	1,213,50[illegible]	171,000	1[illegible]	153,00[illegible]	1[illegible]2	73	The decrease in the area sown and in the outturn is due to the untimely and abnormal rain during the sowing season.
	Mymensingh	4,062,45[illegible]	2,405,700	582,100	545,500	500,000	1[illegible]8	70	Owing to excessive rain early in the year, a reduced area has been sown, and the outturn will be less than normal for the same reason.
	Faridpur	1,450,840	1,116,000	101,000	105,000	110,000	10[illegible]	75	There is no reason to change the figures shown in the preliminary forecast. The outturn has been below the normal owing to excessive rain during the growing season.
	Backergunj	2,335,[illegible]	1,408,[illegible]	10,000	1[illegible],000	10,000	1[illegible]0	50	Excessive rainfall throughout the season has been very prejudicial to the growing season. Hence the low outturn.

Division.	District.	Total area of the district.	Estimated total area under cultivation.	Approximate normal area under jute.	Approximate area sown last year (1901).	Estimated area sown this year (1902).	Taking 100 to represent the normal outturn, how much represented outturn last year (1901)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1902)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11
		Acres.	Acres.	Acres.	Acres.	Acres.				
Chittagong	Tippera	1,594,580	1,188,400	285,000	292,000	235,000	88	50	The decrease in the area sown and in the outturn, is due to unseasonable rainfall, as was noticed in the preliminary forecast. The crop actually grown is below the normal crop ordinarily obtained in this district.	
	Noakhali	1,052,800	784,800	3,500	7,000	2,100	85	30	The decrease in column 4 is due to revision of estimate, as explained in the preliminary forecast. The decreases both in the area sown and in the estimated outturn, are due to excessive rainfall at the time of sowing.	
	Bhagalpur ..	2,704,640	2,697,000	22,400	22,900	22,200	100	96	From enquiries made the area sown and the proportion it bears to the normal area, have been ascertained. Sub-divisional Officer, Madhipura, reports that deficient rainfall is the cause of low outturn.	

Bhagalpur ...	Purnea ..	3,185,520	1,680,000	53,000	53,000	51,000	90	75	This year's outturn has not been good. There were heavy rains and floods at the latter part of the season and jute on low lands got damaged. Low prices of last year have discouraged cultivation somewhat, hence reduced area.	The figures in columns 4 and 7 have been revised.
	Malda ..	1,216,000	672,800	32,500	30,900	29,200	87	100	The area was accurately estimated in the preliminary forecast. The outturn is equal to a normal crop.	
Orissa ...	Cuttack ...	2,323,200	1,161,200	4,900	5,600	5,900	90	100	Owing to favourable rainfall, the area sown has increased by about 300 acres and an average outturn is expected, since there has been no damage to this crop either by flood or deficient rainfall.	
	Balasore ...	1,334,369	570,800	2,600	4,600	5,290	85	100	The increase in area and outturn is due to seasonable rains.	
	Total	49,744,430	30,664,700	2,330,100	2,263,800	2,106,300	96*	91*		* As estimated by this Department.

PRELIMINARY FORECAST OF THE BHADOI CROPS OF BENGAL, 1902.

The following Note is published for general information.

W. C. Macpherson,
Offg. Secy. to the Govt. of Bengal.

The 2nd October 1902.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Preliminary Forecast of the Bhadoi crops of Bengal, 1902.

Explanatory.—The chief *bhadoi* non-food crops of the Province are jute, indigo and cotton, and they are forecasted separately. *Bhadoi til* is included in the oilseeds forecast, and this report deals mainly with food-crops, of which the most important are *bhadoi* paddy, Indian-corn and millets. These three together make up more than four-fifths of the total area under all the *bhadoi* food-crops. *Bhadoi* paddy is chiefly grown in Bengal and Orissa, and occupies 60 per cent. of the total *bhadoi* food-crop area. Maize and millets predominate in Bihar and occupy 26 per cent. of this area.

2. *Character of the season.*—The rainfall in March and April was above the normal almost all over the Province, and in May also there was fair rain everywhere, except in a few districts of Bihar and Chota Nagpur. June was a comparatively dry month, except in North and East Bengal, where the fall greatly exceeded the normal. The rains broke late in June and were seriously deficient in the Patna and Chota Nagpur Divisions; while, on the other hand, in Eastern Bengal, the fall was excessive, thus aggravating the injury caused by abnormally heavy rain in April and May. July was a seasonable month, but in August the fall was again deficient, except in North and East Bengal, while floods at the end of the month caused much damage in the Muzaffarpur and Darbhanga districts. In the present month there has been copious and general rain throughout the Province. On the whole, the season has not been an unfavourable one, though some damage has been caused by excessive rainfall in Eastern Bengal and by drought in Bihar and Chota Nagpur.

3. *Area sown.*—Since the issue of last year's final forecast on these crops, the estimates of the normal area occupied

by the different *bhadoi* crops have been revised in some districts. Excluding the area sown with jute, indigo, cotton and *bhadoi til*, the normal area under *bhadoi* crops is estimated at 12,512,100 acres. The area sown this year is returned at 12,157,100 acres, as compared with 12,233,700 acres last year. The contraction is attributable to the drought in June.

4. *Character of the crop.*—From the summary of the district returns appended to this forecast, it will be seen that out of 45 districts in the Province, 14 report a crop of 100 per cent. or over; in 8 the outturn is expected to vary between 90 and 100 per cent., and in 10 others between 80 and 89 per cent. Of the rest, 11 anticipate a harvest of 70 to 79 per cent. of the normal. Tippera forecasts a 65 per cent. outturn, while Patna anticipates only 57 per cent. of a normal crop. According to the district returns, the outturn for the whole Province will amount to 87 per cent. of the average, but after allowing for the tendency of the reporting officers to underestimate, I am inclined to think that the yield will not be less than 90 per cent. throughout the Province.

C. G. H. ALLEN,

Offg. Director of Land Records and Agriculture, Bengal.

DARJEELING,

The 22nd September 1902.

Preliminary Forecast of the Bhadoi crops of Bengal, 1902.

District.	Total area of district in acres.	Total area in district estimated to be under cultivation in acres.	Names of *bhadoi* crops.	Approximate normal area under each specified *bhadoi* crop in acres.	Approximate area last year (1901) under each specified *bhadoi* crop in acres.	Estimated area this year (1902) under each specified *bhadoi* crop in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year (1901)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1902)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11

REPORT ON THE ADMINISTRATION OF THE STAMP DEPARTMENT DURING THE THREE YEARS ENDING THE 31ST MARCH 1902.

NOTIFICATION—No. 1752T.—F.

The 27th September 1902.—The following extracts from the Report from the Board of Revenue on the Administration of the Stamp Department for the triennium ending 31st March 1902, are published for general information.

E. W. COLLIN,
Offg. Secy. to the Govt. of Bengal.

No. 972B., dated Calcutta, the 15th August 1902.

From—H. WHEELER, ESQ., Secretary to the Board of Revenue, L. P.,
To—The Secretary to the Government of Bengal, Financial Department.

Member in charge:
THE HON'BLE MR. BOURDILLON, C.S.I.

I AM directed to submit, for the information of Government, the following report on the administration of the Stamp Department during the three years ending the 31st March 1902.

* * * * *

2. Stamp revenue during the period under report was realised under the Indian Stamp Acts, I of 1879 and II of 1899, and the Court-fees Act, VII of 1870, as amended by subsequent enactments. Act II of 1899 came into force on the 1st of July 1899.

* * * * *

FINANCIAL RESULTS.

9. The progress of the revenue derived from the sale of stamps during the last five triennial periods may be gathered from the following figures:—

Year.	Receipts	Charges *	Net revenue.	Percentage of increase of the net revenue of each triennium over the triennium 1887-88 to 1889-90.
1	2	3	4	5
	Rs.	Rs.	Rs.	
Average of three years—				
1887-88 to 1889-90 ...	1,39,64,266	3,39,519	1,36,24,747	...
1890-91 to 1892-93 ...	1,49,83,961	3,60,403	1,46,23,558	7·3
1893-94 to 1895-96 ...	1,64,82,973	3,96,485	1,60,86,488	18·0
1896-97 to 1898-99 ...	1,75,71,597	4,21,284	1,71,50,313	25·8
1899-1900 to 1901-1902 ...	1,85,77,217	4,66,884	1,81,10,333	32·9

* Exclusive of the cost of general supervision.

10. * * * * The revenue collected under both the Stamp and Court-fees Acts during 1901-1902 amounted to Rs. 1,90,17,932 and exceeded the receipts of any other year during the triennium, being Rs. 5,83,102 more than in 1900-1901, and Rs. 7,39,044 more than in 1899-1900. The increase of revenue occurred both under judicial and non-judicial stamps. While the receipts under the former head received a set back in 1900-1901, which was, however, more than made good during the succeeding year, the receipts from the sale of non-judicial stamps increased steadily throughout the triennium. There has been a corresponding steady increase in the total charges during the past three years, although the general result shows an increase in the annual net income. The total charges during 1901-1902 amounted to Rs 4,94,012, giving an increase of 2·2 and 16·6 per cent. over the figures

of 1900-1901 and 1899-1900, respectively. The increased expenditure was mainly due to the allowance of discount at more favourable rates to vendors on the sales of non-judicial stamps since the 1st April 1900.

* * * * *

A.—JUDICIAL STAMPS.

12. The sale proceeds of Court-fee stamps (excluding stamps for copies) fell from Rs. 1,25,11,391 in 1899-1900 to Rs. 1,23,44,307 in 1900-1901. In the subsequent year (1901-1902), however, they exceeded by Rs. 3,08,339 the receipts of 1900-1901. The increase is mainly attributed to greater activity in the Civil Courts and to the institution of suits of higher value in the Small Cause Court, in Calcutta. The enquiries held by revenue officers under section 19H (3) of the Court-fees Act, VII of 1870, as amended by Act XI of 1899, resulted in further realisations and doubtless have induced a more careful valuation by applicants for the grant of probates and letters of administration. There was an increase in the receipts from the sale of stamps for copies and of plain paper. The total receipts under the former head amounted to Rs. 7,57,815 against Rs. 6,91,462 in 1900-1901, and Rs. 6,89,119 in 1899-1900. Under the latter the total receipts amounted to Rs. 2,79,193, and compared with the receipts of the preceding two years, show an increase of Rs. 5,878 and Rs. 12,410, respectively.

B.—NON-JUDICIAL STAMPS.

13. Non-judicial stamps show an increase of revenue of Rs. 1,82,112 or 3·5 per cent. when compared with 1900-1901. The increase was shared by all classes of stamps except Foreign Bill, Share Transfer and Notarial stamps, and (to a trifling extent) one anna impressed stamps.

(*a*)—*Impressed Stamp paper.*

14. The revenue derived from the sale of impressed stamp paper (the most important item among non-judicial stamps) rose steadily during the past three years. The receipts during 1901-1902 amounted to Rs. 37,43,739 against Rs. 36,03,405 in the year 1900-1901. The increase is attributed partly to the enhanced stamp duty on perpetual leases under the new Stamp Act, and partly to the encouragement given to mufassal vendors by the more liberal rates of discount. The Commissioner of the Orissa Division specially draws attention to the increase since the conclusion of the settlement operations, in the number of sales and mortgages of occupancy rights, by which the stamp revenue has also profited.

(*b*)—*Hundi Stamps.*

15. The revenue derived from the sale of *hundi* or bill of exchange stamps showed a progressive increase during the past three years. The receipts during 1901-1902 were Rs. 1,32,540, and show an increase of Rs. 12,407 as compared with those of 1900-1901, and of Rs. 29,908 over those of 1899-1900. The largest increase occurred in Calcutta, and is attributed by the Collector of Calcutta to the institution of a number of criminal prosecutions in respect of unstamped *hundis* which had the result of enforcing a closer observance of the law.

(*c*)—*Impressed Labels.*

16. The receipts from the sale of impressed labels, which are used only in Calcutta, showed some recovery, but were still noticeably smaller than in 1899-1900. The receipts in that year were, however, abnormally large. Such increase as there was—amounting to Rs. 20,724 as compared with the receipts of 1900-1901—is attributed to the payment of stamp duty by the solicitors of the High Court on a few mortgages and conveyances of properties of large value.

(*d*)—*Adhesive Stamps*—(*1*)—*One-anna adhesive Revenue Stamps.*

17. The income from one-anna adhesive revenue stamps continues to show satisfactory results, and the revenue has improved steadily during the past

three years. The receipts during 1901-1902 amounted to Rs. 4,30,191 and show an increase of Rs. 16,727 or 4·0 per cent. as compared with 1900-1901, and of Rs. 45,082 or 11·7 per cent. as compared with 1899-1900. The increase is mainly attributed to the use under the new Stamp Act of these stamps on all cheques issued by local bodies and others, irrespective of their amount. In Calcutta, however, in which the increase was largest, the result is attributed chiefly to the stringent action taken by the authorities under section 62 of Act II of 1899 on the detection of unstamped receipts. It is probable that the provisions of the law in this respect are now well known and that the importance of a stamped receipt to the payer is now more fully recognised, but it is reported that Marwari traders in particular, persistently evade the law when this can be done with safety.

(2)—Foreign Bill Stamps.

18. These stamps are sold chiefly in Calcutta for bills of exchange, cheques, and promissory notes drawn or made out of British India and chargeable with a duty of more than one anna. The receipts from this source during the past year amounted to Rs. 48,593, showing a decrease of Rs. 1,407 as compared with the results of 1900-1901 and an increase of Rs. 7,431 as compared with those of 1899-1900. No special reasons for these fluctuations are alleged.

(3)—Advocate, Vakeel and Attorney Stamps.

19. These stamps are supplied from the office of the Superintendent of Stamps, on indents made by the Registrar of the High Court, Calcutta. The amount of revenue realised during the year 1901-1902 was Rs. 17,750, or the same as in the preceding year It shows an increase of Rs. 500 as compared with the revenue of the year 1899-1900.

(4)—Share-transfer Stamps.

20. Sales of these stamps, which are used for payment of stamp duty on transfers of the shares of public companies and associations, were effected in Calcutta, Jalpaiguri and Darjeeling. The revenue during 1901-1902 amounted to Rs. 33,057, which compared with Rs 39,534 and Rs 38,020, the receipts of the years 1900-1901 and 1899-1900, shows a decrease of Rs. 6,497 and Rs. 4,985 or 16·4 and 13·1 per cent., respectively. The depression in the tea industry is said to have led to fewer transactions in the share market.

(5)—Notarial Stamps.

21. These are one-rupee foreign bill stamps overprinted with the word "Notarial" under rule 15 (*d*) of the Rules issued with the notification of the Government of India No. 786S.R., dated the 17th February 1899. They were sold in 20 out of 46 districts during 1901-1902. The sales of the year amounted to Rs. 1,711 in comparison with Rs. 1,874 and Rs. 1,604, realised during the two previous years.

(6)—One-anna Impressed Stamps.

22. These stamps are impressed in the office of the Superintendent of Stamps on skeleton forms of cheques, receipts, drafts, &c., requiring a duty of one anna under the Indian Stamp Act, II of 1899, in accordance with rule 7 of the Rules issued with the Notification of the Government of India No. 786S.R., dated the 17th February 1899. The receipts of the year 1901-1902 from this source amounted to Rs. 83,032, against Rs. 83,045 and Rs. 77,339, the revenue of the years 1900-1901 and 1899-1900. Cheque forms of 10 different kinds issued by the Accountant-General, Bengal, for the use of Incorporated Local Funds, are impressed in the office of the Superintendent of Stamps with the one-anna stamp and issued to all treasuries in Bengal. This fact, taken with the increase in the number of skeleton forms impressed for private parties, necessitated the setting up of a fourth stamping machine, with an additional establishment.

ARRANGEMENTS FOR THE SALE OF STAMPS.

23. * * * * The total number of vendors employed in the sale of judicial and non-judicial stamps during the year 1901-1902, was 6,755 or an

increase as compared with the previous two years, of 97 and 530 persons, respectively. There were few complaints during the years under report of difficulty or inconvenience in procuring stamps, and the sales were, on the whole, properly conducted by the licensed vendors.

* * * * *

The expenditure during the past year exceeded that of the preceding year by Rs. 14,428, and that of the year 1899-1900 by Rs. 69,516. As compared with 1900-1901 there was a decrease of Rs. 1,425 in respect of plain paper, and an increase of Rs. 196 and Rs. 15,657 in respect of judicial and non-judicial stamps. As compared with 1899-1900 there was a decrease of Rs. 30,770 in respect of judicial stamps and an increase of Rs. 843 and Rs. 99,443 in respect of plain paper and non-judicial stamps. The decrease in respect of judicial stamps and the increase in respect of non-judicial stamps were directly due to the revised rates of discount sanctioned with effect from the 1st April 1900, in the Resolution of the Government of India, Department of Finance and Commerce, No. 5583S.R., dated the 8th December 1899.

The rates of Rs. 4-11 and Rs. 2-9-8 per cent. allowed under those orders on certain non-judicial stamps, were reduced in Calcutta to Rs. 3-2 per cent. and Re. 1-9 per cent. respectively, and Local Governments were authorised at their discretion to make the same reduction in the case of any town with a population of 50,000 inhabitants and over. The Government of Bengal, accordingly, in their letter No. 820T.F., dated the 19th June 1902, sanctioned the extension of the reduced rates to the towns of Patna, Gaya, Chapra, Darbhanga, Dacca, Bhagalpur, Monghyr and Cuttack, and to the Sadar Stations of Howrah and the 24-Parganas. The lower rates were also extended under the orders of the Government of India to portions of the suburbs adjacent to Calcutta and to the Sadar Station of Hooghly, in which, individually, the population fell short of 50,000 inhabitants.

* * * * *

PUNITIVE ACTION OF THE COURTS AND REVENUE OFFICERS.

25. * * The total number of cases dealt with by the Civil Courts during the last year of the triennium was 1,507 in comparison with 1,442 in 1900-1901 and 1,447 in 1899-1900. The increase in the number of cases was insignificant, but there was an advance of Rs. 6,874 in the duty and penalty realised by the Civil Courts in comparison with the realisations of the preceding year, and of Rs. 7,476 in comparison with those of 1899-1900. There was an increase of 370 in the number of cases decided and of Rs. 7,385 in the duty and penalty realised by Revenue Officers as compared with the figures of the preceding year, and an increase of 585 in the cases decided and of Rs. 7,527 in the duty and penalty realised, in comparison with those of 1899-1900. The increase in the number of cases may denote more careful examination of documents by Civil Courts and Revenue Officers, but possibly it was due also to ignorance on the part of the public of the changes made by the new Stamp Act.

26. * * The number of cases instituted was 567, in which 497 persons were brought to trial against 513 cases and 511 persons in the preceding year, and 660 cases and 691 persons in the year 1899-1900. The fines imposed amounted to Rs. 4,047, against Rs. 5,253-8 in 1900-1901 and Rs. 5,939 in 1899-1900, while the amount distributed in rewards was Rs. 2,647 as against Rs. 4,282 in 1900-1901 and Rs. 3,684-8 in 1899-1900.

WORKING OF SECTION 19H ADDED TO THE COURT-FEES ACT, VII OF 1870, BY ACT XI OF 1899.

27. * * The enquiries conducted in order to ascertain the correct valuation of estates have led to a steady increase of revenue in the shape of deficit duty realised. On the other hand, in some districts it has led to a perceptible increase of the work of the Collectorate. Penalties were very seldom levied and enquiries seem to have been made without unnecessary harassment of the parties. Of the cases reported during 1901-1902, 75·9 per cent. were enquired into; the corresponding percentages in the two preceding years were 73·6 and 69·5. The proportion borne by the deficit

duty realised to the amount originally paid was 8·8, 6·5, and 7·3, respectively, during the three years of the triennium.

* * * * *

GENERAL REMARKS AND MISCELLANEOUS.

* * * * *

32. *Reference to the High Court under section 60(1)*—Under section 60(2) of the Indian Stamp Act, II of 1899, upon a reference from the Munsif's Court at Sirajganj whether a person taking a loan of Rs. 20 should execute two bonds of Rs. 10 each or one bond of Rs. 20, the High Court held that there was no provision in the stamp law prohibiting a person from executing two bonds instead of one, if he chose; that the Government Rules contained no such provision, and that there was no evasion of stamp duty, as the two bonds had been executed on two pieces of stamped paper of the value of two annas each, and if one bond for Rs. 20 had been executed the stamp duty would have been 4 annas only. It was, however, explained that if the loan had been of a sum of Rs. 110, and the parties had executed bonds for Rs. 100, and Rs. 10, there would have been a loss to Government. The High Court held that if this were so, and if the Government desired to prevent it, a clear provision prohibiting the practice should be inserted in the Act. As such cases are of rare occurrence and the amount involved is usually petty, the Board decided to take no action at present.

33. *Reference to the High Court by the Presidency Magistrate, Calcutta.*—In May 1899, on a reference to the High Court, by the Chief Presidency Magistrate of Calcutta, under section 432 of the Criminal Procedure Code, in connection with a prosecution instituted by the Collector of Stamp Revenue, Calcutta, under sections 61 and 64 of the Indian Stamp Act, I of 1879, against certain Khetra Mohan Chowdhury, and others, an important point of law was decided involving the responsibility of the partners of a firm for the acts of their servants in refusing to give receipts for money paid to them on behalf of their masters. The case has been fully reported in the Indian Law Reports, Calcutta Series, Volume XXVII, page 324.

* * * * *

REPORT ON THE ADMINISTRATION OF THE INCOME-TAX IN BENGAL DURING THE THREE YEARS ENDING THE 31ST MARCH 1902.

NOTIFICATION—No. 1789T.—F.

The 27th September 1902.—The following extracts from the Report of the Board of Revenue on the administration of the Income-tax in Bengal during the three years ending 31st March 1902, are published for general information.

E. W. COLLIN,
Offg. Secy. to the Govt. of Bengal.

No. 971B., dated Calcutta, the 15th August 1902.

From—H. WHEELER, ESQ., Secretary to the Board of Revenue, L. P.,
To—The Secretary to the Government of Bengal, Financial Department.

INCOME-TAX.

THE HON'BLE MR. BOURDILLON, C.S.I.

I AM directed to submit the following report on the administration of the Income-tax in the Lower Provinces during the triennium ending on the 31st March 1902.

* * * *

Administration of the Income-tax.

2. There has been little change during the three years under review in the system under which the tax on incomes is collected. The law in force (Act II of 1886) has undergone no modification, and the alterations in administrative details have been few.

* * * *

Assessors and their establishments.

4. For the purpose of fixing the scale of the assessing establishment, districts are classified on the basis of their average annual final demand on account of the tax during the previous five years. In this respect the following districts were advanced to higher classes during the triennium under review:—

Burdwan, Murshidabad and Darjeeling from class II (above Rs. 50,000) to class I (above Rs. 60,000);
Rangpur and Faridpur from class III (above Rs 30,000) to class II (above Rs. 50,000);
Jalpaiguri and Manbhum from class IV (above Rs. 20,000) to class III (above Rs. 30,000); and
Puri from class V (below Rs. 20,000) to class IV (above Rs. 20,000).

No district was reduced to a lower class during the same period.

Revenue derived from Income-tax during the triennium.

5. The receipts, charges and net revenue derived from the collection of income-tax during each of the three years 1899-1900, 1900-1901, and 1901-1902 were as follows:—

	Receipts.	Charges.	Percentage of charges.	Net revenue.
	Rs.	Rs.	Rs.	Rs.
1901-1902 ...	56,56,735	2,13,398	3·8	54,43,337
1900-1901 ...	52,64,685	1,99,759	3·8	50,64,926
1899-1900 ...	52,21,051	2,02,322	3·9	50,18,729
Increase or decrease as compared with the figures for 1900-1901 ...	+3,92,050	+13,639	Nil	+3,78,411
Increase or decrease as compared with the figures for 1899-1900 ...	+4,35,684	+11,076	—·1	+4,24,608

It will be seen that in comparison with the results of the preceding year, the net revenue for the year 1901-1902 shows an increase of 7·5 per cent., as compared with an increase of ·9 per cent. in 1900-1901.

A comparison with the results obtained in the first year after the introduction of Act II of 1886 is not without interest. The corresponding figures for the year 1886-87 are shown below:—

	Receipts.	Charges.	Percentage of charges.	Net revenue.
	Rs.	Rs.	Rs.	Rs.
1886-87 ...	40,28,441	2,84,219	7·1	37,44,222

The charges incurred during the first year of the collection of the tax upon a new system were necessarily unusually heavy, but during the 16 years for which the tax in its present shape has now been in force, the receipts have increased by 40·4 per cent., and the charges have decreased by 24·9 per cent. The net revenue in consequence shows a rise of 45·4 per cent.

Demand on account of Income-tax.

6. The number of persons finally assessed to income-tax and the demand from them on this account during each year of the triennium, were as follows:—

Year.	Number of persons finally assessed in—			Final demand in—		
	Calcutta.	Other districts.	Total of columns 2 and 3.	Calcutta.	Other districts.	Total of columns 5 and 6.
1	2	3	4	5	6	7
				Rs.	Rs.	Rs.
1901-1902	27,802	96,254	124,056	26,48,668	24,77,347	51,26,015
1900-1901	26,234	93,236	119,470	23,52,665	23,86,235	47,38,890
1899-1900	25,473	91,247	116,720	23,40,773	23,16,376	46,57,149
Increase as compared with the figures of 1900-1901.	1,568	3,018	4,586	2,96,013	91,112	3,87,125
Increase as compared with the figures of 1899-1900.	2,329	5,007	7,336	3,07,895	1,60,971	4,68,866

In other words, the percentages of increase in the final numbers of assessees in the year 1901-1902 as compared with the two previous years, were 3·8 and 6·3 per cent. respectively; those in the final demand, 8·2 and 10·07 per cent.

* * * *

Incidence of the demand on population.

8. The following statement shows the proportion of persons assessed to the population and the villages in the Province, and the incidence of the tax during the triennium under report:—

Year.	Proportion of persons assessed to population.		Proportion of persons assessed to villages.		Number of persons in proportion to each rupee of tax assessed.	Remarks.
	Persons.	Population.	Persons.	Villages.		
1901-1902	1	600	61	100	14·5	
1900-1901	1	595	52	100	15	
1899-1900	1	610	51	100	15·3	

The population statistics for 1901-1902 are based on the census totals of 1901, and those for the previous years on the figures of the census of 1891. The late census shows an increase in the population and a decrease in the number of villages, and this will account, in the main, for the fluctuations noticeable. Reverting to the results of the year 1886-87, the proportion of persons assessed was then 1 in every 677 of the population, and the incidence of the tax was only Re. 1 to every 19 of the population. The proportionate number of assessees was then returned as 40 in every hundred villages.

9. The proportion of the tax paid in Calcutta in comparison with that paid in the rest of the Province is exhibited below:—

Rural and urban incidence of the tax.

Year	Amount of tax realised in—		
	Calcutta.	Rest of Province.	Total.
1	2	3	4
	Rs.	Rs.	Rs.
1886-87	17,05,885	16,78,796	33,84,681
*	*	*	*
1899-1900	22,42,807	22,94,435	45,37,242
1900-1901	22,35,105	23,50,538	45,85,643
1901-1902	24,94,945	24,*38,863	49,33,808

* * * *

It will be seen that during the last year under consideration Calcutta contributed 22·4 per cent. of the persons assessed, and 50·6 per cent. of the tax realised. The corresponding proportions in the year 1886-87 were 21·5 and 50·4 per cent.

* * * *

11. Except in some districts in which, for special causes, one or two assessments still remained to be made, the rule was generally observed that the assessment should be completed three months before the expiry of the year. The only noticeable exceptions were the districts of Dinajpur and Jalpaiguri and the town of Calcutta. In the two former the failure was due to bad work on the part of the assessors (one of whom has since died), though it should have been possible to have detected the delay in time to remedy the defect. As regards Calcutta, the Collector of Income-tax represents that the circumstances of the town render it impossible to comply with the instructions: assessees absent themselves at the time of enquiry and certain mercantile and trading firms will not submit their returns. These difficulties are not necessarily peculiar to Calcutta, though doubtless, owing to the large number of assessees, they are felt more acutely there, and efforts will be made during the current triennium to overcome them.

Assessment.

12. The number of persons originally assessed and that of the petitions or objections instituted before District Officers, Commissioners, and the Board, during the triennium, are shown in the following table:—

Objections to the demand.

Year.	Number of persons originally assessed.	Number of petitions or objections instituted before District Officers.	Number of petitions or objections instituted before Commissioners.	Number of petitions for revision of assessment filed before the Board.	Total of columns 3 to 5.
1	2	3	4	5	6
1901-1902 ...	126,064	12,114	452	10	12,576
1900-1901 ...	121,128	10,659	368	8	11,035
1899-1900 ...	118,452	10,855	395	10	11,260

The percentages of objections to assessments were, for the whole province, 10 in 1901-1902, 9·1 in 1900-1901, and 9·5 in 1899-1900. During the year 1901-1902 Cuttack shows the highest percentage (21·2), followed by Hazaribagh (20·3). During the same year the percentages were between 15 and 20 in the following districts, viz., Sonthal Parganas (18·6), Puri (18·2), Shahabad (17·7), Monghyr (16 8), Manbhum (16·8), Bhagalpur (15·9), Muzaffarpur (15·2), and

Gaya (15·05). The increase of objections is usually attributed to the addition of new assessees to the list of tax-payers. In many cases the petitions of objection were filed with a view to gain time for payment, and they were sometimes the outcome of the non-production of accounts at the time of assessment. A fair proportion of the objections came from the unrevised areas and were based on the ground that the assessees were dead or had given up their business.

13. The figures on the margin compare the number of persons exempted on revision and the amount of tax remitted by District Officers, Commissioners, and the Board, during the triennium under report.

Exemptions and result of revision.

Year.	No. of persons exempted.	Amount of tax remitted. Rs.
1901-1902	2,008	1,37,956
1900-1901	1,658	1,49,701
1899-1900	1,732	1,32,467

* * * *

14. The following statement compares the amount of the tax collected under each part of the Act during the last three year:—

Collection of Income-tax.

YEAR.	*Part I.*—Salaries pensions, annuities and gratuities.	*Part II*—Profits of companies.	*Part III.*—Interest on securities.	*Part IV.*—Other sources.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.
1901-1902	7,21,256	5,57,644	73,817	35,81,091	49,33,808
1900-1901	6,71,987	4,32,077	74,744	34,06,835	45,85,643
1899-1900	6,44,208	4,83,576	75,912	33,33,546	45,37,242
Increase or decrease as compared with the figures of 1900-1901 ...	+49,269	+1,25,567	— 927	+1,74,256	+3,48,165
Increase or decrease as compared with the figures of 1899-1900 ...	+77,048	+ 74,068	—2,095	+2,47,545	+3,96,566

The percentages of increase in the total collections on account of the tax, under all parts, for the year 1901-1902, over the collections of the two previous years, were 7·6 and 8·7, respectively.

The gross collections during the year 1901-1902, including arrears of tax, penalties, &c., amounted to Rs. 51,31,559, as compared with Rs. 47,42,594 in the year 1900-1901 and Rs. 47,05,544 in 1899-1900, showing an increase of Rs. 3,91,965 and Rs. 4,29,015, or 8·3 and 9 1 per cent., respectively.

The percentage of tax collected under each part on the total amount of tax collected during the year 1901-1902, was as follows:—

Part	*I.*—Salaries, &c.	14·6
,,	*II.*—Profits of companies	11 3
,,	*III.*—Interest on securities	1·5
,,	*IV.*—Other sources	72·6

The percentage of collections on the final demand on account of tax alone during the year 1901-1902 was 96·3, as compared with 96·8 and 97·4 in the two previous years, respectively. The percentage of collections on the final demand on account of tax, penalties, &c., both current and arrear, excluding advance payments and excess collections, was 93·5, as compared with 93·8 in the year 1900-1901 and with 95·2 in the year 1899-1900. The districts of Burdwan, Birbhum, Bankura, Dacca, Tippera, Noakhali, and Darbhanga succeeded in collecting the entire demand within the year. Burdwan, Dacca, and Noakhali also appeared in the previous two years' lists, and Bankura, Tippera, and Darbhanga in that of the previous year only. Murshidabad and Backergunge nearly succeeded in collecting the entire demand, the percentage of collections in each of these two districts being 99·9. The prescribed standard of 95 per cent. was not reached in Hazaribagh, Bhagalpur and Calcutta, where the percentages were 88·3, 92·3, and 94·2, respectively. In Hazaribagh and Bhagalpur the defect is attributed to delay in the disposal of objections with the result that after orders were passed the tax could not be realized within the current year. In Calcutta the deficiency was due to the fact that

assessments to the value of over a lakh and-a-quarter were made during the last three months of the year, and consequently could not be collected within it. The Board do not regard the explanations from these three districts as satisfactory, and trust that the fault noticed will not be allowed to recur.

Outstanding balances of Income-tax.

15. The outstanding balance on account of tax, penalties and costs for the year 1901-1902, as compared with the two previous years, is shown below:—

Year.	Balance on account of—			
	Tax.	Penalties.	Costs.	Total.
	Rs.	Rs.	Rs.	Rs.
1901-1902	2,46,366	29,839	8,387	2,84,592
1900-1901	2,18,482	28,866	8,199	2,55,547
1899-1900	1,74,390	25,300	6,945	2,06,635

The sum of Rs. 2,84,592 includes balances on account of the previous years also, viz., Rs. 33,274 for the year 1900-1901 and Rs. 36,244 for 1899-1900. The amount due on account of the latter year has since been remitted. The balance on account of the year 1901-1902 alone, outstanding at the close of the year, was Rs. 2,15,074, as compared with Rs. 1,73,054 and Rs. 1,37,490, on account of the two previous years, outstanding at the close of those years, respectively. Of the total balance of Rs. 2,84,592, Calcutta alone returns a balance amounting to Rs. 2,26,386, as compared with Rs. 1,98,670 in 1900-1901, and Rs. 1,68,607 in 1899-1900. This unsatisfactory result is attributed to the fact that 733 assessments under Parts II and IV, amounting to Rs. 1,25,699, were made during the last quarter of the year for reasons which have already been given in paragraph 11. The Collector represents that it was found impracticable, in spite of all endeavours, to complete the assessment work within the prescribed time. Of the total balance of Rs. 2,84,592, Rs. 75,640 are reported to be under realisation, the realisation of Rs. 1,44,262 is doubtful, and Rs. 64,690 are probably irrecoverable.

Coercive measures.

16. The following statement compares the demand, collection and balance on account of penalties, fines and costs for the last three years:—

Year.	Demand.		Collection.		Balance.		Remarks.
	Penalties and fines.	Costs.	Penalties and fines.	Costs.	Penalties and fines.	Costs.	
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
1901-1902	29,998	12,179	11,541	7,769	18,457	4,410	
1900-1901	29,287	13,239	13,303	9,416	15,984	3,823	
1899-1900	29,804	11,891	15,492	8,621	14,312	3,270	

The small collection of penalties during the year 1901-1902 is due to short collections in proportion to the amount imposed, made in Calcutta and the districts of Dinajpur, Patna, Gaya, Bhagalpur and Manbhum. Coercive measures are not taken till towards the end of the year, and it is inevitable that some portion of the demand on this account should fail to be realised within the year.

Expenditure.

17. The total expenditure during the year 1901-1902, including the cost of establishments in the Commissioners' and Board's offices and the remission allowed on the collection of tax by employers, amounted to Rs. 2,13,398, as compared with Rs. 1,99,759 in the year 1900-1901 and Rs. 2,02,322 in the year 1899-1900, showing an increase of Rs. 13,639 and Rs. 11,076, respectively.

REPORT ON THE ADMINISTRATION OF THE EXCISE DEPARTMENT IN THE LOWER PROVINCES, BENGAL, DURING THE YEAR 1901-1902.

NOTIFICATION—No. 1795T.—F.

The 1st October 1902.—The following extracts from a letter from the Board of Revenue, reviewing the administration of the Excise Department in the Lower Provinces of Bengal during the year 1901-1902, are published for general information.

E. W. COLLIN,
Offg. Secy. to the Govt. of Bengal.

No. 1013B., dated Calcutta, the 25th August 1902.

From—H. WHEELER, ESQ., Secretary to the Board of Revenue, L. P.,
To—The Secretary to the Government of Bengal, Financial Department.

Member in charge: THE HON'BLE MR. BOURDILLON, C.S.I.

I AM directed by the Board of Revenue to submit the annexed report received from the Commissioner of Excise, Bengal, on the administration of the Excise Department during the year 1901-1902.

* * * *

The Excise Revenue.

4. The net revenue showed an increase of approximately 3¾ lakhs of rupees over the figures of the preceding year and was the largest on record. Judging by the results of the new settlements, the receipts of the current year should, in their turn, surpass those of that which preceded it. Every head showed an increase during the year under review, except those of rum and beer, although the relative importance of the different sources of revenue has undergone no material change. It is noticed that the revenue in the Chota Nagpur Division, which under the unfavourable conditions of 1900-1901 had shown some contraction, has more than made up the ground lost, and the settlements of the current year are also very favourable.

Collections.

5. Collections maintained the same satisfactory standard (99·6 per cent. of the gross demand) as in the previous year. Attention was last year invited to the large sum of Rs. 22,000 reported to be irrecoverable on the year's demand. The total similarly reported this year is slightly larger—Rs. 23,500—but with the increased demand this is to some extent inevitable, and while the proportion of the revenue unrealised is as small at it is at present, no serious defect would appear to be indicated.

The current settlements.

6. The settlements for 1902-1903 show an increase of some 4½ lakhs of rupees over the results of the preceding year. Of this increase, Calcutta, where the previous triennial settlement had expired and where the new settlements showed a substantial improvement, furnished nearly 1¾ lakhs. Regarding the eleven districts which show a decrease, the explanations offered may generally be accepted as sufficient, with the exception of Cuttack (—Rs. 23,083) and Monghyr (—Rs. 9,822). With proper arrangements it should have been possible to counteract the combination among the *abkars* which is said to have had a prejudicial effect in the former district, and the Board are not aware of any such special deterioration in the material condition of the Monghyr district as would justify a decline of nearly Rs. 10,000. A further report will be called for from the Commissioner of Excise in both instances.

Country Spirit.

7. The only change during the year in the rate of still-head duty on distillery liquor was in the Arambagh subdivision of the district of Hooghly, where it was raised from Rs. 2 to Rs. 3 per gallon, L. P. The measure was a tentative one adopted at the instance of the Government, and it is noticeable that there was some decrease in consumption which is attributed to this cause. It is too early yet to judge of the wisdom of the step taken, and the future results will be carefully watched. Of the other districts in which the rates of duty

had been changed in the preceding year, it is observed that in Burdwan and Murshidabad where it had been reduced, the increased consumption of the previous year was maintained and a further small advance recorded. In Midnapore there was a noticeable decrease, but other causes seem to have operated. Both the districts of Faridpur and Backergunge in which the rate had been raised, show a small decrease in consumption, the latter in continuation of a similar result in the previous year. The competition of cheap imported liquor is alleged to have been the cause.

In respect of the offence of illicit distillation the district of the Sonthal Parganas stands first in the Province, and the noticeable increase in the number of persons arrested on this charge during the year (766 as against 271 during 1900-1901) formed the subject of special enquiry. The Board were of opinion that some excess of zeal had been shown in the institution of prosecutions, and that one main cause of the prevalence of illicit practices lay in the fact that the price of licit liquor was beyond the means of the ordinary consumer. The chief remedy proposed was a reduction in the license-fees on the shops which it was hoped would induce a corresponding decrease in the price of liquor, and this was accepted by Government. The opening of 15 new shops in the preceding year had scarcely had the effect anticipated, although the consumption of distillery liquor exhibited some increase, and a further addition of ten was sanctioned. Some further experiments in the issue of weak liquor were also directed. The effect of these changes remains to be seen.

The second area within which the offence of illicit distillation occasions constant trouble is the Burdwan Division. From the figures of persons arrested it would seem that there was some diminution in this particular breach of the law, but the numbers arrested for smuggling outstill liquor increased from 30 to 59. Both offences recur with frequency in certain well-known localities, and the deterrent effect of the punishments which can be inflicted under the present law would seem to be small. There was also a serious instance of resistance to the police, indicative of the obstructive attitude of the villagers generally. The decrease in the number of persons arrested for illicit distillation in the district of Bankura from 49 during the preceding year to 14 is very marked, and the Board would like to receive a clearer assurance that it was due to a genuine diminution of the offence. It is curious that, so far as the figures go, the law in this respect in the district of Birbhum would appear to be scrupulously observed.

Illicit distillation is common also in Angul and the Khondmals, where 36 persons were arrested on this account during the year.

The smuggling of liquor into Jalpaiguri from Bhutan and Cooch Behar continued, and in fact showed some increase: the appointment of a special preventive staff may have a good effect. Similarly, the smuggling into Darjeeling of liquor from Sikkim and Nepal would appear to be on the increase.

Country Rum.
